The City's Community Development Department provides important services to the public in the areas of construction safety, planning, housing, and land use. The department has four divisions: Planning, Building and Safety, Housing and Human Services, and Administration, as well as numerous boards and committees.

    - (2) All buildings not included in paragraph 1 above. For example, residential buildings over 3 stories, all office buildings, warehouses, factories and other manufacturing or processing facilities, restaurants, and other non-residential buildings, shall be assessed at the rate of twenty-eight dollars (\$28) per one hundred thousand dollars (\$100,000) of construction valuation, with appropriate fractions thereof.
    - (3) The fee shall be the amount assessed under paragraph (1) or (2), depending on building type, or fifty cents (\$0.50), whichever is greater.

The City may retain not more than 10 percent of the fees collected under this section for related administrative costs and for code enforcement education, including, but not limited to, certifications in the voluntary construction inspector certification program, and shall transmit the remainder of the funds to the California Building Standards Commission for deposit in the Building Standards Administration Special Revolving Fund established under Health & Safety Code Section 19831.7.

## DEEMED APPROVED REGULATORY FEE

Ordinance No. 6026 as set forth in Santa Barbara Municipal Code Title 28 and Ordinance No. 6027 as set forth in Title 30 of Santa Barbara Municipal Code were adopted in November 2021 to regulate alcoholic all off sale alcoholic beverage retail establishments in the community—both new and pre-existing. Off-sale consumption licenses are issued for businesses that sell alcohol for consumption off the premises, such as liquor stores and grocery stores and convenient marts. The legislative intent behind the ordinance is for the City to curb nuisance activities at sale alcohol outlets through operational requirements and enforcement. A fee has been imposed under the ordinance that is for the costs of administering the enforcement program. The fee is applied to all off-sale alcohol establishments that either have an existing status or obtained a CUP after the effective date of this ordinance.

The annual fee is \$971 per establishment

Declined Check Payment Fee - If a check payment is returned by the banking institution for insufficient funds, the following fees will be assessed:

## PHOTO AND FILM SHOOTS

The City of Santa Barbara offers one-stop photo and film/video permitting with Parks and Recreation as the lead department accepting applications, collecting fees, issuing the permits, and coordinating as many internal logistics among City departments such as Police, Fire, Public Works and Waterfront as possible for administrative convenience.

Fees for photo and film/video shoots include both permit and "facility use" fees. Permit fees apply to all photo and film/video shoots. If you plan to shoot in a City park, beach, Stearns Wharf or the Harbor, a facility use fee is charged, in addition to the permit fee. Fee rates depend on the location where photography or filming occurs. See the applicable Facility Use Fee charts below.

In situations where City personnel may be required to be present during the shoot, a fee for staff will be charged. See the Staff and Miscellaneous section below for further information.

Although specific uses may vary slightly within a designated category, the description is intended to provide a guide for categorizing shoots properly. The Parks and Recreation Director reserves the right to determine fees outside of the following chart for certain shoots, characterized by the unique or untypical location, scope, size or duration of the shoot, and/or impact to public parkland as a result of the use.

#### **GENERAL USE FEES**

\$50	Sporting special events/public special event applications
\$10	Photo/Film application

Security Deposit: A security deposit is charged to the following types of facility rentals and is normally refundable if everything is left in good condition and there is no damage to a facility and/or its equipment, no excessive cleaning is needed, and the terms and conditions of the rental contract were followed.

1) Indoor Facilities

Deposit amount varies by facility: \$300 - \$1,000

2) Outdoor Facilities

In most cases, deposit amount determined by group size:

1-25 people	\$ 50

126-200 people and Skofield Park overnight rentals	\$200
201-300 people and Oak Park Main Use with amplified music and Chase Palm Park Outdoor Rentals (not picnic sites)	\$300

3) Special Events

Special deposits or bonds may be charged for special events or groups exceeding 300 persons. If damages exceed the security deposit amount, renter is responsible for the additional damage.

The security deposit for special events open to the public is generally equal to the daily facility use fee but maybe higher if the event has not adhered to park terms and conditions from previous events, if site damage or extra cleaning had occurred, or if a particular element of the event or large vehicle use has a greater potential to cause damage to park or beach property.

Following are some examples of when a portion or the entire security deposit is withheld:

1. Damage occurs to a facility and/or its equipment that requires repair or replacement.
2. Extra cleaning is needed above the normal cleaning level in order to return the facility back to its original condition.
3. Rental use exceeds the rental span of time.
4. Rental use expanded beyond the designated rental space.
5. Terms and conditions of the rental contract were violated.
6. The Parks and Recreation Department's Code of Conduct was violated, affecting the enjoyment of an activity and/or putting participants and staff at risk.
7. Misrepresenting an event in the original application so appropriate requirements could not be set.

Cleaning Fee: \$150 - \$500 for indoor facilities. Fees vary by facility and are intended to cover full custodial cost related to use. Cleaning Fees for outdoor events will be based on venue and planned use of associated City facilities.

- 1) All events at Cabrillo Pavilion, Carousel House, Palm Park Beach House, Casa Las Palmas, Carrillo Recreation Center, MacKenzie Center, Ortega Welcome House, Louise Lowry Davis, Franklin and Westside Neighborhood Centers, and outdoor facilities at Chase Palm Park require a monitor for the entire duration of the rental.
- 2) For outdoor facilities other than #1 and rental is not open to the public, monitors are required for a one- hour period to check for the site's cleanliness, meet and greet the customer, and inspect the site at the end of the event.
- 3) For outdoor facilities other than #1 and rental is open to the public, a flat monitor fee will be charged as follows:
  - \$50 For events with estimated attendance of less than 299 people
  - \$100 For events with estimated attendance of 300-999 people

Tables/Chairs Fee: \$50 to \$125 is charged by indoor facilities for use of tables, chairs, audio- visual and other equipment. Fees vary by facility and are intended to cover full staff cost related to setting up/breaking down these amenities. Facilities with dance floors will charge an additional fee to set up this item.

Security Guard Fee: \$32 per hour for indoor facilities with alcohol served. Events at Cabrillo Pavilion, Carousel House, Palm Park Beach House, Casa Las Palmas, Carrillo Recreation Center, and outdoor facilities at Chase Palm Park have a security guard present during the last 5 hours of a rental. Various fees related to facility use are described within the Schedule of Fees and Charges.

**OUTDOOR RENTAL FACILITIES**

Categories:

The City of Santa Barbara provides the opportunity for public and private use of City parks and parkland. Uses such as picnics, wedding ceremonies and private gatherings, sporting events or large community special events are categorized and fees are determined by the size, scope and duration of the event (except for group picnic sites, which are based on the site's area capacity.) Following are the categories and fee levels describe in the Outdoor Rental Facilities fee table.

Picnics P1 to P4	Based on group picnic area capacity
Private Gatherings PG1 to PG4	Corporate or individual private events. Limited to 10 hours, with a fee for extra hours beyond 10.
Wedding Ceremonies W1 to W3	Ceremonies limited to 4 hours. Can include locations other than designated reservable areas.
Sporting Events SE1 to SE6	Runs, walks, sporting tournaments, etc.
Public Events PE1 to PE6	Any event open to the public

Set Up and Break Down Days:

For larger outdoor events with extensive set up including canopies, stage, etc., set up and break down days will be assessed at 50% of the daily reservation fee per day or any part of one day. Dumpsters and portable toilets are exempt from the break down day charge if they are removed by 9am the following day.

Utility Hook Ups for De La Guerra Plaza, MacKenzie Park, and Leadbetter Beach Events:

For De La Guerra Plaza and MacKenzie Park, gas, water, and electrical hook ups may be made available for large public events. The activation of these utilities can either be accomplished through a licensed general contractor (or a licensed plumbing and licensed electrical contractor), or the Parks and Recreation Department can facilitate the hook-up requests through the Public Works Department. If the former is chosen, the Public Works Department will charge fees to supervise and inspect the work before and after the activation and require that a permit be obtained from the Building and Safety Department. A deposit of up to \$1,000 is required to cover the estimated usage of the

utilities with the amount based on the number of utility boxes activated. Additional information on the fees and how to obtain the permit will be provided.

If the latter is chosen, approval is dependent upon Public Works' ability to schedule the necessary personnel to complete the required work for the event within the given timeframe. Requests must be submitted a minimum of four weeks in advance of the event. The base cost to activate/deactivate the various plumbing and electricity boxes is established by Public Works/Facilities Maintenance and a deposit is also required to cover the estimated usage of utilities.

For Leadbetter Beach, only water and electrical hook ups are available and the activation of these utilities is handled by park monitors, along with the reading of the water and/or electrical meters prior to and after the usage. Water usage is charged at \$10 per unit of water and electricity usage is charged at \$10 per kilowatt-hour. There is a \$10 minimum charge for these utilities. A deposit of up to \$100 is required to cover estimated utility usage.

**Vehicles in Park or Beach Areas Related to Permitted Events:**

The use of vehicles in parks and beaches is strictly controlled and restricted to authorized uses only. Unauthorized driving or parking of vehicles in park or beach areas related to permitted events will be cited and fined \$50 per vehicle.

### 3. Sewer Service Connections

A. The City has three methods for the installation or replacement of sewer lateral connections. The three options are outlined below.

1. Option 1: Standard Sewer Connection Installation/Replacement. This option and associated charges are only for the replacement of the lateral connection by the City contractor after the property owner's appropriately licensed/permitted contractor has excavated at the location of connection to the City main. The following charges cover the cost of the City's contractor to make the replacement of the fitting from the private lateral to the City sewer system and shall apply for each connection of a sewer lateral to the City sewer system, and shall be in addition to any applicable capacity charges:

Sewer Lateral Diameter	Sewer Main Diameter	Fee
4" or 6"	6" or 8"	\$1,045
	10" or greater	\$1,160
	6" or 8" (rehab)	\$990

Applicants for such connections shall coordinate with City staff in advance of the appointed installation time to determine required site preparations. If City staff determines that such preparation is not complete at the scheduled start time, a rescheduling fee of \$630 will be charged and the connection will be rescheduled upon payment of such fee.

2. Option 2: Complete Sewer Connection Installation/Replacement. This option and associated charges cover the complete cost of the new service connection installation or replacement, including all permits, coordination and project management, locating, excavation (up to 8 feet deep), and inspection services. The following charges shall be in addition to any applicable capacity charges:

Sewer Lateral Diameter	Sewer Main Diameter	Fee
4" or 6"	6" or 8"	\$5,190
	10" or greater	\$5,625
	6" or 8" (rehab)	\$5,380

For connections deeper than 8 feet deep, an additional \$620 per four feet of depth will be added to the sewer installation fee charge.

If in the course of the scheduled wye replacement, an additional service connection is encountered and the property owner elects to replace it at the time of excavation, the additional connection may be replaced for an additional \$525 per connection, regardless of the lateral or main size.

3. Option 3: Sewer Lateral Connection Rehabilitation: For lateral connections that

are in a condition eligible for rehabilitation and are on a lined sewer main, or are part of a proposed capital improvement project, a “trenchless” sewer lateral connection sealing device can be installed by the City’s contractor. The cost for installing a lateral connection sealing device, including coordination and project management by City Staff: \$1,800 per device.

- B. If a sewer main is damaged during installation or replacement of a lateral or during other similar work affecting City sewer lines, an additional fee equal to the greater of \$265 per lineal foot of sewer line needing repair or replacement, or \$403 per hour plus the cost of materials including fifteen percent markup, shall be charged to the person(s) who caused such damage.
- C. Sewer Lateral Connection Abandonments: This option and associated charges are only for the removal of the lateral connection by City contractor after the property owner’s appropriately licensed/permitted contractor has excavated at the location of connection to the City main. Cost for the City’s contractor to remove the lateral connection and replace it with a like piping of the City maintained sewer main \$990 per abandonment.

**4. Wastewater Discharge Other Than Through An Approved Sewer Connection.**

The following service charge shall apply to all discharges of wastewater permitted pursuant to Municipal Code Section 16.04.080 and 16.04.090: -

- A. \$13 per 100 gallons. Charges shall be assessed on the metered discharge or on the rated capacity of the tank discharging the wastewater if no meter is available.
- B. Every Person required to obtain a temporary discharge permit under Title 16.08.120 of the Santa Barbara Municipal Code shall be required to pay fees and charges as set forth below.

A permit fee is applicable for each temporary discharge permit application submitted. The fee includes application processing, site visit, verification of submitted information, permit processing, reports, and invoicing:

- 1. \$173 per permit.
- 2. \$108 additional fee will apply in the event of incomplete application/resubmittal, permit modification request, or if review from multiple departments is necessary.
- 3. In the event of any unplanned or emergency discharges that are not in compliance with its permit conditions, additional fees or charges may apply (See Section 5.A. Wastewater Miscellaneous Fees.)
- 4. Temporary Wastewater Discharge Permit Volume Charges:

Customer Class	FY 2023	FY 2024	FY 2025
----------------	---------	---------	---------

Commercial Class <sup>(1)</sup>	\$4.94/HCF	\$5.27/HCF	\$5.63/HCF
High Strength and Industrial Class <sup>(2)</sup>	\$6.24/HCF	\$6.65/HCF	\$7.08/HCF

(1) See Section 1.B. Sewer Service Rates for included businesses or activities. All Discharges must meet applicable Pretreatment Standards.

(2) See Section 1.C. Sewer Service Rates for included businesses or activities. All Discharges must meet applicable Pretreatment Standards.

## **5. Wastewater Miscellaneous Fees**

- A. The following service charges shall apply for services of City wastewater staff upon application of a property owner, contractor, or other applicant, or where such services are deemed necessary by City staff to prevent or mitigate damage to the City collection system or violation of regulations related to the collection system:
1. Hourly rate for a two-person crew with heavy duty equipment, including emergency response, containment, control and recovery, data input, and reporting related to a private sewer lateral overflow or a sanitary sewer overflow or blockage caused by a private party where that party can clearly be identified: \$399 per hour.
  2. Hourly rate for a two-person crew with light duty equipment to respond to priority sewer related requests that do not constitute an emergency response, including CCTV inspection, locating and dye testing services for a sewer main: \$273 per hour.
- B. Delinquency Fee: \$8.00 per account, per month, for any billing period in which a delinquent unpaid balance exists.
- C. Returned Payment Fee: See Delinquent Check Payment Fee under Finance Administrative Fees.
- D. Lateral Liner Inspection Fee: For applicants seeking to rehabilitate their private sewer laterals using cured in place pipe, or other lining technology, a \$174 fee will be assessed for the lateral installation inspection and pre- and post-video review by City staff. Applicants for such lateral liner installation shall coordinate with City staff in advance of the appointed installation time to determine required site preparations. If City staff determines that such preparation is not complete at the scheduled start time, a rescheduling fee of \$58 will be assessed and the installation will be rescheduled upon payment of such fee.

E. Sewer Lateral Video Review for Building Permits: When an applicant is required to complete a sewer lateral inspection video as a condition of a building permit, an \$87 fee will be assessed for each video reviewed by City staff.

**6. Effective Date.**

The rates and charges specified herein shall be effective on July 1, 2022, except that, with respect to wastewater rates that are based on metered use of water, the Fiscal Year 2023 wastewater rates specified herein shall commence upon the customer's first billing cycle where all water use occurs after June 30, 2022.

## WATER RATES AND FEES

Title 14.08 of the Santa Barbara Municipal Code authorizes the City Council to set fees for water meters and water service;

Section 14.12.010 of the Santa Barbara Municipal Code authorizes the City Council to set the rate for City water for private fire services when the use of a meter is not required; and

The City does currently and wishes to continue to have in effect a water rate structure that reflects an adequate supply of water and promotes the efficient use of such water by its customers.

### 1 Definitions

Wherever used in this resolution the following quoted words shall have the meanings set forth below:

- 1.1 "**Account holder**" means the person or entity responsible for payment for water service at a particular property, as shown in the City's water billing records.
- 1.2 "**Master Meter**" or "Auxiliary Master Meter" is defined in Santa Barbara Municipal Code 14.04.020
- 1.3 "**Base allotment**" means the average monthly consumption on record with the City for the most recent complete off-peak period calculated assuming the maximum days in a monthly billing cycle, or such other level of consumption determined by the Director to represent the average monthly off-peak water usage by a particular customer. An off-peak period for any given customer shall be a period comprised of the service periods charged on bills dated January through June.
- 1.4 "**Director**" means the Director of the Department of Public Works, or ~~his or her~~ their designated representative.
- 1.5 "**Dominant use**" means for any meter serving multiple uses, such as an existing meter serving both a residence and a commercial establishment, the use consuming the most water on average. In cases where a meter serves more than one type of use, the meter will be classified based on the dominant use for billing purposes.
- 1.6 "**HCF**" means one Hundred Cubic Feet.
- 1.7 "**Service**" or "water service" means water provided by or through the water distribution facilities of the City.

## 2.1 MONTHLY SERVICE CHARGES

A monthly service charge shall be collected for all connections, including City submeters, without regard to actual water use. Unless a master meter serves water directly to a dwelling unit without water passing through a City submeter, a monthly service charge shall not be collected for a City master meter. The monthly service charges shall be as follows:

Size of Water Service Connection	Rate (\$/meter/month) Effective July 1, 2021	Rate (\$/meter/month) Effective July 1, 2022	Rate (\$/meter/month) Effective July 1, 2023

## 2.3 USER CLASSIFICATIONS

For the purposes of assessing metered water charges provided for below, user classifications shall be determined and corrected by Staff, using the categories below. Any meter serving multiple uses shall be classified based on the dominant use.

### 2.3.1 Residential Single Family

Applicable to all meters serving one detached dwelling unit.

### 2.3.2 Multifamily 1-4 Units

Applicable to all meters serving two or more detached dwelling units, all meters serving 1, 2, 3, or 4 attached dwelling units, and all meters serving accessory dwelling units.

### 2.3.3 Multifamily Over 4 Units

Applicable to all meters serving five or more dwelling units, any of which are attached.

### 2.3.4 Commercial

Applicable, without regard to meter size, to all accounts serving mercantile buildings, motels, and other short term lodging establishments, office buildings, institutional buildings, schools, churches, and other commercial establishments. Also applicable to accounts solely serving common areas on multifamily or mixed use properties including but not limited to communal laundry rooms.

### 2.3.5 Industrial

Applicable to all meters serving laundries (other than self-service laundries), manufacturing facilities, and other industrial facilities.

### 2.3.6 Irrigation-Potable

Applicable to meters limited to outdoor water use and subclassified as provided in subsections 2.3.6.1 through 2.3.6.4 below. All meters under this classification shall be subject to interruption upon declaration of a Stage Three Drought Condition. There shall be no connection between a meter served under this classification and any dwelling or commercial or industrial structure.

The first tier of all irrigation accounts shall be calculated using the following formula: Monthly Water

$$\text{Budget} = (\text{ETo}) \cdot (.62/748) \cdot (\text{PF} \times \text{HA}) / \text{IE}$$

Where

ETo = Reference evapotranspiration (weather factor)

0.62/748 = Conversion factor (inches to HCF)

PF = Plant factor

HA = Square footage of irrigated area(s)

IE = Irrigation efficiency (80%)

The Monthly Water Budget shall be determined using real-time monthly ETo data from a local weather station, plant factors that relate plant type water use needs to the ETo, and irrigated area by plant type. Irrigation system efficiency is set at a constant value of 80% for all account types.

Monthly Water Budgets shall be based on irrigated area only. Accounts shall be subject to mandatory ground-truthing measurement at Staff discretion to verify measurement accuracy of irrigated areas and plant types. If ground-truthing measurements are not completed within two months after initial contact due to lack of customer response, service may be subject to suspension until irrigated landscaped areas are verified in the field.

#### 2.3.6.1 Irrigation-Agriculture

Applicable only to Potable Irrigation meters that serve bona fide commercial agricultural enterprises, including nurseries. A bona fide commercial agricultural enterprise is one that grows and sells one or

more type of agricultural or horticultural products, for the purpose of producing income from the sale of these products. The amount of water made available in the first tier of metered water usage under this sub-classification shall be based on the square footage of the commercial crop area that is planted and irrigated as part of the enterprise. As a condition of the right to receive Irrigation-Agriculture service, the Director may require an Account holder to submit to the Director any documentary or other evidence necessary to establish to a reasonable degree of certainty that the property served by the meter is being used to conduct a bona fide commercial agricultural enterprise as defined above. Such evidence may include tax returns, bills of sale, or similar documents.

PFc = 75%

HAc = total crop irrigated area (square feet)

If the crop is a tree species the crop irrigated area is the number of irrigated trees multiplied by the average tree area. The average tree area is the area of a circle with a diameter equal to the average diameter of the drip line of the relevant species. An alternate method to calculate the irrigated area may be used as approved by the Director.

#### 2.3.6.2 *Irrigation-Recreation*

Applicable only to Potable Irrigation meters that serve areas used primarily for passive or active recreational purposes, including parks, playgrounds, golf courses, school yards, and publicly owned open spaces and landscaped areas. The amount of water made available in the first tier of metered water usage under this sub-classification shall be based on the square footage of the irrigated area served by the meter.

HAt = total irrigated turf area (square feet)

Turf PFt = 80%

HAs = total irrigated shrub area (square feet)

Shrub PFs = 30%

#### 2.3.6.3 *Irrigation-Urban (Residential / Commercial):*

Applicable to Potable Irrigation meters serving properties that are primarily residential in use or are zoned for residential use or commercial, industrial, or institutional in use. The amount of water made available in the first tier of metered water usage under this subclassification shall be based on the square footage of the irrigated area served by the meter.

HAt = total irrigated turf area (square feet)

For Residential Irrigation, HAt cannot exceed 20% of total irrigated area. If measurements are greater than 20%, the remainder square footage will be assigned to the HAs.

PFt = turf plant factor = 80%.

HAs = total irrigated shrub area (square feet)

For Commercial Irrigation, 100% of total irrigated area is considered HAs, unless a permitted exception of Landscape Design Standards has been approved.

PFs = shrub plant factor = 30%.

Plant Factor percentage allotments reflect the requirements of the City's Landscape Design Standards for Water Conservation per SBMC 22.80.

#### 2.3.6.4 *Bird Refuge*

Upon finding that there are adequate water resources available to allow such use, the Director may also authorize the sale of up to a total of 21,780 HCF (50 acre feet) per year at the first block recreation rate for use in refilling the Andre Clark Bird Refuge.

#### 2.3.7 Recycled Water

Applicable to all meters providing recycled water

#### 2.3.8 State Institutional

Applicable to customers that are State agencies located in the unincorporated area of the County of Santa Barbara

## 2.4 METERED WATER CHARGES

In addition to all other charges imposed by Chapter 14.08 of the Santa Barbara Municipal Code, including but not limited to the monthly service charges set forth in subsection 2.1 above, water use shall be charged according to the following block rates for those user classifications defined in subsection 2.3 above. Usage shall be measured in units of 100 cubic feet (HCF).

The allocation of the City's six water sources to customer classes and tiers is based on priority level. Each tier is charged the weighted average cost of water based on the allocated sources. The highest priority customer tiers receive the least expensive sources of water, limited to that tier's percentage of each priorities' total demand times the water source (or remaining water source remaining from a higher priority).

1. Tier 1 Agriculture. The highest priority use is allocated to tier 1 agriculture (Ag) for efficient agricultural purposes.
2. Tier 1 Residential Single Family (SFR)/Tier 1 Residential Multi-family (MFR)/Tier 1 Recreation (Rec) for essential health and safety purposes and efficient irrigation of parks and public spaces.
3. Tier 1 Commercial/Industrial for efficient use of commercial and industrial purposes.
4. Tier 2 Residential SFR/MFR and Tier 1 irrigation for efficient irrigation needs for residential/commercial with dedicated irrigation meters.
5. Tier 2 Ag/Tier 2 Rec/Tier 3 Residential/Tier 2 Irrigation for residential and commercial dedicated irrigation meters/ Tier 2 Commercial or Industrial for inefficient use for agricultural, recreation, residential, commercial or industrial purposes

#### 3.1 FAILURE TO CONNECT TO RECYCLED WATER SYSTEM

Where the Director has determined that use of recycled water is feasible at and on a particular property and has notified the account holder for the meter serving such property of this fact as described in Section 14.23.030 of the Santa Barbara Municipal Code, and thereafter the user has failed to substitute recycled water use for potable water use, the charge for provision of potable water use shall be double the otherwise applicable charge for metered water.

#### 3.2 GRANTING OF ADJUSTMENTS TO EXTRAORDINARY WATER CHARGES

Upon an account holder's application that is 1) received within 45 days of a relevant billing date, 2) submitted on a form provided by the Finance Director, and 3) supported by detailed written documentation, the Finance Director, or a designee of the Finance Director, shall have the authority to make adjustments to extraordinary water charges in the event of hidden leaks, undetected line breaks, unexplained usage of at least five times the average use, or circumstances that are demonstrated to be beyond the reasonable control of the account holder. Such adjustments shall be made in accordance with written guidelines reviewed by the Water Commission and approved by the Finance Director and Public Works Director. However, such adjustments shall in no case result in a cost per HCF that is less than the lowest unit rate for residential customers located within the City limits. The decision of the Finance Director, or said designee, regarding any such adjustment shall be final and not subject to further appeal. Adjustments shall not be allowed for ordinary water use, such as filling of swimming pools, establishment of landscaping, or similar voluntary or customary uses of water. The Finance Director shall not approve an adjustment within five years of the date of a prior adjustment for the same account unless the Director rescinds the prior adjustment at the request of the account holder.

#### 3.3 WATER CONSUMPTION ESTIMATES

If an accurate meter reading is not obtained for any reason, including but not limited to, inability to access the meter and/or meter failure, the water consumption for the time period where the water meter read is not available may be estimated. If access is the issue, then estimation may only occur after two separate attempts within one reading cycle to gain access. If meter failure is the issue, then the water consumption will not be estimated for more than 90 days, unless plumbing on the customer side must be addressed prior to meter replacement or with mutual consent of the City and the customer.

City staff will utilize estimating functionality within the billing system to estimate use based on the six billing periods that most closely correspond to the time frame from the prior calendar year. The calculated daily average is multiplied by the number of days in the reading period where the meter read is not available to determine an estimated consumption for the reading period. Should there not be sufficient usage history on the customer's account, the last actual meter read will be used.

Once the water meter is repaired or replaced, if the customer's water consumption is found to be significantly lower than the estimated consumption calculation after three full months of meter reads on the new meter, the customer may request an evaluation of the estimated consumption calculation and consideration of a billing adjustment.

All water service connections must be installed per City standard details. If not, the customer shall be charged at a time and materials basis for the service to be brought up to City standards.

The Director may waive the fee for a service connection or main connection to the recycled water system upon a finding that such connection will promote the efficient and beneficial use of recycled water and will displace existing usage of the City's potable water supply. Fees related to water service connection to the City water system are as follows and are in addition to capacity charges established by the City Council in separate resolutions:

# WATER AND WASTEWATER CAPACITY CHARGES AND POLICIES

## 1. CAPACITY CHARGES

Except as provided herein, the following water and wastewater capacity charges shall be collected prior to the Public Works Director’s approval to: 1) make a new connection to the City water or wastewater system, 2) commence a discharge into the City wastewater system from a newly permitted dwelling unit, or 3) increase the size of an existing water meter. Such capacity charges shall be in addition to fees assessed under other resolutions for the labor, materials, equipment, and other City costs necessary to construct the actual connection to the water or wastewater system.

Water capacity charges for: 1) non-residential uses, 2) newly created single family residential units, or 3) a multi-family residential dwelling unit served by a meter larger than 5/8”, are as follows, per meter\*:

Non-Residential meter sizes as reflected in the chart above. The property may be subject to a site inspection by City staff to verify water use.

\*\*\* See Future Year Charge Calculation subheading, below

Capacity Charges for Multi-Family and Accessory Dwelling Unit Projects

Except as provided above, the water and wastewater capacity charges for newly permitted multi-family dwelling units and accessory dwelling units served by a separate and dedicated City water meter shall be calculated by multiplying the total number of newly proposed water supply Fixture Units times the applicable Fixture Unit cost as established in the tables below; provided, however, the wastewater capacity charge per dwelling unit for multi-family and accessory dwelling units shall not exceed the wastewater capacity charge for a 5/8" meter.

Fixture Unit Costs (\$/Fixture Unit)

Future Year Charge Calculation

Charges shall be escalated annually based on the change in the March Engineering News Record (ENR) Construction Cost Index (CCI) 20-City Average from the previous year. For example, if the March 2023 ENR CCI is 3% higher than the March 2022 ENR CCI, then capacity charges will increase by 3% in July 2023 (start of FY24).

**2. REGULATIONS REGARDING ASSESSMENT OF CAPACITY CHARGES**

The following regulations shall apply to the assessment of water and wastewater

capacity charges:

- A. The term “multi-family residential dwelling unit” as used herein shall mean any attached dwelling unit, including attached apartments, condominiums, and secondary dwelling units.
- B. Water and wastewater capacity charges shall not apply to:
  - 1. Water system connections for public fire hydrants, private fire hydrants, and private fire lines; and
  - 2. Common area meters to serve irrigation on multi-family residential properties.
- C. A wastewater capacity charge shall not apply to a water meter that is classified as “Irrigation” in the City billing system.
- D. Water and wastewater capacity charges shall not apply to a connection to the City’s recycled water distribution system to the extent that the connection offsets existing potable water capacity.
- E. In the case of an application for a water connection to serve a parcel where connections already exist, credit shall be given for existing connections such that the water capacity charges shall be based on the net increase in metered capacity. In the case of an application for a Wastewater connection to serve a parcel where connections already exist, capacity charges shall be based on the net increase in meter capacity for non-residential meters, or in the case of residential meters, the net increase in the number of dwelling units. The credit shall only be valid when the existing connections are abandoned within six months of the installation of new services.
- F. There shall be no capacity charge assessed for the installation of a meter to serve a legally existing residential dwelling unit that is already being legally served by another City water meter when such installation is done for the purpose of providing separate metering to such dwelling unit.
- G. There shall be no capacity charge assessed for the installation of a 5/8” irrigation meter to serve existing watered landscaping that is already being legally served by another City water meter when such installation is done for the purpose of providing separate metering of indoor uses and irrigation. Water use history for the property must show patterns of irrigation watering for at least two years. The property may be subject to a site inspection by City staff to verify the landscaping is existing and irrigated. Should a customer request an irrigation meter size larger than 5/8”, the capacity charge will be calculated at the applicable fee based on the meter size as provided in Section 1, less the applicable fee for a 5/8” meter. All other applicable fees, charges, and costs shall apply.
- H. A reduction in meter size may be approved by the Public Works Director in accordance with applicable resolutions; however, there shall be no refund of capacity charges upon such reduction.

- I. When a customer voluntarily downsizes a meter, the original meter capacity will be reserved for the service connection for 12 months. If, before 12 months has elapsed from the time of the smaller meter being installed, the customer requests the original meter size to be re-installed at the same service connection, no capacity charge shall apply. If more than 12 months has elapsed, the customer will be charged the difference in capacity charge between the meter size currently installed and the size of the meter to be installed.
  
- J. In cases where an applicant asserts that the water or wastewater capacity charge imposed under this Resolution exceeds the reasonable cost of providing the service for which the charge is imposed, or does not reasonably reflect the proportionate benefit of existing public facilities using the methods contained herein, an applicant may appeal the determination of the capacity charge to the Public Works Director, and may subsequently appeal the Public Works Director's Decision to the City Council, for determination of a different capacity charge. Appeals under this section, shall be made as follows:
  1. Prior to installation of water meters, the applicant shall submit a written notice of appeal to the Public Works Director. The notice of appeal shall set forth the grounds upon which the appeal is based, a proposed alternate capacity charge calculation, and all relevant issues, facts, information, and analysis necessary to substantiate the appeal.
  2. Within twenty-one (21) days of receiving the written notice of appeal, the Public Works Director shall provide a written decision on the appeal to the applicant.
  3. The Public Works Director shall have the authority to continue the determination on the appeal beyond twenty-one (21) days to request additional information from the applicant, and consider new issues and facts raised by the applicant.
  4. The applicant may appeal the decision of the Public Works Director to the City Council by filing a written notice of appeal with the City Clerk within ten (10) days of the date of the Public Works Director's Decision. The notice of appeal shall set forth in detail the grounds upon which the appeal is based and provide all supplemental documents upon which the applicant intends to reply. The City Clerk shall require payment of a fee for such appeal as is provided by resolution of the City Council for the matter.
  5. Prior to setting the appeal for hearing before the City Council, the Water Commission, at their soonest available meeting after the notice of appeal is filed with the City Clerk, shall consider the Public Works Director's decision on the appeal and shall make a recommendation to City Council on the appeal. No new information, documents or evidence shall be filed or considered by the Water Commission.

6. Within twenty-one (21) days of receiving the recommendation from the Water Commission, the City Clerk shall set a date for hearing on the appeal before the City Council.
  7. At the time and place of the hearing, the City Council shall hear and receive any relevant information and document regarding the appeal. The City Council may continue the hearing from time to time as may be required, or may grant or deny the appeal, in whole or in part.
  8. The decision of the City Council shall be final on the day of the decision.
- K. The Public Works Director is authorized to establish Administrative Guidelines to determine eligibility criteria to pay capacity charges previously established in lieu of capacity charges established herein for development projects that have achieved specific milestones in the development review process.

3. **REGULATIONS REGARDING RESERVED CAPACITY CHARGES FOR INACTIVE ACCOUNTS**

- A. As system capacity continues to be reserved for inactive accounts even when connections are not in use, accounts that have been inactive for more than 6 months shall be subject to reserved capacity charges before service can be reinstated. Charges shall be determined by the following formulas:

1. WATER

The current monthly service charge multiplied by the number of months that have passed since the expiration of the 6-month grace period.

2. WASTEWATER

For Residential Accounts: The current monthly basic charge per dwelling unit, multiplied by the number of dwelling units on the account, multiplied by the number of months that have passed since the expiration of the 6-month grace period

For Commercial Class 1-4 Accounts: The minimum monthly service charge based on meter size, multiplied by the number of months that have passed since the expiration of the 6-month grace period

3. The water monthly service charge and wastewater minimum monthly service charge shall be based on the meter size at the time of account termination.
4. If the above calculation exceeds the current capacity charge for the meter size in question, the charge is capped at the current capacity charge amount.

- B. Accounts that are inactive due to catastrophic circumstances, such as fire or

other natural disasters, may apply for a waiver of reserved capacity charges that have accrued within 5 years of the catastrophic circumstance, subject to approval by the Public Works Director. The Public Works Director may adopt an administrative policy for implementation of this section.
