SSI - Supplemental Security Income

State - State of California

TCAC - Tax Credit Allocation Committee

TCRC - Tri-Counties Regional Center

UCSB - University of California Santa Barbara

USDA - United States Department of Agriculture

Glossary

ADU: Accessory Dwelling Unit

An attached or detached residential dwelling that provides complete independent living facilities for one or more persons, including permanent provisions for living, sleeping, eating, cooking, and sanitation. An accessory dwelling is an accessory use to the permitted primary residential use and shall be located on the same parcel as the primary residential use.

AFFH: Affirmatively Furthering Fair Housing

Taking meaningful actions that, taken together, address significant disparities in housing needs and in access to opportunity, replacing segregated living patterns with truly integrated and balanced living patterns, transforming racially and ethnically concentrated areas of poverty into areas of opportunity, and fostering and maintaining compliance with civil rights and fair housing laws.

Affordable Housing

Housing is generally considered to be affordable to a household if less than 30% of a household's gross income is spent on housing costs (including rent, utilities, and mortgage interest). Federal, state, and local housing assistance programs establish categories of affordable housing, set maximum incomes for eligibility to live in deed restricted affordable housing, and maximum rents and housing costs that may be charged based on household size. See also AMI and Deed Restricted.

State of California Income Categories for Households:

- *Extremely Low Income*: 0 to 30 percent of Area Median Income (AMI)¹.
- *Very Low Income*: 30 to 50 percent of AMI.
- *Low Income*: 50 to 80 percent of AMI.
- *Moderate Income*: 80 to 120 percent of AMI.
- *Above Moderate Income*: More than 120 percent of AMI.

City of Santa Barbara Definitions (Inclusionary Housing Ordinance, Santa Barbara Municipal Code Title 30, Chapter 30.160):

- *Middle-Income*: 120 percent to 160 percent of AMI.
- *Upper-Middle Income*: 160 percent to 200 percent of AMI.
- *Workforce*: 30 percent to 160 percent AMI (Very Low Income to Middle Income) (for the purpose of this Housing Element and as stated in Goal 2)

The City's adopted Affordable Housing Policies and Procedures Manual (March 2021) provides additional details on qualifications for affordable housing.

¹ For Regional Housing Needs Assessment, this is included in the very low-income category.

AMI: Area Median Income

The most recent applicable county median family (typically for a household of four people) income published by California Tax Credit Allocation Committee (TCAC).

AUD: Average Unit-Size Density Incentive Program

A housing development program adopted by the City in 2013 to encourage the construction of new rental housing with increased densities (up to 63 units/acre) and other incentives.

City

City of Santa Barbara.

Coastal Zone

That land and water area of the City of Santa Barbara extending seaward to the State's outer limit of jurisdiction and extending inland to the boundary shown on the official Zoning Maps for the CZ Coastal Overlay Zone, as amended from time to time and adopted by the Coastal Commission.

CDBG: Community Development Block Grant

An annual entitlement received by the City from the U.S. Department of Housing and Urban Development (HUD) to be used for activities that benefit low and moderate income persons. Moneys are predominantly used for capital projects located in low-income neighborhoods. The grants also fund activities of social service agencies. See also HOME.

CUP: Conditional Use Permit

A discretionary permit that enables the City to consider, on an individual basis, specific land uses that might otherwise have undesirable effects upon an area and to approve such uses when conditions can be placed on them that would avoid those effects.

Deed Restricted

For the purpose of this Housing Element, deed restricted refers to housing subject to affordability restrictions or covenants. In the City of Santa Barbara, the developer/owner of deed restricted rental and ownership units must execute and record an "Affordability Covenant" for a term of ninety (90) years from the effective date of the covenant.

Density

For the purpose of this Housing Element, density means number of permanent dwelling units per acre.

Density Bonus

An increase in maximum allowable density for qualifying projects, in accordance with California Density Bonus Law (California Government Code Sections 65915-65918) or the City's Density Bonus Program (Santa Barbara Municipal Code Title 30, Chapter 30.145).

General Plan

The comprehensive General Plan of the City of Santa Barbara together with all Specific Plans adopted by the City Council. See also Specific Plan.

HOME: Home Investment Partnership Program

An annual entitlement received by the City from HUD for the development and rehabilitation of affordable rental and ownership housing for low- and moderate-income households. The City typically uses HOME funds to assist local housing and service providers to provide security deposit loans and tenant-based rental assistance.

Household

For the purpose of this Housing Element and the census data presented herein, a household includes all the people who occupy a housing unit. (People not living in households are classified as living in group quarters.)

HASB: Housing Authority of the City of Santa Barbara

A local public agency that provides affordable rental housing for low-income families, elderly, and disabled persons. It is an operating arm of the City and also a legally distinct public entity. The HASB provides housing and supportive services that is developed and owned and/or managed for eligible applicants and housing through rent subsidies. See also Housing Choice Voucher Program.

Housing Choice Voucher Program

A federal government program (formerly known as Section 8) for assisting very low-income families, the elderly, and the disabled to afford housing in the private market. Housing choice vouchers are administered locally by the Housing Authority of the City of Santa Barbara (HASB). A housing subsidy is paid to the landlord directly by the HASB on behalf of the participating family.

Housing Element Law

Laws first passed by the California State Legislature in 1969 and periodically amended mandating that housing be included as an element of each jurisdiction's general plan.

Landmark

A structure, site, cultural landscape or feature having historic, architectural, archeological, cultural, or aesthetic significance and designated by City Council as a Landmark under the provisions of Title 30.

Land Use Category

Any of the districts defined by Title 28 and Title 30 of the Santa Barbara, California Municipal Code, which are applied to portions of the City of Santa Barbara for the purpose of identifying areas of land suitable for particular land uses. See also Zoning District.

Low and Moderate Income Housing Asset Fund

Established to conduct the dissolution of operations related to housing assets and activities of former Redevelopment Agency (Housing Successor) of the City of Santa Barbara.

Multi-Unit Dwelling

A building or a portion of a building used and/or designed as a residence for two (2) or more families living independently of each other. Includes: duplexes, triplexes, and apartments; attached ownership units, such as planned developments, condominiums, and townhouses; and rooming and boarding houses (a residential structure where rooms are rented for short or long-term lodging where at least one meal daily is shared in common dining facilities, with 10 or fewer beds for rent).

Overlay Zone

Additional regulations superimposed on existing zoning in specified areas. Subsequent development must comply with the requirements of both the overlay zone and the base district.

Persons with Disabilities

Persons who have a medical, physical, or mental condition, disorder or disability as defined in [Government Code](#) § 12926 or the Americans With Disabilities Act, that limits one or more major life activities.

Planning Period

The time period between the due date for one housing element and the due date for the next housing element.

Quantified Objectives

State-required estimates of the number of units likely to be constructed, rehabilitated, or conserved/preserved by income level during the planning period.

Reasonable Accommodation/Modification

A change, exception, or adjustment to a rule, policy, practice, or service that may be necessary for a person with disabilities to have an equal opportunity to use and enjoy a dwelling, including public and common use spaces. The American with Disabilities Act often refers to these types of accommodations as “modifications”.

Under the Fair Housing Act, a reasonable modification is a structural change made to existing premises, occupied or to be occupied by a person with a disability, in order to afford such person full enjoyment of the premises.

RHNA: Regional Housing Needs Allocation

The Regional Housing Needs Allocation process establishes the total number of housing units that the City must plan for within the eight-year Housing Element planning period.

SBCAG: Santa Barbara County Association of Governments

A voluntary council of governments formed under a joint powers agreement executed by each of the general-purpose local governments. In Santa Barbara County, SBCAG is the designated regional planning agency and the metropolitan planning organization.

Single-Unit Dwelling

A building designed for and/or occupied exclusively by one household. Also includes attached ownership units using common wall development, airspace condominium ownership, and factory built housing.

Site

For the purpose of this Housing Element, site means a parcel or lot.

Special Needs Groups

For the purpose of this Housing Element, special needs groups are seniors, people with disabilities (including developmental disabilities), large families (households of five or more persons), female headed households, farmworkers, people experiencing homelessness, and students.

Specific Plan

A Specific Plan is a detailed policy and regulatory document that establishes zoning regulations tailored to the site, consistent with the General Plan. By law it is required to include:

- Land use regulations and development standards;
- A program of implementing measures;
- Planned and needed public works projects to serve the Specific Plan area; and
- Financing measures necessary to implement the Plan and its recommendations.

Suitable Sites Inventory

An inventory of land suitable for residential development prepared to compare the City's development capacity with its Regional Housing Needs Allocation. The inventory includes specific vacant sites and sites having the potential for redevelopment.

Structure of Merit

A historic resource designated by the Historic Landmarks Commission that deserves official recognition as having historic, architectural, archeological, cultural, or aesthetic value but does not rise to the level of Landmark status.

Use By Right

For the purpose of this Housing Element and suitable sites included in two or more consecutive housing element planning periods (i.e., nonvacant sites in the 5th cycle and vacant sites in the 5th and 4th cycle housing element), the phrase "use by right" applies to proposed housing projects on the aforementioned previously identified suitable sites when 20 percent or more of the units are affordable to very-low and low-income households. For these proposed projects, the City shall not require:

- A conditional use permit.
- A planned unit development permit.
- Other discretionary, local-government review or approval that would constitute a "project" as defined in §21100 of the Public Resources Code (California Environmental Quality Act "CEQA").

However, if the project requires a subdivision, it is subject to all laws, including CEQA. The "use by right" phrase does not preclude the City from imposing objective design review standards. However, the review and approval process must remain ministerial and the design review must not constitute a "project" as defined in CEQA.

Vacant Site

A vacant site is a site without any houses, offices, buildings, or other significant improvements on it. Improvements are generally defined as development of the land (such as a paved parking lot, or

income production improvements such as crops, high voltage power lines, oil-wells, etc.) or structures on a property that are permanent and add significantly to the value of the property.

Vacant Unit

A housing unit is vacant if no one is living in it at the time of the [U.S. Census Bureau] interview, unless its occupants are only temporarily absent. In addition, housing units where all the occupants have a usual residence elsewhere are grouped with vacant units.

Zoning District

A specifically delineated area of district in the city within which regulations and requirements uniformly govern the use, placement, spacing, and size of land and structures.

EXECUTIVE SUMMARY

The 2023-2031 Housing Element provides new goals and programs to guide the City over at least the next eight years to better address the gap between housing production and housing need in the community. The programs are informed by current housing conditions, demographic information, and the needs of our residents considering the lack of sufficient access to quality, affordable housing.

Since 1969, the State of California has required that cities and counties adequately plan to meet the housing needs of everyone in the community through preparing a Housing Element as one of the required elements of the General Plan. The City's first Housing Element was adopted in 1979 and has been updated periodically. Subsequent housing element laws require the City's Housing Element to be updated in coordination with Santa Barbara County Association of Governments (SBCAG) every other Regional Transportation Plan update (i.e., at least every eight years). Housing Element planning periods are referred to as "cycles". This Housing Element is for the 6th cycle planning period from February 2023 to February 2031.

The housing needs for the City are determined through the Regional Housing Need Allocation (RHNA) process. The California Department of Housing and Community Development (HCD) is responsible for determining regional housing need, segmented by income levels, for each the state's Councils of Government, including SBCAG which comprises the entire County of Santa Barbara. HCD determines projected household population in consultation with the California Department of Finance (DOF) and adjusts the regional allocation to account for housing vacancy rate, replacement units, overcrowding, and cost burden.

For the 6th cycle RHNA, SBCAG received a regional determination of 24,856 units, which is approximately 125 percent higher than the 5th cycle (2014 – 2022) determination of 11,030 units. This increase in the regional determination reflects the markedly different housing markets in 2021 compared with 2014 as well as the addition of new existing need considerations (overcrowding and cost burden) due to state legislation adopted in 2018 (Senate Bill 828, 2018). The City's 6th cycle RHNA allocation (8,001 units) is 95 percent higher than the 5th cycle (4,100 units).

In the 5th cycle, the total number of housing units that received a building permit up through calendar year 2022~~1~~ is ~~4,592~~ 1,832 units, or ~~45.39~~ percent of the total ~~5th cycle previous~~ RHNA allocation (Table 1). As with previous years, most permitted housing units are in the "Above Moderate" RHNA income category, meaning housing affordable to households making 120 percent or more of the County's Area Median Income (AMI). In 2022~~1~~, accessory dwelling units (ADUs) ~~were the most prevalent type of permitted housing project, accounted for just under half nearly two thirds of~~ permitted units that year.

TABLE 1: REGIONAL HOUSING NEEDS ALLOCATION STATUS (2015 - 2022†)

RHNA Income Category	2015 – 2022 RHNA	2015 – 2022†* Progress	Remaining Allocation	Percent Remaining
Very Low	962	120	842	87.5%
Low	701	115 2	586 9	84.0%
Moderate	820	124	804 46	98.59.5%
Above Moderate	1,617	1,577 356	36 264	2.516.1%
Total	4,100	1,824	2268	55.361.2%

*One more calendar year is left in the planning period

There are multiple reasons why affordable units are not being produced at the same level as market rate but lack of financing is one of the key factors. From 1977 to 2012, the largest source of City affordable housing financing was from the City's Redevelopment Agency (RDA). The state required each RDA to allocate at least 20 percent of annual tax increment revenue to create, protect, or rehabilitate affordable (very low, low, and moderate-income) housing. The state legislature dissolved all RDAs as of February 2012 and since then, no equivalent source of funding for affordable housing has been established. A program in this Housing Element is intended to at least partially replace this lost funding source.

The City government is not required to build the housing assigned through the RHNA process but it is responsible for ensuring that adequate land is zoned to accommodate the projected need and to adopt and implement programs that promote and facilitate housing at all income levels. The City must rely on infill redevelopment since there are very few vacant parcels. The City has the capacity to accommodate the RHNA units within the existing higher density residential and commercial zones that allow mixed-use development. The Sites Inventory and Analysis section demonstrates that the City has at least the capacity to meet the overall 6th cycle RHNA of 8,001 units with an additional buffer of approximately 1749 percent to ensure that sufficient capacity will be available to accommodate RHNA income categories throughout the eight-year planning period, as recommended by HCD.

The City's prior housing elements focused on removing regulatory barriers, incentivizing mixed-use development, supporting affordable housing programs, encouraging smaller units, and increasing residential density downtown. In particular, adoption of the Average Unit-Size Density Incentive (AUD) program in 2013 and new state laws to facilitate accessory dwelling units in 2017 and 2020 resulted in increased production of market rate (i.e., above moderate income level) units. While all these efforts resulted in increasing housing production overall, the number of new deed-restricted units affordable to households making less than 120 percent of AMI has not met demand and the City is falling behind on affordable housing production as the demand increases. In response, the focus of the 6th cycle Housing Element programs is to increase the production of deed-restricted affordable units including creating a permanent source of funding for these units and adopting further incentives to encourage inclusion of higher levels of deed-restricted affordable units in new multi-unit housing projects.

A notable addition in this 6th cycle Housing Element is the need to "affirmatively further fair housing" as a required objective for local housing elements statewide. The concept of furthering fair housing comes from the Federal Fair Housing Act. It means that the City must take actions to overcome historic patterns of segregation, promote fair housing choice, and foster inclusive communities that are free from discrimination. More information on this topic is available in Appendix B.

The City of Santa Barbara is committed to allowing as much housing as possible within resource limits to provide an array of lifestyle options for a demographically and economically diverse resident population. Promoting a diversity of housing types, increasing the feasibility of development of underused and infill sites throughout the City, and focusing new housing near transit and jobs are some of the strategies needed for the City to meet its housing commitment, reduce greenhouse gas emissions, and continue to affirm that housing is a basic human right for all residents. The Housing Element lays out the City's plan for removing barriers to housing production to counter well-documented housing shortages and helps ensure that the City is planning for its "fair share" of affordable and market rate housing. The Housing Element also continues and expands upon the City's efforts to preserve existing housing in the community.

HOUSING ELEMENT ORGANIZATION

The Housing Element includes five main sections and appendices listed below. The Housing Plan (Section 5) builds upon and revises the goals, policies, and programs of the 2015 - 2023 Housing Element to ensure that the City can meet the housing needs of all residents through 2031, when the plan is scheduled to be updated again as required by state law.

1 INTRODUCTION

Introduces the purpose of the Housing Element, context, related documents, and summary of public outreach and participation.

2 HOUSING NEEDS SUMMARY/COMMUNITY PROFILE

Describes Santa Barbara's demographics and existing housing related to the City's housing needs, including housing type and affordability.

3 HOUSING CONSTRAINTS

Identifies governmental, market, environmental, and other existing obstacles or challenges to increasing and maintaining housing in Santa Barbara.

4 HOUSING RESOURCES

Shows the Regional Housing Needs Allocation (RHNA), or the "fair share" of housing units the City must plan for at different affordability levels as required by law, describes the sites inventory and analysis, and summarizes financial and administrative resources for housing.

5 HOUSING PLAN

Lays out the goals and steps needed to meet the housing needs of current and future residents over the next eight years. Each of the eight goals listed below has associated policies and detailed programs to meet the goal.

- Goal 1: Create New Housing: Create new healthy, safe, and energy-efficient housing that meets community needs, within our resources.
- Goal 2: Prioritize Affordable Housing: Prioritize housing that is affordable to the workforce and vulnerable communities, by the use of deed restrictions and other measures, over other types of development, with special emphasis on housing that meets the needs of extremely low, very low, low, moderate, and middle income, and special needs households.

- Goal 3: Provide Housing Assistance: Provide financial resources and supportive services for members of the community who need housing assistance.
- Goal 4: Promote Housing Stability: Implement tenant protection measures, promote full-time occupancy of existing housing, and discourage conversion of housing to other uses.
- Goal 5: Preserve Housing: Maintain and improve the physical condition of existing housing at all affordability levels.
- Goal 6: Engage the Community: Educate and support the community about housing issues, affordable housing opportunities, and available resources and programs.
- Goal 7: Coordinate with Regional Partners: Coordinate with surrounding communities and regional agency partners to address regional housing issues, homelessness, and the jobs/housing balance.
- Goal 8: Fund Affordable Housing: Develop a permanent source of local funding to produce deed-restricted affordable housing.

APPENDICES

These are the more detailed, technical analyses and reports prepared to inform the goals, policies, and programs. It includes 1) a review of the 2015 Housing Element; 2) the Affirmatively Furthering Fair Housing assessment; 3) public outreach table; 4) accessory dwelling unit survey results; 5) housing stock survey results; 6) residential development standards; and 7) the suitable sites inventory.

PUBLIC OUTREACH AND OPPORTUNITIES TO COMMENT

Public outreach is an important part of any General Plan update and, state law requires “...a diligent effort to achieve public participation of all segments of the community in the development of the housing element, and the program shall describe this effort.” A discussion of the City’s robust public outreach and participation effort is included in the Introduction and a detailed list of public outreach meetings and other efforts is in Appendix C.

There are at least ~~four~~^{three} drafts planned for the 2023-2031 Housing Element: 1) Public Review Draft (released July 5, 2022); 2) HCD Review Draft (submitted August 19, 2022); 3) Revised HCD Review Draft (submitted April 2023); and 34) City Adoption Draft (date to be determined). Public comments are welcome and accepted on each draft. Prior to release of the Public Review Draft, the City received approximately 60 public comments on the Housing Element update. The Public Review Draft Housing Element was available for review from July 5 to August 3 and the City received approximately 67 written comments on the draft. The HCD Draft was available for review from August 19 to present and the City has received approximately 14 written comments to date. A strike through/underline version of each the Public Review draft and a matrix of responses to public comments is available online (see Table 2 below).

Per HCD, if an organization or individual plans to provide comments to HCD on the City’s Housing Element, early contact with the assigned review staff member (HCD Analyst) is encouraged to ensure that HCD is aware of this intent. To ensure that HCD has sufficient time to consider comments in the review of the Housing Element, written comments should be provided within the first 30 days of the review, directly to the assigned HCD Analyst or emailed to HousingElements@hcd.ca.gov.

For more information about the topics listed above, see Table 2.

1. INTRODUCTION

Housing Element Purpose and Context

The State of California has declared the availability of decent and suitable housing to be “a priority of the highest order”. This priority has become increasingly urgent in recent years as communities across the state, including Santa Barbara, struggle to meet the housing needs of all their residents. California Housing Element Law, established in 1969, recognizes the vital role local governments’ play in the supply and affordability of housing and requires all cities and counties in California establish a long-range plan to meet their fair share of regional housing needs. Cities are charged with planning for the welfare of their citizens, including ensuring that the existing and projected demands for housing are adequately met. The Housing Element is the primary tool used by the state to ensure local governments are appropriately planning for and accommodating enough housing across all income levels.

The Housing Element is a mandatory part of a jurisdiction’s General Plan but differs from other General Plan elements in two key aspects. The Housing Element must be updated every eight years for jurisdictions within a metropolitan planning organization (MPO) on a 4-year regional transportation plan (RTP) cycle, such as the Santa Barbara County Association of Governments (SBCAG). The Housing Element must also be reviewed and approved (i.e., certified) by the California Department of Housing and Community Development (HCD) to ensure compliance with statutory requirements.

This Housing Element covers the 2023 to 2031 planning period (referred to as the “6th cycle” in state planning law) and contains updated goals and strategic directions (policies and programs) that the City is committed to undertake to address housing needs. State law requires a review of the prior “5th cycle” 2015 to 2022 Housing Element’s effectiveness in obtaining goals and objectives, including progress in implementation, and appropriateness of goals, policies, and programs to determine if they should be changed or adjusted in the next cycle. This evaluation is found in Appendix A.

Multiple changes to California Housing Element Law have become effective since processing of the City’s 5th cycle Housing Element. In particular, the state increased its ability to enforce Housing Element requirements, and the ability for interested persons to challenge the City’s compliance with Housing Element Law. Pursuant to California Government Code § 65585, the state has a greater range of penalties that can be imposed on jurisdictions for noncompliance. This puts the City at risk of exposure to a variety of fiscal and regulatory impacts that could reduce local control over housing-related decision-making. Jurisdictions that do not comply also risk the state imposing a more frequent Housing Element update cycle. The 6th cycle Housing Element Update was prepared to comply with Housing Element Law, as amended, and all other federal, state, and local requirements as necessary to demonstrate compliance with state law and gain state certification.

Beginning 2019, all housing elements must include a program that promotes and affirmatively furthers fair housing opportunities throughout the community for all persons regardless of race, religion, sex, marital status, ancestry, national origin, color, familial status, or disability, and other characteristics protected by the California Fair Employment and Housing Act (FEHA), Government Code § 65008, and

any other state and federal fair housing and planning law. Under state law, affirmatively furthering fair housing means “taking meaningful actions, in addition to combatting discrimination, that overcome patterns of segregation and foster inclusive communities free from barriers that restrict access to opportunity based on protected characteristics.”

Additionally, all housing elements due on or after January 1, 2021, must contain an Assessment of Fair Housing (AFH) consistent with the core elements of the analysis required by the federal Affirmatively Furthering Fair Housing (AFFH) Final Rule of July 16, 2015. The housing element land inventory and identification of sites must be consistent with a jurisdiction’s duty to AFFH and the findings of its AFH. Appendix B includes the AFFH analysis. The City’s Analysis of Impediments to Fair Housing prepared by Root Policy Research in 2020 (the “City AI”) provided extensive data and policy recommendations that informed the AFFH analysis.

Relationship to Other General Plan Elements

State law mandates the adoption of a general plan (Government Code § 65300), which serves as the blueprint for how a particular city or county will develop. A general plan expresses the community’s development goals and embodies public policy relative to the distribution of future land uses, both public and private. Zoning ordinances, specific plans, development projects, capital improvements, and development agreements are required to conform to the general plan. Preparing, adopting, implementing, and maintaining the general plan serves to identify the community’s land use, circulation, environmental, economic, and social goals and policies as they relate to future growth and development. The City has a long-standing commitment to affordable housing and sound community planning. Protecting and enhancing the quality of life by “living within our resources” have been fundamental goals for Santa Barbara since adoption of the first General Plan in 1964.

A general plan consists of individual elements that address a specific area of concern, but collectively, they make up an integrated planning approach for the jurisdiction. State law requires that general plans include the following seven elements:

- Land Use
- Transportation
- Conservation
- Noise
- Open Space
- Safety
- Housing

A city or county may choose to have additional elements as part of their general plan. The City’s additional elements include Parks and Recreation, Economy and Fiscal Health, and Historic Resources.

In 2011, the City adopted the Plan Santa Barbara General Plan. This process resulted in a new General Plan Introductory Framework, a comprehensively updated Land Use Element, and a new set of goals and policies for the remaining elements. The 2011 General Plan update reorganized the

Elements, consistent with the Introductory Framework for Sustainability (and state law), and compiled six previous volumes into one document as follows:

TABLE 3: CITY GENERAL PLAN ELEMENTS

Element	Last Updated	Other Components
Land Use	2011	
Housing	2015	
Open Space, Parks, and Recreation	2011	1972 Open Space Element 1982 Parks and Recreation Element
Economy and Fiscal Health	2011	
Historic Resources	2012	
Environmental Resources (includes Conservation and Noise)	2011	1979 Conservation Element 1979 Noise Element
Circulation (Transportation)	2011	1997 Circulation Element
Safety	2013	

To meet the City's Regional Housing Needs Allocation (RHNA) of 8,001 new units over the next eight years and to affirmatively further fair housing, the Housing Element includes programs to amend adopted development standards and policies. As required by State law, elements of the General Plan should form an integrated, internally consistent plan, and inconsistencies cannot be remedied by a statement giving one element precedence over the others (Gov. Code § 65300.5; *Sierra Club v. Board of Supervisors of Kern County* (1981) 126 Cal.App.3d 698). Therefore, adoption of the Housing Element may require amendments to other General Plan elements to ensure internal consistency. In addition, the City will review for and confirm internal consistency as part of its annual General Plan Implementation Report required under Government Code § 65400.

Pursuant to State law, adoption of this Housing Element will trigger revision of the City's Safety Element. The Safety Element was last updated and adopted in 2013. Since that time, the State has established new requirements pertaining to safety element updates as follows:

- The safety element must be revised to identify new information on fire hazards, flood hazards, and climate adaptation and resiliency strategies applicable to the city or county that was not available during the previous revision of the safety element.
- The revision must occur upon each revision of the housing element or Local Hazard Mitigation Plan (LHMP), but not less than every eight years.

The Safety Element update is anticipated to commence once the 2023 Housing Element is certified. After City Council initiation of the General Plan amendment for the Housing Element and Safety Element updates in March 2022, the City also initiated formal notification to California Native American Tribes per state law.

Community Context

Affordable housing on the South Coast is currently provided by a combination of local government agencies and programs, private nonprofit housing developers, and federal government rental subsidies, and privately-owned housing that may be more affordable than typical market rate housing (e.g., mobile

homes, or accessory dwelling units provided free of rent or at a low cost to family members or caregivers). The City of Santa Barbara has provided, to developers and nonprofit sponsors, financial and/or land use incentives in exchange for long-term recorded affordability agreements ensuring that subsidized units will remain affordable for a specified number of years. Additional units are subsidized under the Housing Choice Voucher program (Section 8). In total, there are approximately 5,543 affordable and Housing Choice Voucher assisted units within the City.

The South Coast region housing market area extends from the City of Carpinteria and the Ventura County line to the City of Goleta, including the City of Santa Barbara and all the region's unincorporated communities. The County of Santa Barbara and the cities of Goleta, Carpinteria and Santa Barbara have regulatory authority over housing and job growth, as well as the provision of affordable housing. Although the South Coast is a single housing market, median single-unit housing ownership prices vary by city or region, ranging from \$1.2 million in Goleta to over \$2 million in the City of Santa Barbara (median listing price for April 2022, realtor.com). However, even in the few areas of the City or South Coast where lower median home values exist, the price is generally unaffordable to the vast majority of households. Every year, the City publishes data on active rental housing listings across the South Coast. As of April 2022, median rent for a 2-bedroom apartment was \$3,475 in Santa Barbara (up 28 percent from April 2021) and \$4,545 in Goleta (up 95 percent from April 2021). Median rent for a 2-bedroom house was \$4,500 in Santa Barbara (up 58 percent from April 2021). In April 2021, the median rent for a 2-bedroom house was \$2,995 in Goleta. There was no sample data for 2-bedroom houses in Goleta in the 2022 survey (City of Santa Barbara 2022 and 2021 Rent Surveys for the South Coast, June 2022 & May 2021). Santa Barbara exhibits the same trend as much of the state and nation: home and rent prices are up significantly and the supply of available homes and apartments is severely insufficient.

While the amount of new commercial development has been limited in the City since 1990 through the Nonresidential Growth Management Program, the region has not adopted similar control measures, nor managed to produce enough levels of affordable housing. Regional cooperation in addressing the jobs/housing balance issues that affect the South Coast region continue to be an important goal of this Housing Element. Policies and programs recognizing and promoting the City's commitment toward a coordinated regional effort in addressing the South Coast region's housing market are included in the Element.

Public Outreach and Participation

California law requires local governments to engage the public in developing the Housing Element. Specifically, Government Code § 65583(c)(7) states "that the local government shall make a diligent effort to achieve public participation of all economic segments of the community in the development of the housing element, and the program shall describe this effort." State law does not specify the means and methods for participation; however, it is generally recognized that the participation must be inclusive. Throughout the preparation of the 2023 – 2031 Housing Element, the City conducted numerous outreach efforts to engage all segments of the community.

Virtual Meetings, Online Outreach, and In-person Events

Learning from experience in public outreach during COVID-19, the City adapted public outreach to be a variety of virtual meetings, online outreach, live streaming video, and in-person events (Appendix C). One of the greatest challenges of community engagement, especially during COVID-19, is diversity and involvement from those not typically engaged in city planning efforts. This is especially true for marginalized and disadvantaged populations in our community. To achieve the greatest level of participation, the City:

- Ensured noticing of meetings and the website were bilingual for our residents who are not fluent in English and used guidelines from the California Web Accessibility standards for ADA compliance.
- Built an interested parties list by advertising on City newsletters and social media (Facebook, Nextdoor, Twitter, and LinkedIn) and leveraging our partnerships with housing advocates, neighborhood groups, and professional organizations, reaching over 38,000 residents.
- Educated and partnered with community groups on the importance of the Housing Element, including virtual and in-person meetings with over 40 nonprofit organizations who serve our residents, neighborhood groups, and faith-based organizations to increase engagement and build relationships.
- Leveraged new relationships with stakeholders, neighborhood groups, and faith-based organizations to use their digital communications channels to inform residents throughout the process (social media, electronic newsletters, and websites) to distribute information and events to their served communities.

The City also developed events and activities designed to allow the public to participate in a way that was easy, user-friendly, and accessible to everyone. Some of the key activities used throughout the process were:

- Developed a project website in both English and Spanish on informative materials, project progress, public outreach events, staff reports, draft documents, a live suitable sites GIS map, and other relevant links (<https://santabarbaraca.gov/heu>).
- Created educational videos in both English and Spanish on the Housing Element Process.
- Held a joint City Council and Planning Commission meeting to establish the Housing Element goals.
- Collaborated with the Cities of Goleta, Carpinteria, and the County of Santa Barbara on an in-person and live-streamed public workshop to review local housing element updates and regional housing issues².
- Conducted a community survey on the use of Accessory Dwelling Units.

² Over 140 people attended the in-person event and over 30 attended the live-stream

- Formed a Planning Commission Working Group to help guide the Housing Element's policies and programs.
- Presented the Public Review Draft Housing Element to the City Council and Planning Commission during the public comment period to gather feedback from decision-makers.

OutreachPublic Comments on the Draft Housing Element

The first public draft of the Housing Element was released in July 2022 for a 30-day public review period. The draft was available in hard copy at the Eastside and Central libraries and City Hall and posted on the project website. The Planning Commission held a public hearing to take input on the public draft on July 14 with 16 written public comments and nine speakers, followed by City Council on July 26, 2022, with 22 written public comments and 19 speakers. Public notice of the two public hearings, with information about how to access the Public Review Draft, and all related materials were advertised in the newspaper, and communicated via an e-bulletin to the interested parties' list of over 370 subscribers and to City News in Brief that reaches approximately 30,000 people.

The City received over 120 comments on the Draft Housing Element. Public comments were considered for a minimum of 10 business days after the close of the public comment period. City staff reviewed each public comment submitted during the outreach process to determine if changes should be made to incorporate them into the City's housing strategy. Where appropriate, feedback received was ~~and~~ incorporated into the August 2022 draft for submittal to the State of California Department of Housing and Community Development (HCD). Staff prepared responses to comments in three categories: 1) Anonymous Comments from the Online Workshop (April 15 – July 18, 2022); 2) Written Comments from Joint County and Cities Housing Element Workshop on June 22, 2022; and 3) Comments Received on the Draft Housing Element Prior to Release and During the Public Comment Period of July 5 – August 3, 2022. A "Global Responses" to public comments was prepared for questions or concerns that were included in multiple public comment letters. A strike through/underline version of the Public Review Draft, public comment letters, and the City's response to the comments were posted on the project website. Notification of the availability of the HCD Review Draft and responses to comments were sent to the interested parties list and published in the American Institute of Architects Newsletter.

Public outreach is ongoing over the course of the 6th Cycle Housing Element process. During the HCD 90-day review period and beyond, the City held five presentations and one radio interview about the Housing Element's policies and programs, with a specific focus on special needs of persons with disabilities, people experiencing homelessness, and lower income households. To date, an additional 14 comment letters were received. As described above, the City reviewed the comments, incorporated them as appropriate into the Revised Draft, and posted the responses.

2. HOUSING NEEDS SUMMARY/COMMUNITY PROFILE

This section provides information related to the City's demographic, household, and housing characteristics and an analysis of the community's housing needs. Many demographic factors affect the demand for housing and the type of housing needed or preferred. Factors such as age, presence of children, size of household, and income all contribute to housing needs.

This section uses data from the U.S. Census, California Department of Finance, California Employment Development Department, the Santa Barbara County Association of Governments (SBCAG) Housing Element Data Package (this package was provided to the County and each incorporated jurisdiction and mainly uses American Community Survey [ACS] 5-year estimates³ from 2015 – 2019), and other relevant sources. While every attempt was made to use the most recent or relevant data source available, the 2016 – 2020 ACS was not used due to the impact of the COVID-19 pandemic on data quality in 2020. There were fewer ACS interviews in 2020 and respondents had higher levels of education and income and were more likely to be married than respondents in prior years. As such, sources may differ among population characteristics and from those cited in the City's 2015 Housing Element.

Population Trends

Population Growth Trends

In 2010 the City's population was 88,410 and by January 2022⁴ the State Department of Finance (DOF) estimated the City's population to be 86,591 ~~93,055~~, representing a 2.5 percent ~~decrease~~ increase over that 12.1-year period. Table 4 illustrates how the City's population has changed over time. The largest population growth occurred between 2010 and 2016, with an increase in 4,467 people (5.1 percent), representing an average annual growth rate of 1.5 percent. However, in the years since 2016, the City's population rate of growth has been considerably slower, with occasional decreases in population.

³ The 5-year estimates from the ACS are "period" estimates that represent data collected over a period of time. Multi-year estimates provide an increased statistical reliability of data in less populated areas and for small population subgroups.

**TABLE 4: POPULATION GROWTH TRENDS (2010-2021)
CITY OF SANTA BARBARA**

Year	Population	Numerical Change	Percent Change	Average Annual Growth Rate
2010	88,410			
2011	88,877	467	0.5%	0.05%
2012	89,474	597	0.7%	0.07%

SBCAG, Regional Growth Forecast 2050 Santa Barbara County						

Projected Regional Population Growth

The Regional Growth Forecast (RGF) 2050 (Santa Barbara County Association of Governments 2018) forecasts demographic changes for the major economic and demographic regions and the eight incorporated cities of Santa Barbara County. The population forecast is based on projected job growth. The RGF estimates that from 2025 to 2050, population in the County will increase by approximately 43,100 persons (9 percent) to a total of 521,700. Significant population increases are projected in the North County (i.e., west and north of Gaviota, including Lompoc, Santa Maria, Santa Ynez, and Cuyama Valleys), while population increases in the South Coast region are expected to be substantially less. During the entire forecast period (2017 – 2050), the South Coast region is forecast to grow in population by about 15,850, or approximately 7 percent, while North County is expected to grow by about 52,410, or approximately 22 percent.

The City of Santa Barbara's population is projected to reach 102,000 by the year 2050. This represents a 4.8 percent total change or a 0.19 percent annual average increase from 2025 to 2050. For context, the 20-year annual average increase from 1990 to 2010 was approximately 0.17 percent. From 2010 to 2017, the population increased from 88,410 to 94,800 ~~92,663~~, a ~~7.23~~ 4.8 percent total increase (or a ~~1.03~~ 0.7 percent annual average increase).

According to ~~recent~~ the Department of Finance estimates (DOF), from 2018 to 2024~~2~~, the City's population ~~increased~~ actually decreased from 92,759 to ~~93,055~~ 86,591, a ~~0.32~~ 6.6 percent total ~~decrease~~ increase (or a ~~0.08~~ 1.3 percent annual average ~~decrease~~ increase). ~~Recent Department of Finance population estimates show a revised 2021 population total of 88,499 and an estimated 2022 population of 86,591, a decrease in population of 2.2 percent (California Department of Finance E-45 Population and Housing Estimates and Report E-1, Population Estimates).~~

Age Characteristics

Housing needs are influenced by the age characteristics of the population. Different age groups have different housing needs based on lifestyle, family types, income levels, and housing preference. For the purpose of this analysis, the age groups are generally defined as preschool (0-4), school age (5-19), college / early workers, young adults (20-24), prime workforce and child rearing years (25-54), mid-life / pre-retirement (55-64), and senior / retirees (65+ years of age).

Table 6 below illustrates how the City's age distribution from 2015 to 2019 compared to the County as a whole. This table shows that the City's population is older than the County's population as a whole, with a median age of 39 years compared to 33.8 years for the County. A population composed of older residents has implications regarding the type and size of future housing needs as well as for accessibility.

**TABLE 6: AGE DISTRIBUTION
CITY OF SANTA BARBARA VS. SANTA BARBARA COUNTY**

Age Group	City of Santa Barbara		Santa Barbara County	
	Number	Percentage	Number	Percentage
0-4 years	4,333	4.7%	28,159	6.3%
5-19 years	13,858	15.2%	92,555	20.8%
20-24 years	8,566	9.4%	49,023	11%
25-54 years	36,036	39.4%	158,345	35.6%
55-64 years	11,525	12.6%	50,184	11.3%
65+ years	17,058	18.7%	66,563	14.9%

2015-2019 ACS, Table DP05				

Employment Trends

City Residents Jobs by Industry

Information on jobs and employment gathered during the 2015 to 2019 ACS is keyed to where people live. Table 7 shows the distribution of employed City residents by industry compared to Santa Barbara County as a whole. The most notable differences between City and County employment as seen in this table are the lower proportion of City residents employed in agriculture and the higher proportion of City residents employed in professional occupations and the arts and entertainment.

**TABLE 7: EMPLOYMENT BY INDUSTRY
CITY OF SANTA BARBARA VS. SANTA BARBARA COUNTY**

Industry	City of Santa Barbara		Santa Barbara County	
	Number	Percentage	Number	Percentage
Agriculture, forestry, fishing and hunting, and mining	408	0.8%	19,435	9.1%
Construction	2,948	5.8%	12,302	5.8%
Manufacturing	2,931	5.7%	14,552	6.8%

Industry	City of Santa Barbara		Santa Barbara County	
	Number	Percentage	Number	Percentage
Retail trade	4,586	9.0%	20,456	9.6%
Educational services, and health care and social assistance	12,510	24.5%	49,462	23.2%
Arts, entertainment, and recreation, and accommodation and food services	7,789	15.3%	26,591	12.5%
Other services, except public administration	3,122	6.1%	11,823	5.5%
Public administration	1,447	2.8%	8,742	4.1%
Transportation and warehousing, and utilities	1,323	2.6%	6,484	3.0%

Professional, scientific, and management, and administrative and waste management services	9,167	17.9%	25,849	12.1%
Wholesale trade	760	1.5%	3,889	1.8%
Total Employed City Residents	51,075	100%	213,438	≈ 100%
2015-2019 ACS, Table DP03				

City Resident Jobs by Occupation

According to the 2015 to 2019 ACS, the majority (64.4 percent) of City residents are employed in white-collar occupations, including management, business, science, arts, sales, and office occupations. Compared to the County of Santa Barbara, City residents held white-collar jobs at a slightly higher rate during this period (Table 8).

**TABLE 8: RESIDENTS IN WORKFORCE BY OCCUPATION
CITY OF SANTA BARBARA VS. SANTA BARBARA COUNTY**

Occupation Category	City of Santa Barbara		Santa Barbara County	
	Number	Percentage	Number	Percentage
Management, business, science, and arts occupations	23,174	45.4%	76,726	35.9%
Service occupations	11,726	23.0%	45,491	21.3%
Sales and office occupations	9,719	19.0%	40,877	19.2%
Natural resources, construction, and maintenance occupations	3,362	6.6%	30,562	14.3%
Production, transportation, and material moving occupations	3,094	6.1%	19,782	9.3%
Total Employed City Residents	51,075	≈ 100%	213,438	100%
2015-2019 ACS, Table DP03				

Housing Stock Characteristics

Housing Conditions

The age and exterior condition of housing is one indicator of overall housing conditions. Approximately 87 percent of the housing stock in the City was built prior to 1990 (Table 9), which can raise housing maintenance issues. Housing units older than 30 years typically need some rehabilitation work to address issues with roofing, siding, and plumbing and electrical systems.

**TABLE 9: HOUSING UNIT AGE
CITY OF SANTA BARBARA**

Year Structure Built	City of Santa Barbara		Santa Barbara County	
	Estimate	Percentage	Estimate	Percentage
Built 2014 or later	241	0.6%	2,406	1.5%
Built 2010 to 2013	798	2.0%	3,078	2.0%
Built 2000 to 2009	1,682	4.2%	12,308	7.8%
Built 1990 to 1999	2,313	5.8%	15,497	9.9%
Built 1980 to 1989	4,189	10.5%	23,414	14.9%
Built 1970 to 1979	5,587	14.0%	29,155	18.6%
Built 1960 to 1969	6,665	16.7%	31,650	20.1%
Built 1950 to 1959	7,319	18.3%	20,148	12.8%
Built 1940 to 1949	2,829	7.1%	6,058	3.9%
Built 1939 or earlier	8,309	20.8%	13,447	8.6%
Total Housing Units	39,932	100%	159,317	100%
2015-2019 ACS, Table DP-4				

To further understand characteristics of the City's existing housing stock, City staff conducted visual surveys to estimate the number of substandard units. If existing housing units fall into substantial disrepair or become dilapidated, they risk being removed from the City's housing supply.

In April and May 2022, the City performed walking surveys of eight residential neighborhoods. These neighborhoods are a representative sample to provide for a general sense of the housing stock condition and were not intended to be a comprehensive City-wide survey. Housing units were surveyed from the street for the exterior condition of roofing, walls, windows, driveway, fencing, landscaping, and accumulated belongings in the yard. The condition of these elements was rated from one to three: one being "sound/good condition", two being "minor/moderate need of repair", and three being "substantial/major need of repair".

- Roofing was rated based on its need for patching or replacement of damaged roof shingles or tiles.
- Walls were rated based on their apparent structural integrity, paint condition, and noticeable damages, such as cracking. For instance, walls that received a score of one and were considered in "sound/good" condition had few to no cracks, minimal peeling, and appeared structurally sound. Walls that received a score of two and were considered in "minor/moderate need of repair" had noticeable cracking and peeling, but nothing

substantial. Walls that received a score of three and were considered in “substantial/major need of repair” had significant cracking, peeling, and damage covering more than 50 percent of the housing unit, or appeared structurally unsound.

- Windows were rated based on if they were broken, cracked, or boarded up.
- The driveway was rated based on the severity of cracking.
- Accumulated belongings in the yard was rated based on the presence of inoperable machinery or personal belongings that were kept in the yard.
- Fencing was rated based on sagging, missing slats, or visible rusting.
- Landscaping was rated based on if it appeared to be maintained.

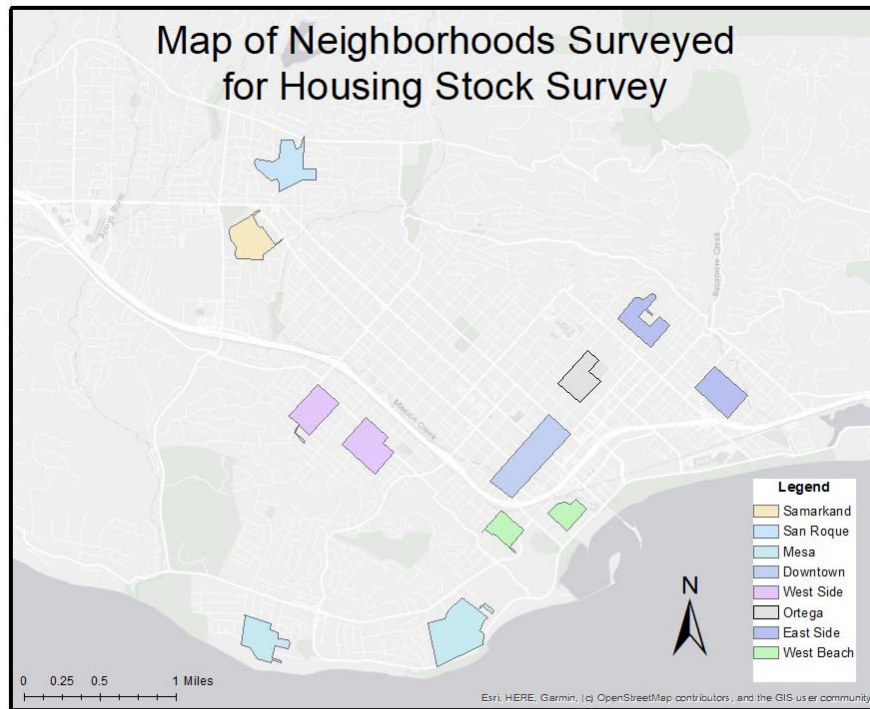

The ratings for each exterior condition were averaged and units were determined to be in “sound” to “dilapidated” condition.

The housing condition survey included a total of 1,584 housing units (Table 10). The majority of units were single-unit dwellings, followed by multi-unit complexes, and duplexes. Of the 1,584 units surveyed, 833 were found to be sound, 727 were found to be in minor need of repair, 22 were found to be in moderate need of repair, and two in substantial need of repair. None of the units surveyed were considered to be dilapidated.

TABLE 10: HOUSING CONDITIONS SURVEY
CITY OF SANTA BARBARA (2022)

Housing Type	Sound	Minor	Moderate	Substantial	Dilapidated	Total
Single-unit	690	557	17	2	0	1,266
Duplex	60	72	3	0	0	135
Multi-unit	83	98	2	0	0	183

Percentage	52.6%	45.9%	1.4%	0.1%	0.0%	
2022 City Housing Stock Condition Survey						

The eight surveyed neighborhoods include Laguna, Eastside, Westside, the Mesa, San Roque, Samarkand, Downtown, and West Beach (Figure 1). The Laguna area is a mixed residential neighborhood that transitions to denser multi-unit, institutional, and office uses closer to Santa Barbara Street and the Downtown. The Eastside neighborhood is mainly residential, with most of its commercial activity located along the Milpas Street corridor. The majority of the Eastside neighborhood is designated for medium density housing, but also contains single-unit homes in the northeast and

FIGURE 1: HOUSING STOCK NEIGHBORHOODS SURVEYED

southeast corners and medium-high density housing in the southern portion near Highway 101. The Westside neighborhood transitions from single unit to duplex to multi-unit housing as it moves west to east towards the City's urban center and Highway 101. The Mesa neighborhood is predominately single-unit housing with a commercial center dividing the Mesa into East Mesa and West Mesa. The San Roque and Samarkand neighborhoods primarily consist of single-unit housing and are located near the Upper State Street district. The Downtown area is dominated by commercial buildings and denser multi-unit housing. The West Beach neighborhood consists of dense multi-unit housing alongside motels and hotels.

Tenure and Vacancy Rates

According to ACS 2015-2019 estimates, the owner occupancy rate in the City of Santa Barbara is significantly lower than in Santa Barbara County. Approximately 40.7 percent of households own their homes in the City whereas approximately 52.1 percent of households own their homes in the County. This indicates that the City continues to be a prominent place for renter occupied households.

**TABLE 11: EXISTING HOUSEHOLDS BY TENURE
CITY OF SANTA BARBARA VS SANTA BARBARA COUNTY**

Existing Households by Tenure	City of Santa Barbara	Percentage	Santa Barbara County	Percentage
Owner Occupied	15,180	40.7%	75,945	52.1%

Renter Occupied	22,153	59.3%	69,911	47.9%
Total Households	37,333	100%	145,856	100%

2015 – 2019 ACS, Table B25003

Table 12 shows the housing type mix for the County and City in 2006 to 2010 compared to 2015 to 2019. In the City, while multi-unit housing types have been steadily increasing, the breakdown in unit type has been very consistent over the last 20 years (i.e., about 55 percent single-units, 15 percent 2-4 units, 29 percent five or more units, and one percent mobile home and other), reflecting the City's age and historic development patterns. The five-year ACS data presented in Table 10 is based on 60 months of collected data. The unit numbers do not necessarily match the housing unit data the City provides annually to the State Department of Housing and Community Development, which is based on number of housing permits issued.

**TABLE 12: HOUSING UNITS BY TYPE - CHANGE OVER TIME
CITY OF SANTA BARBARA VS. SANTA BARBARA COUNTY**

Housing Type	City of Santa Barbara			Santa Barbara County		
	2006-2010	2015-2019	Percent Change	2006-2010	2015-2019	Percent Change
One-unit, detached	18,185	18,984	4.4%	89,468	91,003	1.7%
One-unit, attached	3,437	2,843	-17.3%	10,154	10,641	4.8%
2 units	2,191	2,452	11.9%	5,080	4,946	-2.6%
3 or 4 units	3,254	3,143	-3.4%	9,859	9,575	-2.9%
5 to 9 units	3,493	3,803	8.9%	11,612	11,826	1.8%
10 to 19 units	3,488	3,287	-5.8%	8,942	8,951	0.1%
20 or more units	3,749	5,096	35.9%	9,467	13,271	40.2%
Mobile home	372	324	-12.9%	7,660	6,875	-10.2%
Boat, RV, van, etc. ⁴	22	0	-100.0%	139	73	-47.5%
Total Units	38,191	39,932	4.6%	152,381	157,161	3.1%

2006-2010 and 2015-2019 ACS, Table DP-4

⁴Staff has been unable to determine why boat, recreational vehicle, and van housing types were reported as decreasing from 22 in 2006 – 2010 to zero in 2015 – 2019.

The total number of housing units have increased in both the City and County over the two five-year spans (2006 to 2010 and 2015 to 2019). The total number of units increased by a slightly higher rate in the City than in the County (4.6 percent vs. 3.1 percent).

TABLE 13: OCCUPANCY STATUS
CITY OF SANTA BARBARA VS. SANTA BARBARA COUNTY

Housing Units	City of Santa Barbara			Santa Barbara County		
	2006-2010	2015-2019	Percent Change	2006-2010	2015-2019	Percent Change
Occupied	35,335	37,333	5.7%	141,793	145,856	2.9%
Vacant	2,856	2,599	-8.9%	10,588	11,305	6.8%
Total Units	38,191	39,932	4.6%	152,381	157,161	3.1%

2006-2010 and 2015-2019 ACS, Table B25002

The City and County have similar vacancy rates (6.5 percent and 7.2 percent, respectively from the 2015 to 2019 data) among existing housing units. Based on comparisons between the two five-year spans (2006 to 2010 and 2015 to 2019), both the City's and County's number of occupied housing units has increased (5.7 percent and 2.9 percent, respectively). While the City's number of vacant housing units has decreased (8.9 percent), the County's number of vacant housing units has increased (6.8 percent). For the purposes of this analysis, housing units may be deemed "vacant" for a variety of reasons, which are shown in in Table 12 and further discussed below.

TABLE 14: HOUSING STOCK BY TYPE OF VACANCY
CITY OF SANTA BARBARA VS. SANTA BARBARA COUNTY

Type of Vacancy	City of Santa Barbara			Santa Barbara County		
	2006-2010	2015-2019	Percent Change	2006-2010	2015-2019	Percent Change
For Rent	606	386	-36.3%	2,479	1,872	-24.5%
Rented, Not Occupied	546	218	-60.1%	1,290	797	-38.2%
For Sale Only	251	98	-60.9%	1,243	613	-50.7%
Sold, Not Occupied	60	66	10%	356	488	37.1%
For Seasonal, Recreational, or Occasional Use	975	1,067	9.4%	2,960	4,088	38.1%
For Migrant Workers	0	0	0%	4	208	5,100%
All Other Vacants	418	764	82.8%	2,256	3,239	43.8%
Total	2,856	2,599	-8.9%	10,588	11,305	6.8%

2006-2010 and 2015 – 2019 ACS, Table B25004

The ACS definitions of vacancy are as follows:

- For rent: “Vacant units offered for rent and vacant units listed for rent or for sale”.
- Rented, not occupied: “Vacant units that have been rented (i.e., compensation has been paid or agreed upon) but where the renter has not yet moved in”.
- For sale only: “Vacant units offered for sale only (i.e., does not include vacant units that are listed for sale or for rent)”.
- Sold, not occupied: “Vacant units that have been sold but where the new owner has not yet moved in”.
- For seasonal, recreational, or occasional use: “Vacant units used or intended for use part time or occasional use throughout the year. This includes units used seasonally or recreationally, such as second or non-primary housing units, and timeshares”.
- For migrant workers: Vacant units designated for migrant workers (not specifically defined by the ACS).
- All other vacants: “Vacant units that don’t fall into any of the categories above. This can include units held vacant for personal or family reasons, units requiring or undergoing repair, corporate housing, units held for use by a caretaker or janitor, units subject to legal proceedings, units being kept vacant for a future sale, etc.”

The reasons for housing stock vacancy in both the City and the County were relatively diverse. That being said, units for seasonal, recreational, or occasional use made up the highest percentage of vacant units in both the City and the County, although that type of vacancy made up a higher percentage of total vacant units in the City than in the County (approximately 41.1 percent vs. 36.2 percent from the 2015 to 2019 data). Over the two five years spans (2006 to 2010 and 2015 to 2019), both the City’s and County’s “For Rent”, “Rented, Not Occupied”, and “For Sale Only” vacancy types have decreased. The City’s and County’s “Sold, Not Occupied”, “For Seasonal, Recreational, or Occasional Use”, and “All Other Vacants” vacancy types have increased. The City’s “For Migrants Workers” vacancy type had no change, while the County’s increased significantly.

Household Characteristics

Household Growth Trends 1990-2019

Table 15 shows that between 1990 and 2000, the number of City households increased by 1,257, representing a slight annual increase of 0.4 percent. The 2010 Census reported a net loss of 156 households in the City between 2000 and 2010. The 2015 - 2019 ACS estimated the number of households in the City to be 37,333, an average annual increase of 0.97 percent since 2010.

TABLE 15: HOUSEHOLD GROWTH TRENDS (1990-2019)
CITY OF SANTA BARBARA

Year	Households	Numerical Change	Annual Percentage Change
1990	34,348		
2000	35,605	1,257	0.4%
2010	35,449	-156	-0.04%
2015 - 2019	37,333	1,884	0.6%
1990, 2000, 2010 Census, 2015 - 2019 Census ACS, Table B25003			

Housing Affordability

Housing Affordability Criteria

State law establishes six income categories for purposes of designated housing programs based on the area (i.e., county) median income (“AMI”).

- Acutely Low (15 percent or less of AMI)⁵
- Extremely Low (16-30 percent of AMI)
- Very Low (31-50 percent of AMI)
- Low (51-80 percent of AMI)
- Moderate (81-120 percent of AMI)
- Above Moderate (over 120 percent of AMI)

Acutely and extremely low-income households are subsets of the very low-income households as it relates to RHNA and are defined as 30 percent of AMI and below. In addition to these categories, the City has identified “Middle-Income” (121-160 percent AMI) and “Upper-Middle” (161-200 percent AMI) in recognition of the high housing costs in the South Coast area. These income categories are used in the Inclusionary Housing Ordinance for ownership units to meet the needs of these households, which are typically not met with traditional local or state density bonus programs of government tax incentives.

Housing affordability is based on the relationship between household income and housing expenses. According to the U.S. Department of Housing and Urban Development (HUD) and HCD, housing is considered “affordable” if the monthly payment is no more than 30 percent of a household’s gross income. In some areas, these income limits may be increased to adjust for high housing costs.

⁵ Per 2021 state law (AB 1043 [2021]). State Income Limits apply to designated programs and are used to determine applicant eligibility (based on the level of household income) and may be used to calculate affordable housing costs for applicable housing assistance programs.

Table 16 shows 2022 affordable rent levels and estimated affordable purchase prices for housing in Santa Barbara County by income category. Maximum purchase prices are more difficult to determine due to variations in mortgage interest rates and qualifying procedures, down payments, special tax assessments, homeowner association fees, property insurance rates, etc. With this caveat, the maximum home purchase prices by income category shown in Table 16 have been estimated based on typical conditions.

**TABLE 16: INCOME CATEGORIES AND AFFORDABLE HOUSING COSTS
SANTA BARBARA COUNTY**

2022 County Median Income = \$100,100	Income Limits	Affordable Rent¹	Affordable Price (estimated)¹
Acutely Low (15% and below)	\$15,015	\$375	-
Extremely Low (16-30%)	\$41,900	\$1,048	\$85,100
Very Low (31-50%)	\$69,850	\$1,746	\$221,600
Low (51-80%)	\$111,900	\$2,798	\$427,600
Moderate (81-120%)	\$120,120	\$3,003	\$467,700
Above Moderate (>120%)	>\$120,120	>\$3,003	>\$467,700
Revised April 2022 Based on a 4-person household ¹ Equal to 30% of gross income for rent or mortgage principle/interest/taxes/insurance (PITI)			

Extremely Low-Income Households

State housing law requires a quantification and analysis of existing and projected housing needs of extremely low-income (ELI) households as a subset of the very low-income group, defined as households with income 30 percent or less of Area Median Income (AMI). AMI, as established by HUD, corresponds to the income for a four-person household. According to the 2022 Income Limits published by the California Department of Housing and Community Development, a 4-person household with an annual income of \$41,900 or less is considered an extremely low-income household. ELI households have a variety of housing needs. Many families and individuals who receive public assistance, social security insurance, or disability insurance benefits are considered extremely low-income households. In addition, employed households earning 30 percent or less of the AMI are also considered ELI.

According to the HUD Comprehensive Housing Affordability Strategy (CHAS) data (2015~~4~~⁸ – 2019~~8~~⁸ ACS), the City had approximately 4,860 ~~395~~ ELI owner and renter households, representing approximately ~~13.4~~² percent of all households. Of these 4,860 ELI households, 1,065 (21.9 percent) are owner households and 3,795 (78.1 percent) are renter households. Approximately ~~75.7~~⁸ percent of ELI owners and ~~73.7~~⁴ percent of ELI renters were reported to be overpaying for housing (cost burden greater than 30 percent of household income). Furthermore, approximately 69 percent of ELI owners and 67 percent of ELI renters are severely cost burdened (cost burden greater than 50 percent of household income). Many ELI households also face other housing problems, such as overcrowded living conditions and/or living without complete kitchen or plumbing facilities.

EXISTING NEEDS

The City's 2020-2024 Consolidated Plan for allocating federal HUD formula grants includes an analysis of ELI household problems and needs. The Plan includes an assessment of ELI households that are experiencing one or more housing problems/severe housing problems, defined as:

1. Lacks complete kitchen facilities.
2. Lacks complete plumbing facilities.
3. More than one person per room/more than 1.5 persons per room (severe).
4. Cost burden greater than 30 percent/cost burden exceeds 50 percent (severe).

The analysis shows that 86 percent of ELI households have at least one of four housing problems, and 79 percent of all ELI households have a severe housing problem. The analysis also reviewed the need of any racial or ethnic group that has a disproportionately greater need in comparison to the needs of that category as a whole and found that for ELI households, no single racial/ethnic group experiences a disproportionately⁶ high rate of need relative to the City as a whole.

The major obstacles to meeting the needs of ELI households include the high and sustained demand for public services, as well as the lack of funding. During the last 12 years, the City's CDBG allocation has dropped by 26 percent and the HOME allocation by 33 percent. These cuts, along with the state's elimination of Redevelopment Agencies, with no subsequent replacement, are the main obstacles to meeting underserved needs.

PROJECTED NEEDS

To determine the projected housing needs for ELI households, the City assumed that 50 percent of the 2,147 very low-income RHNA units (1,073 units) are for ELI households. As discussed previously, ELI households typically experience overpayment, overcrowding, or substandard housing. In addition, some of these households may have physical and mental disabilities, which require special housing needs.

RESOURCES

To address the array of housing needs for ELI households, the City continues to fund and promote affordable housing opportunities for its special needs population. Financial assistance is provided via the Low and Moderate Income Housing Asset Fund (LMIHAF), which has expended a total of 47 percent of the fund for development of rental housing affordable to ELI households since 2016. In addition, the federal Community Development Block Grant (CDBG) and HOME Investment Partnerships Program formula grants allocated to the City are prioritized to the needs of the lowest income residents, based on the assumption that due to the extremely high cost of rental and ownership housing, they are at greatest risk of displacement, homelessness, or other serious housing situations. In Program Year 2021, 1,950 ELI persons were served by CDBG and HOME funds where information of income by family size is required to determine eligibility.

⁶ [According to HUD, disproportionate need occurs when a household category has a level of need that is at least 10 percentage points higher than the level of need of all households in a particular income category.](#)

According to the CDBG and HOME Annual Action Plan, the City helped prevent low-income individuals and families with children (especially those with incomes below 30 percent of median) from becoming homeless through continued support of programs such as the Rental Housing Mediation Program, Fair Housing Enforcement Program, Legal Aid, PATH, and Transition House, all of which have substantial programs to assist in homeless prevention. Transition House offers a homelessness prevention program to assist very low-income households increase their earning potential and improve their household finance management. The Housing Rehabilitation Loan Program rehabilitates substandard multi-family buildings and implements affordability controls. The Rental Housing Mediation program assists and/or mediates disputes between tenants and landlords to prevent the possibility of displacement/homelessness. The Fair Housing Enforcement Program investigates reported cases of housing discrimination and educates the public on housing rights and responsibilities. Legal Aid provides legal services regarding uninhabitable residences, evictions, and unlawful detainers. PATH coordinates with Cottage Hospital to receive homeless individuals who need respite beds.

In addition, the City contracted with SB ACT to establish a citywide collaboration between homeless service providers; elected representatives; community leaders; and advocacy groups, which is intended to prevent duplication of effort and better serve homeless individuals, families and persons at risk of homelessness. One of the workgroups facilitated by SB ACT is a homelessness-prevention workgroup.

Non-entitlement resources the City makes available to, or are received by the City's partners to meet ELI needs include:

- Housing Authority of the City of Santa Barbara:
 - Housing Choice Voucher (Section 8): 2,869 units/households, 75 percent serving ELI households.
 - Workforce Housing: 200 units/households, 60 percent serving ELI households.
 - Senior Housing: 630 units/households, 63 percent serving ELI households.
 - Supportive Housing: 189 units/households, 88 percent serving ELI households.
- Continuum of Care Funds: The City is a partner in the County's Continuum of Care.
- Low-Income Housing Tax Credits: The federal 4 percent and 9 percent tax credit is the principal source of funding for construction of affordable rental housing.
- General Fund: The City budget commits approximately \$700,000 in Human Services Grants annually from the General Fund for programs that provide basic human needs, such as food and shelter, and programs that are preventative in nature.
- Permanent Local Housing Allocation: The City commits state funds to support street outreach services to persons experiencing homelessness, and to support the Rental Housing Mediation Program.

Smaller units can be one strategy to meet the needs of single ELI households. In 2004, the state Building Code was amended to reduce the size requirement for single room occupancy (SRO) units to a minimum of 150 square feet to facilitate their construction. The City's Municipal Code allows small units, including 150 square feet ~~and~~ ADUs and Junior ADUs (maximum 500 square feet) that would function similar to SROs, and possibly ~~which could~~ meet the needs of some ELI households. To date,

units of that size are rarely proposed or included in housing projects. In addition, supportive and transitional housing is an important component of meeting the needs of ELI individuals. The City has established partnerships and working relationships with nonprofit developers, such as the Mental Health Association of Santa Barbara and the City Housing Authority to provide housing opportunities for ELI households. Further, Goals, policies, and programs intended to address the housing needs of all income levels, including ELI households, are included as part of this Housing Element. In addition to continuing the City's partnerships and existing support for the resources and programs listed above, consistent funding for affordable housing one of the greatest needs, which is reflected in Program HE-29 Affordable Housing Funding.

Housing Challenges

OVERCROWDING

The U.S. Census has no official definition of a crowded unit but considers an overcrowded unit as one occupied by 1.01 persons or more per room (excluding bathrooms and kitchens). Units with more than 1.5 persons per room are considered severely overcrowded. Overcrowding can serve as an indicator that a community does not have an adequate supply of affordable housing and/or lacks housing units of adequate size to meet the need of large households. Overcrowding can also result when high housing costs relative to income force too many individuals or families to share housing. Overcrowding can accelerate deterioration of the housing stock and associated infrastructure.

Table 17 indicates that approximately 8 percent of the City's occupied housing units were considered overcrowded. Overcrowding was more common among renters (12 percent) than for owners (1 percent). About 4.8 percent of renter households reported severe overcrowding.

**TABLE 17: OVERCROWDED HOUSEHOLDS BY TENURE
CITY OF SANTA BARBARA**

Housing Type	Owner		Renter		Total	
Person per room	Households	Percentage	Households	Percentage	Households	Percentage
1.00 or fewer	14,995	98.78%	19,393	87.55%	34,388	92.11%
1.01 to 1.50	135	0.90%	1,695	7.65%	1,830	4.90%
1.51 or more	50	0.32%	1,065	4.80%	1,115	2.99%
Total	15,180	100%	22,153	100%	37,333	100%
% Overcrowded by Tenure	185	1.20%	2760	12.45%	2945	7.88%
2015 - 2019 ACS, Table B25014						

According to the City's Analysis of Impediments to Fair Housing Choice⁷ (2020), many residents and stakeholders (i.e., organizations that provide housing and human services, fair housing enforcement and advocacy, services to residents with disabilities, residents in poverty, workforce development, and

⁷ The City, as a recipient of Community Development Block Grant funds, is required to complete an assessment of fair housing, known as an Analysis of Impediments, or AI.

transportation) who were engaged in interviews and focus groups described situations of extreme overcrowding in the City—stemming from the shortage of affordable, appropriately sized units. In many cases families are sharing a single room and individuals are renting what stakeholders described as “closets” for hundreds of dollars per month.

OVERPAYMENT

A household is considered to be overpaying for housing (or cost burdened) if it spends more than 30 percent of its gross income on housing. Severe housing cost burden occurs when a household pays more than 50 percent of its income on housing. The prevalence of overpayment varies significantly by income, tenure, household type, and household size. For lower-income renters, severe cost burden can require families to double up, resulting in overcrowding and related problems.

Renter Households Overpaying

The HUD Comprehensive Affordable Housing Strategy (CHAS) data source estimates the percentage of household income paid for rent by total household income. High rents in the City have the most significant negative effect on lower income households. As shown in Table 18, 50 percent of renter households are cost burdened and 26 percent of all renters have a severe cost burden. Among lower-income renters, overpayment was estimated to effect 77 percent of households.

This information is especially somber when one considers that the City estimates that 14 percent of the housing stock is publicly subsidized. According to the City’s Analysis of Impediments to Fair Housing Choice (2020), 70 percent of renters worry about their rent going up to a level they can’t afford and 70 percent want to buy a house but are unable to afford it. Renters are also concerned about landlord behavior: 31 percent said they worry if they request a repair their rent will go up or they will be evicted. Low income respondents (those with household incomes below \$25,000) are particularly concerned about costs (rising rents and struggles to pay rent/mortgage) as well as overcrowding (units not large enough for their family).

**TABLE 18: COST BURDEN BY TENURE AND INCOME CATEGORY
CITY OF SANTA BARBARA**

Category	Extremely Low	Very Low	Low	Moderate	Above Moderate	Totals	Total Lower Income Overpaying

HUD CHAS Dataset, 2014 – 2018 ACS							

Owner Households Overpaying

The picture is also troubling for many who live in owner-occupied housing in the City. Overall, about 32 percent of owner-occupied households are cost burdened and 17 percent of all owners have a severe cost burden. An estimated 63 percent of lower-income households are overpaying for housing ownership.

Coastal Zone Housing

State law requires jurisdictions within Coastal Zone boundaries to review coastal zone affordable housing obligations including the preservation of existing units affordable to low- and moderate-income households and, where feasible, to include low- and moderate-income housing in new development. The following information is provided per Government Code § 65588(d):

- Since January 1982, 234 new housing units have been approved for construction in the City's Coastal Zone, including 72 accessory dwelling units.
- 24 units for low- and moderate-income households were required to be provided as a result of projects approved either within the Coastal Zone or within three miles of it.
- 18 units were occupied by low- and moderate-income households and were authorized to be demolished or converted in the Coastal Zone since January 1, 1982.
- 1 unit for low- and moderate-income households was required either within the Coastal Zone or within three miles, in order to replace those being demolished or converted.

The City's Coastal Land Use Plan (LUP) allows increased densities for affordable housing proposals using density bonus, inclusionary housing, or lot area modification, as long as the development is found consistent with the policies of the Coastal LUP. Furthermore, the City's accessory dwelling unit ordinance was locally adopted and certified by the Coastal Commission for use in the Coastal Zone. Policies and programs to protect and provide affordable housing in the City (including the Coastal Zone) are provided in the Goals, Policies, and Programs section.

Assessment of “At Risk” Assisted Units

Section 65583(a)(9) of the Government Code requires that the Housing Element include an analysis of existing assisted housing at-risk of changing to non-low-income housing uses during the next 10 years and, if necessary, the development of programs to preserve or replace those assisted housing units.

At-Risk Affordable Rental Housing

Except for public housing and other Housing Authority units, the City does not own any affordable housing units. In return for the financial assistance the City provides, the developer/owners of the City’s affordable rental housing stock are required to make the units affordable to low-income households for a specified period of time. The City provides most of its financial assistance to local nonprofit organizations, since few for-profit firms have approached the City for assistance in building affordable housing. Regardless of whether they are for profit or nonprofit, all developer/owners of affordable housing units sign affordability covenants that specify allowable rent and income levels for the project.

Upon expiration of a project’s affordability controls, the affordable units are at risk of being sold or converted to market rate housing. Based on a review of the City’s records, the ~~45880~~ affordable rental housing units listed below in **Error! Reference source not found.** have affordability controls that will expire during the next 10 years (2023 through 2033).

City of Santa Barbara 2022 ¹ CDBG stands for the federal Community Development Block Grant Program; RDA stands for the City's Redevelopment Agency Housing Set-Aside funds; Zoning Mod does not stand for any source of funding, but rather for <u>lot area</u> modifications to the City's zoning code that were granted in return for dedication of affordable housing units.				

As indicated in the Assessment of Conversion Risk section below, nonprofit owners are considerably more likely than for-profit owners to maintain affordable housing units beyond the expiration of affordability controls. Only seven (4.4 8.8 percent) of the ~~458~~ 80 at-risk affordable rental units are owned by for-profit owners firms.

At-Risk Affordable Ownership Housing

The City also requires provides affordable ownership housing opportunities in certain cases, such as conversion of apartments to condominiums, for mostly moderate-income households. Most of the early ownership projects were developed by two nonprofit organizations, Homes for People and Santa Barbara Community Housing Corporation, with financial assistance from the City and its Redevelopment Agency. Covenants on units in these projects were typically 30-year covenants. Since then, affordability periods for ownership units were extended to 90 years. Should the owner sell before the 30-year term concluded, then the next owner would sign on for a new 90-year covenant.

Listed below in Table 20 are 19 ownership projects in which covenants for 119 individual affordable ownership units could expire during the next ten years (2023-2033); the covenants for the remaining 94 units in the 19 projects will not expire until later (since these units were sold to new qualifying homeowners before the end of their affordability period). It is possible that owners in some of the 119 units with expiring covenants may end up selling before the end of their affordability period, which would trigger an additional period of affordability up to a maximum of 90 years.

Most of the new affordable ownership housing projects are currently built by for-profit developers without financial assistance from the City or its Successor Housing Entity to the Redevelopment Agency, pursuant to the City's Inclusionary Housing Ordinance requirements (Title 30, Chapter 30.160) and Density Bonus incentives (Title 30, Chapter 30.145).

Affordable Rental Housing Projects with Expired Affordability Covenants

Table 21 below lists 10 2 projects with a total of 6 44 units where affordability covenants expired since the City's last Housing Element Update (from 2015 through 2022). In 2010, the City changed its policies to extend the affordability period for rental projects from 60 to 90 years.

City of Santa Barbara 2022		

Monitoring At-Risk Affordable Units

All affordable housing units are monitored throughout the affordability period established as part of their recorded affordability covenants. No later than 12 months prior to the expiration of an affordability covenant for rental properties, the property owner is contacted to discuss and identify ways to extend the affordability period. For ownership projects, the City sometimes offers rehabilitation funds in exchange for extended affordability covenants; however, the City cannot unilaterally extend ownership covenants. In the case of rental projects, the affordability term can be extended by refinancing the loan agreement. For example, in 2021, the City extended two affordability covenants by an additional 30 years each through loan subordinations. The City encourages the Housing Authority and other nonprofits to acquire units with affordability limits that are due to expire.

If the affordability period is not extended, notices are sent to tenants with information regarding the impending expiration of the affordability period. Tenants are made aware that rents could be raised and are provided information on rules established by State law regarding rent increases, noticing requirements, City rental mediation services, and other affordable housing providers in the area.

Estimated Replacement Costs

Because producing new housing in Santa Barbara is very expensive, it can be more cost-effective to protect existing covenant-controlled units than build new units. Rents for low-income units simply do not

support the conventional financing needed to acquire property and build affordable housing; therefore, deep subsidies are required. Land costs are high, even in areas with high concentrations of low-income households. Nevertheless, the City works closely with nonprofit developers to leverage additional funds and permit as many new units for lower income households as possible. As noted above, the City works with nonprofits to extend affordability covenants typically by renegotiating 30-year loan terms. In exchange for extending the loan term, the developer is required to extend the affordability covenant. Costs to the City of preserving units in this manner are difficult to quantify but they include loss of repayment on the loans, deferred interest, or forgiving interest payments.

If the at-risk affordable units were to be replaced by new affordable units, based on new construction figures for the next affordable housing project to be built in the City (29 units at Vera Cruz Village), the cost per unit is \$702,413. This amount includes land and building acquisition, construction “hard costs”, contractor and developer fees, and soft costs (i.e., architectural, engineering, financing, permit, and legal fees, etc.). In leveraging other funds, such as tax-exempt bond financing, conventional loans, and contributions from the developer, the City subsidy for affordable housing projects is relatively low. Using the total per unit development cost cited above (without subsidies), it would cost nearly \$139.95 million to replace the 277 199 at risk units with new units.

Assessment of Conversion

As enumerated in Table 20 and Table 21 above, there are ~~103~~ 103 affordable rental housing projects with ~~458~~ 80 at-risk units and 19 affordable ownership housing projects with 119 at-risk units. Affordable rental housing units under for-profit ownership are perceived as being at higher risk of conversion to market rate housing when affordability controls expire. Most of the at-risk affordable rental housing units (91.6 percent) are owned by nonprofit organizations.

The affordable rental housing units considered at the highest risk of conversion are the remaining seven units that are owned by for-profit firms. Fortunately, two of these seven units (28 percent) are in projects where either tenancy restrictions (such as senior housing) will continue for the life of the project, or the owner actively participates in the Housing Choice Voucher Program (or both).

The City has taken steps to extend the life of recorded covenants for affordable housing units. As mentioned above, the term for new affordability covenants is now 90 years. The City also works nearly exclusively with nonprofit firms for the creation of its affordable rental housing, which effectively extends the affordability period in perpetuity (or at least for as long as the nonprofit organization is in existence). The City relies mostly on for-profit firms to create the affordable ownership housing through density bonus incentives and inclusionary housing requirements. Covenant terms for ownership units were also extended to 90 years.

Qualified Entities and Resources to Preserve “At-Risk Units”

The resources needed to preserve at-risk units are typically either 1) funding to purchase existing units or develop replacement units; 2) nonprofits with the intent and ability to purchase and/or manage at-risk units; or 3) programs to provide replacement funding for potentially lost Housing Choice Voucher Program rent subsidies.

FINANCIAL RESOURCES FOR REPLACEMENT HOUSING

The City is proud of its affordable housing record. Since 1973, the City has provided approximately \$150 million in grants and loans for the production and preservation of about 4,316 affordable housing units. As detailed below, the City receives affordable housing funds from several sources. The remainder of the funds will be used to continue the City's strong commitment to providing affordable housing.

The City's Redevelopment Agency Housing Set-aside Funds

From 1977 to 2012, the largest source of City affordable housing financing was the City's Redevelopment Agency (RDA). As required under state redevelopment law, the RDA dedicated at least 20 percent of its "tax increment" income generated from its downtown redevelopment project area for affordable housing (for very low, low, and moderate-income households). Since the City's Redevelopment Agency began operating in 1977 until the state dissolved the RDA in 2012, the RDA provided \$66.1 million in loans and grants of redevelopment funds to approximately 70 affordable housing projects (rentals, ownership, and group/transitional housing) in the City. In June 2011, the California Legislature adopted Assembly Bill 1X26 (the "Dissolution Act") resulting in the dissolution of all redevelopment agencies in California as of February 1, 2012. The Bill included provisions for the City, in which the agency was located, to assume all right, title, and responsibility for the housing assets of the dissolved agency. In January 2012, the Santa Barbara City Council designated the City of Santa Barbara as the Successor Housing Entity to the Redevelopment Agency of the City of Santa Barbara and in November 2012, the City adopted Resolution No. 12-083 and assumed all right, title, and interest in all housing assets of the former Redevelopment Agency.

State law requires unencumbered Housing Asset Funds (HAF) to be used as previously required for monies in the Low and Moderate Income Housing Asset Fund established under the RDA (also known as "set-aside" funds). Subsequent amendments expanded the requirement to include specified types of services within permissible categories of homeless prevention and rapid rehousing.

Since dissolution of the RDA, the City has invested \$32.15 million of set-aside funds in 11 affordable housing projects intended to serve seniors/special needs/homeless populations with low, very low, and extremely low-income levels. Table 22 lists the affordable housing projects totaling 288 very low and low income units.

**TABLE 22: AFFORDABLE HOUSING PROJECTS USING SET-ASIDE FUNDS

City of Santa Barbara 2022					

Federal Home Investment Partnerships (HOME) Program Funds

The City is a Participating Jurisdiction under the HOME Program and has received funding since the inception of the program in 1992. Since 2018, annual allocations have remained relatively steady at approximately \$500,000. By law, HOME funds must be spent on producing or preserving housing or providing tenant-based rental assistance for low and very low-income households.

Federal Community Development Block Grant (CDBG) Funds

The City is a CDBG Entitlement Jurisdiction and receives an annual allotment of funds accordingly. Since 2018, this annual funding has also remained relatively steady at approximately \$900,000. The funds must benefit low and very low-income individuals. The City spends most of its CDBG entitlement funds on capital improvements and related social services. As mentioned above, CDBG program income (loan repayments) is used for rehabilitation of nonprofit rental projects.

Housing Choice Voucher Program

The Housing Choice Voucher Program (formerly called the Section 8 Program) is a valuable resource that provides housing for low income and special needs households and helps preserve some at-risk units with long term contracts. Both nonprofit organizations and for-profit firms/owners participate in this program, which is operated by the Housing Authority of Santa Barbara. Under this program, federal funds are used to help low income households pay rent for both affordable and market rate housing. There are two housing options, each with their own waiting list: tenant-based vouchers and project-based vouchers. Tenant based vouchers allow assisted households to use a voucher at open rental market units. Project-based vouchers offer rental housing options at specific locations. Property owners receive direct payments equal to the difference between the market rent and the tenant's contribution to the rent (30 percent of household income). There are currently 2,536 Housing Choice Vouchers used in the City (R. Fredericks, City of Santa Barbara Housing Authority, June 2022).

The Housing Authority has an ongoing relationship with the Santa Barbara Rental Property Owners Association whereby they provide free advertisement on the program for landlord outreach on their

website and in their monthly magazine. Additionally, the Housing Authority was selected by HUD to be in their innovative Move-To-Work Program under the Landlord Incentives Co-hort. The Housing Authority provides the following incentives to landlords to take advantage of the Housing Choice Voucher Program:

- \$1,000 for new landlords (who haven't participated in last 5 years or a new property);
- \$2,000 mitigation fund for unpaid rent or damages;
- Up to 10.5 days vacancy payment (between consecutive Section 8 tenancies); and
- Security deposit loan program.

Special Housing Needs

California Government Code § 65583(a), requires an assessment of housing needs and an inventory of resources and constraints relevant to the meeting of these needs. Per § 65583(a)(7), this section analyzes the needs of seniors, people with disabilities (including developmental disabilities), large families, families with female heads of households, students, farmworkers, and families and persons in need of emergency shelter in the City. These specific groups typically encounter more difficulty in finding decent, affordable housing due to special circumstances. Special needs may be related to one's employment type and income, family characteristics, medical condition or disability, or household characteristics.

These households may require special accommodations, such as on-site supportive services, unique building design, or spatial accommodations. Special considerations should be taken to ensure adequate housing for seniors, single parent households, people with disabilities, people living below the poverty line, students, and people experiencing homelessness. Furthermore, many of these groups overlap. For instance, many seniors live with a disability, and many single mothers are homeless. Generally, these groups would be assisted by an increase in affordable housing, especially housing located near public transportation and services.

Consolidated Action Plan

The City of Santa Barbara prepared a 2020–2024 Consolidated Plan and 2020 Annual Action Plan (Consolidated Action Plan) to comply with HUD's federal block grant funding requirements. The Consolidated Action Plan identifies overall housing and community development needs for the City. In addition to the data used in this section, the Consolidated Action Plan was used to determine housing needs and goals.

Seniors

The number of elderly persons as a percentage of total U.S. population is expected to continue to increase over the coming decades due to the aging "Baby Boom" generation, lower birth rates in recent years, and longer life expectancies. In 2019, the national population aged 65 or older numbered 54.1 million, or 16 percent of total population. The number of older Americans has increased by 14.4 million (or 36 percent) since 2009, compared to an increase of 3 percent for the under-65 population (Administration for Community Living, 2020 Profile of Older Americans, May 2021).

Housing affordability is an important consideration for older residents, as they typically live on fixed incomes. Persons aged 65 and older often have special needs related to housing, such as particular construction and location requirements to facilitate mobility and access. For instance, they may require ramps, handrails, lower cabinets, and counters to allow greater access and mobility. In addition, due to limited mobility, seniors need close proximity and access to public facilities (e.g., medical and shopping) as well as public transit. Housing for this age group is often constructed at higher densities and typically consists of one- and two-bedroom apartment units.

According to the 2015 to 2019 ACS, nearly 19 percent of the City's 91,376 population was age 65 years or older. Based on that, the percentage of residents 65 years and older is estimated to have increased from 14.2 percent in 2006 to 2010 to 18.6 percent in 2015 to 2019.

TABLE 23: CITY POPULATION BY AGE

Age	2006 -2010	Percentage	2015 - 2019	Percentage
Up to 64 Years	75,837	86%	74,318	81%
65 Years +	12,573	14.2%	17,058	18.6%
Total	88,410		91,376	

2015 - 2019 ACS, Table DP05

The City has a greater share of residents over the age of 65 (18.6 percent) compared to Santa Barbara County (14.9 percent) and California as a whole (14.8 percent).

As a special needs group, the elderly are in some respects unique. According to the 2015 to 2019 ACS, the majority of elderly households in the City are homeowners, representing 61.9 percent of all elderly households.

TABLE 24: ELDERLY HOUSEHOLDERS BY TENURE AND AGE

Householder Age	Owners	Renters	Total Households
65 – 74 Years	3,600	2,309	5,909
75 Plus Years	3,191	1,864	5,055
Total	6,791	4,173	10,964

2015 – 2019 ACS, Table B25007

This is a high rate of ownership for a population comprising about 19 percent of the total population in the City. However, of elderly homeowners, 1,039 households pay more than 30 percent of their monthly income on housing costs, and 770 households pay more than 50 percent of their monthly income on housing costs (2011- 2015 CHAS). Senior households may be less able to cope with increasing housing costs (rents for renters and property taxes for owners) as they are more likely to be living on a fixed retirement income. Most seniors desire to age in place but may need accessibility modifications as they age and may need additional support services in order to properly maintain their home and property. Many may also require transportation services and easy access to health services and home health care options and support related to aging in place such as home modification, home repair, and assistance with maintenance.

In the City of Santa Barbara, there are three continuing care retirement communities for the elderly with a capacity for 1,192 persons and 19 residential care facilities with a capacity for 529 persons.

The City's Human Services and CDBG programs allocate grants to support local nonprofit organizations that provide services to low- and moderate-income seniors, including those with disabilities. Table 25 provides a partial listing of these organizations.

TABLE 25: COMMUNITY DEVELOPMENT BLOCK GRANT RECIPIENTS

Organization	Services
Foodbank Older Adult Nutrition Program (formerly known as Brownbag Program)	Home food delivery for low-income seniors
Family Services Agency	Long Term Care Ombudsman to advocate for the rights of residents in skilled nursing homes and assisted living facilities. Senior Services free case management and support for people 60 and older or those caring for older residents
Area Agency on Aging (Central Coast Commission for Senior Citizens)	Programs that promote health, dignity, and well-being of older adults. Produces the Senior Resource Directory. One member on the Board of Directors is recommended by Santa Barbara City Council.
Friendship Adult Day Care Center	Classes and programs for seniors and dependent adults with Alzheimer's/dementia/other health conditions of aging and their family caregivers
City Parks and Recreation Senior Programs	Exercise programs and classes at the Carrillo Recreation Center and Louise Lowry Davis Center
Center for Successful Aging	Provides peer counseling and support programs
Santa Barbara Meals on Wheels	Delivers meals to those who might otherwise go without, due to the inability to shop or cook for themselves.
Housing Authority	Provides multiple affordable housing opportunities for seniors, and the Housing Choice Voucher Program.

Persons with Disabilities

Persons with disabilities have special housing needs and face unique problems in obtaining affordable and adequate housing. Persons with disabilities often have particular requirements due to accessibility issues, fixed or lower income and high health care costs. There are different types and levels of disabilities, including physical (mobility impairments, sight impairments, hearing impairments or speech impediments), mental, and developmental disabilities. Because of this broad range of types of disabilities, identifying and meeting housing needs is challenging.

Individuals with disabilities require conveniently located housing in close proximity to transit, retail, and commercial services, as well as their place of employment. Housing adapted for wheelchair accessibility, ramps, lower sinks, grip bars, wider doorways, etc., is required for the physically disabled. Making a new or existing dwelling unit accessible requires different features depending on the type of disability. The Fair Housing Act requires buildings with four or more new units to meet accessibility requirements. All federally assisted new housing projects with five or more units must design and construct 5 percent of the units, or at least one unit, to be accessible for persons with mobility disabilities. The Americans with Disabilities Act of 1990 (ADA) requires public and common use areas in housing developments to be accessible to persons with disabilities. However, housing developments built prior to the Fair Housing Act (after March 13, 1991) or prior to ADA rarely include accessible features and some of these units can be difficult to retrofit.

Another serious problem that people with disabilities face is one of housing affordability. The cost of housing in Santa Barbara and the low-income status of most people with disabilities make it difficult to find housing. For many of the disabled population, the only source of income is Supplemental Security Income (SSI) benefits. Given this limited income, rent often accounts for a major portion of their monthly expenses. Therefore, a variety of housing types, both rental and ownership, should be made available for this segment of the population.

The total civilian noninstitutionalized population of persons aged 18 to 64 is 58,559. Of those, seven percent (4,151 persons) have a disability. As shown in Chart 1 (2015-2019 ACS, Table C18120), shows persons with a disability by employment status. About 13 four percent (2,075 persons) of non-institutionalized persons in the total labor force of 48,608 persons (i.e., employed or unemployed and actively looking for work/available for work) stated that they had a disability, while 20 percent not in the labor force had a disability.

Chart 1: Noninstitutionalized Persons with a Disability by Employment Status

Persons ~~aged 5 to 64 years of age and younger~~ represent 51 percent (4,602 persons) of the total disabled population of 9,057 persons. The most frequently reported disabilities in this age group were cognitive (54 percent), ambulatory (30 percent), and independent living difficulty (28 percent) (Chart 2). For seniors (age 65+), representing 49 percent of the disabled population (4,455 persons), the most frequently reported disabilities are ambulatory (52 percent), independent living difficulty (49 percent), and hearing (44 percent) (Chart 3). It is important to note that totals in Charts 2 and 3 may exceed 100 percent due to multiple disabilities per person. Data for Chart 2 and 3 is sourced from the 2015 - 2019 ACS, Table S1810.

Chart 2: Percentage of Persons Ages 5-64 by Type of Disability

Chart 3: Percentage of Persons Ages 65 and Over by Type of Disability

DEVELOPMENTAL DISABILITIES

As defined by state law, “developmental disability” means a substantial disability of an individual that:

- Is manifested before the individual attains age 18.
- Continues, or can be expected to continue, indefinitely.

The term includes intellectual disability, cerebral palsy, epilepsy, autism, and disabling conditions closely related to intellectual disability or requires treatment similar to that required for individuals with

an intellectual disability. It does not include other handicapping conditions that are solely physical in nature.

The State Department of Developmental Services (DDS) collects data on individuals with a developmental disability by zip code and residence type. As of June 2019, the City of Santa Barbara had approximately 485 persons aged 17 and younger and 458 persons over 18 with developmental disabilities (some zip codes span into Santa Barbara County unincorporated areas). Of those, 75 percent are living with parents or family guardian, 19 percent are in independent and supportive living situations, and six percent are in an intermediate care facility.

Many developmentally disabled persons can live and work independently within a conventional housing environment. More severely disabled individuals require a group living environment where supervision is provided. The most severely affected individuals may require an institutional environment where medical attention and physical therapy are provided. Because developmental disabilities exist before adulthood, the first issue in supportive housing for the developmentally disabled is the transition from the person's living situation as a child to an appropriate level of independence as an adult.

RESOURCES

The DDS provides community-based services to approximately 243,000 persons with developmental disabilities and their families through a statewide system of 21 regional centers, four developmental centers, and two community-based facilities. Santa Barbara is served by the Tri-Counties Regional Center (TCRC) which is based in Santa Barbara. As of May 2022, TCRC served approximately 17,600 clients, with approximately 4,000 clients living in Santa Barbara (TCRC Director of Community Development). Any resident who has a developmental disability that originated before age 18 is eligible for services.

Local community-based organizations that serve the disabled population are shown in Table 26. The City's Human Services and CDBG programs allocate grants to help support these local nonprofit organizations that provide services to low- and moderate-income residents with disabilities. The City's Community Development and Human Services Committee includes representatives from the disabled community and the City's Access Advisory Committee meets quarterly to assist and advise staff on general matters concerning access and compliance with the State Building Code regarding accessibility for people with disabilities.

TABLE 26: ORGANIZATIONS THAT PROVIDE SERVICES TO PEOPLE WITH DISABILITIES

Organization	Services
Independent Living Resource Center	Advocacy for independent living and full access for individuals with disabilities for residents of Santa Barbara, San Luis Obispo, and Ventura counties
Tri-Counties Regional Center	Lifelong services and support for people with developmental disabilities for residents of Santa Barbara, San Luis Obispo, and Ventura counties
Alpha Resource Center	Services and support for families of children with developmental disabilities, day services for adults 22 years of age and older with intellectual and developmental disabilities, and social and recreational activities for teens and young adults
CHANCE Housing	Helps adults and children with disabilities find and maintain affordable, accessible community based housing
Salvation Army	Adult day care programs for seniors with mental and physical disabilities

Organization	Services
Mental Wellness Center	Provides a range of services for individuals with mental illnesses. The Residential Services Program includes more than 100 beds consisting of adult residential board and care homes, independent living, and Housing First facilities for people diagnosed with serious mental illness.
Friendship Adult Day Care Center	Activities for seniors and dependent adults with cognitive disabilities
Hillside House	Care for moderate to severely disabled, low-income adults

Large Households

Large households include five or more persons. Due to the limited supply of affordable, adequately-sized units to accommodate large households, large families face an above-average level of difficulty in locating adequate housing. Even when larger units are available, the cost is generally higher than that of smaller units. The lack of supply, compounded with the often lower incomes of larger families, results in many large families living in overcrowded conditions.

The 2015 to 2019 ACS shows that large households comprise 8.3 percent of all households in Santa Barbara. This percentage has not changed since the 5th Cycle Housing Element. Of those, 32.5 percent are owners and 67.5 percent are renters. By comparison, households of 2-4 persons comprise 59.5 percent and single person households comprise 32.2 percent of all households. Overall, the housing need for small units exceeds that for units with three or more bedrooms. This trend is expected to continue in the coming decades due to the growth in the senior population, who often live alone.

As shown in Chart 5, the City has approximately 14,328 existing units with three or more bedrooms which could accommodate large households. Under the AUD program, larger rental units are encouraged and provided in some projects because density is not based on bedroom count. In the 5th Cycle (up to December 2021), 64 three+ bedroom market rate units were approved, issued a building permit, or constructed and the Housing Authority of Santa Barbara (HASB) acquired one three bedroom/two bathroom house. Larger deed-restricted affordable units are included in the City's Housing and Human Services affordable housing inventory, including 181 three+ bedroom ownership units and 202 three+ bedroom rental units (40 of which are HASB units). The Housing Authority has an additional 132 three+ bedroom units in its portfolio.

The data from Chart 4 is from 2015 – 2019 ACS, Table B25009. The data from Chart 5 is from 2015 – 2019 ACS, Table DP-4.

Chart 4: Household Size of Renter & Owner-Occupied Households

Chart 5: Housing Units by Number of Bedrooms

Large family households in Santa Barbara are much more likely to have a housing problem (defined as incomplete kitchen facilities, incomplete plumbing facilities, more than one person per room, and cost burden greater than 30 percent) than small family households: 43 percent of small family household have a housing problem compared to 75 percent of large family households (City of Santa Barbara Analysis of Impediments to Fair Housing Choice, 2020).

Female Headed Households

Single parent households, in particular female-headed households, generally have lower-incomes and experience higher living expenses. This makes it difficult to find safe, decent, and affordable housing.

These households can also face challenges in attaining affordable childcare, health care, and other supportive services. Female-headed households, especially those with children, have special needs with respect to affordable, adequately sized housing units, located near schools and recreational facilities.

The 2015 – 2019 ACS estimates reported that about 31 percent of all households in the City are female headed households. Of those, 13 percent are with children, and 87 percent without. Of all families under the poverty level, 48 percent are female-headed.

TABLE 27: FEMALE HEADED HOUSEHOLDS

Household Type	Estimate	Percent of Total Households (37,333)
Female Headed Householders	11,397	31%
Female Heads with Own Children	1,477	4%
Female Heads Without Children	9,920	27%
Total Families Under the Poverty Level	1,376	
Female Headed Households Under the Poverty Level	664	2%
2015 – 2019 ACS, Table B11012, B17012		

College and University Housing

There are three major schools (a university and two colleges) within the Santa Barbara area. The University of California at Santa Barbara (UCSB) is located just west of the City. UCSB had an enrollment of 26,124 undergraduate and graduate students for the Fall 2021 Quarter; 10,375 of those students (40 percent) lived in UCSB housing facilities comprised of residence halls, family student housing, and undergraduate and graduate apartment housing. The remaining 54 percent live in the local community, and 5 percent live elsewhere. Of those living in the local community, 5 percent, or 1,310 individuals, live in the City of Santa Barbara. UCSB is the largest employer in Santa Barbara County, employing a total of nearly 11,000 academic and non-academic staff (UCSB 2021-2022 Campus Profile). Faculty and staff housing on or near the campus includes 224 for sale units for faculty, and 35 rental units for faculty and staff.

Santa Barbara City College (SBCC) is located within the City of Santa Barbara. SBCC does not provide on-campus or off-campus housing for students. As of fall 2021, SBCC had an enrollment of 14,039 students, including students on the main campus, students from local high schools (dual enrollment), and exclusively online. Of those, 39 percent have a mailing address in the City of Santa Barbara. From 2014 – 2021, SBCC student enrollment dropped 23 percent, with most of the decrease coming from part-time students (The Channels, 10/29/21). Some SBCC students live in residence halls or other student housing options alongside UCSB students in Isla Vista. Others live in privately-owned, off-campus, student housing apartments and single-unit residences adjacent to SBCC.

Westmont College is located in Montecito, a 10-minute drive east of Santa Barbara. Westmont is restricted to an on-campus enrollment of 1,200 students through a Conditional Use Permit. Westmont provides on-campus housing for 98 percent of its students; therefore, fewer Westmont students impact the rental housing market. Westmont also provides faculty and staff housing.

There are also several smaller schools in Santa Barbara, including Antioch University, Fielding Graduate University, and Santa Barbara College of Law. Although these schools have small enrollments or cater to those already living and working in Santa Barbara, they do contribute students to the demand for affordable rental units. Foreign language schools in Santa Barbara also contribute to the demand for rental housing. While these schools offer a variety of housing accommodations, such as living with a host family, at a hotel, or in a dormitory with other students, students may choose to rent an apartment unit while attending school. Competing for rentals with local residents not only impacts the availability of rental housing, but also makes it attractive for landlords to rent their units at higher prices.

University and college students have special housing needs due to limited income and financial resources. Most students are able to work only part-time to accommodate their study program. It is not uncommon for students to earn lower incomes and pay over half their annual income for housing. Students may double-up in rooms to make rent payments more affordable.

University and college students impact the rental housing market. These students can be a significant factor that affect housing availability and rent levels, especially in areas close to the schools. Apartments and houses near these schools generally experience lower vacancy rates and a higher turnover due to the cyclical school year. Because of the increased demand placed by students, owners with units close to colleges can charge higher rents, and often rent out individual bedrooms within a house to students to maximize rents charged.

Farmworkers

According to the 2021 Santa Barbara County Agricultural Production Report, the total gross production value of agriculture in 2021 was over \$1.9 billion. Farmworker households are a special needs group due to lower incomes typically earned by these households. Migrant and other farmworker households are generally located close to the agricultural areas providing employment. As noted in Table 5, it is estimated that 0.8 percent of the City's residents are employed in agriculture, forestry, fishing and hunting, and mining jobs. The City of Santa Barbara has a limited amount of agricultural uses, mostly on the northern edge of the City, north of Foothill Road and between the Riviera and the northern City limits. There are also smaller pockets in the Braemar Ranch area and on upper West Valerio Street. All the agricultural uses occur on land zoned for single-unit residential use. The City does not have an agricultural zone designation.

The City's main agricultural crop grown is avocados, which traditionally is not labor intensive. Information contained in the Environmental Impact Report prepared for the City's Agricultural Uses: General Plan and Municipal Code Amendments (SB-147-90), certified in 1993, indicates that there was approximately 130 acres of agricultural use within the City limits, including avocados, lemons/limes, and nursery. Avocados and lemons/limes are grown predominately on hillside areas and nursery stock is grown on relatively level mesa areas. It is estimated that there are only 20 to 30 larger agricultural operations in the City. The majority are small, possibly one-half acre or less. Therefore, agricultural uses have been relatively stable in the City of Santa Barbara.

The housing needs of farmworkers are difficult to quantify. The ability to gather information about farmworkers is limited because they are often mobile and reluctant to participate in any survey. According to the 2017 USDA Agricultural Census, there were 22,985 hired farmworkers in Santa Barbara County and ~~42,684~~21,101 of those worked on larger farms with 10 or more workers. Data is not available at the city level. ~~Based on the fact that farm operations in the City are relatively small and are located in residential zones, there is not a significant need for housing exclusively for farmworkers. Therefore, t~~

The housing needs of farmworkers are met through a variety of housing types and programs, such as accessory dwelling units, deed-restricted affordable units, and housing choice vouchers, are addressed as part of the City's general affordable housing programs. As noted above, there is no agricultural zoning in the City and State regulations that require farmworker housing by right in agricultural zones do not generally apply. As discussed in the Constraints section, City zoning regulations comply with state law and will be amended to allow employee housing for six or fewer persons a use by right in single-unit zones. allow small farmworker housing developments as an agricultural use. (See also the discussion of farmworker housing regulations in the Constraints section.)

People Experiencing Homelessness

The US Department of Housing and Urban Development (HUD) defines homelessness in four broad categories (24 CFR Part 91.5):

- People who are living in a place not meant for human habitation, in emergency shelter, in transitional housing, or who are exiting an institution where they resided for up to 90 days, provided they were in shelter or a place not meant for human habitation immediately prior to entering that institution;
- People who are losing their primary nighttime residence, which may include a motel or hotel, within 14 days and lack resources or support networks to remain in housing;
- Families with children or unaccompanied youth (under 25 years of age) who are unstably housed and are likely to continue in that state, have had two or more moves in the last 60 days, and who are likely to continue to be unstably housed because of disability or multiple barriers to employment; or
- People who are fleeing or attempting to flee domestic violence and lack the resources or support networks to obtain other permanent housing.

Although there are myriad causes of homelessness, among the most common are low-income, substance use disorders, disabilities, domestic violence, and mental illness. The 2020 Point-in-Time Count, a nationwide snapshot count of persons experiencing homelessness, found more than 580,000 people living without a home either on the streets or at shelters, a number that has increased each year since 2017. At 28 percent, California has the largest percentage of the nation's homeless population. More notably, California has more than half of the unsheltered population in the country and are more vulnerable to health problems, violence and trauma, and longer periods of homelessness.

~~In the City of Santa Barbara, the number of persons experiencing homelessness has averaged around 927. Preliminary r~~Results of the 2022 Point-in-Time (PIT) Count identified 822 homeless individuals

living in the City of Santa Barbara. Although this represents a 10 percent decrease since the last count, this total still represents 41 percent of the homeless population countywide.

Government Code Section 65583(a)(7) requires that the assessment of emergency shelter needs be based on the most recent homeless PIT count conducted before the start of the planning period, i.e., the 2022 PIT. However, preliminary results of the 2023 PIT show a continued decrease to the City's overall number of persons experiencing homelessness—787 total in Santa Barbara, with the number of sheltered persons increasing from 304 to 375 since the last count, and the number of unsheltered decreasing by 20 percent to 412. This reduction in unsheltered homeless is a result of significant efforts to increase the number of shelter beds in the City, and investments in street outreach and Neighborhood Navigation Centers, which will be discussed further in this section. Despite the overall decrease in the total number of persons experiencing homelessness, the City's share is still 42 percent of the total homeless population.

CHART 6: POINT IN TIME COUNT BY YEAR

~~According to the County of Santa Barbara 2020–2021 HUD performance data, 3,347 persons experiencing homelessness were served countywide during this period, while the countywide Point in Time count estimated 1,962 persons. The number of homeless individuals in the City far outpaces the number of existing shelter beds, transitional housing, or permanent supportive housing units available.~~

EMERGENCY SHELTER NEEDS ASSESSMENT FACILITIES SERVING THE HOMELESS

There are a number of facilities and programs that address homelessness in the City of southern Santa Barbara County area. While ending homelessness requires a focus on permanent housing solutions, the following types of temporary housing is necessary to support a full system.

CHART 6: NUMBER OF PEOPLE EXPERIENCING HOMELESSNESS BY YEAR

- Emergency Shelter: provides temporary shelter for homeless individuals, and which does not require occupants to sign leases or occupancy agreements. Also includes navigation centers, bridge housing, and respite and recuperative care. Services include meals and case management.
- Transitional Housing: provides homeless individuals and families with interim housing and support to successfully move into permanent housing. Residential stay is generally limited to 24 months, and tenants must have a signed lease, sublease, or occupancy agreement.
- Permanent Supportive Housing: provides indefinite leasing or rental assistance paired with supportive services to assist homeless persons achieve housing stability.

~~The following facilities serving the homeless are based in the City of Santa Barbara~~Currently, the City has a total of ~~823~~ 964 beds/rooms/units available to serve the homeless in various forms (Table 28). Additionally, in 2022 two projects were added to the inventory—Dignity Moves with 34 units and Hospitality House with 24 units, increasing total capacity to 1,022 for 2023. As demonstrated below, the City continues its commitment to the support of housing opportunities for persons experiencing homelessness.~~Table 28).~~

**TABLE 28: HOUSING FOR PEOPLE EXPERIENCING HOMELESSNESS
CITY OF SANTA BARBARA**

Facility Type	Capacity

Total Capacity	<u>964</u><u>09</u>
Total Need*	1,778 Units
<p>* In 2022, two projects were added to the inventory: Dignity Moves with 34 units and Hospitality House with 24 units, increasing total capacity to 1,022 for 2023. <u>County of Santa Barbara and City of Santa Barbara Phase II Community Action Plan to Address Homelessness 2021</u></p> <p><u>*The number of units needed is for the South Coast of Santa Barbara, which includes Santa Barbara, Goleta, Isla Vista, Montecito, Summerland and Carpinteria, and includes temporary beds, rapid rehousing, permanent supportive housing and long term rental subsidies.</u></p>	

Table 29 shows the breakdown of the number of beds by type countywide from the 2022 Housing Inventory Count (HIC) provided by the Consortium of Care (CoC). This data shows that while the City's share of total homeless persons is 42 percent of the countywide total, the number of emergency shelter beds within the City of Santa Barbara make up 51 percent of the total emergency beds available countywide.

TABLE 29: NUMBER OF BEDS BY TYPE AND AREA

City/Area	Emergency Shelter	Transitional Housing	Rapid Re-Housing	Permanent Supportive Housing and Other	Total
<i>Santa Barbara</i>	<i>330</i>	<i>54</i>	<i>48</i>	<i>446</i>	<i>878</i>

Carpinteria	0	0	0	6	6
Total	644	102	355	1,649	2,750
Housing Inventory Count 2022 County of Santa Barbara					

As stated earlier, the 2022 PIT identified 822 homeless individuals throughout the City of Santa Barbara. Of those, 304 were sheltered (i.e., living in a supervised publicly- or privately-operated shelter designated to provide temporary living arrangements) and 518 were unsheltered (i.e., with a primary nighttime residence that is a public or private place not designated for or ordinarily used as a regular sleeping accommodation, including a car, park, abandoned building, bus or train station, airport, or camping ground).

As shown in Table 29, above, there are 330 year-round emergency shelters in the city, with transitional housing providing an additional 54 year-round beds, for a total of 384 year-round beds⁸. During the PIT survey, 342 of those beds were filled, with 42 beds open to unsheltered homeless persons. Reducing the number of vacant beds from the unsheltered PIT count leaves 476 persons remaining in need of shelter.

Based on the formula utilized by the County of Santa Barbara's Community Action Plan to Address Homelessness to annualize the one-time PIT survey there is an annual need of 714 beds. Further, utilizing the turnover rate of beds (based on Homeless Management Information System data), the City needs to accommodate an additional 310 emergency beds to shelter the unsheltered population.⁹ Utilizing the same formulas as above and applying it to 2023 PIT data which counted 412 unsheltered individuals—a decrease of 20 percent since last year—there are 347 persons remaining in need of shelter, which reduces the number of additional emergency beds to 226 beds. This reduction in unsheltered homeless persons is a result of significant efforts by the City and partners to increase the

⁸ The 2022 Housing Inventory Count conducted as part of the PIT noted 53 year-round beds were unavailable during the PIT survey due to COVID-19 response protocols. Those protocols were lifted in 2023.

⁹ Multiplied number of individuals remaining in need of shelter by 1.5 and then divided the product by 2.3. Source Santa Barbara County Housing Element – 2023-2031, special housing needs.

number of available shelters in the City, and investments in street outreach and Neighborhood Navigation Centers.

DATA LIMITATIONS

There are two data sets that were not available to the City: The number of beds that go unused on an average monthly basis, and the number of supportive housing units that were vacant during the PIT/HIC count.

The average number of beds that go unused on a monthly basis was unavailable, however the City was able to obtain the number of unused emergency beds counted during the PIT count: 42 in 2022, and 65 in 2023, and utilized this data in its assessment. Additionally, the number of supportive housing units that were vacant (unused) during the PIT/HIC were not available at the city level. The HIC noted 99 supportive housing beds were unused during the 2022 count Countywide. Given that the City of Santa Barbara makes up 27 percent of the permanent supportive housing stock in the county, having access to this data point would further reduce the number of additional emergency beds the City would require. In future PIT/HIC counts the City will request this information at the city level.

ASSEMBLY BILL 2339 (2022)

AB 2339, effective on January 1, 2023, amended housing element law regarding identification of zones and sites for emergency shelters, and transitional and supportive housing. It requires that zoning designations that allow emergency shelters as a permitted use without a conditional use permit or other discretionary permit must allow residential uses. The City's Zoning Ordinances allow emergency shelters in all residential and nonresidential zones, but all zones except M-C (Manufacturing Commercial) require a Conditional Use Permit (CUP). ~~In accordance with Senate Bill 2 (2007), the M-C Manufacturing Commercial zone (Title 30 Zoning Ordinance) allows emergency shelters as a permitted use without discretionary approval.~~ The M-C zone also allows residential uses.

The City must also demonstrate the adequacy of sites identified to accommodate emergency shelters. Identified opportunity sites in the M-C zone demonstrate sufficient capacity to support the development of additional emergency shelters as a permitted use without discretionary approval. The City's Suitable Sites Inventory (Appendix G) lists approximately 67 vacant or underutilized M-C zoned properties totaling 25.2 acres of available land. These parcels either separately (larger parcels) or in combination (smaller parcels) could accommodate the development of emergency shelter facilities. See the Housing Constraints section for more information.

In the Coastal Zone (Title 28 Zoning Ordinance), emergency shelters require a Conditional Use Permit (CUP). The two major emergency shelter facilities, PATH Shelter (zoned M-1/C-2/S-D-3) and Santa Barbara Rescue Mission (zoned OM-1/S-D-3), are currently permitted with a CUP. Amending their respective zones to allow emergency shelters by right requires coordination with the California Coastal Commission because these zones are intended to provide appropriate ocean-dependent and related industrial uses in close proximity to the Harbor.

The Zoning Ordinances consider ~~In the inland area of the City (Title 30 Zoning Ordinance),~~ transitional and supportive housing ~~are considered~~ a residential use of property and they are subject to only those restrictions that apply to other residential dwellings of the same type in the same zone.

PROGRAMS FOR PEOPLE EXPERIENCING HOMELESSNESS

Although the County is the public entity responsible for attending to people experiencing homelessness, the City is deeply involved in helping the homeless. The City collaborates with the County and supports various partner agencies to implement an effective multi-pronged effort to assist in the provision of adequate housing and social services to this population. The City is a strong partner in a continuum of care that supports prevention programs, emergency shelter, transitional programs and permanent supportive housing. Table 30 describes the main programs.

TABLE 30: PROGRAMS FOR PEOPLE EXPERIENCING HOMELESSNESS

Program	Description
Elected Leaders Forum on Homelessness	The city participates on the County-sponsored regional forum for local elected representatives to learn about concerns, demographic trends, best practices, and future grant and other funding opportunities
Santa Maria/Santa Barbara County Continuum of Care	The Continuum of Care (CoC) is a regional planning body that coordinates housing and funding for services funding for homeless persons. The city is a represented on the Governing Board by key high level-staff. City partnered to secure \$2.5 million in state Encampment Resolution Funds
Dignity Moves	A nonprofit organization that provides interim housing solutions. Dignity Moves and the County created <u>are creating</u> a transitional housing project on a County parking lot within the City of Santa Barbara that will provide 34 <u>3</u> temporary, small, portable housing units and related facilities for the unhoused population, prioritized as those with an established history in downtown Santa Barbara. To assist the County on this needed project, the City is providing County employees with parking access at a nearby City Parking lot for the duration of the project, to offset the County's loss of parking space, at a value of \$294,400.
Santa Barbara Alliance for Community Transformation (SB ACT)	The City has contracted with SB ACT to develop a unified, strategic response to homelessness. The Common Agenda/Strategic Plan was developed by a steering committee of community stakeholders (which includes City leadership and staff) and identifies four main goals: increase the number of affordable housing units by 20 percent; increase the rate of housing retention by five percent; reduce the percentage of people entering homelessness from a housed situation by ten percent; and strengthen the coordination and availability of outreach and case management services by 25 percent.
Regional Action Plans (RAPs) and Working Groups	SB ACT convenes regular neighborhood-centered group meetings (RAPs) to discuss issues of concern, inform the public about efforts to address homelessness, and develop strategies to reduce the impacts of homelessness. There currently are three RAPs in the City of Santa Barbara attended by residents, business leaders, and service providers. <u>In 2022, in coordination with the City SB ACT also convenes monthly meetings with service providers to coordinate services to individuals residing in highly impacted neighborhoods.</u> Additionally, SB ACT leads monthly working groups of housing agencies, service providers, and individuals with lived experience to increase coordination and collaboration. Staff from the City's Rental Housing Mediation Program, Library, and Environmental Services, among other City programs participate in these work groups.

Program	Description
Neighborhood Navigation Centers (NNC)	<p>The City provides funding to SB ACT to operate NNCs, a “one-stop-shop” location to provide case management, food distribution, medical and veterinary care, sanitation services, and more provided by many nonprofit organizations. The City’s Library is a NNC partner, and provides homeless individuals with computer and internet access; phone charging and printing stations; workforce development and/or literacy program intakes; assistance obtaining vital documents or applying for government benefits (i.e., MediCal, CalFresh, lifeline phones, low-cost internet, etc.) NNCs operate Thursdays at Alameda Park and Tuesdays at the Carrillo Commuter Lot, and Wednesdays at the Rescue Mission. <u>In 2022, these NNCs resulted in 65 street exits.</u></p>
City Net	<p>City Net provides four-street outreach, workers and case-management, and housing navigation services to persons experiencing homelessness in Santa Barbara, funded by State of California’s Permanent Local Housing Allocation Program, which the City receives annually. City Net works closely with local shelters, landlords, Cottage Hospital, Santa Barbara Police Department, SB ACT, and various service providers to coordinate outreach and housing location services and is often the first line of response to our unhoused population. <u>In early 2023, the City contracted with City Net to expand services from Thursday through Sunday until 11:30 a.m. to 10 p.m. in addition to regular weekday services.</u></p>
People Assisting the Homeless (PATH)	<p><u>The City provides annual operations support to PATH, an interim housing program serving homeless individual men and women. Services include an on-site health clinic, mental healthcare, substance use counseling, housing location, employment and benefits assistance, meals and hygiene facilities.</u></p>
Tenant Based Rental Assistance (TBRA)	<p>The City has partnered with New Beginnings, Transition House, and the Housing Authority of the City of Santa Barbara to provide rental assistance to low-income households in order to rent market-rate units.</p> <p>The City has utilized its federal HOME entitlement award to fund TBRA programs since 2012. The HOME TBRA program operates similarly to the Section 8 Program. TBRA rental assistance grants may facilitate security deposit payments and/or monthly rental housing assistance for up to 24 months to low-income households, including homeless persons and those at imminent risk of becoming homeless.</p> <p>Since 2010 2, TBRA assistance has been provided to more than 330 <u>1,324</u> households.</p>

3. HOUSING CONSTRAINTS

Governmental Constraints

Potential constraints on the provision of housing that could be attributed to governmental actions include factors such as land use controls, local processing and permit procedures, on-and offsite improvement requirements, other City regulations, application of building codes, and fees. Each potential constraint and its effect on the production of housing in Santa Barbara is discussed below.

Land Use Controls

Below is a description of the various plans, documents, and other controls that set forth the goals, policies, and standards that affect where housing is located and the development standards and requirements that shape housing developments. Pursuant to Government Code 65940.1(a)(1) (A) and (B), all documents and standards summarized below can be found on the City's website.

General Plan Land Use Element

The original City of Santa Barbara General Plan was adopted in 1964 and was most recently comprehensively updated in December 2011. State law requires that all cities and counties in California have a General Plan that includes a land use element. The land use element designates the proposed general distribution and location of the extent of land uses for public and private uses, including land and natural resources suitable for designation in the General Plan's environmental resources element.

Specific to the Housing Element, the Land Use Element establishes residential land use designations that allow for a mix of housing types. Table 31 outlines the residential land use designations and applicable base densities in the General Plan. Urban land use designations allow a higher density range with the City's Average Unit Size Density Incentive (AUD) program, indicated in parentheses.

TABLE 31: SANTA BARBARA GENERAL PLAN RESIDENTIAL DENSITY RANGES

General Plan Designation	Maximum DU/Ac
Hillside	
Low Density Residential 1	1
Low Density Residential 2	2
Low Density Residential 3	3
Suburban	
Low Density Residential 3	3
Low Density Residential	5

General Plan Designation	Maximum DU/Ac
Medium Density Residential	12
General Urban	
Medium High Density Residential	<u>12 to 18</u> (15 to 27 <u>with AUD Program</u>)
High Density* Residential	<u>12 to 18</u> (28 to 36 <u>with AUD Program</u>)
<u>Hotel/Medium High Density Residential</u>	<u>12 to 18</u> (15 to 27 <u>with AUD Program</u>)
<u>Ocean Related Commercial/Medium High Density Residential</u>	<u>12 to 18</u> (15 to 27 <u>with AUD Program</u>)
Office/Medium Density Residential	12
Office/Medium High Density Residential	15 to 27
Office/High <u>Density*</u> Residential	<u>12 to 18</u> (28 to 36 <u>with AUD Program</u>)
Commercial/Medium High <u>Density</u> Residential	<u>12 to 18</u> (15 to 27 <u>with AUD Program</u>)
Commercial/High <u>Density*</u> Residential	<u>12 to 18</u> (28 to 36 <u>with AUD Program</u>)
Commercial Industrial/Medium High <u>Density</u> Residential	<u>12 to 18</u> (15 to 27 <u>with AUD Program</u>)
City of Santa Barbara General Plan 2011; BAE, 2022. *High Density designations can achieve densities of 49-63 DU/Ac if developed under the Priority Housing Overlay incentive program and the units are restricted to rental, employer sponsored housing, or cooperative housing.	

According to state law, the default minimum density for land targeted to address the RHNA for lower-income households in Santa Barbara is at least 20 dwelling units per acre. “At least” means the density range allowed on the parcel by the zone has to include the default density. Densities achieved through the Average Unit-Size Density Incentive (AUD) Program are higher as discussed in further detail below. The City is currently processing amendments to the Zoning Ordinance to change the base density range to include default densities up to 20 units per acre. In addition to the AUD Program density incentives, state and local density bonus incentives allows developers to exceed the density limits listed above. During the 5th cycle Housing Element period, approximately 13 projects have been approved or are pending approval at higher densities using City or state density bonus. General Plan densities have not been shown to be a constraint on housing.

Coastal Land Use Plan

The City's first Coastal Land Use Plan (LUP) was certified by the California Coastal Commission in 1981 and was most recently comprehensively updated in 2019. The Coastal Act requires that the City's LUP include the kind, location, density, and intensity of land uses within the Coastal Zone and that public access, recreation, aquaculture, coastal-dependent, and coastal-related uses be prioritized on oceanfront lands that are suitable to those purposes. Visitor-serving and recreational uses, particularly lower cost ones, shall also be protected and encouraged.

Most land use designations in the LUP allow residential uses, except for Hotel and Related Commerce-I, Industrial, Coastal-Oriented Industrial, Institutional, Beach, Parks/Open Space, Harbor-Stearns Wharf, and limited areas within Ocean-Oriented Commercial.

The 2013 Zoning Ordinance amendments that established the AUD Program have not been submitted to or certified by the Coastal Commission. Without the AUD Program effective in the Coastal Zone, the highest allowed density is currently 27 dwelling units per acre.

Zoning Ordinance

The City has two Zoning Ordinances for different areas of the City. Title 28 is used in the Coastal Zone while Title 30 is used in the remainder inland portion of the City. Title 30 was recently reformatted and updated and instances where nomenclature or standards differ in Title 28 are noted in parenthesis or otherwise below. The City intends to submit Title 30 to the Coastal Commission for certification and use in the Coastal Zone to eliminate the need for two separate Zoning Ordinances. The Zoning Ordinance has specific standards for base zones, with additional development standards for overlay zones and specific plan zones.

BASE ZONES

Specific to housing, the base zone regulations includes: ~~six~~

- **RS Residential Single Unit** is intended to provide areas for single-unit housing on individual lots at appropriate low densities with allowances for an Accessory Dwelling Unit or Two-Unit Residential Development when certain standards are met. Designators (e.g., -25, -15) refer to minimum lot size in thousands of square feet or, in the case of RS-1A, acres. This zone also allows manufactured housing and mobilehomes on an approved permanent foundation. ~~residential zoning designations, a two-unit zone, and two multi-unit residential zoning designations.~~ Development standards for each of these residential designations, including density, height, open space, and others, can be found in Appendix F. ~~Two-unit and multi-unit housing is allowed in the following three zones:~~
- **R-2 Two-Unit Residential** is intended to provide areas for medium-density residential where the principal use of land is for two-unit dwellings. Single-unit dwellings and garden apartment developments are also allowed.
- **R-M (R-3) Residential Multi-Unit** is intended to provide areas for a variety of multi-unit housing types.
- **R-MH (R-4) Residential Multi-Unit and Hotel** is intended to provide areas for a variety of multi-unit housing types.

Residential development is also an allowed use in most of the City's nonresidential zones, including: O-R (R-0) (Office Restricted), O-M (C-O) (Office Medical), C-R (C-P, C-1, C-L) (Commercial Restricted), C-G (C-2) (Commercial General), and M-C (C-M) (Manufacturing Commercial).

Development standards for each of these residential designations, including parking, height, open yard, and others are summarized below, details can be found in Appendix F.

OVERLAY ZONES

There are twelve Overlay Zones in the City, as provided in Table 322 below.

TABLE 322: OVERLAY ZONES

Overlay Zone Description	Zone Designation
Auto, Commercial, and Services	ACS
Coastal Zone	CZ
Hazardous Waste Management Facility	HWMF
Historic District	HD
Landmark District	LD
Mobile Home Park	MP
Planned Unit Development	PUD
Research and Development	RD
Resort Hotel	RH
San Roque Park Subdivision	SRP
Senior Housing	SH
Upper State Street Area	USS
City of Santa Barbara Municipal Code, 2022; BAE, 2022.	

Each overlay zone has specific development standards depending on the purpose. The Upper State Street (USS) and Landmark District (LD) overlay zones apply in areas where most of the City's new multi-unit housing is developed. The Upper State Street (USS) Overlay Zone (Figure 3) allows multi-unit housing, but has more restrictive standards (i.e., 45 feet height limit, greater front setbacks) than other areas of the City. The more restrictive standards are intended to maintain and enhance the character of Upper State Street, including the public streetscape, open space, creeks, views, site design, and building aesthetics. In recent years, three residential projects totaling 237 units rental units (over half of which are 100 percent affordable) and one project of 72 ownership units have been constructed within the USS Overlay Zone. A further four projects are pending with a total of 738 units, 87 of which are proposed for very low- and low-income households. The Suitable Sites Inventory includes 55 additional sites within the USS Overlay with a total capacity of 2,319 units.

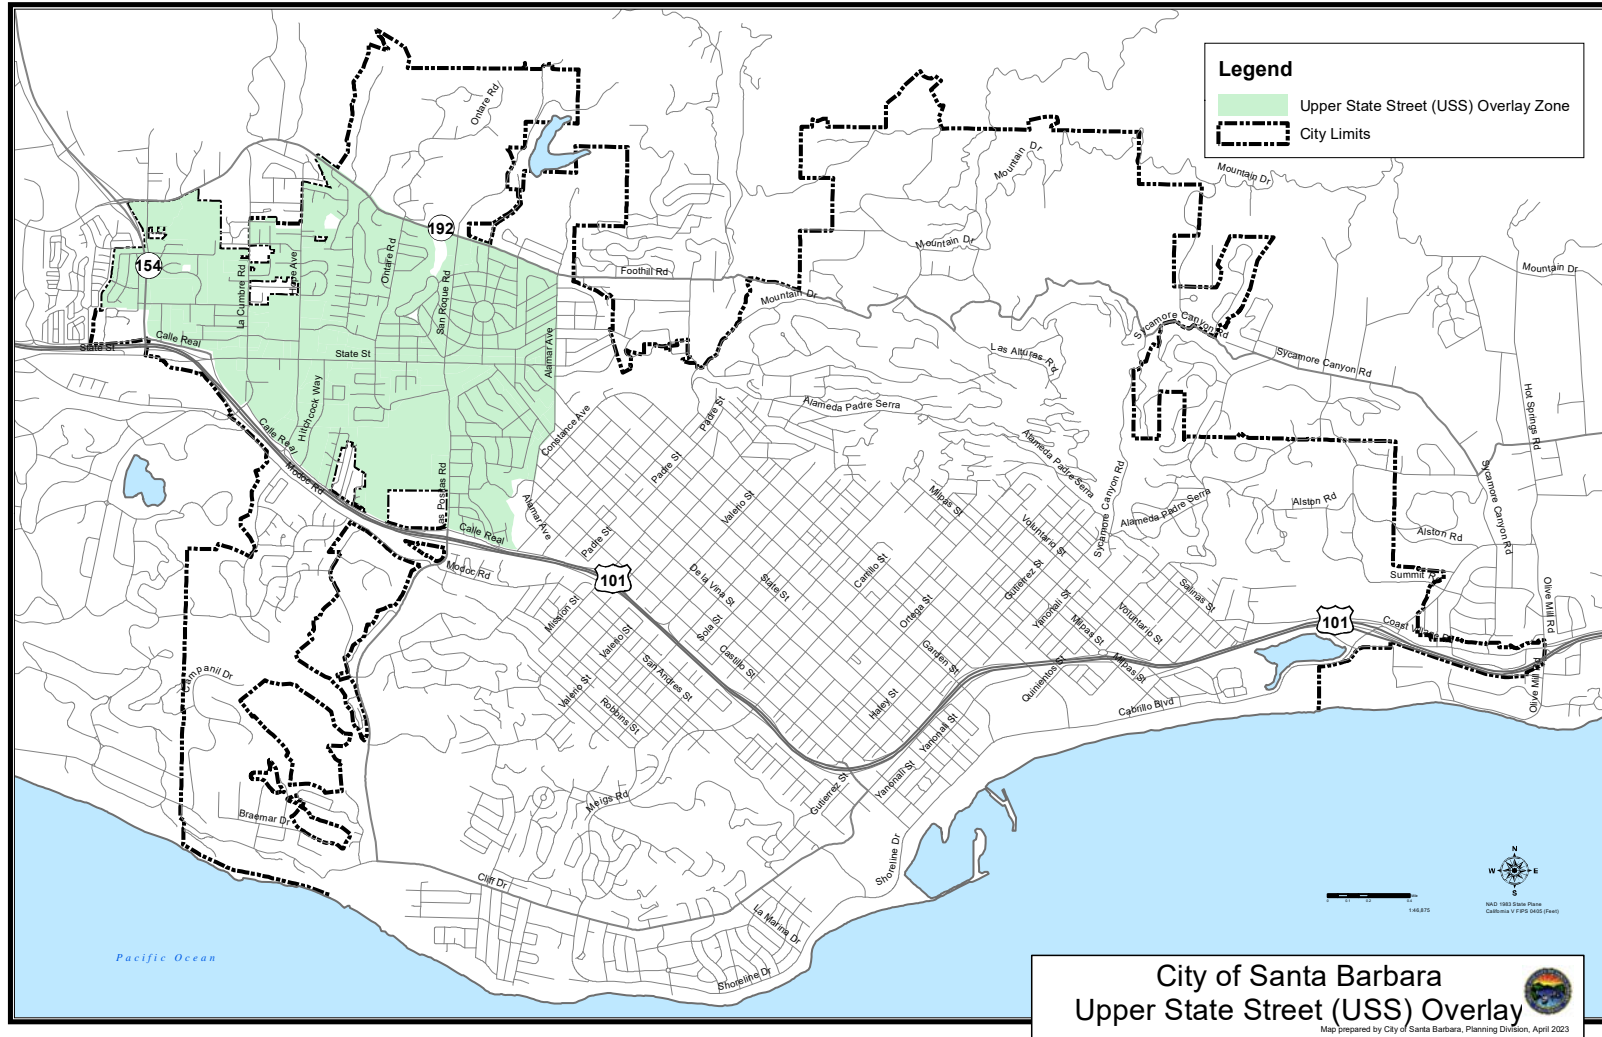

The City's El Pueblo Viejo Landmark District (LD) Overlay Zone and various Historic Districts (HD) Overlay Zones also contain certain provisions with respect to the production of new housing, such as specific design review standards and required architectural styles, to ensure compatibility with the existing historic character of these areas.

Analysis

The standards for the El Pueblo Viejo District LD Zone have not been shown to constrain housing because much of this area is also zoned for and has produced high density housing projects

compatible with the historic character of the area. Parcels within the Historic Districts (HD) Overlay Zones are typically already fully developed and not considered suitable sites for a significant number of new housing units.

FIGURE 3: UPPER STATE STREET OVERLAY ZONE

R:\GIS\housing\HE_2023\AFPH Maps 2nd Draft\UpperStateStreetOverlay_MapBn11_Apr102023.mxd

The standards for the Upper State Street USS Zone have not been shown to constrain housing based on the track record of constructed and pending projects that able to meet or exceed maximum density within the height limits and other specific standards. Furthermore, eligible projects can use State or City density bonus waivers, concessions, and incentives if desired to reduce site development standards.

~~The height restriction of 45 feet in the USS Overlay Zone could present a constraint to housing within the proposed La Cumbre Plaza planning area. This will be addressed with the La Cumbre Plaza planning program.~~

SPECIFIC PLAN ZONES

The City has nine Specific Plan Zones at present. Four of these Zones allow for housing, including the Cabrillo Plaza Specific Plan (SP2-CP); the Rancho Arroyo Specific Plan (SP4-RA); the Westmont College Specific Plan (SP5-WC); and the Los Portales Specific Plan (SP10-LP). These Plans allow for residential densities consistent with the General Plan.

~~The City is currently considering options to plan for redevelopment of a 31-acre shopping center to be used primarily for multi-unit housing. The site would allow for approximately 1,900 units. The General Plan calls for establishing an initial framework for a future “La Cumbre Plaza Specific Plan” to guide coordinated redevelopment of the area. This planning process for La Cumbre Plaza is expected to start in 2023 depending on grant funding availability.~~

AVERAGE UNIT-SIZE DENSITY INCENTIVE PROGRAM

The City’s Average Unit-Size Density Incentive (AUD) Program was adopted in 2013 to facilitate the construction of smaller housing units by allowing increased density that could not be achieved through existing development standards. The standards for projects proposed under this program are contained within City Wide Regulations, Chapter 30.150. The AUD Program is not yet certified for use in the Coastal Zone.

~~At the time of this analysis, 618 units (206 of which are affordable units) had been built under the City’s AUD Program and 778 have received permits (234 of which are affordable units).~~

The AUD Program applies to both mixed-use development and residential-only development. It allows both ownership units (condominiums) and rental units. It is permitted in the following multi-unit and nonresidential zones: R-M, R-MH, O-R, C-R, C-G, and M-C. In exchange for densities of up to 63 dwelling units per acre, the AUD Program includes additional development incentives such as reduced parking, setback, and open ~~space~~ yard requirements, described in detail below.

The AUD Program consists of three density tiers based on the General Plan Land Use Designation for the lot as shown in the next table: Medium-High Density (15-27 dwelling units per acre); High Density (28-36 dwelling units per acre) and the Priority Housing Overlay (37-63 dwelling units per acre).

TABLE 33: AUD PROGRAM DENSITY BY CATEGORY

Medium-High Density		High Density		Priority Housing Overlay	
Average Unit Size (sf)	Density du/acre	Average Unit Size (sf)	Density du/acre	Average Unit Size (sf)	Density du/acre
1450	15	1245	28	970	37-48
1360	16	1200	29	969	49

Medium-High Density		High Density		Priority Housing Overlay	
Average Unit Size (sf)	Density du/acre	Average Unit Size (sf)	Density du/acre	Average Unit Size (sf)	Density du/acre

				811	63

City of Santa Barbara Municipal Code, 2022; BAE, 2022.

Analysis

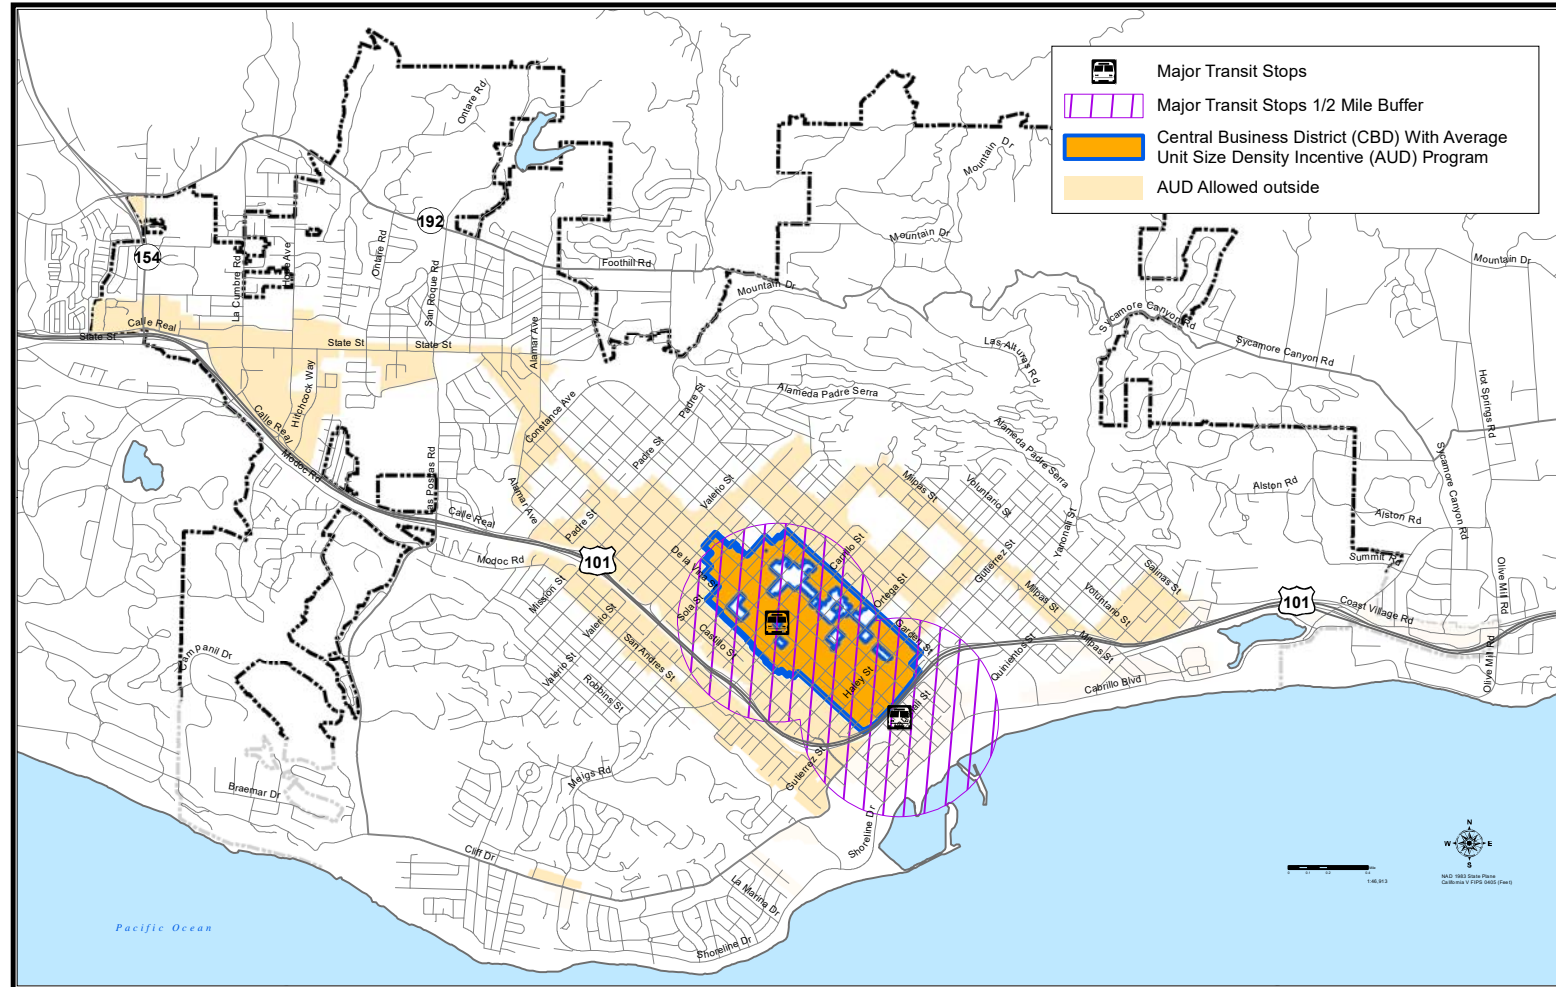

At the time of this analysis, 618 units (206 of which are affordable units) had been built under the City's AUD Program and 778 have received permits (234 of which are affordable units). The AUD Program is set to expire on February 15, 2024. ~~In absence of City Council action before the expiration date, the program will end, and the allowable residential densities will revert to those as they previously existed (conforming with Base Densities allowed in the Code or Variable Density).~~ However, the City is currently working on ordinance amendments to make major components of the AUD Program into permanent multi-unit housing standards.¹⁰ Furthermore, Housing Element Program HE-10 will develop an Affordable Housing Strategy to incentivize deed-restricted affordable housing similar to the way that the AUD Program incentivized market-rate rental housing.

PARKING

Residential parking requirements vary in the City depending on the type of project and where it is located. Figure 4 shows areas of the City that require fewer parking spaces per unit to incentivize more units on infill lots.

¹⁰ <https://santabarbaraca.gov/AUD>

FIGURE 4: REDUCED RESIDENTIAL PARKING AREAS

**Locations in the City with
Reduced Residential Parking Requirements**

Map prepared by City of Santa Barbara, Planning Division, April 2023

Average Unit Size Density Incentive Program (AUD) Projects:

- Within Central Business District: Maximum one per unit. This “unbundled” parking requirement was adopted by City Council in 2020 as a strategy to provide the greatest amount of building flexibility and infill housing incentives in the core downtown area where lots are often built out to the property lines. With this standard, parking spaces can be sold or leased separately from the lease/sale of a unit. Spaces within City-owned parking lots are available nearby as an alternative.
- Outside Central Business District: one per unit for studio, one-bedroom, and two-bedroom units; two per unit for each unit with three or more bedrooms.

Guest parking is not required.

Single and Two-Unit Residential and Condominiums: Two covered spaces per unit. For single unit residential, uncovered parking can be substituted for covered on lots less than 15,000 sq. ft. as follows:

- One covered and One Uncovered Space: Any lot developed with less than 85 percent of the maximum net floor area for the lot;
- Two Uncovered Spaces: Any lot developed with less than 85 percent of the maximum net floor area for the lot, subject to approval by the appropriate Design Review Body, provided a minimum 200 cubic feet of enclosed exterior storage space is provided on-site.

For two-unit residential and condominiums, a minimum of one space per unit must be covered. The City is proposing amendments to the Zoning Ordinance that would eliminate the covered parking requirements, anticipated for adoption in by 2023.

Multi-Unit Residential (outside of AUD): Can be covered or uncovered. The following parking standards are rarely applied because most new multi-unit housing projects are within the AUD Program boundaries. It is anticipated that they will be revised and removed from the Zoning Ordinance when new multi-unit housing standards are adopted.

- Studio: 1 if 600 sq. ft. or less, or 1.25 per unit
- One-bedroom: 1 if 600 sq. ft or less, or 1.5 per unit
- Two or more bedrooms: 2 per unit

Guest Parking: Not required in CBD or for AUD projects. Outside of CBD, none is required for 1-5 units, one space for 6-7 units, and one space per 4 units for 8 or more units.

Accessory Dwelling Units:

- Inland (Title 30): None. Exception of one per unit or bedroom in High Fire Hazard Areas (unless project meets State law exception).
- Coastal (Title 28): One per unit required for consistency with Coastal LUP policies. Exception of no parking required if project meets local and State law criteria.

Parking Exceptions and Reductions:

- Affordable and Senior Housing: Unless further reduced by State law, projects with 100 percent rental units affordable to very low- and low-income households or senior housing may reduce parking to one space per unit. Units restricted to low-income senior housing may further reduce parking to one space for every two units.
- Other Reductions: Required spaces may be further reduced for designated carshare vehicles, electric vehicle charging stations, and parking area improvements.

Assembly Bill 2097 (2022)

AB 2097 prohibits the City from imposing or enforcing minimum automobile parking requirements if the project is located within one-half mile of public transit, which is defined as a major transit stop. According to Santa Barbara County Association of Governments, Santa Barbara County has six locations that qualify as a major transit stop (per transit service levels of October 2022), two of which are in the City of Santa Barbara. The two areas include much of downtown and part of the Coastal Zone, depicted on Figure 3.

Analysis

Most new multi-unit residential development is constructed under the AUD Program with reduced parking incentives or even no parking as an option. While it is generally acknowledged that parking adds costs to a multi-unit residential project, most developers have opted to include parking as a desired amenity for the residents. To further incentivize infill residential development, Housing Element Program HE-1: Facilitating Conversion of Nonresidential Buildings to Housing will provide further parking relief for projects converting from nonresidential to residential in the CBD or if converting a historic resource to residential within one-half mile of a major transit stop.

BUILDING HEIGHT

City residents value the existing historic scale, architectural character, and mountain views. In 1972, City electors approved a charter amendment to limit building height. The building height limitations are reflected in the Zoning Ordinance maximum building heights as follows:

- 30 feet for single and two-unit residential development;
- 45 feet for multi-unit and mixed-use;
- 45 feet or base zone height, whichever is less, for projects within the Upper State Street (USS) Overlay Zone (see Overlay Zones above for more information);
- 48 feet for AUD projects in the C-G or M-C zones, within the Priority Housing Overlay and located within the CBD (adopted in 2020); and
- 60 feet for a Community Benefit Housing Project¹¹ in the C-G or M-C zones that meets the following findings:
 - a. Demonstrated Need. The applicant has adequately demonstrated a need for the project to exceed 45 feet in height that is related to the project's benefit to the community, or due to site

¹¹ Defined as priority housing, housing affordable to very low, moderate, or middle income households, and transitional and supportive housing.

constraints, or in order to achieve desired architectural qualities;

- b. Architecture and Design. The project will be exemplary in its design;
- c. Livability. If the project includes residential units, the project will provide amenities to its residents which ensure the livability of the project with particular attention to good interior design features such as the amount of light and air, or ceiling plate heights; and
- d. Sensitivity to Context. The project design will complement the setting and the character of the neighboring properties with sensitivity to any adjacent federal, state, and City Landmarks or any nearby designated Historic Resources, including City-designated Structures of Merit.

In addition to the height maximums, the City's Solar Access Height Ordinance (Section 30.140.170) may limit height on a portion of new development on the north side of applicable properties. This is to ensure the building does not cast a significant shadow on the neighboring building and adequate access to direct sunlight is provided. Sun access is essential to energy conservation, allowing for passive solar heating and for solar energy systems optimal performance.

Analysis

As shown in the examples in Tables 42 and 43 in the Sites Inventory and Analysis section, the City's height limits have not been shown to constrain housing development because residential and mixed-use projects are able to develop up to maximum density (or higher if using density bonus) within the maximum building heights listed above. Furthermore, four pending and approved projects for a total of 235 units are using the Community Benefit provision, density bonus concessions, or a height exception approval from the Planning Commission to exceed the 45 or 48 foot height limits, as applicable.

Lot Coverage and Open Yard

The City does not have lot coverage standards. In single-unit zones, building size may be limited by the maximum floor area (floor to lot area ratio or FAR) applied to lots smaller than 15,000 square feet and with a building of two or more stories or 17 feet or more in height. On properties larger than 15,000 square feet or single-unit development in multi-unit zones, FAR is applied as a guideline rather than a regulation. If applicable, the maximum FAR is 85 percent and a modification can be requested to exceed maximum FAR. Newly constructed detached ADUs of up to 800 sq. ft., and ADUs created from converting existing structures are not counted in the FAR calculation.

The City requires open yard areas to promote desirable living conditions and useful space for outdoor living. Open yard is comprised of common and private (per unit) open yard space. Private open yard can be located on grade or on a deck, balcony, or patio and can overlap with common open yard. Open yard can be located within the interior setbacks and can be landscaped or hardscaped. Open yard is not required for ADUs and the required open yard for existing or proposed primary units can be reduced to construct an ADU.

In multi-unit residential zones, a minimum of 15 percent of the lot area is for open yard. In nonresidential zones where multi-unit residential is allowed, there is no minimum lot area requirement. Multi-unit residential or mixed-use projects in nonresidential zones can apply to replace or reduce private open yards with a common area provided the proposal meets the following standards and findings:

1. **Minimum Area:** 15% of the net lot area;

2. **Minimum Dimensions:** 10 feet long and 10 feet wide, unless reduced or waived by the Review Authority;
3. **Standards and Location:** Except those for private open yards, all open yard standards and location requirements are met; and
4. **Common Open Yard Area.** At least one area with a minimum dimension of 20 feet long and 20 feet wide, located on the ground or on decks of any height, or on any floor of the structure, that is accessible to all units for use as a common open yard area is provided.
5. **Findings.** Approval may only be granted if the Review Authority finds that:
 - a. The alternative open yard design is necessary to provide flexibility in architectural style or site organization, such as the preservation of natural features, enhanced circulation, shared amenities, or the protection/creation of scenic views; and
 - b. Approval of the alternative open yard design will meet the purpose of the required open yard, as described in this section.

Analysis

The open yard requirement has not been shown to constrain housing development due to the availability of alternative open yard designs, particularly in the nonresidential zones where common open yard is accommodated by rooftop decks and other alternative locations. Further, open yard space can be used to accommodate construction of an ADU.

ZONING FOR A VARIETY OF HOUSING TYPES

State law requires that local land use regulations contain provisions to ensure the ability to develop a variety of housing types that can serve individuals and households with a diverse range of needs.

Definition of a Family

Santa Barbara Municipal Code defines “Family” in the same way it does a “Household”: that is, “one or more persons living together in a single residential unit, with common access to, and common use of, all living areas and all areas and facilities for the preparation and storage of food and who maintain no more than four separate rental agreements for the single residential unit. (Ord. 6047 § 7, 2021; Ord. 6006, 2021)The purpose of limiting the number of separate rental agreements is to allow the City to regulate student housing and boarding houses as “Group Residential” facilities, which includes convents and monasteries, rooming and boarding houses, dormitories and other types of organizational housing intended for long-term occupancy (more than 30 consecutive calendar days) but excludes Hotels and Similar Uses, and State-licensed facilities for Residential Care and Supportive and Transitional Housing.

If more than four persons are living in the unit, tenants can either operate with everyone’s name on the same lease or have a “master tenant” and “subtenant” arrangement, where one person’s name is on the lease and rent is collected from the other tenants. The code does not determine occupancy based on the relationship of residents or restrict the number of individuals residing together based on disability or employment status.

The Coastal Zone (Title 28) has a slightly different definition for “Family”, which it defines as a “single residential unit or a person or group of persons living together as a domestic unit in a single residential unit.”

Reasonable Accommodation Procedures

~~SBMC Chapter 30.520 establishes a process for Modifications that provide a means for granting relief from certain zoning standards. It is the City's policy to comply with the Federal Fair Housing Act, the Americans with Disabilities Act, and the California Fair Employment and Housing Act to provide reasonable accommodation to persons with disabilities seeking fair access to housing through relief from the application of certain zoning regulations such as parking, setbacks, open space, and others. Accessibility guidelines are distributed by City Staff to builders explaining Federal and State laws regarding accessible building codes for housing for persons with disabilities.~~

The City's Municipal Code incorporates reasonable accommodation provisions for persons with disabilities. The Ordinance ensures that persons with disabilities are provided equal access to housing. Specifically, the Municipal Code allows:

- Accessible uncovered parking spaces, access aisles, and accessibility ramps necessary to make an existing building accessible to disabled individuals to encroach into required setbacks.
- All parking areas, except those located in one- and two-unit zones, to provide parking spaces accessible to disabled persons. The conversion of an existing parking space to an accessible parking space or access aisle for an accessible parking space does not require a modification of the parking requirement even if the conversion would result in fewer parking spaces than required.
- Modifications to any zoning standard when necessary to make an existing residential unit accessible to persons with disabilities. For example, encroachments into yard areas for access ramps for disabled persons are allowed without requiring a modification hearing process.

If Zoning Modification approval is required, the review authority for modifications to provide accommodation of disabilities is the Staff Hearing Officer (SHO). The SHO process was created in 2006 to improve and streamline the discretionary review process for smaller, less complex projects. A Modification to allow improvements to an existing structure or site to accommodate individuals with disabilities may be approved if the SHO makes all of the following findings:

1. The project does not include new structures, demolitions or substantial redevelopment and rebuilds, or additions where the proposed project precludes a reasonable accommodation that would not require a Modification;
2. That the property which is the subject of the request for reasonable accommodation will be used by an individual or organization entitled to protection;
3. If the request for accommodation is to provide fair access to housing, that the request for accommodation is necessary to make specific housing available to an individual protected under State or federal law;
4. That the conditions imposed, if any, are necessary to further a compelling public interest and represent the least restrictive means of furthering that interest; and
5. That denial of the requested Modification would conflict with any State or federal statute requiring reasonable accommodation to provide access to housing.

Concentration/Siting Requirements and Permit Requirements for Community Care Facilities~~Group Homes~~

~~Consistent with State law, the City does not have any restrictions on the concentration of community care facilities group homes or other restrictive siting requirements that limit the potential number of these facilities group homes that could be developed within the zones where they are an allowable use, which is any zone in the City that allows residential use.~~

Housing for Persons With Disabilities

~~A Conditional Use Permit (CUP) is not required for Community Care Facilities, Residential Facilities for the Elderly, and Hospices housing six or fewer individuals are allowed by right in all residential, commercial and office, and manufacturing commercial zones.~~

A Performance Standard Permit (PSP) is required for such facilities only in residential zones when housing seven to 12 individuals, while a Conditional Use Permit (CUP) is required when housing more than 12 individuals in all zones. The purpose of the PSP/CUP is to make sure any accessory uses (e.g., recreational facilities, staff offices, etc.) fit into the character of a residential neighborhood. For similar reasons, a PSP is also required for Large Family Day Care Homes and a CUP is required for Group Residential in residential zones.

The required findings for such facilities serving seven or more individuals in a residential zone are:

1. The facility conforms to the extent feasible to the type, character, and appearance of other residential units in the neighborhood in which it is located. This provision shall not restrict the installation of any special features(s) necessary to serve residents with special needs (e.g., ramps, lifts, handrails).
2. The intensity of use in terms of number of people, hours of major activities, and other operational aspects of the proposed facility is compatible with any neighboring residential use.

These Conditional Use Permit and Performance Standard Permit requirements could be considered a constraint and ~~is will be~~ addressed in the Housing Plan Program HE-3: Amend the Zoning Ordinance for Special Needs Housing s-section.

Low Barrier Navigation Centers

AB 101, passed in 2019, requires that a low barrier navigation center be a use allowed by right in mixed-use zones and nonresidential zones permitting multi-unit uses if it meets specified requirements.

The Zoning Ordinance (Title 30 and Title 28) has not been amended to specifically permit low barrier navigation centers in mixed-use and nonresidential zones permitting multi-unit uses. This could be considered a constraint and ~~is will be~~ addressed in the Housing Plan Program HE-3 s-section.

Transitional Housing

Transitional housing facilities are intended to house homeless individuals and families for a longer stay than in emergency shelters. The City's Zoning Ordinance¹² allows transitional housing as a residential

¹² Title 28 uses the term "Group Home", which is intended to include Transitional and Supportive Housing. Title 28 also states "State authorized, licensed, or certified use to the extent it is required by State law to be an allowed use in residential zones."

use subject only to those restrictions that apply to other residential uses of the same type in the same zone.

Supportive Housing

Supportive housing provides on- or offsite services to assist individuals facing obstacles to employment and housing stability. AB 2162 (2018) requires that supportive housing be permitted in zones where multi-unit and mixed-use developments are permitted. Local jurisdictions must also streamline the approval of housing projects containing a specified amount of supportive housing by providing for ministerial approvals, with no requirements for CEQA analysis, conditional use permits, or other discretionary approvals. The City has an online Supplemental Application form available for Supportive Housing Streamlined Approval per AB 2162.

The City's Zoning Ordinance (Titles 28 and 30) allows supportive housing as a residential use subject only to those restrictions that apply to other residential uses of the same type in the same zone.

Emergency Shelters

The City's Zoning Ordinance allows Emergency shelters are allowed in all residential and nonresidential zones, but all zones require a Conditional Use Permit, with the exception of the M-C (Manufacturing Commercial) zone where the use is allowed without a CUP. Currently, there are eight facilities in the City that meet the definition of an emergency shelter, with a capacity of 330 beds. Emergency shelters are subject to all development standards applicable within the zone in which the emergency shelter is located and the following objective development and management standards:

- Capacity: An Emergency Shelter located within the M-C zone may provide a maximum of 100 beds and shall serve no more than 100 homeless persons per night. Capacity in other zones is determined by the Review Authority.
- Length of Stay: 180 consecutive nights
- Intake/Waiting Area: At least 10 square feet of interior intake and waiting space per bed is required.
- Outdoor Area/Activity: Outdoor gathering areas shall be hidden from view or screened. Prospective residents shall not queue on the public right-of-way or parking areas.
- Parking: One parking space for every eight beds and one covered and secure bicycle space for every four beds. Fewer parking spaces may be proposed if a parking study demonstrates that the anticipated parking demand will be satisfied. The required parking shall not be more than that which is required for similar residential or commercial uses within the zone.
- Lighting: Compliance with the City's Lighting Ordinance.
- Concentration of Uses: No emergency shelter or homeless shelter shall be permitted within 300 feet of another Emergency shelter or homeless shelter.
- On-Site Management: On-site management is required at all times the shelter is in operation. A Management Plan for the operation of the shelter must be submitted with the master application, subject to approval by the Community Development Department Director.

- Ability to Pay: No individual or household may be denied Emergency Shelter due to an inability to pay.

Approximately 67 parcels, or a little over 25 acres of land is suitable for housing in the M-C zone, with parcel size ranging from less than one-quarter acre to over three acres. Two sites are vacant, and the remaining sites meet the thresholds for redevelopment in the 6th cycle Housing Element as described in the Suitable Sites Inventory. Emergency shelters are also an allowed use on these parcels.

The City's M-C zone includes two public parks, a large grocery store/retail center, and several Class 2 bikeways. It is within walking distance of downtown, bus routes, and a train station. Some of the area is in a FEMA flood hazard area but the City's floodplain management standards allow for safe development in these areas. Due to the availability of parcels suitable to accommodate emergency shelters and proximity to amenities and services, ~~Therefore~~, the requirement of a CUP in other zones is not considered a constraint.

Recent state law (AB 139 [2019]) also requires that emergency shelters may require parking for employees only, not clients (or beds). The City is not currently in compliance with this parking requirement and will address this issue in ~~the Housing Plan Programs HE-3 section.~~

Employee and Farmworker Housing

The State's Employee Housing Act (Health and Safety Code, § 17000 et seq.) requires that the City define what constitutes "Employee Housing." Employer-sponsored housing is defined in Title 30. govern the standards for the construction, maintenance, use, and occupancy of living quarters, called "employee housing," provided for five or more employees under specified circumstances. Employee housing subject to the Act is privately-operated and does not include government-owned and -operated migrant worker facilities. In general, employee housing is privately-owned housing that houses five or more employees and meets the following:

- Living quarters provided in connection with any work, whether or not rent is involved.
- Housing in a rural area that is:
 - Provided by someone who is not an agricultural employer, and
 - Provided for agricultural workers employed by any agricultural employer.

California Health and Safety Code §17021.5 generally requires employee housing for six or fewer persons to be permitted by right, without a Conditional Use Permit (CUP), in single-unit zones. Employee housing per Health and Safety Code §17021.5 is permitted in single-unit zones under current zoning. Distinct from the State definition above, the City's Zoning Ordinance defines employer-sponsored housing for the purposes of the AUD Program as residential units which are developed, owned, maintained, and initially sold or rented to employees of a local employer (or group of employers) where each residential unit is occupied as a primary residence by a household that includes at least one person who works in the south coast region of Santa Barbara County.

Health and Safety Code § 17021.6 considers agricultural employee housing with no more than 12 units or 36 beds an agricultural land use and no CUP, zoning variance, or other discretionary zoning clearance shall be required of this employee housing that is not required of any other agricultural activity in the same zone. Further, Health and Safety Code §17021.8 requires streamlined approval for farmworker housing on land zoned primarily for agricultural uses.

The City does not have any agricultural zoning districts, so these provisions do not generally apply. The City will amend the Zoning Ordinance to clarify that agriculture is an accessory use in any zone; thus, clarifying that Health and Safety Code §17021.8 not applicable. Recognizing that the City's definition of a family/household noted above, which limits the number of separate rental agreements in a single unit to four, could be considered a barrier, the City will amend the Zoning Ordinance to clarify that employee and farmworker housing is excluded from the Group Residential use classification and will add definitions for employee and farmworker housing consistent with State law. This is addressed in Housing Program HE-3.

FARMWORKER HOUSING

~~California Health and Safety Code §17021.5 and §17021.6 generally require agricultural employee housing to be permitted by right, without a Conditional Use Permit (CUP), in single-unit zones for six or fewer persons and in agricultural zones with no more than 12 units or 36 beds. Further, Health and Safety Code §17021.8 requires streamlined approval for farmworker housing on land zoned primarily for agricultural uses.~~

~~The Zoning Ordinance does not address Health and Safety Code §17021.5, §17021.6, and §17021.8; however, the City does not have any agricultural zoning districts, so these provisions do not generally apply. The City will amend the Zoning Ordinance as applicable to clarify that agriculture is an accessory use in any zone; thus, clarifying that Health and Safety Code §17021.8 not applicable. Recognizing that a small number of agricultural workers could reside in the city, the City will implement a program to make agricultural employee housing for six or fewer persons a use by right, without a CUP, in single-unit zones. This will be addressed in the Housing Plan Programs section.~~

Single-Room Occupancy Units

Single-Room Occupancy (SRO) Units are not a defined use within the City's Zoning Ordinance. However, the City allows a variety of residential unit types to provide a range of housing opportunities. The City does not define SROs specifically because "small units" are treated the same as any other residential unit with the following minimum unit sizes:

- 1 or more bedroom unit must be a minimum of 400 sq. ft.
- Studio units must be a minimum of 220 sq. ft.
- Affordable efficiency unit or ADU must be a minimum of 150 sq. ft.

The City allows the smallest dwelling unit size allowed by the Health and Safety Code; therefore, SROs are also allowed, even if they are not defined as such.

Manufactured Homes

The City's Zoning Ordinance defines a mobile home as including a manufactured home and treats manufactured homes installed on a permanent foundation the same as single-unit residential use.

Mobile Home Parks

Conditional Use Permits are required for Mobile Home Parks in all residential zones. The requirement for a CUP is a reasonable constraint, due to the unique features of parks, such as private infrastructure systems that are developed, operated, and maintained by the park owner, to ensure health and safety for residents.

Accessory Dwelling Units Requirements

Section 30.185.040 (Title 30) and Chapter 28.86 (Title 28) of the Municipal Code define ADUs and JADUs and provide standards for development and maintenance in accordance with California Government Code § 65852.2 and § 65852.22. The City has three different types of J/ADUs, and defines each as follows:

- ADU– An attached or a detached residential unit that provides complete independent living facilities for one or more persons and is located on a lot with a proposed or existing primary residential unit. It shall include permanent provisions for living, sleeping, eating, cooking, and sanitation and be located on the same parcel that the primary residential unit is or will be situated. The following categories of accessory dwelling units are subject to specific development standards:
 - a. *Special Accessory Dwelling Unit.* These are specific types of smaller accessory dwelling units and junior accessory dwelling units with certain size, height, and setback standards described in subsection L [Section 28.86.090], Development Standards for Special Accessory Dwelling Units. Special accessory dwelling units allow for more than one accessory dwelling unit on a lot.
 - b. *Standard Accessory Dwelling Unit.* These are typically larger accessory dwelling units with size, height, and setback standards generally described in subsection G [Section 28.86.055], Development Standards for Standard Accessory Dwelling Units. Standard accessory dwelling units do not allow for more than one accessory dwelling unit on a lot.
- JADU – ~~Defined as a~~ A unit that is no more than 500 square feet in size and contained entirely within the structure of an existing or proposed single residential unit. A junior accessory dwelling unit may include separate sanitation facilities or may share sanitation facilities with the existing or proposed single residential unit and includes an efficiency kitchen.

ADUs are allowed in any zone that allows residential use, located on a lot developed or proposed to be developed with one or more residential units. Certain locations such as lots within the High Fire Hazard Area (Extreme Foothill and Foothill) are limited to the smaller “special” ADUs (800 sq. ft. maximum), as described above.

JADUs are allowed in any zone that allows residential use and shall be located on a lot developed with an existing or proposed single residential unit.

Since the initial ADU Ordinance adoption in 2018, the City has been processing amendments to the ADU Ordinance to comply with changes in State law. The most recent amendments were adopted by City Council in 2023. These amendments to Title 30 and Title 28 include clean-up items for ease of use, new or changed content necessitated by Senate Bill 897 and Assembly Bill 221, effective January 1, 2023, and new or changed content to local standards intended to facilitate the production of ADUs, some of which are noted in Housing Element Program HE-6. City Council adopted amendments to the Title 30 (Inland) and Title 28 (Coastal) ADU ordinance in November 2020. The ordinance amendments were prepared in compliance with the changes in state law. In compliance with State law, the City submitted the ADU Ordinance and any amendments to HCD. Both were submitted to HCD in

~~November 2020.~~ HCD has confirmed receipt but ~~has not~~ did not ~~submitted~~ written comments to the City.

~~Amendments to the Title 28 (Coastal) ADU Ordinance are~~ was submitted to the California Coastal Commission (CCC) for certification as a Local Coastal Program (LCP) amendment ~~in July 2021.~~ The most recent LCP Amendment for the ADU Ordinance was ~~The CCC approved by the CCC~~ it with suggested modifications, ~~and it was certified and became~~ effective in the Coastal Zone as of April 2022. The 2022/2023 amendment to Title 28 will be submitted to the CCC for certification in 2023.

CONSTRAINT AND/OR FUTURE PROGRAM

The preceding discussion of Land Use Controls has identified some potential constraints on housing production. Where noted above, the constraints are will be addressed in ~~the~~ Housing Plan Programs section.

Local Processing and Permit Procedures

There are three types of processing and permitting procedures that may apply to a housing project described in Table 34 below. The steps involved for approval is included in Appendix F, Table F-4: *City Processing and Permit Procedures*.

TABLE 34: PROCESSING AND PERMITTING PROCEDURES

MINISTERIAL	OBJECTIVE	DISCRETIONARY
No discretionary decisions and generally no public hearing. <u>Must apply objective standards</u>	Limited public hearings. Decision based on objective review criteria	Approval of overall project or exceptions requires a discretionary decision
Appeal of permit or ministerial design review (SB-35) only	Appeal of permit, administrative action, and CEQA	Appeal of permit, discretionary action, and CEQA
Mandated planning approval timelines of 90-180 days	Planning approval timelines per Permit Streamlining Act	Planning approval timelines per Permit Streamlining Act
Does not require CEQA review	Requires CEQA review	Requires CEQA review
<u>Examples of ministerial projects:</u> <u>Single-Unit homes, if one-story, less than 17 ft in height, less than 4,000 sq. ft., and not historic or in a special design district. Other projects are exempt from discretionary review if qualify for administrative review</u> <u>Two-Unit Residential eligible for SB-9 streamlining</u> <u>Multi-Unit affordable housing projects eligible for SB-35 streamlining (requires one ministerial design review hearing)</u> <u>Supportive Housing eligible for AB-2162 streamlining</u> <u>Low-Barrier Navigation Centers</u> <u>Accessory Dwelling Units; if no coastal permit is required and meeting all administrative review criteria</u> <u>Conversions, additions, or alterations to existing buildings, if qualify for administrative review</u>	<u>Examples of objective projects:</u> <u>New housing project that complies with applicable objective General Plan, zoning, subdivision, and design review standards eligible for SB-330 streamlining:</u> <u>Multi-Unit Residential (2+units)</u> <u>Mixed-Use (min. 2/3 residential)</u>	<u>Examples of discretionary projects:</u> <u>New Nonresidential</u> <u>New housing project Multi-Unit Residential or Mixed-Use that “opts out” of objective standards</u> <u>Single-Unit homes subject to discretionary review</u> <u>Historic Resources</u> <u>Land use decision or entitlement: (Coastal Development Permit, Conditional Use Permit, Development Plan, Subdivision, Modification, etc.)</u>

The following provides a review of the local processing and permit procedures that could be applicable to housing development projects. Depending on project characteristics, projects may not be subject to all of the procedures described below.

DESIGN REVIEW

Multi-Unit and Mixed-Use Housing

The City Charter established the Architectural Board of Review (ABR) and Historic Landmarks Commission (HLC). The purview for each review body is included in the Charter and cannot be revised without a majority vote of the people. ~~All~~ Most new or expanded multi-unit housing developments require some level of design review (Full Board, Consent Agenda, or Administrative Approval). If the project is located in El Pueblo Viejo Landmark District Overlay Zone, one of the Historic Districts, or involves a designated or potential historic resource, the project is subject to review and approval by the HLC. All other two- or multi-unit housing projects are subject to review and approval by the ABR.

Single-Unit Residential

New or altered single-unit residential development is subject to review and approval by the Single Family Design Board (SFDB) if any of the following certain criteria are met: (e.g., sloping lot, significant grading, two-story volume, larger than 4,000 sq. ft.).

- The property is located in the Hillside Design District and it is over 20 percent slope or over 50 cubic yards (cy) of grading is proposed.
- The property is located in the Mission Area Special Design District or the Lower Riviera Survey Area.
- The project is over 17 feet in height or 2+ stories.
- The project exceeds 4,000 square feet.
- The project requires an FAR Modification.
- The project is a manufactured home.
- The building is relocated from another lot.
- Over 250 cubic yards of grading is proposed (in areas outside the Hillside Design District).
- The project is also proposing 3 or more parking spaces, or uncovered parking, or over 500 square feet of detached accessory buildings at the same time.
- The project requires an exception to standards (i.e., a minor zoning exception).
- The project is proposing certain retaining walls at the same time (walls over 6 feet in height, or walls on 15 percent slope, or on an ocean bluff, or in the front yard greater than 42 inches in height).

Design Review Process

The Municipal Code and related HLC, ABR, and SFDB guidelines establish a two-part project approval process: Concept Review and Final Design Approval. Generally, applicants of larger or unique projects submit for Concept Review first to receive general comments on the mass, bulk, scale, and architectural style of the project. AUD Program projects located on lots 15,000 square feet or greater and within the High Density area are required to receive a Concept Review at both the applicable design review body and the Planning Commission prior to the application being deemed complete. No formal action is taken at the hearing and recommendations are considered advisory only. Concept Review at both the applicable design review body and the Planning Commission prior to the application being deemed complete is optional except for the following projects:

1. Planned Unit Development (PUD) Overlay Zone
2. AUD Program projects when all of the following conditions apply:
 - The project does not require another discretionary approval by the Planning Commission;
 - The project site has a combined lot area of 15,000 square feet or greater; and
 - The project site includes a lot within a High Density Residential land use designation or under the Priority Housing Overlay.

Once an application has been deemed complete and an environmental determination has been made, a project is scheduled for Project Design Approval (PDA). A decision to grant Project Design Approval by the HLC, ABR, or SFDB is an appealable action. After PDA is granted and construction details, colors, materials, lighting, and landscaping are finalized, the project returns to the HLC, ABR, or SFDB for Final Approval. That action is also appealable, but grounds for appeal are limited to whether the final plans substantially conform to the plans that received PDA.

Design Guidelines

The City's Design Guidelines establish a set of goals, values, and qualities by which projects are evaluated in design review. The existing Design Guidelines provide detailed direction for specific areas and types of projects. Not all guideline techniques or approaches are appropriate or practical for every project. In cases where sets of multiple design guidelines apply, the guidelines are viewed as "layers" where the most specific guidelines take precedence.

While the guidelines listed below are mainly subjective, the City has adopted architectural design criteria for ADUs in the Zoning Ordinance and Objective Design Standards for Streamlined Housing Projects specifically for Senate Bill 35 projects. Housing Element Program HE-7 Objective Design Standards will provide an objective standard review option for all multi-unit housing, anticipated for adoption in late 2023.

Board and Commission Guidelines: The Architectural Board of Review, Historic Landmarks Commission, and Single Family Design Board each have General Design Guidelines and Meeting Procedures documents. They are intended to clarify the goals and policies. Infill Design Guidelines were added to the HLC and ABR Guidelines in 2017. Other guidelines specific to residential development include the following:

El Pueblo Viejo (EPV) Landmark District Guidelines. These guidelines clarify the design criteria and procedures for the EPV district.

Haley-Milpas Design Manual. The purpose of these guidelines is to assist developers in the Haley-Milpas area to improve the appearance of their properties, provide a more human-scaled and pedestrian environment, and encourage mixed-use.

Lower Riviera Special Design District Guidelines. These guidelines direct development within and adjacent to the Bungalow District to be compatible with the existing architectural character.

Upper State Street Area Design Guidelines. These guidelines describe different neighborhoods and provide guidance for compatibility and landscaping.

Urban Design Guidelines. These apply to the urban grid to ensure that traditional design principles and pedestrian friendly design concepts are incorporated into development.

Single Family Residence Design Guidelines. These guidelines assist the public in designing compatible single unit residential development.

Historic Resources Design Guidelines. For owners of historic resources, these guidelines assist in development of successful alterations, additions, and new construction next to a historic resource.

Project Compatibility Findings

Findings required for approval of the design of a proposed single unit or multi-unit and mixed-use housing project are specific to the review body responsible for approval or denial.

HLC and ABR Project Compatibility Findings

- a. Consistency with Design Guidelines. The design of the project is consistent with design guidelines applicable to the location of the project within the City;
- b. Compatible with Architectural Character of City and Neighborhood. The design of the project is compatible with the desirable architectural qualities and characteristics which are distinctive of Santa Barbara and of the particular neighborhood surrounding the project;
- c. Appropriate Size, Mass, Bulk, Height, and Scale. The size, mass, bulk, height, and scale of the project is appropriate for its location and its neighborhood;
- d. Sensitivity to Adjacent Landmarks and Historic Resources. The design of the project is appropriately sensitive to adjacent Federal, State, or City Landmarks or other nearby designated historic resources, including City structures of merit, sites, or natural features;
- e. Public Views of the Ocean and Mountains. The design of the project responds appropriately to established scenic public vistas; or
- f. Use of Open Space and Landscaping. The project includes an appropriate amount of open space and landscaping.

SFDB Neighborhood Preservation Findings

- a. Consistency and Appearance. The proposed development is consistent with the scenic character of the City and will enhance the appearance of the neighborhood.
- b. Compatibility. The proposed development is compatible with the neighborhood, and its size, bulk, and scale are appropriate to the site and neighborhood.
- c. Quality Architecture and Materials. The proposed buildings and structures are designed with quality architectural details. The proposed materials and colors maintain the natural appearance of the ridgeline or hillside.
- d. Trees. The proposed project does not include the removal of or significantly impact any designated Specimen Tree, Historic Tree or Landmark Tree. The proposed project, to the maximum extent feasible, preserves and protects healthy, non-invasive trees with a trunk diameter of four inches or more measured four feet above natural grade. If the project includes the removal of any healthy, non-invasive tree with a diameter of four inches or more measured four feet above natural grade, the project includes a plan to mitigate the impact of such removal by planting replacement trees in accordance with applicable tree replacement ratios.
- e. Health, Safety, and Welfare. The public health, safety, and welfare are appropriately protected and preserved.
- f. Good Neighbor Guidelines. The project generally complies with the Good Neighbor Guidelines regarding privacy, landscaping, noise and lighting.
- g. Public Views. The development, including proposed structures and grading, preserves significant public scenic views of and from the hillside.

Noticing

Most new or expanded multi-unit residential and new single-unit developments require a mailed notice prior to the initial Concept Review for the project and again when the project is scheduled for Project Design Approval. The notice is sent at least ten days in advance of the hearing to owners and tenants within 300 feet of the project site. Although this noticing may be viewed as extending the application process, the City believes that by engaging interested parties at the early stages in the process, this ultimately helps to reduce appeals at the Final Approval stage and the resulting delays; thus, this does not pose an undue constraint to housing production.

Objective Design and Development Standards for Multi-Unit Housing

The State Legislature has enacted several bills that require jurisdictions to adopt objective design standards. First, under the Housing Accountability Act, a housing development may only be denied or reduced in density if it is inconsistent with objective standards. Senate Bill 330, Housing Crisis Act of 2019, prohibits cities and counties from adopting standards that reduce residential development capacity and imposing or enforcing new design standards established on or after January 1, 2020, that are not objective design standards. The City has not denied or reduced the density of a housing development or imposed or enforced new design guidelines that are not objective since the passage of these acts.

In 2021, the City adopted Objective Design Standards for Streamlined Housing Projects proposed under Senate Bill 35 (see below). As a follow up effort, the City is currently working on objective design and development standards for multi-unit housing, including two-unit residential, multi-unit residential, mixed-use with at least 2/3 footage designated for residential, transitional and supportive housing, emergency shelters, and employee housing that meets all eligibility criteria per the Government Code. Adoption of these standards is included in Housing Element Program HE-7: Objective Design Standards; with adoption anticipated in 2023. The City is also (as of 2022) exploring amendments to multi-unit housing standards to further incentivize housing and create more objective standards, including adaptive reuse, revising open yard, landscaping, and parking standards, and creating a land use approval from the Planning Commission. These amendments are currently in process and are scheduled for completion in 2023.

Objective Development Standards for Single Unit Development

For single unit housing, there is no plan for additional objective design standards, other than the recently adopted ordinance to implement SB 9 (2021) (Government Code §65852.21) in single-unit zones (SBMC 30.185.440) and the objective design standards for Accessory Dwelling Units applicable to single-unit development. Although this could be considered a constraint, the City contains very few vacant parcels to accommodate new single-unit development that would potentially benefit from additional objective development standards. The overwhelming majority of single-unit projects subject to discretionary review by the SFDB involve additions, remodels, or demolition and rebuild of existing homes and do not generate net new units. Therefore, the effort to develop additional objective standards for the purposes of producing new single-unit residences would outweigh the benefit, and it is not recommended.

City Charter

The City's Charter (Sections 814 and 817) mandates design review and approval authority to the ABR and HLC. This means that even when Objective Design Standards are adopted, the ABR or HLC still need to approve or disapprove multi-unit housing projects.

Analysis of Municipal Code and Related Guidelines

Subjecting new and expanded residential projects to multiple concept reviews and two appealable actions by either the HLC, ABR, or SFDB could extend the overall timeline for a project to receive required Planning approvals and add unforeseen costs. This could be considered a constraint and is will be addressed in the Housing Plan Programs HE-5: Process Improvements and HE-7: Objective Design Standards-section.

ENVIRONMENTAL REVIEW

Regarding environmental review, in most cases the City uses the California Environmental Quality Act (CEQA) infill exemption for projects that are less than five acres in size and do not require a land use/zoning change. In rare cases where a Categorical Exemption doesn't apply, the City looks at other options or tiers off the General Plan Program EIR, and completes an environmental checklist. The Program EIR being prepared for the 2023-2031 Housing Element will provide an opportunity for applicable project to tier from the programmatic analysis.

The City identifies required technical studies and other potential environmental issues as part of the project application review stage, which can result in requiring additional environmental information or case-by-case studies as part of project completeness. The purpose is to conform with the Master Environmental Assessment process and General Plan policies, and to ensure issues are identified early and can fit within a CEQA exemption. This step can result in delays prior to the application being deemed complete and is likely reflected in the time it takes to get from application submittal to a complete application, but it eliminates environmental delay after the project is complete. This could be considered a constraint and is addressed in Housing Program HE-9: Resource Protection and Development Certainty. This program would replace case-by-case studies with cumulative area-wide analyses that cover multiple potential projects at one time, such as establishing measurable inland creek setback standards to protect public health and safety and riparian habitat. This would reduce the need for site-specific technical studies and streamline the environmental review process for projects, while ensuring the protection of environmental resources.

COASTAL ZONE/COASTAL DEVELOPMENT PERMIT

If the project is in the Coastal Zone and meets the definition of "development", it will also require a Coastal Development Permit (CDP) prior to the building permit unless it is categorically excluded from the CDP requirements per the City's Categorical Exclusion Order as follows:

- Conversion of any existing multi-unit residential structure to a time-share project;
- Construction of one single unit residence on an existing vacant parcel in the area designated as Non-Appealable on the Post-LCP Certification Permit and Appeal Jurisdiction Map; and
- Demolition and reconstruction of an existing single unit residence in the non-appealable zone (unless the lot contains certain coastal resources).

Projects proposed on coastal bluff lots, which are all zoned for low density, single-unit development, require a CDP and are charged higher permit fees due to the potential hazard of bluff failure coupled with sea level rise and required coastal bluff edge development buffer calculations. Most bluff-top parcels are developed with single-unit homes and the majority of permit applications are for remodeling or demo rebuilds.

Coastal Development Permit review is conducted by either the Planning Commission, the Staff Hearing Officer, or the California Coastal Commission (where the Coastal Commission retains permit authority). A CDP may take 6 to 12 months or longer to be processed, but the CDP is processed concurrently with other required discretionary applications and does not add to the timeline. As noted earlier, the AUD Program is not certified for use in the Coastal Zone and the City processes very few, if any, multi-unit development projects in the Coastal Zone.

In 2022, the City streamlined the review process for accessory dwelling units (ADUs) in the Coastal Zone that require a CDP. Now, fewer departments review the application, and a simplified staff report has been will be launched in July 2022 to speed the process of getting on the Staff Hearing Officer's agenda. Also, no public hearing is required per SBMC §28.44.110.C.

While the City adheres to Permit Streamlining Act timelines for its local approvals process, it is also required to comply with CEQA and the Coastal Act processes and procedures and has little control over the time required to meet statutory requirements for review and analysis of projects that are subject to these State laws.

LOCALLY ADOPTED ORDINANCES AND POLICIES

Nonresidential Growth Management Program

In 2013, the City adopted a Nonresidential Growth Management Program (GMP) in the Zoning Ordinances (Title 28 and Title 30) to prioritize the development of housing over nonresidential development. The GMP restricts the amount of new nonresidential floor area from 2013 to 2033 to 1.35 million square feet. Allowable nonresidential floor area is allocated from the following categories:

- Community Benefit (project with a broad public benefit) - 600,000 sq. Ft.
- Small Addition Floor Area – 400,000 sq. Ft.
- Vacant Property – 350,000 sq. Ft.

Property owners faced with limited commercial development potential under the GMP are encouraged to pursue mixed-use development projects. The GMP allocations for nonresidential floor area have been adequate and there are many successful examples of buildings with retail/commercial space on the ground floor with residential units above.

Population Goal

In 1975, the City adopted a General Plan amendment with the objective of reducing the potential population of the City to approximately 85,000 to achieve a population that could be sustained by existing and proposed resources, such as water supply, traffic and parking capacity, and wastewater treatment capacity. The objective was implemented by limited potential residential buildout and downzoning. The downzoning was the initial step towards a concept which was later referred to as "living within resources". Since then, it has been acknowledged that a limit on the number of residents or the number of dwelling units in the City is not desired or acceptable and the policy has shifted to

balancing jobs and housing, implementing the GMP, and preserving and creating residential opportunities for all economic groups. City Charter Section 1507 (approved by election held in 1982) sets the goal of land development not exceeding public services and physical and natural resources and balancing residential and commercial development, without reference to a population goal.

Short-Term Rentals

The City does not have a short-term rental ordinance but it regulates short-term rentals as hotels and allows them in zones where hotel uses are allowed. In the inland portion of the City, this includes the Residential Multi-Unit and Hotel (R-MH), Commercial Restricted (C-R), Commercial General (C-G), and Manufacturing Commercial (M-C) zones. In the Coastal Zone portion of the City, this includes the Hotel-Motel-Multiple Residence (R-4), Restricted Commercial (C-L, C-P, and C-1), Commercial (C-2), Commercial Manufacturing (C-M), Hotel and Related Commerce I (HRC-1), Hotel and Related Commerce II (HRC-2), Hotel and Related Commerce II / Ocean-Oriented Commercial (HRC-2/OC), and Light Manufacturing (M-1) zones.

Short-term rentals are currently considered a non-residential use, and applicants must go through a Change of Use process that varies in complexity based on the number of existing residential units, the amount of square footage converted from residential to nonresidential use, and whether the property is in the Coastal Zone portion of the City. Projects with more than one unit are subject to the Hotel Conversion Ordinance. Short-term rentals must have a business license, are subject to the square footage limits in the City's Nonresidential Growth Management Program, must have at least one parking space per bedroom, are not eligible for the residential permit parking program, must comply with zoning setbacks, are subject to the Tenant Displacement Assistance Ordinance, may need to have a separate water meter and pay commercial rates, and may need to go through a discretionary review permitting process.

Inclusionary Housing

The City adopted its Inclusionary Housing Ordinance (IHO) for ownership projects in 2004 (Chapter 30.160). The IHO is intended to encourage housing opportunities for a broad range of households with varying income levels, promote the City's goal to add affordable housing units to the existing housing stock, and increase the availability of housing for middle- and upper-middle-income households. Further, the IHO encouraged the development of housing for first-time homebuyers, particularly moderate- and middle-income households.

The City's ownership IHO requires projects with ten or more units (excluding any density bonus units), provide at least 15 percent of the total units as inclusionary units offered for sale at prices affordable to middle-income (up to 160 percent AMI) or upper-middle-income (up to 200 percent AMI) households or, in the case of residential lot subdivisions, for the construction of single unit homes for upper-middle income households. The inclusionary units are in addition to density allowed by right on the site, and therefore a lot area modification is not required to exceed density.

In 2009, the IHO was amended to require in-lieu fees for projects of two to nine units or the developer can provide one unit as an owner-occupied middle-income restricted unit. The in-lieu fee is pro-rated based on the number and size of the proposed units.

In 2019, City Council adopted Inclusionary Housing requirements for the AUD rental projects Program (Chapter 30.150) to require: 1) AUD Program projects of ten units or more to provide at least ten

percent of the units onsite at rental rates affordable to moderate-income level households; and 2) AUD Program projects with five to nine units to build one unit affordable to moderate-income level households or pay a \$25 per square foot in-lieu fee.

Since July 2019, 11 inclusionary units have been approved and 25 are pending.

Collected in-lieu fees are allocated to a reserve account intended to increase and improve the supply of deed-restricted affordable housing and ensure compliance with the City's Affordable Housing Policies and Procedures. Since Fiscal Year 2011, a total of \$768,959 added to the account and the current fund balance is \$675,000.

~~For owner-occupied housing, the City requires that residential developments with ten or more units provide at least 15 percent of the total units offered for sale as Inclusionary Units restricted for owner-occupancy by middle income households, or, in the case of Residential Lot Subdivisions for the construction of single-unit homes, by upper-middle income households.~~

SENATE BILL 35 (2017) MANDATED STREAMLINING FOR AFFORDABLE HOUSING

SB 35 (2017) requires jurisdictions that have failed to approve housing projects sufficient to meet their State-mandated RHNA to provide streamlined, ministerial entitlement process for housing developments that incorporate affordable housing. Per SB 35 (2017), review and approval of proposed projects with at least 50 percent affordability must be based on objective standards and cannot be based on subjective design guidelines.

The local jurisdiction must approve the project within 60 days of submittal of an application for 150 or fewer housing units, or within 90 days of submittal of an application for more than 150 units.

The Zoning Ordinance (Title 30) was amended in 2021 to include procedures for SB 35 projects (Affordable Housing Streamlined Approval) and the City adopted Objective Design Standards for Streamlined Housing Projects. A Supplemental Application with eligibility and design standards checklists is available online for SB-35 projects. At the time of this analysis, the City had not received any applications for projects that were eligible for SB 35 (2017) streamlining.

SENATE BILL 330 (2019) PROCESSING PROCEDURES

SB 330 (2019), the Housing Crisis Act of 2019, established specific requirements and limitations on development application procedures in "affected cities". Santa Barbara is considered an affected city. The bill allows a housing developer to submit a "preliminary application" to a local agency for a housing development project. Submittal of a preliminary application allows a developer to provide a specific subset of information on the proposed housing development before providing the full amount of information required by the local government for a housing development application. Submittal of the preliminary application secures the applicable development standards and fees adopted at that time. The project is considered vested and all fees and standards are frozen, unless the project changes substantially (by 20 percent or more of the residential unit count or square footage) or the applicant fails to timely submit a complete application as required by the Permit Streamlining Act.

Each jurisdiction may develop their own preliminary application form or may use the application form developed by HCD. In addition, the bill limits the application review process to 30 days, for projects less than 150 units, and 60 days, for projects greater than 150 units, and no more than five total public hearings, including Planning Commission, design review, and City Council.

The City of Santa Barbara has established a Preliminary Housing Development (SB 330) pre-application form online preliminary application process for residential development pursuant to SB 330 (2019).

AVERAGE TIME FROM APPLICATION SUBMITTAL TO PLANNING APPROVAL

Multi-Unit Residential Development

Based on data from 2013 – 2021, the average time for projects proposed under the AUD program (multi-unit rental and ownership, total of 73 projects) from application submittal to planning approval is 322 days. This includes the time when projects are undergoing concept review or when the plans are returned to the applicant for more information before the applications are deemed complete and scheduled for a hearing. Once applications are deemed complete, the City adheres to Permit Streamlining Act timelines.

Table 35 depicts a sample development timeline for a residential project which includes 14 new duplex units in an AUD Medium High Zone, outside of the Coastal Zone. This discretionary project required Concept Review and Final Design Approval by the Architectural Board of Review. The application took 307 days from the application received to project design approval. The applicant applied for a building permit in May 2021 and it was issued in February 2022.

TABLE 35: EXAMPLE MULTI-UNIT RESIDENTIAL PERMIT APPROVAL DEVELOPMENT TIMELINE

Approval Granted	
City of Santa Barbara. 2022; BAE, 2022.	

Single-Unit Residential Development

Based on data from 2013 – 2022, the average time from application submittal to approval of a single-unit home is 193 days (total of 47 projects). This includes the time when plans are returned to the

applicant for more information before they are deemed complete. Table 36 depicts the approval timeline for a two-story, single-unit project in the Hillside Design District and located in the non-appealable area of the Coastal Zone. The project included an attached 420 sq. ft. ADU. This discretionary project required Final Design Approval by the Single Family Design Board and was categorically excluded from needing a Coastal Development Permit. While the original approval time was five months, the applicant subsequently revised the plans twice and returned to SFDB for final project design approval, adding eight months to the approval timeline.

Accessory Dwelling Units

Based on data since 2017, the average time from application submittal to a building permit for ADUs is 232 days (415 permits). As a ministerial permit, details are not available for these projects. City staff adhere to ADU building permit approval timelines specified in State law. Staff have noted that nearly all ADU permit applications are initially returned to the applicant because the application is incomplete. Housing Element Program HE-6 will evaluate the ADU permit application process and look for ways to clarify and simplify the application process to reduce the time it takes to get a building permit, including use of pre-approved plans.

CONSTRAINT AND/OR FUTURE PROGRAM

The review of local permit and processing procedures has identified a limited number of local regulations that could be construed as undue constraints on housing production. The City is either already in the process of making changes to address constraints or it will address the constraint in the Housing Plan Programs section, as noted above.

On- and Off-site Improvement Standards

The City requires new, expanded, or redeveloped residential projects to comply with certain on-and off-site improvement standards for quality of life, environmental, or public health and safety reasons.

ON-SITE IMPROVEMENT STANDARDS

On-site standards include, but are not limited to, the undergrounding of any utility and/or Cable TV connections; visual screening for mechanical equipment; capturing storm water; enclosed bicycle

parking; covered vehicle parking (for single-unit dwellings and duplexes); and dimension of driveways. Certain standards can be waived; for example, the Municipal Code provides hardship waivers for undergrounding of utilities.

SUBDIVISION IMPROVEMENT STANDARDS

The City's Subdivision Ordinance (Title 27) carries out the requirements of the Subdivision Map Act and regulates the design and improvement of the subdivision of land. Title 27 is applied to subdivision of new land, urban lots splits per SB 9, new condominiums, and condo conversions. Because there are few large remaining undeveloped parcels in the City, land that is subdivided physically into more than 2-4 single unit lots is rare. The Staff Hearing Officer is the Advisory Agency for most subdivisions of four parcels or fewer, the Planning Commission is the Advisory Agency for larger subdivisions.

In 1975, City Council adopted by resolution Interim Subdivision Design and Improvement Standards that are still in use. They include objective standards for flood control, grading, lighting, lots and blocks, monuments, streets and roads, and utilities. Certain subdivision standards can be waived upon a finding that the waiver "will be in the best interest of the City and will improve the quality of the design of the subdivision" made by the Planning Commission or City Council.

The City requires each lot created by a subdivision to front upon a public street constructed to applicable standards (minimum width of 32 feet), unless the lot is served by a private road, lane, drive or driveway which serves no more than two lots, or the Planning Commission or City Council waives the requirement.

BICYCLE PARKING

Parking regulations are detailed in the Land Use Controls section. In addition to automobile parking, the City requires one covered and secure bicycle parking space per unit for multi-unit housing projects of 3 or more units. This requirement helps the City meet sustainable transportation and greenhouse gas emissions reduction goals. The number of bicycle parking spaces can be reduced or waived if the Public Works Director finds that:

- Adequate site space is not available on an existing development to provide bicycle parking;
- Reduced bicycle parking is justified by reasonably anticipated demand; or
- Other criteria based on unusual or specific circumstances of the particular case as deemed appropriate by the Public Works Director.

STORM WATER MANAGEMENT PROGRAM

The City's Storm Water Management Program (SWMP) details how the City will protect water quality by listing a series of Best Management Practices (BMPs) and Measurable Goals that the City must meet each year. Urban storm water runoff is the single largest source of surface water pollution in Santa Barbara and the City has been implementing a SWMP since 2006 in compliance with the prior General Permit from the state. All projects that propose new and/or replaced impervious area or qualify as a public improvement in the right-of-way are reviewed for compliance with the SWMP requirements. Four project tiers require different levels of post-construction storm water BMP implementation based on square footage of new or replaced impervious surface.

The SWMP was amended in 2021, which resulted in new on-site improvement requirements, such as requiring most projects to install at least one basic permanent storm water protection BMP. Although the new rules capture more Tier 1 and 2 projects (1 – 499 sq. ft. and 500 - 1,999 sq. ft., respectively), BMPs for these tiers can be achieved fairly easily and for minimal cost. Examples of basic BMPs for Tier 1 and 2 projects include disconnecting downspouts to vegetated areas or a rainwater collection system, installing a rainwater garden, and installing rain water barrels.

Tier 3 and 4 projects must meet storm water runoff requirements and use BMPs that target identified pollutants of concern and pollutants identified in the Clean Water Act if the project contributes runoff to one or more of the impaired receiving waters within the City. The new rules are less restrictive in some ways for Tier 3 (2,000 – 14,999 sq. ft.); for example, up to five percent of the impervious area on each parcel is exempt from the Tier 3 treatment requirement. A recent example of a proposed Tier 3 BMP includes permeable pavers and stormwater runoff collection systems to catch basins inlet, and landscape planter areas for the site and on the roof (project with three merged parcels and 78 residential units). The new Tier 4 (15,000 sq. ft. or more of new or replaced impervious surface) is more restrictive. To date, no Tier 4 projects have received building permits. Strategies to comply with the Tier 4 requirements are similar to Tier 3 and include routing runoff from impervious areas to biofiltrations BMPs incorporated into pervious landscaped areas of the sites or a combination of permeable pavement and underground infiltration BMPs (e.g., infiltration trench).

OFF-SITE IMPROVEMENTS

With respect to off-site improvements, projects in certain zones require that sidewalks have a minimum width of five feet (if adjacent to streets with a right-of-way width of 60 feet or less), or six feet if the adjacent street is wider. The City may also require street lights or tree planting according to the Master Street Tree Plan within parkway strips.

Residential and mixed-use projects in all zones (except areas zoned for single units and duplexes) that abut a public street or right-of-way for public street purposes are required to dedicate and improve one-half of the public street or right-of-way to meet street improvement standards detailed in Title 22 of the Municipal Code.

CONSTRAINT AND/OR FUTURE PROGRAM

Most of the on-and off-site improvements are standard requirements and do not constrain the development of housing. Regarding covered parking, the City is proposing removal of this standard as part of a package of amendments to the Zoning Ordinance multi-unit housing standards (discussed above). While compliance with SWMP is sometimes cited as problematic by applicants, particularly for redevelopment projects in the City's downtown core where buildings occupy most if not all of the lot area, compliance is required by the state General Permit, as well as additional requirements set by the Central Coast Regional Water Quality Control Board, and the Santa Barbara County Flood Control and Water Conservation District, and the examples above show that compliance is achievable. ~~The City is preparing a State Street Master Plan which could evaluate creative solutions for complying with SWMP in order to encourage more housing downtown.~~

Other City Regulations

Aside from land use controls and project review and permitting processes, some other City regulations can impact housing development.

NATURAL GAS INFRASTRUCTURE PROHIBITION

Natural gas is prohibited in newly constructed buildings within the City of Santa Barbara as of January 1, 2022. In some cases, significant rehabilitation is defined as a new building. More information is available here: <https://sustainability.santabarbaraca.gov/climate-actions>. Elimination of the need to provide natural gas connections to homes and to pipe homes for natural gas will reduce construction costs for new housing; thus, this Municipal Code requirement will not act as a constraint on new housing production.

APPLICATION OF BUILDING CODES

The City of Santa Barbara generally adopts the State's Building Code as required, with some local amendments. Local amendments are typically kept to a minimum and are designed to address local conditions. For example, in 2019, the City coordinated adoption of the Building Code with adoption of the state and international Fire Code to eliminate potential conflicts and incorporate administrative, climatic, geologic, and topographic amendments that promote safe, sustainable, and accessible development.

In 2022, the State completed amendments to the codes, which the City adopted by reference with a couple of local amendments from the 2019 code adoption. As in the past, the local amendments to the code are kept to a minimum and are coordinated with the City Fire Department. This cycle, the City adopted minor edits to the Building and Fire Board of Appeals procedures, fire protection systems, and high fire hazard area construction requirements. There is no evidence that the minor local building code amendments impacts housing supply.

Residential code enforcement is almost entirely complaint driven, rarely from City-identified health, safety, or general welfare violations. Enforcement staff refers affected renters to the City's Rental Housing Mediation Program staff or local nonprofits, such as Legal Aid Foundation, when appropriate. Planning and Building and Safety staff assist in resolution of violations with meetings, public counter visits, phone, and email assistance in identifying options for correction of code violations.

FEES

The City charges a modest level of Planning Application and building permit fees which are set at levels to cover the City's costs of providing the necessary services to new development projects. Importantly, the City does not charge any development impact fees for community infrastructure such as roads, public buildings and facilities, parks and open space, or utility infrastructure. In addition to City fees, the Santa Barbara Unified School District has adopted the levying of these fees in accordance with Assembly Bill 2926, Statutes of 1986, State of California. For residential development projects, the fee is \$3.79 per square foot.

Following are fee amount samples for representative single-unit, accessory dwelling units (ADU), and multi-unit housing projects, and other planning fees. These fees are based on specific projects and serve as one example of planning application and building permit fees applied to housing development.

Not included in these fee amount samples are fees associated with water and sewer connections (i.e., water and sewer capacity charge, water meter install, and sewer lateral install, not including contractor charges). These fees vary depending on multiple factors. Water and sewer connection fees for a sample multi-unit project (seven units) is approximately \$12,059 per unit (based on Fiscal Year 2023 fees), assuming a dedicated City water meter for each unit, and a dedicated irrigation meter. Price per

unit for larger projects can be less assuming a single offsite City meter with private submeters onsite. The water and sewer connection fees for a new single-unit project is approximately \$19,775. ADUs do not need a dedicated city water meter but a new ADU often triggers the Sewer Lateral Inspection Program and occasionally the sewer lateral needs repairing to accommodate the ADU.

In accordance with the provisions of Gov. Code § 65940.1(a)(1)(A), the City has published a comprehensive list of Adopted City Fees (both current and historic) that can be found on the City's website [here](#).

In summary, fees charged for housing development reflect the cost to provide required services to support new housing development. Due to the lack of public facilities impact fees, the City's overall level of housing fees is quite low and does not pose a constraint to housing development.

Table 37 shows the fee schedule sample for a single-unit development project, located outside the Coastal Zone. If this project were in the Coastal Zone (not on the coastal bluff), the total fee would increase by approximately 65 percent to cover the additional staff time necessary to process a Coastal Development Permit. As noted earlier, projects on the coastal bluff require an extensive coastal hazard analysis that further increases staff time and cost.

TABLE 37: FEE SCHEDULE SAMPLE FOR SINGLE-UNIT DEVELOPMENT

Project Description	
Number of Units	1
Number of Square Feet (including garage)	1,876
Fee Description	FY 2022 Fees
Planning Application Fees	\$3,105
Environmental Review - Exemption	\$395
Single Family Design Board – New Unit on Lots up to 15,000 square feet (sf)	\$2,530
Mailing List Service	\$180
Building Permit Fees	\$11,355
Building Plan Review, Medium (Permit Plan Check & Inspection)	\$217
New R3 Residence Plan Check Fee	\$5, 201
Building Plan Review, Garage	\$1,715
Growth Management/General Plan Update (14% of Total Building Permit Fees)	\$1,207
SB 1473 (2008) ¹³	\$16
Technology Fee (8% of Total Building Permit Fees, used for maintenance, hardware, and upgrades to the permit tracking system)	\$690
Records Management Fee (7% of Planning & Building Fees)	\$821
Zoning Plan Check – New Single Family Residence (SFR)	\$605
Zoning Plan Check – Design Review Compliance	\$345
Public Works (PW) Transportation Adaptive Management Program (AMP)	\$75
Benchmark (per SFR unit, funds traffic model updates)	

¹³ Requires cities and counties to collect a fee on building permit applications, in the amount of \$4 per every \$100,000 in valuation, a portion of which (10 percent) is for administrative costs and code enforcement education, while the remainder is for the Building Standards Commission to fund development of building standards, with an emphasis on efforts associated with green building standards.

Project Description	
PW Engineering Plan Check	\$84
PW Transportation Plan Check	\$217
Fire Department Fee	\$162
School Fees (\$3.79/sf)	\$5,321
Total Fees	\$19,781
Total Fees/Unit	\$19,781
Total Fees/sf (including garage)	\$10.54
City of Santa Barbara, 2022; BAE, 2022.	

Table 38 presents the fee schedule sample for an accessory dwelling unit development ADU created from a converted garage with an addition, located outside the Coastal Zone. If this ADU were in the Coastal Zone (not on a coastal bluff) the fee would increase by approximately 55 percent to cover the additional staff time to process a Coastal Development Permit. As noted earlier, projects on the coastal bluff require an extensive coastal hazard analysis that further increases staff time and cost.

TABLE 38: FEE SCHEDULE SAMPLE FOR ADU DEVELOPMENT

Project Description	
Number of Units	1
Number of Square Feet (including garage)	462
Fee Description	FY 2022 Fees
Planning Application Fees	N/A
Building Permit Fees	\$8,134
Building Plan Review, Medium (Permit Plan Check & Inspection)	\$217
Remodel R3 – up to 300 sf Plan Check Fee	\$1,591
Room Add – up to 300 sf Plan Check Fee	\$2,751
Processing Agreements or Docs	\$420
ADU Sign	\$179
Growth Management/General Plan Update (14% of Total Building Permit Fees)	\$883
SB 1473 (2008)	\$5
Technology Fee (8% of Total Building Permit Fees)	\$504
Records Management Fee (7% of Planning & Building Fees)	\$441
Zoning Plan Check – Multi-Unit New	\$605
PW Transportation AMP Benchmark (per SFR unit)	\$75
PW Engineering Plan Check	\$84
PW Transportation Plan Check	\$217
Fire Department Fee	\$162
School Fees	\$1,751
Total Fees	\$9,885
Total Fees/Unit	\$9,885
Total Fees/sf	\$21.40
City of Santa Barbara, 2022; BAE, 2022.	

Table 39 provides the fee schedule sample for a multi-unit, mixed-use development, located outside the Coastal Zone.

TABLE 39: FEE SCHEDULE SAMPLE FOR MULTI-UNIT DEVELOPMENT

Project Description	
Number of Units	29
Number of Square Feet (including garage)	20,426
Fee Description	FY 2022 Fees
Planning Application Fees	\$16,415
Pre-application Review Team (Voluntary by Applicant)	\$2,955
Environmental Review – Exemption with one study	\$1,065
Architectural Board of Review (ABR)-NR, New 1,001-3,000 sf	\$4,095
ABR-R, New More than 20 New Units	\$8,120
Mailing List Service	\$180

Misc. – Inspection Fee (each 30 minutes)	\$179
Fire Department Fee	\$328
PW Engineering Traffic Control, 1.25 years staging in street & 4 pkg restrictions	\$7,350
PW Engineering Public Improvement Plan Check, Engineer's Estimate = \$69,489	\$11,180
PW Engineering Public Improvement Inspection, Engineer's Estimate = \$69,489	\$5,098
School Fees (\$3.79/sf)	\$77,415
Total Fees	\$182,659
Total Fees/Unit	\$6,299
Total Fees/sf	\$8.94
City of Santa Barbara, 2022; BAE, 2022.	

Table 40 provides fees for other planning services not listed above. These fees are only charged when applicable to a particular project.

TABLE 40: PLANNING DIVISION FEES

Fee Description	FY 2023 Fees
<u>General Plan Amendment or Zone Change</u>	<u>\$15,000 initial deposit with actual costs charged at the fully allocated hourly rates of all personnel involved, plus any outside costs</u>
<u>Local Coastal Plan Amendment</u>	<u>\$20,000 initial deposit with actual costs charged at the fully allocated hourly rates of all personnel involved, plus any outside costs</u>
<u>Variance</u>	<u>\$10,000 initial deposit with actual costs charged at the fully allocated hourly rates of all personnel involved, plus any outside costs</u>
<u>Conditional Use Permit (CUP)</u>	
<u>Minor CUP and Amendments</u>	<u>\$14,210</u>
<u>Residential Uses (permanent or temporary)</u>	<u>\$15,790</u>
<u>Development that requires a CUP per a specific zone (e.g., Overlay Zone, Specific Plan)</u>	<u>\$15,540</u>
<u>Coastal Zone Review</u>	
<u>ADU on bluff-top lot</u>	<u>\$15,940</u>
<u>ADU on all other lots</u>	<u>\$5,495</u>
<u>Other single unit development on a bluff-top lot</u>	<u>\$24,705</u>
<u>Other single unit development on all other lots</u>	<u>\$12,835</u>
<u>2-5 New Units</u>	<u>\$12,835</u>
<u>Over 5 New Units</u>	<u>\$22,315</u>

Non-Governmental Constraints

A variety of non-governmental constraints impact the maintenance, improvement, and development of housing in a community. The Housing Element is required to discuss the availability of financing and development costs such as the price of land and cost of construction.

AVAILABILITY OF FINANCING

The availability of financing is a critical factor that can influence the cost and supply of housing. There are generally two types of financing used in the housing market: (1) capital used for initial site preparation and construction; and (2) capital used to finance the purchase of units by homeowners and investors. Interest rates substantially impact home construction, purchase, and improvement costs. A small fluctuation in rates can make a dramatic difference in the annual income needed to qualify for a loan. While interest rates for development and construction are generally higher than interest rates for home purchase (i.e., mortgages), financing is generally available in the City for new construction, rehabilitation, and refinancing.

While financing is generally available for market-rate development, limited availability of funding to subsidize for affordable projects is a key impediment to the construction of affordable housing, not only in Santa Barbara, but throughout California and the U.S.

COST OF LAND

Typically, land costs account for the largest single component of housing development costs. The variable cost of land is influenced by many factors including location, lot size, zoning, accessibility, availability of services, and existing infrastructure.

A recent study conducted in 2021 by BAE Urban Economics indicated land costs that generally varied by residential zone. BAE used information on recent land sales in Santa Barbara as well as input received during the practitioner interviews. Due to a lack of recent sales of vacant land in Santa Barbara, the analysis focused on recently-completed multi-unit housing development projects in Santa Barbara to identify the sale price for the project sites when each site was purchased prior to redevelopment with residential uses.

Two sales were for properties located in the City's Downtown, both with sale prices above \$200 per site square foot. This is somewhat consistent with the range of \$150 to \$200 per site square foot that practitioners cited during the interview process. On parcels zoned for multi-unit residential uses outside the Downtown, sale records included prices of \$67 and \$63 per site square foot, for two different parcels that sold.

COST OF CONSTRUCTION

Construction costs for residential development are based on the cost of labor and materials, which vary depending on the type of development. Once a vacant parcel is purchased, the contractor is also required to make site improvements before constructing a building on the property. Site improvements can include connections to existing utility systems, rough grading, and installation of water and sewer lines. The cost variation for site improvements depends on the lot size, unit size, and type of residential dwelling. Other factors that can influence costs are the primary infrastructure needed for the site and roadway improvements.

According to construction cost data published by RS Means (2021), the per square foot cost of single-family construction in Santa Barbara is likely to be at minimum approximately \$224 per square foot, including the garage but not including site improvement, labor, and soft costs. Site improvement costs may be approximately \$50,000 per lot; however, this can vary substantially due to contributing factors such as geology and expansive soils conditions that often require that new construction have deepened footings, grade beams, caissons, removal and compaction of soils, and other conditions that drive up costs.

In total, the cost of land, site improvements, and construction of the home itself could add up to around \$1,100,000 for a 2,000 square foot single-unit home. With the addition of financing costs, permits and fees, other soft costs, and a builder profit of approximately ten percent, the cost to a homebuyer could easily exceed \$1.5 million.

For multi-unit development, a study conducted in 2021 by BAE Urban Economics indicated multi-unit hard costs of \$388 per square foot of built space, not including parking hard costs of \$40,000 per podium space. Soft costs such as engineering, architecture, financing, and CEQA costs, as well as City cost-recovery fees for planning, permitting, and entitlements, are equal to 19 percent of hard costs. Taken together, total costs to complete a multi-unit project within the City of Santa Barbara can range from \$310,000 to \$370,000 per door, before accounting for the cost of land and parking. For projects

utilizing podium construction, structured parking is estimated to cost upwards of \$40,000 per space, or \$100 per square foot.

This can translate to anywhere from \$437 to \$447 per square foot of gross building area, inclusive of hard and soft costs.

In recent years, several factors have caused the increased cost of materials, including global trade patterns and federal policy decisions, such as tariffs, as well as state and local regulations, such as building codes. Most recently, the COVID-19 pandemic has also influenced the cost and availability of construction materials. Supply chain disruptions have resulted in project delays and increased costs due to a shortage of construction materials and equipment as well. In addition, labor costs have also increased in recent years, as the labor pool has not kept pace with the increase in demand. Since the recession, California has seen a severe tightening in the construction labor market, especially for workers trained in specific construction trades. The lack of an available labor force drives up the cost of labor and leads to project delays as workers are either unavailable or lost to more profitable projects.

REQUESTS TO DEVELOP HOUSING BELOW IDENTIFIED DENSITIES IN THE SITES INVENTORY

The City did not track requests to develop housing on suitable sites from the 5th Cycle inventory below anticipated densities (at least 20 dwelling units/acre). Due to the capacity available in the 5th Cycle, the City could still fully accommodate unmet RHNA numbers even if an occasional project developed below anticipated density.

TYPICAL TIMEFRAMES BETWEEN APPROVAL FOR A HOUSING DEVELOPMENT PROJECT AND APPLICATION FOR BUILDING PERMITS

Based on a sample of 58 housing projects with planning approval granted in 2013 to 2020, the average time between planning approval and application for a building permit is eight months. Applicants can apply for a building permit plan review immediately after Final Approval is granted by the design review bodies; however, a permit cannot be issued until after the ten-day appeal period has ended. Although the City might be able to offer some incentives for applicants to apply for building permits more quickly or, conversely, create disincentives for applicants to delay building permit applications, City staff's knowledge of local projects indicates that most delays in building permit applications are related to financial considerations that are beyond the City's control.

Environmental Constraints

Environmental constraints to housing development include natural hazards that limit the development potential of land or increase the costs of development due to special construction standards and mitigation measures necessary to reduce the hazard. In the City, environmental constraints that could impact housing development by limiting a site from building at its full development capacity include fire hazards, flooding hazards, coastal hazards from sea level rise, biological resources, cultural resources, historic resources, seismic hazards, and hillsides/slopes. Parcels with significant environmental constraints associated with biological resources, creeks, and historic resources were removed from the suitable sites inventory database as described in the suitable sites methodology section.

FIRE HAZARDS

Wildland fires have been and will continue to be a significant part of Santa Barbara's history. Between 1955 and 2021, 23 major wildfires have occurred in or near the Santa Barbara "front country," which is the area along the south-facing slope of the Santa Ynez Mountains between the Gaviota Pass to the west and the Santa Barbara/Ventura County line to the east. In total, these 23 fires have burned over 1,000,000 acres and resulted in eight fatalities.

The City's Community Wildfire Protection Plan (2021) identifies four distinct high fire hazard areas in the City based on wildfire hazard modeling, mostly in the residential single unit zones of the City. Development within the high fire hazard areas is guided by Title 8 of the Municipal Code, which establishes construction standards, vegetation management, and other methods to reduce fire hazards. While these methods help reduce the hazard, the City is concerned about the impact of increased density in the Foothill and Extreme Foothill High Fire Hazard Areas where roads are narrow and winding, presenting a challenge for safe and speedy evacuation in the event of a fast-moving wildfire. Based on the health and safety concern, the City imposed special development regulations on ADUs and SB 9 (2021) projects in these High Fire Hazard Areas. Only two sites identified for future housing development in the City's suitable sites inventory are in High Fire Hazard Areas.

FLOODING HAZARDS

Four major watersheds drain through the City of Santa Barbara to the Pacific Ocean. The creeks that drain those watersheds include Arroyo Burro Creek, Mission Creek, Sycamore Creek and the Laguna Channel. There is a potential for flooding from these streams in the event of a 100-year flood. The Federal Emergency Management Agency (FEMA) has designated flood hazard zones throughout the City, and areas subject to inundation during a 100-year storm are depicted on Flood Insurance Rate Maps. Development within flood hazard zones is guided by Title 22 of the Municipal Code, which establishes required construction methods to prevent and reduce flood hazards. Sites within floodways were removed from the suitable sites inventory but some sites are within flood hazard zones. Flood hazards are mitigated by compliance with flood resistant design and construction methods.

COASTAL HAZARDS

Coastal hazards due to sea level rise include coastal flooding and inundation, bluff and beach erosion, and wave impacts. The City participates in local, state, and federal efforts to monitor and model projected hazards due to sea level rise and has prepared a Sea Level Rise Adaptation Plan (2021). Potential shoreline hazards are mapped and used as a screening tool to determine if a site-specific technical evaluation is necessary. The Coastal Land Use Plan includes policies and procedures to reduce the impact of coastal hazards on new development.

One single-unit project on the coastal bluff is included in the site inventory as a pending project. Approximately five suitable sites are located in the potential shoreline hazards screening area (Inland Coastal Flooding). Development on these sites will be evaluated for the risk of coastal flooding on a case-by-case basis and could be subject to minimizing the flood risk by increasing the elevation of structures, restricting basements or habitable floor area below grade, and using flood proof materials.

BIOLOGICAL RESOURCES

The City's creeks, wetlands, oak woodlands, and riparian corridors are home to sensitive plant and wildlife species that require additional review, protection, and mitigation when present on a parcel

proposed for development. Potential sensitive habitat areas are mapped and used as a screening tool to determine if site-specific biological resource surveys are necessary. Title 22 of the Municipal Code, the Coastal Land Use Plan, and the Environmental Resources Element of the General Plan includes policies and procedures to protect biological resources. Parcels with known significant biological resources were removed from the suitable sites inventory.

CULTURAL RESOURCES

Evidence of cultural activity in the Santa Barbara area extends over 9,000 years. The indigenous population encountered by the Spanish in the late 1700s were the Barbareño Chumash and populations associated with these peoples are considered to have been some of the highest in California. Development proposed in any area known or suspected to contain archaeological resources or identified as archaeologically sensitive on the City's Archaeological Resources Sensitivity Map, is evaluated to identify potential for important resources and monitored during construction if recommended by a City-Qualified Archaeologist. Housing development projects may be required to evaluate impacts to cultural resources, but this requirement applies to all development and is consistent with federal, state, and City regulations for protecting cultural resources.

HISTORIC RESOURCES

The City has preserved much of its historic past and is known for its distinguished architecture. Many buildings have been designated as City Landmarks or Structures of Merit. Titles 22 and 30 of the Municipal Code and the Historic Resources Element of the General Plan includes policies and procedures for protecting cultural and historic resources. Sites with designated Landmarks or Structures of Merit were removed from the suitable sites inventory.

SEISMIC HAZARDS

Like the entire Southern and Central California region, Santa Barbara is in an area of high seismic activity. No active faults or fault traces are known or suspected to exist in City limits, and as a result, no Alquist-Priolo Special Studies Zones are in the City. The level of impact resulting from any seismic activity will depend on factors such as distance from the epicenter, earthquake magnitude, soil characteristics, and subsurface geology. Title 22 of the Municipal Code established methods and construction techniques to reduce the potential for loss of life, injury, and property damage in the event of a major earthquake. This requirement is not known to constrain housing development.

HILLSIDES/SLOPES

Development on hillside areas where steep slopes are present can increase rates of erosion and exacerbate landslide hazards, which may threaten structures. Portions of the City include slopes that exceed 20 percent, and typically located in areas zoned for single unit development. Development on slopes with this degree of inclination is difficult and should be avoided if possible to prevent property damage resulting from slope failure. Title 30 of the Municipal Code includes a sliding scale of minimum lot size for newly created lots when slopes are 10 percent to over 30 percent and the Safety Element of the General Plan contains specific policies that address hazards related to the development of hillside areas. Sites with slopes of 30 percent or more were eliminated from the suitable sites inventory.

OTHER CONDITIONS

Other conditions that could impact housing development on suitable sites include accessibility, parcel shape, easements, or known contamination. All the sites suitable for housing in the City are readily

accessible since most of them are in the downtown or upper State Street area and along major transportation and transit corridors. Most of the sites are nonvacant and there are no known easements or unusual parcel shapes that would constrain their redevelopment into housing.

Per a search of the GEOTRACKER and ENVIROSTOR Hazardous Waste Sites databases, no available sites in the suitable sites inventory are located directly on potentially contaminated parcels. If a project site or adjacent parcel does appear on the GEOTRACKER or ENVIROSTOR database, staff requires more information such as a Phase 1 Environmental Site Assessment and possible soil and groundwater testing. The City coordinates with Santa Barbara County Environmental Health Services on when technical studies are needed and appropriate course of action. If contamination is identified, the applicant must remediate the site prior to construction. Remediation includes excavating the contaminated soils or avoiding ground disturbance. In most cases, contamination issues can be remediated, and the project can be built, but the construction costs are increased.

4. HOUSING RESOURCES

Regional Housing Needs Allocation

State Law requires that jurisdictions provide an adequate number of sites to allow for and facilitate the production of their share of regional housing for the Housing Element planning period. To determine whether a jurisdiction has sufficient land to accommodate its share of regional housing needs for all income groups, that jurisdiction must identify “adequate sites.” Under State law (California Government Code, § 65583[c][1]), adequate sites are those with appropriate zoning and development standards—with services and facilities—needed to facilitate and encourage the development of a variety of housing for all income levels.

Regional Housing Targets

Table 41 shows the 6th Cycle Regional Housing Needs Assessment (RHNA) allocation for the City of Santa Barbara, as determined by the Santa Barbara County Association of Governments, for the 8-year period (2023-2031).

TABLE 41: 6TH CYCLE RHNA ALLOCATION

Very Low (0-50% AMI)	Low (50-80% AMI)	Moderate (80-120% AMI)	Above Moderate (120%+ AMI)	Total
2,147	1,381	1,441	3,032	8,001 ¹⁴

Housing Element law does not require the City to ensure that the numbers of housing units identified in the RHNA are built within the planning period. However, the law requires that the City provide an inventory of land suitably zoned and with available infrastructure and utilities to meet that need.

As a suburban jurisdiction, California Government Code, § 65583.2(c)(3)(B), specifies that a minimum default density of 20 units per acre is necessary to meet the City’s low- and very-low-income housing needs. All the available sites in the Suitable Sites Inventory allow at least 20 units per acre per the ranges allowed under the AUD program.

The City satisfied its 5th Cycle RHNA requirement by planning for the number of units assigned to it in that cycle. Progress in the City’s residential development permitting during the 5th Cycle is documented in the City’s Annual Progress Reports. The following section, Sites Inventory and Analysis, along with Appendix G, detail the City’s plan to satisfy its 6th Cycle RHNA requirement.

¹⁴ The City has a RHNA allocation of 2,147 very-low-income units (inclusive of extremely low income units). Pursuant to State law (AB 2634), the City must project the number of extremely low income housing needs based on Census income distribution or assume 50 percent of the very-low-income units as extremely low. Assuming an even split, the City’s RHNA allocation of 1,735 very-low-income units may be divided into 867 very low and 868 extremely low-income units. However, for purposes of identifying adequate sites for the RHNA, State law does not mandate the separate accounting for the extremely low-income category.

Sites Inventory and Analysis

Government Code § 65583 (a)(3) requires that Housing Elements contain a parcel-specific inventory of appropriately zoned, available, and suitable sites that provide housing opportunities for all income categories. The purpose of the inventory is to identify land suitable for housing development and determine whether the City's residential development potential is adequate to meet the City's share of projected regional housing needs.

The Housing Element is required to identify sites to accommodate the RHNA by income level or identify any rezoning to accommodate any shortfall. Sites identified to accommodate lower income units must meet certain criteria for lower income housing, including minimum densities. Lower income includes both the Very Low- and Low-Income categories in RHNA. The City must maintain adequate sites at all times throughout the RHNA period to meet the City's unmet housing needs for each income category. During the 8-year period, if sites are developed with non-residential use or developed with a lower number of units at each income level, the City must demonstrate that there are adequate remaining sites in the inventory to accommodate the remaining RHNA by income level. If the City finds there is insufficient remaining capacity at any income level, additional sites would need to be added to the inventory or rezoning would be necessary.

New in the 6th Cycle is a requirement to determine if sites identified to accommodate the low- and very low-income RHNA were used in the previous planning periods, as follows:

- For a nonvacant site, included in the 5th Cycle Housing Element.
- For a vacant site included in the 5th and 4th Cycle Housing Element.

If such sites are identified, the City is required to rezone them within three years of the beginning of the planning period to allow residential use by right at a minimum of 20 units per acre for housing developments in which at least 20 percent of the units are affordable to very low- and low-income households. This program can be an overlay on these specific sites. The intent of this requirement is to further incentivize the development of housing on sites that have been available over one or more planning periods. This is addressed in Housing Element Program HE-4: Use-By-Right Permitting.

In addition, AB 686 (2018) requires the City's Sites Inventory be evaluated relative to the assessment of fair housing, ensuring site locations and zoning for new housing are provided for all income levels, and considering existing patterns of segregation and/or exclusion of residents in protected classes. Demographic patterns, disproportionate housing needs and access to opportunity, and the City's regulatory review are identified fair housing issues for the City. As a result, sites were analyzed for all income levels and will contribute toward replacing segregated living patterns with truly integrated and balanced living patterns. Suitable sites are prioritized along transit corridors and proximity to employment opportunities and services. The Affirmatively Furthering Fair Housing (AFFH) appendix includes this assessment of fair housing within the City.

The evaluation of suitable sites includes a listing of individual parcels by Assessor's Parcel Number (APN), size of parcel, zone classification, and General Plan land use designation. Existing use, allowable residential density, and the realistic unit capacity are included to demonstrate the realistic development potential for each parcel. Economic consideration of assessed land value and

improvement value was used to identify sites more likely to be redeveloped into housing during the planning period. Existing constraints, including adjacency to creeks, and protected historic resources, were also included in the analysis.

The City's land inventory was completed using a GIS land use database, County Assessor's land use codes, aerial photography, and review of the General Plan and Zoning designations. The inventory identifies suitable sites and estimates the potential development capacity by affordability level. The majority of residential development potential is in the multi-unit and commercial zones where the highest densities are allowed. This section of the Housing Element demonstrates that the City has sufficient land inventory and zoning capacity to accommodate the City's assigned share of regional housing need within existing ~~and proposed~~ General Plan and zoning capacities.

The following discussion of land inventory, zoning capacity, and suitable sites demonstrates that the City has the capacity to meet the overall RHNA of 8,001 units with additional buffer. A 1749.3 percent buffer is provided to ensure that sufficient capacity will be "available" to accommodate RHNA throughout the planning period consistent with State guidance. Sites are considered to be "available" if zoning and land use regulations provide appropriate densities and sufficient public facilities and infrastructure are present to make housing development feasible.

Suitable Site Inventory and Development Capacity

To accommodate RHNA and all required income levels of affordable housing, the suitable sites inventory focused on commercial and multi-unit zones. These areas allow for the highest density residential development and have regulatory incentives for infill housing and redevelopment that are not provided to nonresidential development. The highest residential densities are at the center of the City within and adjacent to commercial uses and transit. Higher density residential and commercial zones that allow mixed-use development with densities up to 63 units per acre also have the potential for lower construction costs because of existing infrastructure and economies of scale and are therefore recognized as most suitable for development of housing affordable to very low- and low-income households.

PROVIDING A VARIETY OF HOUSING TYPES

As noted above, the inventory supports the development of multi-unit residential and mixed-use housing in commercial and multi-unit zones, which is the housing type that best meets the City's housing needs. Other housing types are an allowed use in the single-unit zones, such as accessory dwelling units, mobilehomes and manufactured housing on an approved permanent foundation, transitional and supportive housing, and housing for agricultural employees. These housing types are not identified in the inventory by location.

RESIDENTIAL DEVELOPMENT ON COMMERCIAL SITES

The City allows both residential and commercial development in all zone districts except for RS (Residential Single), R-2 (Two-Unit Residential), Manufacturing Industrial (M-I), P-R (Park and Recreation), and several Coastal-Oriented Zones (HRC-1, OM-1, HC). The majority of new multi-unit and mixed-use residential development in the City occurs on sites that also allow nonresidential development.

In 1989, Measure E was passed which limited nonresidential growth within the City to not more than three million square feet until 2010. Following the General Plan Update of 2011, updated Land Use

Element policy and implementation actions limited most new nonresidential floor to 1.35 million square feet until 2033. Coupled with the nonresidential floor area limitations, residential and mixed-use projects are incentivized over nonresidential uses as follows:

- Additional 3 feet over maximum height is allowed for residential and mixed-use projects in the Central Business District;
- Reduced interior setbacks in some cases; and
- Reduced or no parking requirements.

Other regulatory incentives that favor residential development over commercial include state and local density bonus provisions, streamlined residential permit processing timelines, and reduced number of hearings. Therefore, it is appropriate that the City's site inventory assumes housing capacity in commercial and multi-unit zones.

NONVACANT SITES DEVELOPMENT

As a largely built out City surrounded by steep hillsides, open space, and ocean, almost all new development, including housing, occurs on nonvacant sites. Recent housing projects have included a variety of configurations on nonvacant sites including demolishing all existing structures, retaining, and adding on to existing structures, adding new units within or adjacent to designated historic resources, converting existing structures to residential uses, and moving historic resources to other locations.

Examples of completed projects include the following:

- Small Project: Four new units constructed behind an existing 838 sq. ft. single-unit dwelling for a total of five units. Two existing sheds were demolished and eight fruit trees removed.
- Converted Project: Change of use from an existing 1950s mixed-use building to all residential with 22 net new units, one existing unit retained.
- Relocated Project: Seven new units with a lot merger and relocation of a potentially historic duplex.
- Project with Historic Resource: 26 new units including City Landmark and duplex preserved and renovated on site. An existing four-unit apartment complex, three sheds, and a surface parking lot were demolished.
- Large Project: 89 new units constructed on the site of a former 12 unit motel and office building. All existing structures were demolished.

Of the total available and pending sites in the inventory (460476), 956 percent (437455) are nonvacant. To determine suitability of development on nonvacant sites, the City researched the improvement to land value (I/L) ratios of multi-unit housing sites developed throughout the 5th cycle Housing Element to determine the appropriate threshold for including sites in the 2023 – 2031 Housing Element suitable sites inventory. See the Suitable Sites Inventory Summary below for more information.

SMALL AND CONSOLIDATED SITES DEVELOPMENT

Past residential development trends demonstrate that smaller opportunity sites (i.e., less than half-acre in size) can be developed with multi-unit rental and ownership housing, including for lower income households. Table 42 shows non-vacant sites less than half-acre that were developed or are pending

approval with 10 or more units since 2015. Project height and density are shown to indicate that maximum density can be achieved within the City's height limits. Of the total 290 units, about 31 percent are or will be affordable for low- and moderate-income households. These sites demonstrate market trends to redevelop sites with existing buildings and construct multi-unit housing using density bonus concessions.

TABLE 42: EXAMPLE PROJECTS ON SITES LESS THAN 0.5 ACRES

Address	Status	Parcel size (after merger)	Max Density (units/acre)	Project Density (units/acre)	Project Height	Number of Units	Affordable Units
<u>813 E. Carrillo</u>	<u>Complete</u>	<u>0.34</u>	<u>27</u>	<u>50</u>	<u>34' 6"</u>	<u>17</u>	<u>16 very low (Veterans)</u>

*Project density is higher than maximum for projects using density bonus							

Merging adjoining smaller parcels to acquire sufficient land area is also not uncommon to provide for a financially viable project. Table 42 shows examples of projects (since 2013) that merged adjoining parcels to create larger lot sizes and develop more units. In addition, development standard incentives such as minimum lot area and parking modifications are typically granted to facilitate the construction of affordable housing units. Lot Area modifications allow housing projects to exceed density standards provided that the over-density units are offered to households qualifying for affordable rents or purchase prices.

DEVELOPER INTEREST

Since the initiation of the 6th Cycle Housing Element, the City has been contracted by several developers expressing interest in the Suitable Sites Inventory and potential housing projects including:

- Juno Realty Partners: Interested in multi-unit apartment development and potential opportunities on sites listed in the inventory. Staff provided information on pending projects and development potential on several nonvacant sites.
- Sunrise Senior Living: Interested in suitable sites for senior housing development opportunities in Santa Barbara, with a focus on seniors with memory impairment. Staff researched potential sites and met with representatives to discuss opportunities.
- People's Self Help Housing: Interested in developing affordable housing on a specific nonvacant site in the inventory and is actively working with the property owner on plans. Staff met with representatives to discuss opportunities and provide information and support.
- Urban Rock Properties: Interested in multi-unit apartment development and potential opportunities on sites listed in the inventory. Staff provided information and the City's Density Bonus handout for consideration of development potential with increased density.

SUITABLE SITES INVENTORY SUMMARY

The Suitable Sites Inventory (Appendix G) identifies potential housing sites on vacant and underdeveloped parcels within the City that meet certain criteria to demonstrate a potential for new housing construction.

The analysis used the City's GIS land use database and the County Assessor land use codes. Aerial photography and site inspections were also used to verify the status of certain parcels. Future development considered is in three general categories: projects in process (pending), new multi-unit/mixed-use, and accessory dwelling units.

New Multi-Unit/Mixed-Use

The following criteria were used to identify suitable sites and development potential:

Land Use and Zoning

- All parcels that allow for multi-unit residential use were considered. Single-unit zones were not included because they do not meet the criteria of a development potential of at least 10 units.
- ~~All projects with pending City development applications were included (1,087 units as of June 29, 2022).~~
- ~~For the remaining sites,~~ Only those parcels with a development potential of at least 10 units were included.
- Parcels with the potential to consolidate adjacent sites under common ownership were considered. A total of 155 sites under common ownership were identified with a potential to consolidate, with a total capacity of over 1,700 units.

- Public land, including parks and public parking lots not planned for redevelopment were removed.
- Existing condominiums, planned unit developments, mobile home parks, and private right-of-ways were removed.

Constraints

Parcels were evaluated for known environmental constraints and other conditions that would impact housing development on the identified sites. The majority of parcels suitable for new multi-unit and mixed-use development are in the urban grid or along major travel corridors where parcels are easily accessible. -The following were removed from the inventory based on known constraints:

- Parcels with designated historic buildings (City Landmarks or Structures of Merit) or owned by the State of California and part of El Presidio ~~were removed~~.
- Parcels with significant environmental constraints associated with biological resources and creeks ~~were removed~~.
- Parcels that require significant cleanup or are limited for residential development associated with hazardous waste conditions per the GeoTracker and EnviroStor databases.

Realistic Capacity

Realistic buildout densities were determined based on average densities of projects approved during the 5th RHNA Cycle. Table 45 shows examples of density achieved for completed and approved projects in the Priority Housing Overlay and Medium-High Density areas of the City. The majority of these projects were completed on nonvacant parcels. The examples support the following assumptions:

- For Medium-High density (max 27 units/acre), 22 units/acre was used. The zones that include this density are C-G (Commercial General), C-R (Commercial Restricted), M-C (Manufacturing Commercial), O-R (Office Restricted), R-M (Residential Multi-Unit), and R-MH (Residential Multi-Unit and Hotel).
- For Priority Housing Overlay (max 63 units/acre), 59 units/acre was used. The zones that include this density are C-G (Commercial General), C-R (Commercial Restricted), M-C (Manufacturing Commercial), O-R (Office Restricted), R-M (Residential Multi-Unit), and R-MH (Residential Multi-Unit and Hotel).
- For multi-unit residential in the Coastal Zone (max 27 units/acre), 20 units/acre was used. The zones that include this density are C-1 and C-2 (Commercial), HRC-2 (Hotel and Related Commerce II), OC (Ocean Related Commerce) and R-4 (Residential Multi-Unit and Hotel)

TABLE 44: DENSITY ACHIEVED ON PROJECTS OF 10 OR MORE UNITS

Address	Density Achieved units/acre	Site Constraints
Medium High Density 15-27 units/acre		
1120 & 1122 Hutash	11	Adjacent to creek.
915 E. Anapamu	27	Slopes, existing trees
1317 Punta Gorda	26	
1220 & 1222 San Andres	18	Adjacent to creek and City park
316 W. Micheltorena	26	Included rehabilitation of two existing potentially historic buildings on site
Average Density	22	
Priority Housing Overlay 37-63 units/acre		
809 De la Vina Street	56	Existing City Structure of Merit
410 State	58	
825 De la Vina	63	
835 E. Canon Perdido	52	
214 E. De la Guerra	60	Existing City Landmark
414 Chapala	62	
219 E. Haley	62	
113 W. De la Guerra	62	Existing Potential City Structure of Merit
634 Anacapa	63	
800 Santa Barbara	54	Existing trees
15 S. Hope	57	Adjacent to creek
604 E. Cota	62	
3885 State	63	
Average Density	59	

Financial Viability

- To ~~screen~~ review sites for financial viability, assessor parcel Improvement Value, Land Value, and parcel area were considered. A low improvement to land value ratio indicates improvements on the site are worth less than the land, suggesting that the land is underutilized and there has been a lack of significant improvements in recent years. Properties ~~chosen~~ identified as financially viable were all within the improvement Value, Land Value, and parcel area parameters of projects that were ~~proposed~~ issued permits and constructed during the 5th RHNA cycle.
- The Improvement to Land Value (I/L) and Improvement to Square Foot ratios (I/ft²) were based on the median value of projects developed under the Average Unit Size Density Incentive (AUD) program since 2015 (77 total projects). The methodology used the following median values depending on if the project was developed under the Medium High or Priority Housing Tier as follows:
 - Medium High: 0.66 I/L and 16.11 I/ft²
 - Priority: 0.53 I/L and 16.23 I/ft².

- The median value screening tool supports the assumption that the majority of new housing units will be constructed on nonvacant parcels with relatively low improvement to land value and improvement to square foot ratios.

Accessory Dwelling Units

- Accessory dwelling units (ADUs) were considered based on the ADU survey results and average construction rate. A total of 629 accessory dwelling units are included in the inventory, assuming that 65 percent of ADUs permitted each year would be counted as a housing unit for RHNA purposes. Specific locations were not identified.

Pending Projects

All projects with pending City development applications (except accessory dwelling units) that are consistent with allowable densities by zoning or through state density bonus law were included in the inventory. All projects currently in process that are not yet permitted are generally expected to be constructed within the planning period (before February 2031). Table 44 shows the type, existing use, and number of units assigned to pending projects, with details provided for projects of 10 or more units. Note that projects ~~that are~~ permitted after June 30, 2022 will be credited for meeting the 6th cycle RHNA allocation in the annual reporting to HCD in 2023.

Pending projects with units listed in the very low, low, or moderate income categories based their affordability assumptions on the project description and if the project is applying for density bonus concessions, if the project is subject to the City's Inclusionary Housing Ordinance, or if the project is proposed by the City's Housing Authority or other nonprofit as an affordable housing project.

- Pending single unit projects: All of the pending single residential unit projects (22 units) are considered Above Moderate.
- Pending 2 – 9 unit projects: 133 total units, 123 Above Moderate, 10 are Low Income.
- Pending 10 units and above projects: 1,446 total units, 149 Very Low and Low, 101 Moderate, 1,196 Above Moderate.

Total Capacity

The Suitable Sites Inventory identified 7,829,115 units in multi-unit/mixed-use zones. With ADUs and pending projects, the total capacity identified was 9,352,545 units. Table 46 shows the total capacity by income level. The breakdown of capacity by affordability level is 2,475 very low income (24 percent above RHNA), 1,505 low income (26 percent above RHNA), 1,626 moderate income (25 percent above RHNA), and 2,223 above moderate income units (10 percent above RHNA).

TABLE 46: TOTAL CAPACITY BY INCOME LEVEL

<u>RHNA</u>	<u>Very Low</u>	<u>Low</u>	<u>Moderate</u>	<u>Above Moderate</u>	<u>Total</u>

CITY-OWNED SITES

The inventory includes one pending City-owned site to accommodate RHNA with a capacity of 63 units. The approximately one-acre site at 400 W. Carrillo Street is currently a commuter parking lot. The General Plan designation is Commercial / Medium High Density Residential and the maximum density is 27 dwelling units/acre. The site is adjacent to Mission Creek and a setback of at least 25 feet from top of bank is required.

A pre-application for development of 63 moderate- and middle-income affordable rental units was submitted in February 2022 by the City of Santa Barbara Housing Authority. As of December 2022, the proposed project received two pre-application reviews and no formal application has been submitted. Modifications are required for the proposed density and to allow a height increase. The project is likely

to receive approval as proposed based on the track record of City of Santa Barbara Housing Authority projects and with support from the City and the community.

The City intends to evaluate City-owned sites for future housing development opportunities with Program HE-12: City Land Registry.

INFRASTRUCTURE WATER AND SEWER CAPACITY

Existing City services, including water, sewer, storm drain facilities, and dry utilities (electrical and internal service) are available to serve all the sites in the inventory. The Program Environmental Impact Report (PEIR) being prepared for the Housing Element will further analyze the sufficiency of City services to accommodate the number of units planned to comply with the RHNA.

The City of Santa Barbara operates a water supply system that serves most of the properties within the City limits (except for the City's airport, which is served by the Goleta Water District and the Coast Village Road and Westmont Road areas, served by Montecito Water District). The City also serves selected areas located outside the City limits, most notably the unincorporated areas known as Mission Canyon and Barker Pass. The extent of the services currently provided and those that are planned into the future are detailed in the City's 2024~~0~~ Enhanced Urban Water Management Plan (EUWMP). ~~The City also operates a wastewater collection system.~~

The City's wastewater treatment plant, El Estero Water Resource Center (WRC) has a design capacity of 11 million gallons per day (MGD) and an average flow of 6.0 MGD. El Estero WRC includes tertiary filtration and disinfection capacity to produce recycled water for use at the plant and for the recycled water distribution system.

Water demand projections were developed as part of the City's 2020 Water Conservation Strategic Plan, and further developed and analyzed in the EUWMP. As stated in the EUWMP, the residential component of the water demand projection is based on population projections from the Regional Growth Forecast 2050 Santa Barbara County (RGF). The RGF projected an average of 175 new residential units a year. Population growth is anticipated to have a minimal impact on water demand through 2050 because most new residents are assumed to be housed in multi-unit housing or accessory dwelling units, which have a relatively low per capita water use. Because the EUWMP was prepared before the City's RHNA allocation was received from the state, the EUWMP assumed a growth rate 30 percent higher than the baseline, which is equivalent to 227 units per year. The EUWMP also evaluates existing and future water demand for lower-income households from 2020 to 2050 based on historical information from the City's affordable housing inventory and projections for the future availability and use of housing-related subsidies and incentives.

~~The Program Environmental Impact Report (EIR) being prepared for the Housing Element will evaluate the effects on the environment that may occur as a result of future growth in the City until 2035, including the effects associated with additional growth and development activity with the Housing Element. Impacts to water and sewer capacity will be included in the evaluation.~~

QUANTIFIED OBJECTIVES

State law acknowledges that total housing needs identified through the RHNA process may exceed available resources and the community's ability to satisfy this need. Under these circumstances, the quantified objectives need not be identical to the total housing needs. The quantified objectives should

estimate the number of housing units by income category that are likely to be built, rehabilitated, or conserved/preserved over the 2023-2031 Housing Element planning period.

The quantified objectives do not represent a ceiling on development, but rather a likely outcome based on needs, resources, and constraints. While the City has identified sufficient sites to meet RHNA, the City does not anticipate having financial resources to ensure the entire need for extremely low-, very low-, low-, and moderate-income units will be met by 2031. The City's best estimate of what could actually be constructed during the 2023-2031 Housing Element planning period is based on recent residential development trends from 2013-2022 and expected redevelopment of a portion of La Cumbre Plaza during the planning period. Market conditions and property owner interest in developing or redeveloping property are major factors in providing new housing. For the extremely low, very low, low and moderate-income housing, the estimate is based on past performance, current regulations, and budget assumptions from affordable housing subsidy sources. The Housing Element includes the development of new programs which ~~could be expected to accelerate~~ increase production of these affordable units during the planning period as programs are implemented, including HE-29 Affordable Housing Funding and HE-10 Affordable Housing Strategy Overlay.

The City's quantified objectives from 2023-2031 are shown in Table 47. New construction using public and/or private sources over the planning period is estimated to total 3,083 units, including a mix of extremely low, very low, low, moderate, and above moderate units. Based on actual rehabilitation and conservation/preservation of units between 2015 and 2022, City staff project approximately 162 existing units to be rehabilitated, and 43 existing affordable units to be preserved. To account for the objectives of Program HE-21 Monitor and Preserve Existing Affordability Covenants, an additional 58 low-income units were added to the preservation total. The total number of housing units estimated to be constructed, rehabilitated, or preserved during the 2023 - 2031 Housing Element planning period is 3,346 ~~288~~ units. This is a significant increase in anticipated production compared to the 1,832 units constructed between 2015 and 2022. The additional units are expected to result in new programs favorable to infill housing development and increased production of affordable units.

TABLE 47: QUANTIFIED OBJECTIVES (2023 – 2031)

Income Category	New Construction	Rehabilitation	Conservation/ Preservation
Extremely Low	148	0	0
Very Low	90	4	0
Low	328	158	<u>101</u> 43
Moderate	293	0	0
Above Moderate	2,224	0	0
Totals	3,083	162	<u>101</u> 43

Financial Resources

The extent to which the City can achieve its Housing Element goals and objectives is in large part dependent on the availability of financial resources for implementation. A variety of local, state, and federal funds are available to support affordable housing activities, described below. Table 48 identifies a variety of funding or free programs currently available on a competitive basis to leverage local funding for affordable housing activities including new construction, acquisition/rehabilitation, preservation of at-risk housing, homebuyer assistance, among others.

TABLE 48: FUNDING PROGRAMS

Program Name	Description	Eligible Activities
<u>California Housing Accelerator</u>	Provides gap funding to replace tax credit equity in shovel-ready projects to reduce the backlog of projects in the California Debt Limit Allocation Committee funding pipeline and accelerate the development of housing to those in need.	HCD funded affordable housing projects that were unable to secure tax credits
Affordable Housing and Sustainable Communities Program (AHSC)	Provides grants and/or loans to projects that achieve Greenhouse Gas reductions and benefit Disadvantaged Communities through increasing accessibility of affordable housing, employment centers, and key destinations. The program is funded by the Greenhouse Gas Reduction Fund (GGRF), an account established to receive Cap-and-Trade auction proceeds.	New construction Acquisition & Rehabilitation Preservation of affordable housing at-risk Conversion of non-residential to rental
CA Covid-19 Rent Relief Program (ERAP)	ERAP is for local governments within California seeking Emergency Rental Assistance Funds under California SB-91 (2021) from California's State Rental Assistance Program and/or a block grant.	Rental assistance
CalHome	Grants to cities and nonprofit developers to assist individual homeowners with homebuyer assistance and rehabilitation and ADU/JADU assistance (construction, repair, reconstruction or rehabilitation). Program also includes loans to developers for homeownership projects.	Homebuyer Assistance Down payment assistance Rehabilitation Acquisition & Rehabilitation ADU/JADU

Program Name	Description	Eligible Activities
		Developer Assistance Site acquisition, development, predevelopment and construction period expenses
California Housing Finance Agency (CalHFA) Residential Development Loan Program	Loans to cities for affordable infill, owner-occupied housing developments. Links with CalHFA's Down Payment Assistance Program to provide subordinate loans to first-time buyers.	Site acquisition Pre-development costs
<u>CommUnify of Santa Barbara County</u>	<u>Income eligible low or no cost home energy upgrades</u> <u>Free senior "safe at home" repairs for health and safety</u>	<u>Rehabilitation</u>
Emergency Solutions Grants (ESG) Program	Grants to address homelessness by providing funding for supportive services, emergency shelter/transitional housing, homelessness prevention, and permanent housing.	Street outreach Rapid re-housing assistance Emergency shelter Homelessness prevention
Excess Sites Local Government Matching Grants Program (LGMG)	Provides grant-based funding to match certain local government funding for selected developers and local governments for predevelopment and development of affordable housing on excess state sites.	Projects that accelerate housing production and align with state planning priorities
Foreclosure Intervention Housing Preservation Program	Preserves affordable housing and promotes resident or nonprofit organization ownership of residential real property at risk of foreclosure or in the foreclosure process.	Acquisition Rehabilitation
Golden State Acquisition Fund (GSAF)	Short term loans (up to 5 years) to developers for acquisition or preservation of affordable housing.	Preservation Site acquisition
<u>Habitat for Humanity Southern Santa Barbara County Neighborhood</u>	<u>Home Repair Program: Free interior and exterior repairs for low-income homeowners to address health, safety, and security issues.</u> <u>A Brush with Kindness: Free exterior painting.</u>	<u>Rehabilitation</u>

Program Name	Description	Eligible Activities
<u>Revitalization</u>	<u>landscaping, and repairs for homeowners performed by volunteers.</u>	
Housing for a Healthy California (HHC)	Funds the creation and support of new and existing permanent supportive housing for people who are experiencing chronic homelessness or are homeless and high-cost health users.	Acquisition New construction
<u>Housing Trust Fund of Santa Barbara County</u>	<u>Workforce Homebuyer Program: Low-to-Middle income home buyer down payment loans.</u> <u>Revolving Loan Fund for Affordable Housing: below market-rate interest loan funds where at least 25 percent of units are for low-to-moderate income households.</u>	<u>Acquisition</u> <u>New construction</u> <u>Home buyer assistance</u>
Infill Infrastructure Grant Program (IIG)	Funding of public infrastructure (water, sewer, traffic, parks, site clean-up, etc.) that supports higher-density affordable and mixed-income housing in infill locations.	Parks and open space Utility service improvements Streets, parking structures, transit linkages Traffic mitigation features Sidewalks and streetscape improvements
Local Early Action Planning (LEAP) Grants	Funding of public infrastructure (water, sewer, traffic, parks, site clean-up, etc.) that supports higher-density affordable and mixed-income housing in locations designated as infill.	Development of parks and open space Water, sewer or other utility service improvements Streets, roads, parking structures, transit linkages, transit shelters Traffic mitigation features Sidewalks and streetscape improvements Streamlining and acceleration of housing production
Local Housing Trust Fund (LHTF) Program	Matching grants (dollar for dollar) to local housing trust funds that are funded on an ongoing basis from private and public contributions or public sources.	Rental & ownership housing Transitional housing Emergency shelters
Mobile Home Park Rehabilitation and Resident Ownership Program (MPRROP)	Short-term and long-term loans at up to three percent for mobile home park resident organizations, nonprofit entities, and local public agencies. Low-income residents of converted parks can apply for individual loans to the entity that has purchased the park.	Purchase of mobile home park Rehabilitation or relocation of a purchased park Purchase of a share of space in a converted park by a low-income resident

Program Name	Description	Eligible Activities
Multifamily Housing Program (MHP)	Deferred payment loans with 55-year term for cities, for-profit and nonprofit corporations, limited equity housing cooperatives and individuals, and limited partnerships. Three percent simple interest on unpaid principal balance.	New construction, rehabilitation, or acquisition/rehab of permanent or transitional rental housing
National Housing Trust Fund Program	Deferred payment and forgivable loans for nonprofit and for-profit developers and local public entities to support development of housing for extremely low income households	New construction
Permanent Local Housing Allocation (PLHA)	Grants (competitive for non-entitlement jurisdictions) available to cities that assist increasing the supply of affordable rental and ownership housing, persons experiencing homelessness, facilitate housing affordability, and ensure geographic equity in the distribution of funds.	Competitive Allocations: Development of affordable rental housing Assistance for homeless
Predevelopment Loan Program (PDLP)	Provides pre-development short term loans to cities and nonprofit developers to finance the start of lower income housing projects.	Predevelopment costs to construct, rehabilitate, convert or preserve assisted housing
Regional Early Action Planning (REAP) Grants	Grant funding is available to help regional entities and governments (such as the council of government (COGs)) facilitate local housing production. This funding allows collaboration on projects that have a broader regional impact on housing.	Developing an improved methodology for the distribution of RHNA Sub-allocation funds in the form of planning grants that will accelerate housing production
No Place Like Home Program	Loans to counties or their housing development sponsors for the acquisition, construction, rehabilitation or preservation of permanent supportive housing for persons living with a serious mental illness who are experiencing homelessness or at risk of homelessness	New supportive housing Rehabilitate existing affordable housing
Veterans Housing and Homeless Prevention Program (VHHP)	Loans for development multi-family rental housing with minimum 55-year affordability restrictions. Projects must include permanent	Multi-family rental housing that provides at least 25 percent or 10 units (whichever is greater) to veterans. Minimum 45 percent of these units for extremely low-income veterans.

Program Name	Description	Eligible Activities
	supportive housing units and affordable units for Veterans and their families.	
Workforce Housing Program	Government bonds issued to cities to acquire market-rate apartments and conversion to affordable for moderate/middle income households, generally households earning 80 percent to 120 percent of AMI.	Acquisition of market rate apartments and conversion to affordable units

Administrative Resources

The City's 2020-2024 Consolidated Plan describes funding sources and institutional structure used to address needs in Santa Barbara in detail. Key resources and partnerships in delivering housing and community development services are summarized below.

The City receives about \$1.4 million per year in Community Development Block Grant (CDBG) and HOME Investment partnership funding directly from HUD. Additional resources the City makes available to, or are received by the City's partners vital to addressing housing and community development needs, include:

- **Housing Choice Vouchers:** The Housing Authority of the City of Santa Barbara administers the Housing Choice Voucher program in the City and receives funds annually to provide rent subsidies to nearly 3,000 residents.
- **Continuum of Care funds:** The City is a partner in the County of Santa Barbara Continuum of Care which receives HUD funding and recently secured a Homeless Emergency Aid Program (HEAP) grant. Some of those funds are allocated to programs supported with City CDBG funds.
- **Low-Income Housing Tax Credits (LIHTC):** The federal 4 and 9 percent LIHTC is the principal source of funding for the construction of affordable rental housing. They provide a credit against federal tax liability.
- **Human Services Grants:** The City budget commits approximately \$700,000 annually from the General Fund for human services. Human Services funds are intended to support programs that provide basic human needs, such as food and shelter, and programs that are preventative in nature or promote high degree of functioning. Many of the programs supported through this source aid in the prevention of homelessness, provide emergency and transitional shelter, permanent supportive housing, and other supportive services to persons who are homeless or at risk of becoming homeless.
- **Santa Barbara General Fund:** The City commits General Funds to support homeless programs such as the Restorative Policing program, which helps chronically homeless individuals achieve self-sufficiency, and for general operations-support of PATH Santa Barbara, an interim housing program for homeless individuals.
- **Private Banks:** Women's Economic Ventures receives private bank funds to support the Community Development Loan Fund, which is augmented with repayment funds from previously provided CDBG seed money.

Rental Housing Mediation Program

In 1975, a grassroots effort to provide a forum for landlords and tenants to resolve rental housing disputes out of court led the City to establish the Rental Housing Mediation Task Force (now known as the Rental Housing Mediation Board) in 1976. In 1978-1979, the City began using CDBG administrative funds to pay for Rental Housing Mediation Program (RHMP) staff. Currently, the staff of three are funded by grants and a limited amount of the City's General Fund. The program, which is free of charge

and aims to mediate disputes between landlords and tenants, investigate Fair Housing issues, and prevent homelessness, serves the City of Santa Barbara as well as the cities of Goleta and Carpinteria by contract. RHMP's services are neutral, and staff does not give out legal advice, but they do offer information on rights and responsibilities to landlords and tenants. Low income and other vulnerable residents can be referred to nonprofit law firms such as the Legal Aid Foundation of Santa Barbara County.

Nonprofits and Public Agencies

Santa Barbara is characterized by a capable and extensive housing and community development delivery system. Strong City and County agencies anchor the federal programs and housing and community development programs the City is able to support. In the community, there is a large network of experienced nonprofit organizations that deliver a full range of services to residents. The Housing Authority of the City of Santa Barbara, and various other community affordable housing development organizations, are integral to implementing the City's affordable housing program, including activities for acquisition/rehabilitation, preservation of assisted housing, and development of affordable housing. Additional affordable housing development organizations include the following nonprofits and public agencies:

Opportunities for Energy Conservation

Energy Conservation and Sustainable Housing Development

As residential energy costs rise, increasing utility bills can adversely affect housing affordability. State of California Energy Efficiency Standards for Residential and Nonresidential Buildings were established in 1978 in response to a legislative mandate to reduce California's energy consumption. The standards are codified in Title 24 of the California Code of Regulations and are updated periodically to allow consideration and possible incorporation of new energy efficiency technologies and methods. California's building efficiency standards (along with those for energy-efficient appliances) have saved more than \$100 billion in electricity and natural gas costs since 1978.

Title 24 sets forth mandatory energy standards for all new residential buildings and additions to residential buildings. Separate requirements are adopted for low-rise residential construction (i.e., buildings no more than 3 stories) and nonresidential buildings, which include hotels, motels, and multi-unit residential buildings with four or more habitable stories. The standards specify energy-saving design for lighting, walls, ceilings, and floor installations, as well as heating and cooling equipment and systems, gas cooling devices, conservation standards, and the use of non-depleting energy sources such as solar energy or wind power. The City enforces Title 24 regulations through the plan check and building inspection processes.

The California Energy Efficiency Strategic Plan sets a policy goal for the state to make all new residential buildings to be "net zero energy" by 2020. In 2021, the California Energy Commission adopted new energy efficiency standards for both residential and commercial buildings.

Some of the recent changes to residential standards include:

- Expanding solar photovoltaic systems and battery storage standards to reduce the grid's reliance on fossil fuel power plants;
- Encouraging electric heat pump technology and use, which uses less energy and produces fewer emissions;
- Establishing electric-ready requirements when natural gas is installed; and
- Strengthening ventilation standards to improve indoor air quality and improve occupant health.

Other recent legislation regarding energy efficiency and conservation includes SB 350 (2015), which includes an energy efficiency target of doubling energy efficiency in buildings by 2030. In addition, AB 2722 (2016) designates polluter fees to funding transportation, affordable housing, urban forestry, energy savings, and other sustainable projects to benefit disadvantaged communities.

In 2012 the City approved its first Climate Action Plan. There have been many advancements in climate policy, science, technology, and greenhouse gas (GHG) emissions targets since 2012. Notably, the City achieved the GHG emissions target of 1990-level total carbon emissions by 2020 set by the Global Warming Solutions Act (AB 32 [2006]) and the 2012 Climate Action Plan. In 2019 the City approved a Strategic Energy Plan that provides energy projects, innovative programs, and strategic policies for the City to achieve its goal of using 100 percent renewable electricity by 2030. Since 2019, the City has

been progressively implementing the plan, including launching Santa Barbara Clean Energy, a community choice energy program that provides carbon-free energy to the City.

In 2020, the City approved a new green building policy for all municipal buildings. In 2021, the City passed an ordinance prohibiting the installation of natural gas infrastructure in newly constructed buildings. The City annually conducts energy efficiency, solar micro grids, and other renewable projects every year. The City has also adopted streamlined permitting processes for solar energy systems and electric vehicle charging stations pursuant to State mandates. The City is also installing over 200 electric vehicle charging stations at city owned facilities for use by the community and strategically placed near areas with a high number of rental and multifamily use properties.

The City is currently in the process of updating the 2012 Climate Action Plan to meet City Council's adopted goal of carbon neutrality by 2035. The updated Climate Action Plan will include a new community-wide GHG emissions inventory and new climate action strategies. Strategies will address issues such as electrifying transportation, switching from vehicular to active transportation, improving infrastructure to support telecommuting, decarbonizing the energy and building sectors, and supporting sequestration of carbon.

5. HOUSING PLAN

Introduction

This section describes the City's housing strategy for the 6th Cycle planning period (2023 - 2031). The housing plan is organized by goals. Goals are aspirational purpose statements that indicate the City's direction on housing-related needs. Each goal encompasses several policies, which are specific statements that will guide decision-making. Policies serve as directives for decision makers to achieve a desired goal. Policies may refer to existing programs or call for the establishment of new ones.

Programs are the core of the City's housing strategy, translating goals and policies into actions. These include on-going programs, procedural changes, zoning ordinance changes, and other actions that implement the housing policies and help achieve housing goals. Each program identifies the funding source, responsible party, and timeframe for implementation, including programs that are - Timeframes are stated as short (1-2 years from adoption), medium (3-5 years from adoption), long (6-8 years from adoption), or ongoing (throughout the planning period). Timeframes were informed by priority ranking of draft programs by decision makers, community input, and available staff resources.

Programs are subject to the review and direction of the City Council as well as relevant City Departments. Program implementation includes ordinance amendments, resolutions, and incentives, as well as outreach and education activities. Successful program development is often contingent on the availability of funding and staff resources, which is likely to change over time due to economic conditions, the priorities of City Council, federal and state governments, funding agencies, and other conditions. The programs are reviewed annually through an Annual Progress Report (APR) to City Council and Housing and Community Development and prioritized by City Council to reflect funding limitations and the City's objectives.

The following goals, policies, and programs were developed to meet the needs of all economic segments of the City. They are informed by the demographics and technical assessments conducted throughout the Housing Element update, such as the housing needs assessment and governmental and non-governmental constraints assessment. Programs in this plan were also informed by notable best practices in other jurisdictions, as well as input from community members, local stakeholders, and advocacy groups.

Goals, Policies, and Programs

Goal 1 Create New Housing: Create new healthy, safe, and energy-efficient housing that meets community needs, within our resources.

POLICIES

Policy 1.1: Sustainability. Ensure that new housing programs and housing developments are consistent with the City's sustainability initiatives for energy efficiency and active transportation goals.

Policy 1.2: Infill Housing. Encourage development of housing on infill sites near transit and jobs, particularly redevelopment of sites suitable for housing, while continuing to limit residential density in High Fire Hazard Areas.

Policy 1.3: Adaptive Reuse. Provide incentives and promote flexibility for adaptive reuse projects that convert existing structures to multi-unit housing in order to reduce construction waste and extend the life of existing buildings.

Policy 1.4: Reduce Constraints. Reduce and, where feasible and practical, remove unnecessary City-imposed constraints that impede housing development.

Policy 1.5: Objective Design Standards. Establish citywide objective design and development standards for multi-unit housing, coupled with alternatives to conventional zoning regulations, to accommodate infill development in existing neighborhoods.

Policy 1.6: Housing Sites Inventory. Maintain an up-to-date inventory of vacant and underutilized sites that allow housing, including City-owned sites.

Policy 1.7: Prioritize Housing and Community Benefit. Prioritize residential development and nonresidential priority projects with broad community benefit on sites zoned for both residential and other uses.

Policy 1.8: Flexible Standards. Increase flexibility in multi-unit housing densities and other standards to allow a variety of unit sizes and affordability levels.

Policy 1.9: Senior Housing. Facilitate housing development for Santa Barbara's growing senior population, including designs that support "aging in place," senior housing with supportive services, veterans housing, assisted living facilities, and accessory dwelling units.

Policy 1.10: Housing for Persons with Disabilities. Encourage housing that addresses the needs of persons with disabilities through reasonable accommodation procedures, zoning provisions for supportive and group housing, owner and renter grants for accessibility features, and integration of universal design features.

PROGRAMS

HE-1: Facilitating Conversion of Nonresidential Buildings to Housing

The City has older commercial, office, and industrial buildings and larger single-unit residential buildings that are appropriate for conversion (i.e., adaptive reuse) to multi-unit residential. There are also historic buildings that could be converted to residential use or expanded to accommodate multiple

residential units consistent with the Secretary of Interior's Standards for Rehabilitation. The City will adopt an Adaptive Reuse Ordinance for existing buildings within the Central Business District and existing buildings designated as a historic resource. ~~will evaluate and amend the Zoning Ordinance and other portions of the Municipal Code to remove potential constraints for adaptive reuse, such as review/approval process, design, open yard, and parking standards.~~

The City shall prepare outreach materials, and online forms and applications to ~~also~~ encourage adaptive reuse to property owners and interested developers. ~~The City will review and amend permit procedures and infrastructure requirements if feasible to promote successful conversion implementation projects.~~

Funding Source: General Fund

Responsibility: Planning Division

Time Frame: ~~Short~~ December 2024 to adopt ordinance, June 2025 for outreach materials.

Corresponding Goal/Policy: Goal 1; Policies 1.1, 1.2, 1.4, 1.7, and 1.8

HE-2: La Cumbre Plaza Planning Area

La Cumbre Plaza is a 31-acre site comprised of eight parcels suitable for substantial redevelopment as a residential/mixed-use site ~~development~~ during the Housing Element planning period. It is within the AUD Program Priority Housing Overlay (37-63 units/acre) and is included in the Suitable Sites Inventory. Rezoning is not needed to meet the number of units (housing capacity) assumed in the Suitable Sites Inventory.

The City has a special and unique opportunity to guide and facilitate redevelopment of this large site, identified as a High Resource Area on the California Tax Credit Allocation Committee opportunity maps. The site is served by transit and has unique challenges with respect to topography and habitat resources.

~~A Specific Plan or similar~~ A planning document will be prepared for La Cumbre Plaza Planning Area that facilitates the full residential development potential of the site. This effort will consider effects on with Arroyo Burro Creek; provision of new public open space; multi-modal circulation improvements; impacts to nearby schools; new affordable housing, and increased height limits, among other things.

Funding Source: General Fund/Grants/Permit Fees/Developer Contribution

Responsibility: Planning Division

Time Frame: June 2028

Corresponding Goal/Policy: Goal 1; Policies 1.1, 1.2, 1.4, 1.7, and 1.8

HE-3: Amend the Zoning Ordinance for Special Needs Housing ~~to Reduce Governmental Constraints and Comply with State Law~~

The 2023 Housing Element identified potential governmental constraints to housing, including Zoning Ordinance amendments necessary to comply with changes in state law. Persons and households with special needs, particularly extremely low-income households and persons experiencing homelessness or at risk of becoming homeless, have limited housing options. Housing types appropriate for these

groups include emergency shelters, low barrier navigation centers, transitional housing, supportive housing, and single-room occupancy units. Special needs persons may also find housing opportunities in residential care facilities and group homes.

As part of the Governmental Constraints analysis, amendments were identified to the City's Zoning Ordinances to better facilitate a variety of special needs housing types, as required by State law. In some instances, the Coastal Zoning Ordinance (Title 28) has not been updated because the City intends to submit the updated Inland Zoning Ordinance (Title 30) to the Coastal Commission for certification, resulting in one updated Zoning Ordinance for the entire City. This program will be a two-step process: first the City will amend the Title 30 Zoning Ordinance, then the City will submit Title 30 as a Local Coastal Plan (LCP) amendment to the Coastal Commission for certification and use in the Coastal Zone.

The City will complete the following Zoning Ordinance amendments within one year of Housing Element adoption. for compliance with state law:

- ~~Create findings for compliance with the Housing Crisis Act (Government Code §66300(d)) requirements for residential and nonresidential projects to replace any demolished housing units on a site with at least as many residential dwelling units as the greatest number of units that existed on the project site within the last five years. New housing projects are also required to include deed restricted, affordable units if there are, or have been any "protected units" on the project site~~
- **Residential Facilities/Group Homes:** Amend ~~Revise~~ the Conditional Use Permit/Performance Standard P permit requirements for Community Care Facilities, Residential Facilities for the Elderly, and Hospices and to clarify that only projects that include a housing type not allowed by right in the base zone (e.g., multiple units in a single unit zone) or includes non-residential accessory uses, will trigger the Use Permit requirements. The required findings for facilities serving seven or more individuals in a residential zone will be revised to ensure they are objective with approval certainty similar to other residential uses.
- **Low Barrier Navigation Centers:** Amend to allow ~~Permit~~ Low-Barrier Navigation Centers (as defined in Government Code § 65660 (a)) in mixed-use and non-residential zones permitting multi-unit uses.;
- **Employee and Farmworker Housing:** ~~California Health and Safety Code § 17021.5, § 17021.6, and § 17021.8 generally require agricultural employee housing to be permitted without a Conditional Use Permit (CUP) in single-unit zones for six or fewer persons and on land designated for agriculture with no more than 12 units or 36 beds (the City does not have an agriculture land use designation). To comply with these provisions, the City will~~ Amend the Zoning Ordinance to categorize agriculture as an accessory use where allowed by zoning; thus clarifying that California Health and Safety Code § 17021.8 does not apply and to allow agricultural employee housing as "employee housing" (as defined in Health and Safety Code §17008) for six or fewer persons to be permitted without a Conditional Use Permit in all zones where single-unit residences are allowed.;

- **Emergency Shelters:** Amend parking standards to comply with ~~Address~~ new state law parking provisions for emergency shelters.; and

~~Rezone sites identified in the Suitable Sites Inventory (Appendix G) as follows: 1) nonvacant sites previously identified in the 5th cycle housing element, and 2) vacant sites previously identified for both the 5th and 4th cycle housing elements. The rezone would allow use by right for housing developments pursuant to Government Code § 65583.2(i) when 20 percent or more of the units are affordable to very low- and low-income households. Housing developments that do not contain the requisite 20 percent very low- and low-income units would still be allowed to be developed according to the underlying (base) zoning and incentives but would not be eligible for the same use by right approval.~~

~~Through the City's Land Development Team (LDT) Oversight Subcommittee, the City will also implement process improvements recommended by The Novak Consulting Group, Inc. including Zoning Ordinance and other Municipal Code amendments to streamline the design review process, such as reducing the number of design review triggers and appealable actions for projects that require design review approval.~~

Funding Source: General Fund, Grants if available

Responsibility: Planning Division

Time Frame: ~~June 2024~~ Short (Title 30 amendments) to Medium (LCP amendment)

Corresponding Goal/Policy: Goals 1, 2, and 3; Policy 1.44;

HE-4: Use-By-Right Permitting

Use-by-right approval of housing projects with at least 20 percent of units affordable to lower income households is required on 1) nonvacant sites previously identified in the 5th cycle housing element, and 2) vacant sites previously identified for both the 5th and 4th cycle housing elements pursuant to AB 1397 (2017). The City's sites subject to this provision are already zoned at the specific density set forth in the statute (i.e., default density of at least 20 units per acre) and rezoning of these sites is not required.

Within one year of adoption of the Housing Element, the City will amend the Zoning Ordinance, followed by development of processes and procedures to ensure sites identified for housing in the Suitable Sites Inventory in the 4th and 5th cycles but not yet developed for housing allow use-by-right approval for housing developments pursuant to Government Code § 65583.2(i) when 20 percent or more of the units are affordable to very low- and low-income households.

"Use-by-right" means that the City review is ministerial and therefore the project must not require a conditional use permit, planned unit development permit, or other discretionary review or approval that would constitute a "project" as defined in CEQA. A local ordinance can provide that "use-by-right" does not exempt the use from design review, consistent with the City Charter mandate for design review, but the design review must be objective in accordance with Government Code § 65589.5 (f).

Funding Source: General Fund

Responsibility: Planning Division

Time Frame: June 2024 for Ordinance Amendments, December 2024 for forms and mapping.

Corresponding Goal/Policy: Goals 1, 2, and 3; Policy 1.4

HE-5: Process Improvements

Since 2020, the City has been implementing discretionary and ministerial permit process improvements recommended by the Novak Consulting Group, Inc., (Novak Report, August 2020) guided by the City Council Land Development Team (LDT) Oversight Committee. In addition to the Novak Report, the Governmental Constraints analysis also identified City processes that potentially constrain housing projects, including multiple concept reviews and appealable actions. Through the City's LDT Oversight Subcommittee, the City will implement the design review process improvements recommended by the Novak Report and Governmental Constraints analysis including. Zoning Ordinance and other Municipal Code amendments to streamline the design review process, such as reducing the number of design review triggers and appealable actions for projects that require design review approval.

Funding Source: General Fund

Responsibility: Planning Division

Time Frame: December 2025

Corresponding Goal/Policy: Goals 1, 2, and 3; Policy 1.4

HE-6: Facilitate Production of Accessory Dwelling Units (ADUs)

In 2017, the State legislature identified production of ADUs as an important strategy to increase housing statewide and made significant changes to the manner by which local governments can regulate ADUs. In 2018, the City adopted an ADU Ordinance, which is periodically was subsequently amended in compliance with State law. As of May 2022, 365 ADUs have been constructed and many more have received building permits or are pending approval.

Despite the City's success in number of ADUs permitted, the permit process for ADUs can be confusing and complicated for property owners and staff spends significant time explaining the ordinance, fees, procedures, and vetting various permutations of proposed ADUs. Property owners have expressed interest in pre-approved designs and increasing the allowed number of ADUs on properties with existing multi-unit development.

To facilitate further production of ADUs and meet the objective of 629 ADUs permitted during the 6th cycle, the City will implement the following programs:

- **Zoning Ordinance Amendments:** The City is currently amending the ADU Ordinance to comply with changes in State law adopted in 2022, these are expected to be in effect by March 2023. The amendments also including the following changes to increase ADU production based on suggestions from decision-makers and applicants:
 - Allow conversion of commercial portions of mixed-use buildings to ADUs;
 - Allow additional ADUs on existing multi-unit properties; and
 - Revise standards for ADUs allowed above garages and carports for increased flexibility.

- **Procedural Evaluation:** The City will conduct outreach to evaluate and implement procedural changes to assist ADU applicants. The changes could include: to identify which ADU Ordinance requirements pose unnecessary compliance difficulties or limit ADU production and propose amendments and additional guidance to address those obstacles.
 - Reduce the triggers for design review for ADUs that currently require discretionary design review because they don't meet the City's architectural design criteria; and
 - Use of pre-approved plans, especially for manufactured homes, consistent with design criteria. Pre-approved plans that include innovative fire-safe designs would be specifically helpful for projects allowed in the City's High Fire Hazard Areas.
 - ~~At a minimum, the following concepts will be included in the ordinance evaluation:~~
 - ~~Conversion of commercial portions of mixed-use buildings to ADUs;~~
 - ~~Additional ADUs on existing multi-unit properties; and~~
 - ~~Two ADUs allowed above larger garages and carports on multi-unit properties~~
 -
 - ~~The City will also research amendments to the architectural design criteria for ADUs to reduce the number of projects that request discretionary design review because they don't meet the criteria, and will evaluate the use of pre-approved plans, consistent with design criteria. Pre-approved plans could include use of innovative fire-safe designs specifically for projects allowed in the High Fire Hazard Areas. The~~
- **Guidance:** The City will ~~also~~ conduct outreach and develop additional guidance to provide greater support to applicants who are seeking City approval for ADUs. The guidance will include manuals, webinars, checklists, financing options, and Spanish language materials.
- **Affordability:** The City will research and collaborate with community organizations and nonprofits who are interested in offering ADUs as deed-restricted affordable housing and look for ways to implement a pilot program with incentives for property owners to provide ADUs as deed-restricted housing or housing choice vouchers for low-income seniors, students, and other community members in need of affordable housing.

ADU procedures or the Ordinance shall be amended per the results of the outreach and evaluation.

Note: Unless otherwise required by State law, Any ADU Ordinance amendments that would increase the number of units on a parcel or the size of allowed ADUs will not be implemented in the City's designated High Fire Hazard Areas due to public health and safety concerns and Safety Element policies to limit additional development in High Fire Hazard Areas.

Funding Source: General Fund, Grants if available

Responsibility: Planning Division

Time Frame: March 2023 for Zoning Ordinance Amendments, December 2026 for Procedural Evaluation and Guidance, December 2029 for Affordability. Medium to Long

Corresponding Goal/Policy: Goals 1, 2; Policies 1.1, 1.2, 1.3, 1.4, and 1.9

HE-7: Objective Design Standards

In 2021, the City adopted Objective Design Standards for Streamlined Housing Projects specifically for projects that qualify for streamlined review under SB 35 (2017). Unless extended by the State legislature, SB 35 (2017) will expire on January 1, 2026. As a follow up to the SB 35 (2017) Design Standards, the City is currently developing citywide objective design and development standards for multi-unit housing development projects. These standards include a new section of the Municipal Code that provides alternatives to conventional zoning regulations to accommodate infill development in existing neighborhoods and are intended to apply to all areas of the City that are zoned for two or more units. This program is envisioned as an opt-in alternative for developers who are seeking a streamlined alternative to the City's design review process.

Funding Source: Local Early Action Planning (LEAP) Grant (consultant), General Fund (staff)

Responsibility: Planning Division

Time Frame: Adoption in 2023

Corresponding Goal/Policy: Goal 1; Policy 1.5

HE-8: Innovative Housing Types

The housing needs assessment and demographic changes indicate a need for a variety of housing types to suit different household compositions, changes in circumstances, incomes, and existing and future household needs. The City will study amend the Zoning Ordinance to determine if amendments are necessary as needed to incentivize and facilitate innovative housing types, such as shared housing (co-living), cooperative housing, tiny homes on wheels, flexible spaces (mix of long and short-term tenancy types), housing oriented towards telework, single-room occupancy units, and group quarters. Based on the results of the study, the City will amend the Zoning Ordinance to increase the production of innovative housing types.

Funding Source: General Fund, Grants

Responsibility: Building and Safety and Planning Divisions

Timeframe: June 2027 Medium to Long

Corresponding Goal/Policy: Goals 1 and 2; Policies 1.1, 1.2, 1.3, 1.4, and 1.9

HE-9: Resource Protection and Development Certainty

The City needs to plan for housing that protects unique ecological and cultural resources, responds to the climate crisis, and provides certainty for developers of parcels with constraints. With a recent comprehensive update to the Coastal Land Use Plan (LUP), the City established clear coastal resource protection policies and regulations for development in the Coastal Zone. Conversely, development on constrained parcels in the inland areas of the City often require technical studies and case-by case evaluation of impacts to resources, adding costs and time to project entitlement. While some of these

studies are essential for project safety and environmental quality, resource protection could be more efficiently addressed through cumulative area-wide analyses that cover multiple potential projects at one time, such as establishing measurable inland creek setback standards to protect public health and safety and riparian habitat. This would reduce the need for site-specific technical studies and streamline the environmental review process for projects, while ensuring the protection of environmental resources.

To facilitate residential development Citywide and provide better development certainty, the City will amend the Zoning Ordinance and update the Master Environmental Assessment procedures, as applicable, to implement General Plan resource protection policies and establish clear, measurable standards for cultural, biological, and other resource protection needs as identified in the Program Environmental Impact Report for the Housing Element, in tandem with housing goals.

Funding Source: General Fund, Grants if available.

Responsibility: Planning Division, Creeks Division.

Timeframe: August 2025

Corresponding Goal/Policy: Goal 1, Policies 1.1, 1.2, 1.4.

Goal 2 - Prioritize Affordable Housing: Prioritize housing that is affordable to the workforce and vulnerable communities, by the use of deed restrictions and other measures, over other types of development, with special emphasis on housing that meets the needs of extremely low, very low, low, moderate, and middle income, and special needs households.

POLICIES

Policy 2.1: Prioritize Affordable Housing and Community Benefit Projects. Prioritize production of deed-restricted affordable housing and nonresidential priority projects with broad community benefits over all other land uses and housing types.

Policy 2.2 Increase Production of Affordable Housing. Encourage and provide development opportunities and incentives to increase production of affordable housing for special needs and extremely low-, low-, very-low, and moderate-income households.

Policy 2.3: Ownership Housing. Encourage development of ownership housing for moderate- and middle-income households, including opportunities for employer-provided housing.

Policy 2.4: Nonprofit Partnerships. Pursue partnership opportunities with nonprofit developers to develop deed-restricted affordable housing on City-owned sites.

PROGRAMS

HE-10: Affordable Housing Strategy Overlay

The City's Average Unit-Size Density Incentive (AUD) Program successfully increased production of multi-unit housing but much of the new housing produced is market rate. Additional strategies are needed to incentivize and increase production of deed-restricted affordable units.

The City will create a strategy an Affordable Housing (AH) Overlay Zone to encourage development of deed-restricted affordable housing for moderate-, low-, very low-, and extremely low-income households and for deed-restricted employer-sponsored housing. The strategy will consider AH Overlay incentives will be applicable for projects that substantially exceed the percentage of affordable units that would otherwise be required under inclusionary housing or local and state density bonus programs, or other state laws that streamline housing production with inclusion of affordable units (e.g., Senate Bill 35) and for deed-restricted employer-sponsored housing. The required percentage of deed-restricted affordable units and available incentives will be determined when this program is implemented and could include incentives such as higher densities, increased allowable height, lower or no parking requirements, reduced setbacks and open yard, use-by-right approval, objective design standards, streamlined permitting, deferral or reduction in permit fees, etc.

Based on the results of the study, the City will amend the Zoning Ordinance to implement this program. In addition, the City will contact nonprofit affordable housing developers annually to identify and discuss development opportunities on these sites.

Funding Source: General Fund

Responsibility: Planning Division

Corresponding Goal/Policy: Goal 2; Policies 2.1, 2.2, and 2.3

HE-11: Inclusionary Housing Ordinances Evaluation

The City's Inclusionary Housing Ordinances have been used to increase the number of affordable units in ownership projects since 2004 and rental housing projects since 2019. In some cases, the developer can pay in-lieu fees rather than the required on-site inclusionary unit(s). In-lieu fees are allocated to a reserve fund intended to increase and improve the supply of deed-restricted affordable housing and ensure compliance with the City's Affordable Housing Policies and Procedures. There are relatively few projects that pay the in-lieu fees and the current balance of the fund is only approximately \$675,000. generally applies to projects with 10 or more units, whereby at least 15 percent of the total units must be constructed and offered for sale as Inclusionary Units deed restricted for owner occupancy by middle income households or, in the case of residential lot subdivisions for the construction of single unit homes, for upper middle income households. Housing projects of less than 10 units but more than one pay an in-lieu fee.

Inclusionary requirements for rental projects developed in accordance with the AUD Program apply to developments of 10 or more residential units. At least 10 percent of the total residential units on site must be deed restricted for rent at the moderate income level. Projects with 4 to 9 units may pay an in-lieu fee. Since 2019, 11 deed-restricted moderate-income inclusionary units have been approved and 25 are pending.

Economic studies conducted in 2017 and 2019 evaluated a range of potential inclusionary requirements and in-lieu fees to determine the appropriate balance for the 2019 amendment. Since then, development costs and rents have increased to the extent that a new study should be conducted.

- **Evaluation:** The City will conduct a study ~~The City will reevaluate the Inclusionary Housing Ordinances to determine if the inclusionary requirement or in-lieu fee should be they could be adjusted to produce a greater percentage of deed-restricted affordable housing units or in-lieu funds for affordable housing. or if the in-lieu fee could be raised to allow flexibility for the developer with the intent that the funds would be appropriated to the Affordable Housing Trust Fund (Program HE-12).~~ The evaluation will also review consistency with "No Net Loss" law to ensure any existing deed-restricted affordable units or other "Protected Units"¹⁵ proposed to be demolished as part of a the new housing project are replaced in addition to the required inclusionary units or in-lieu fee.
- **Zoning Ordinance Amendments.** By December 2026, the Inclusionary Housing Ordinance shall be amended if warranted by the results of ~~per the results of~~ the evaluation.

Funding Source: General Fund

Responsibility: Planning and Housing and Human Services Divisions

Time Frame: Study by December 2025, Zoning Ordinance Amendment by December 2026 (if warranted) ~~Short~~

¹⁵ Also includes units subject to rent or price controls and units rented by low or very low-income households over the past five years.

Corresponding Goal/Policy: Goals 1, 2; Policies 2.1, 2.2, and 2.3

HE-12: City Land Registry

State law (AB 1486, adopted 2019) requires the City to annually list City-owned sites that are included in the Housing Element sites inventory that were sold, leased, or otherwise disposed of during the reporting year. The listing of sites must include the entity to whom the site was transferred, and the intended use of the site. Further, AB 1255 (2019) requires cities and counties to create an inventory of surplus lands (land owned by the City which is declared by City Council to be surplus and not necessary for the City's use), and all lands in excess of its foreseeable needs, if any.

In addition to State law requirements, the City will evaluate City-owned land (not including lands dedicated to parks and recreation purposes) including parking lots, to determine future needs and if the publicly-owned site could be donated, leased, or sold at a reduced price to develop affordable housing. Following the evaluation, the City will conduct ongoing outreach with affordable housing developers to gauge interest in the City-owned sites and to prioritize sites for future development. Sites identified in this evaluation will be considered for inclusion in future suitable site inventories.

Funding Source: General Fund

Responsibility: Public Works Department/City Administrator's Office

Time Frame: ~~Medium to Long~~ December 2027

Corresponding Goal/Policy: Goals 1 and 2; Policy 2.4

HE-13: Housing Production Tracking

~~Recent m~~ Modifications to Housing Element law adopted through SB ~~166 4333~~ (2017 ~~8~~), known as the "No Net Loss" provisions, require that the City maintain adequate capacity to accommodate the remaining unmet portion of its Regional Housing Needs Allocation (RHNA) target ~~for each of the income categories~~ throughout the 8-year Housing Element planning period. Senate Bill 1333 (2018), effective on January 1, 2019, confirmed that the No Net Loss Law applies to all cities, including charter cities.

New for the 6th and subsequent cycle Housing Elements, the City is required to identify housing capacity by income level. Therefore, the City must also monitor housing production as the planning period progresses, and ensure that the Housing Element sites inventory continues to have City does not reduce the housing capacity at all times to below what is needed to meet the its RHNA target by income level. Furthermore, the City cannot through either (1) adoption of adopt reductions in allowable residential densities for sites identified in the Suitable Sites Inventory through General Plan update/amendment or rezone, or approve approval of development or building permits for sites identified in the inventory with that authorize the construction or development of fewer units or affordable to a different income category (by income level) than identified as possible in the inventory, unless findings are made that the Housing Element's remaining sites have sufficient capacity to accommodate remaining unmet RHNA for each income level.

Within one year of adoption of the Housing Element, the City will expand upon and improve the ongoing "no-net-loss" efforts to develop a procedure to track and report on:

- Projects proposed on sites identified for housing in the sites inventory;

- Unit count and income/affordability assumed on parcels ~~, particularly those included in the sites inventory;~~
- Actual number of units permitted and -constructed achieved by and income/affordability ~~when parcels are developed;~~
- Net change in capacity and summary of remaining capacity by income level in meeting remaining RHNA; and

Accessory dwelling units are not assigned to specific sites but they are assumed to provide a portion of the City's RHNA allocation, including for affordable units. A related effort will be initiated to track production, intended use, and rents of new ADUs by use of surveys or other methods to determine if they are meeting production and affordability assumptions. This effort will be initiated within one year of adoption and conducted every other year.

In accordance with No Net Loss law, if project approval results in the remaining sites capacity becoming inadequate to accommodate RHNA by income category, the City will identify or rezone sufficient sites to accommodate the shortfall within 180 days of approval.

The results of the tracking will be reported in the Housing Element Annual Progress Report reported annually to City Council and posted online for public review.

Funding Source: General Plan

Responsibility: Planning Division

Time Frame: ~~Short (No net loss tracking by June 2024, ADU surveys starting June 2024 and every other year) to Medium (ADU tracking) plus ongoing~~

Corresponding Goal/Policy: Goals 1 and 2; Policies 2.1, 2.2, and 2.3

Goal 3 - Provide Housing Assistance: Provide financial resources and supportive services for members of the community who need housing assistance.

POLICIES

Policy 3.1: Shelter for People Experiencing Homelessness. Partner with and support other agencies and nonprofit organizations in their efforts to provide shelter and services for people experiencing homelessness or those on the verge of homelessness.

Policy 3.2: Transitional and Supportive Housing. Promote innovative strategies and increase transitional and supportive housing opportunities for people experiencing homelessness.

Policy 3.3: Financial Assistance. Develop programs to provide financial assistance for income-qualified first-time home buyers and home repairs of affordable units.

Policy 3.4: Rental Assistance. Support rental assistance and emergency rent relief to lower income households, including those with extremely low incomes, and encourage landlords and property managers to participate in the Section 8 Housing Choice Voucher Program.

PROGRAMS

HE-14: Affordable Housing Trust Fund

In October 2022, City Council directed staff to create a new Affordable Housing Trust Fund. The intent is to consolidate existing Inclusionary Housing in-lieu payments, and any voluntary donations, grants, and matching funds or other similar payments into an Affordable Housing Trust Fund(s) to be used in support of the production, acquisition, maintenance, or rehabilitation of affordable housing. The Affordable Housing Trust Fund would complement other funding sources such as Community Development Block Grant (CDBG) and HOME funds.

The City will develop a program to manage and prioritize use of the Affordable Housing Trust Fund, which could include the following financial support:

- Gap financing for deed-restricted affordable housing development;
- Down payment or home repair assistance for income-qualified households;
- Rehabilitation of low-income deed-restricted rental units;
- Rent security/emergency rent relief grants and low-interest loans; and
- Extension of affordability covenants on units at risk of conversion.

The City will conduct outreach to qualified developers of affordable housing and report transparently on a regular basis to the public and decision-makers on revenue sources and quantifiable outcomes.

Funding Source: In-lieu fees, grants

Responsibility: Community Development Department, Housing and Human Services Division, Finance Department, City Attorney

Time Frame: Starting in 2023 Medium and ongoing.

Corresponding Goal/Policy: Goal 3; Policies 3.1, 3.2, 3.3, 3.4 and 4.4

Goal 4 - Promote Housing Stability: Implement tenant protection measures, promote full-time occupancy of existing housing, and discourage conversion of housing to other uses.

POLICIES

Policy 4.1: Anti-Discrimination Assistance. Continue to provide and strengthen anti-discrimination legal assistance and support for tenants facing harassment or eviction in efforts to prevent displacement of existing tenants.

Policy 4.2: Rental Housing Mediation Program. Conduct education and outreach to tenants regarding applicable state and local laws that ensure their right to decent, safe, and sanitary housing, and the Rental Housing Mediation Program.

Policy 4.3: Housing for Residents. Promote the use of housing for residents through ordinances and zoning changes and limit practices such as short-term rentals, conversions to hotels, and prolonged vacancies.

Policy 4.4: Extend Affordability Covenants. Encourage and promote the use of public and private funding to extend affordability covenants on units at risk of conversion to market-rate, and to provide rent security for residents.

PROGRAMS

HE-15: Support Rental Housing Mediation Program

On an ongoing basis, the City will ensure the City's Rental Housing Mediation Program continues to meet the needs of tenants requiring assistance, including providing online and printed bilingual resources explaining, including a Right to Counsel for eviction proceedings. Make Program procedures and landlord/tenants' rights and responsibilities, information and mediation procedures, and conducting outreach and education to clients. available to all renters in bilingual printed materials and on the City's website.

Funding Source: General Fund

Responsibility: Housing and Human Services Division

Time Frame: ~~Short and~~ Ongoing

Corresponding Goal/Policy: Goal 4; Policies 4.1 and 4.2

HE-16: Right of First Refusal Purchase Program

State laws require owners of specified, government-assisted developments to provide "notices of intent" to terminate affordability provisions to all affected households and public agencies (unless exempted by State law), and provide an exclusive "notice of opportunity to submit an offer to purchase" to each identified qualified entity, defined by State law as:

- The tenant association of the development.
- Local nonprofit organizations and public agencies.
- Regional or national nonprofit organizations and regional or national public agencies.
- Profit-motivated housing organizations or individuals.

To further limit tenant displacement and promote preservation of affordable rental housing, some jurisdictions have adopted first right/opportunity to purchase programs that gives tenants or qualified nonprofit organizations the right of first offer, and/or the right of first refusal to purchase multi-unit residential buildings not included in the government-assisted programs described above. The City will conduct a study to evaluate a similar program including what kinds of affordable properties are covered; what event triggers application; the nature of the purchase opportunity provided; and which entities can take advantage of the purchase opportunity. The program will be implemented per the results of the study.

Responsibility: City Attorney's Office

Time Frame: Study by December 2028, Program Implementation by 2030~~Medium to Long~~

Corresponding Goal/Policy: Goal 4; Policy 4.4

HE-17: Short-Term ~~Vacation Rental/Hotel~~ Framework and Ordinance

Recent trends of increasing numbers of illegal short-term rentals (30 days or less), fractional ownership properties, and hotels in the City has led to concerns that these uses are displacing existing long-term housing. In a September 2022 report to City Council on a potential future short-term rental permitting program, it was estimated that there are 1,560 listings of vacation rentals on web based rental platforms, a 27 percent increase from the previous year. Of those, only 19 have been permitted.

Legal short-term rentals are currently allowed only in zones where hotel uses are allowed, in compliance with certain requirements and procedures. Short-term rentals are considered a nonresidential use and applicants go through a Change of Use permit process. Projects of two or more units require a conversion permit to a hotel.

The City operates an on-going enforcement program on a complaint-driven basis. Enforcement is a staff-intensive and time-consuming process which takes on average four to nine months to resolve by code compliance staff. Enforcement in the Coastal Zone is complicated by a recent court case that only allows the City to enforce on nuisance-based complaints, until a new short-term rental program is certified by the California Coastal Commission. ~~or that properties that could have accommodated housing are being developed/redeveloped as hotels instead.~~

Short-term rentals (30 days or less) are prohibited in the City except in zones that allow for hotels and similar uses and in compliance with certain requirements and procedures. Since at least 1983, the City has regulated short-term rentals and operated an on-going enforcement program on a complaint-driven basis. The City's Zoning Ordinance allows both hotel and residential uses in a significant portion of the City zoned for multi-unit residential use.

Based on direction from City Council, the City will continue to develop a framework for a future short-term rental permit program. The program will determine which residential units would be eligible for short-term rental, including evaluating how to preserve existing long-term rental housing by considering a requirement that the unit is occupied by the owner as their primary residence (all rental units would be ineligible), the unit is not deed-restricted affordable housing, and the unit is not a type of housing that prohibits short-term rental (e.g., accessory dwelling units). Once adopted, enforcement of illegal short-term rentals would be improved by contracting with a web monitoring firm that would identify illegal

listings, requiring that hosting platforms delist illegal rentals, and establishing higher fines and penalties to discourage noncompliance. Once the framework is approved, the Zoning Ordinance will be amended by June 2025 to implement the program.

Funding Source: General Fund

Responsibility: Community Development Department

Time Frame: Framework in 2023, Zoning Ordinance Amendments by June 2025 ~~Short to Medium~~

Corresponding Goal/Policy: Goal 4; Policy 4.3

HE-18: Hotel Zones Evaluation

The City's Zoning Ordinance allows both hotel and multi-unit residential and mixed uses in approximately 9.3 percent of the City. These areas are also permitted for legal short-term rentals as discussed above. In recent years there has been a strong uptrend in demand for hotel rooms and several projects that were initially proposed for multi-unit housing changed into applications for a hotel. This had led to concern that the City's available parcels for new infill development are not being prioritized for multi-unit housing over hotel use.

Similar to this trend, there is a concern that fractional ownership properties could proliferate and replace long term housing in residential areas. This type of ownership model is facilitated by professional companies that manage the sale, temporary use, and other aspects for non-primary owners. To date, one such property has been advertised in the City of Santa Barbara. Some cities and counties in California and elsewhere are adopting ordinances to prohibit fractional ownership or issuing Cease and Desist Orders against the companies purchasing homes for this use.

To respond to these trends, the City will complete the following:

- **Monitor Trends:** ~~Continue to track monitor~~ the proliferation of ~~legal and non-legal short term vacation rentals~~ hotels and fractional ownership projects in residential zones.
- **Review and Rezone Hotel Zones:** ~~and will review~~ Review zone districts that allow both hotel and residential use. Based on the review, amend the Zoning Ordinance to further regulate legal short term vacation rentals and to rezone some areas of the City that allow both uses residential and hotel use, with the aim of increasing multi-unit residential development, to reduce the ing conversion of residential uses to hotel uses, reduceing the development of new hotels, and affirm a priority of incentivizing residential development over hotel development in appropriate areas.
- **Study Fractional Ownership:** Study how other jurisdictions are responding to fractional ownership trends. Based on the study, draft Zoning Ordinance amendments if warranted to protect long term housing stock.

Funding Source: General Fund

Responsibility: Community Development Department

Time Frame: Monitor Trends ongoing, Review and Rezone Hotel Zones December 2024, Study Fractional Ownership December 2027, Zoning Ordinance Amendments June 2028 (if warranted).

Corresponding Goal/Policy: Goal 4; Policy 4.3

HE-19: Residential Units Conversion Ordinance

The City's Conversion of Residential Units to Condominiums, Hotels, or Similar Uses Ordinance establishes criteria for conversions and reduces the impact of such conversions on residents who may be required to relocate. Since 2019, units approved, permitted, or constructed under the AUD program are not allowed to convert to a hotel or other similar uses. For non-AUD projects, if any units in a conversion project have been "affordable rental units" (as defined by City Council) for at least 24 of the previous 48 months preceding the application, the conversion may only be approved if the same number and type of units in the project after conversion are subject to a recorded affordability covenant. The City will evaluate the Conversion of Residential Units to Condominiums, Hotels, or Similar Uses Ordinance to determine if amendments are needed to strengthen this provision and ensure no net loss of affordable units. The Zoning Ordinance will be amended per the results of the evaluation.

Funding Source: General Fund

Responsibility: Planning Division

Time Frame: Evaluate Ordinance December 2024, Amend Zoning Ordinance June 2025 (if warranted)
Short

Corresponding Goal/Policy: Goal 4; Policy 4.3

HE-20: Affirmatively Further Enhance the Fair Housing Program and Opportunities

Based on the City's Analysis of Impediments to Fair Housing (2020) and Fair Housing assessment (Appendix B), existing Fair Housing programs will be continued and enhanced, and new actions initiated to affirmatively further fair housing. This program includes initiatives to expand housing opportunities for lower-income households, persons with special needs, and other protected classes, including the following:

Fair Housing Program: The Fair Housing Enforcement Program is a component of the City's Community Development Department. The Program was established to assist people who believe that they have experienced discrimination with rental housing, with an emphasis on discrimination against families with children. The City's Fair Housing Enforcement Officer investigates Complaints of Discrimination in rental housing, provides information/education to tenants and landlords, and refers cases as necessary to the State Department of Fair Employment and Housing or to the City Attorney for civil action. Over past five years, the City referred the 1-2 complaints received annually to the Rental Housing Mediation Program (RHMP). RHMP staff made the initial contact and each case was successfully settled. The goal for this program is to continue to successfully resolve fair housing complaints with the RHMP as much as possible.

In compliance with the 2020 Analysis of Impediments to Fair Housing Choice, The City's Fair Housing website includes an online complaint form and a copy of the Housing Discrimination Ordinance and the City has printed and disseminates a Fair Housing brochure in English and Spanish. The City will continue ongoing efforts to promote fair housing services and education through announcements on City News in Brief and participating in the Housing Authority's annual Housing Santa Barbara Day. Throughout the planning period, the City will identify a source of funding and conduct outreach and regular audits to evaluate fair housing compliance and identify discrimination.

Increase Access to Opportunity and Mobility: The analysis noted a concentration of racial/ethnic

minorities in the Downtown and Eastside neighborhoods and lower access to economically strong neighborhoods. In Santa Barbara, the lowest economic opportunity scores areas are found in the Coastal Zone (West Beach, East Beach, and the Waterfront) and neighborhoods within the western areas of the City (Campanil and Hidden Valley) (Figure B-17). This is likely because these areas include more lower income household and are further from job centers. The majority of sites suitable for future housing development are prioritized along transit corridors and with easy access to employment opportunities and services in areas designated as Moderate, High, or Highest Resource areas (Figure B-29). Furthermore, many of the programs are intended to improve access to housing in high opportunity areas such as HE-6 Facilitate Production of ADUs (expands housing options and mobility in high-opportunity single-unit neighborhoods), HE-8 Innovative Housing Types (expands the types and sizes of housing available), HE-10 Affordable Housing Strategy (intended to increase the number of deed-restricted units in targeted areas, including high opportunity areas, and HE-14 Affordable Housing Trust Fund (provides a one-stop funding pool for deed-restricting housing choices throughout the City).

Disproportionate Housing Needs. The analysis noted disproportionate housing needs for racial/ethnic minorities, large family households, and people with disabilities. As noted above, increasing deed-restricted affordable housing opportunities will continue to be an important focus. The City will continue to use federal, State, and local funds to support affordable and special needs housing, including for large families. Housing Element Program HE-23 Fund Home Improvements and Repairs provides opportunities for people with disabilities to make access improvements to stay in their existing homes.

Regulatory Review Zoning and Land Use: The analysis noted that barriers to affordable housing development contribute to market realities that limit housing choice and exacerbate vulnerability of residents that may experience housing discrimination. The Government Constraints section identified zoning and land use changes to reduce constraints and comply with State law. Housing Element Programs HE-3, HE-6, HE-8 and others will implement zoning changes to provide more housing choice and reduce the vulnerability of residents to housing discrimination.

Funding Source: General Fund

Responsibility: Community Development Department, Housing and Human Services Division

Time Frame: ~~Short and~~ Ongoing

Corresponding Goal/Policy: Goal 4; Policies 4.1 and 4.2

HE-21: Monitor and Preserve Existing Affordable Housing

There are approximately 199 affordable, deed restricted rental and ownership units that are at risk for conversion to market rate in the next 10 years. The City will continue to monitor the status of at-risk projects, ensure that required notice is given to tenants, and advise property owners and tenants in advance of potential conversion dates.

The City will strive to ensure that deed restricted affordable housing will remain affordable for the longest term per City policy. In expenditures from the Affordable Housing Trust Fund and other actions, the City will prioritize preservation of existing affordable units, with the objective of preserving at least 73 affordable rental units owned by nonprofit entities during this 6th Cycle Housing Element. Specific actions that will be conducted on an ongoing basis include:

- Continue to maintain an up-to-date inventory of affordable housing subject to recorded affordability agreements and potential expiration dates.
- Continue to work with property owners and other parties to extend affordability covenants. Coordinate with the Housing Authority and other nonprofit partners seeking to acquire and rehabilitate affordable rental housing units.
- In the event that a property is scheduled for conversion, coordinate with the property owner to ensure that state noticing requirements are followed prior to conversion and that tenant education is available regarding their options.

Funding Source: General Fund

Responsibility: Housing and Human Services Division

Time Frame: Ongoing

Corresponding Goal/Policy: Goal 4, Policy 4.4

Goal 5 - Preserve Housing: Maintain and improve the physical condition of existing housing at all affordability levels.

POLICIES

Policy 5.1: Repair and Upgrade Housing. Encourage the maintenance and repair of existing renter- and owner-occupied housing to prevent deterioration and assist property owners that can demonstrate financial need in upgrading substandard units.

PROGRAMS

HE-22: Home Rehabilitation Funding and Technical Assistance

One of the City's CDBG and HOME Consolidated Action Plan priorities is support to local housing partners for rehabilitation of affordable multi-family rental housing. The City will continue to offer CDBG and HOME grants and loans to rehabilitate existing multi-unit affordable housing through the Housing Rehabilitation Loan Program. Proactive outreach on this program is conducted annually via application workshops and through the Community Development and Human Services Committee monthly meetings. The majority of entitlement funding is targeted to census tracts with 51 percent or more of the residents who are low-or moderate income. The program prioritizes rehabilitation in concentrated areas of poverty with disproportionately more health, safety, and building code violations. The objective is rehabilitation of 10 rental units per year.

The City offers express, over-the-counter permits for certain rehabilitation projects including replacement windows and roofs. The City will continue to provide technical assistance via virtual appointments, phone and email and walk-in permit counter assistance personal appointments to for residents, including seniors, veterans, and people with disabilities, to help review and permit their housing rehabilitation needs. The program will prioritize rehabilitation in concentrated areas of poverty and areas with disproportionately more health, safety, and building code violations.

Funding Source: Grants, General Fund

Responsibility: Planning, Housing and Human Services, and Building and Safety Divisions

Time Frame: Ongoing Long

Corresponding Goal/Policy: Goals 1 and 5; Policies 1.9 and 1.10

HE-23: Fund Home Improvements and Repairs for Senior and Disabled Homeowners and Renters

There is an unmet need to fund repairs for income-qualified residents of existing naturally affordable (i.e., older units not subject to affordability covenants) homes. In 2023, City Council established a Low-Income Homeowner Rehabilitation Pilot Program with funding from the Inclusionary Housing Reserve Funds to Habitat for Humanity of Southern Santa Barbara County to operate the program. Habitat Program data indicates that home repair clients are 78 years old on average, 70 percent have a disability, average annual income is below \$30,000 annually, and all homeowners served are at or below 80 percent of Area Median Income.

To the extent possible, based upon needs and the continued availability of funds in the Affordable Housing Trust Fund or other sources and/or CDBG, the City will monitor the success of the pilot program and continue to support Habitat for Humanity or other local nonprofits that provide small-home

repair and equipment grants to income-qualified ~~senior households, including seniors~~ or persons with disabilities, to improve safety, security, and comfort. ~~The home improvement and equipment grants could include wheelchair ramps, disabled access toilets, handrails, quick releases for bars on windows, ground fault circuit interrupter outlets, smoke and carbon monoxide detectors, hand held showers, bath/shower seats, and grab bars. On an ongoing basis, the City program will work with nonprofit partners to publicize the program and prioritize home repairs rehabilitation in concentrated areas of poverty and areas with disproportionately more health, safety, and building code violations.~~

Funding Source: Affordable Housing Trust Fund, ~~CDBG~~

Responsibility: Planning and Housing and Human Services Divisions

Time Frame: Pilot Program 2023, Outreach Ongoing for ~~CDBG, other aspects after implementation of Affordable Housing Trust Fund~~

Corresponding Goal/Policy: Goals 1, 3, and 5; Policies 1.9, 1.10, 3.3, and 5.1

Goal 6 - Engage the Community: Educate and support the community on housing issues, affordable housing opportunities, and available resources and programs.

POLICIES

Policy 6.1: Community Outreach. Continue to work with local and regional organizations and partners to engage in community outreach strategies to provide information on fair housing laws and programs, including community workshops and public awareness campaigns.

Policy 6.2: Promote Housing. Develop campaigns that raise awareness about the importance of and need for housing and affordable housing citywide and encourage public participation in the formulation and review of housing programs. Build and maintain relationships with local journalists, media outlets, neighborhood groups, and community organizations to help expand awareness of housing challenges, initiatives, needs, and resources.

PROGRAMS

HE-24: Renters Rights Information

The City provides ~~rental housing landlord and tenant rights~~ information online and, as of 2019, requires landlords to offer residential tenants one-year leases in many circumstances. To further this program, the City will amend the Municipal Code Just Cause and Relocation Assistance Ordinance to require landlords to provide bilingual renters' rights information with their lease and conduct outreach to landlords to ensure compliance with this requirement.

Funding Source: General Fund

Responsibility: Housing and Human Services Division, City Attorney's Office

Time Frame: Municipal Code Amendment December 2028, Outreach ongoing thereafter~~Short to Medium~~

Corresponding Goal/Policy: Goals 4 and 6; Policies 4.1, 4.2, and 6.1

HE-25: Housing Resources for the Public

The City will continue to provide information, resources, and referrals for housing issues and affordable housing availability and will increase its efforts to educate the public on fair housing rights and responsibilities and work with landlords and real estate agents to increase knowledge of fair housing and reasonable accommodation requirements. This action includes but is not limited to promoting Fair Housing month, continuing to provide access to fair housing information/posters, and providing and posting resources available for renters, including how to avoid rental scams and other misinformation.

Funding Source: General Fund

Responsibility: Planning and Housing and Human Services Divisions

Time Frame: Information and outreach Ongoing, Increase efforts by December 2026

Corresponding Goal/Policy: Goals 4 and 6; Policies 4.1, 6.1, and 6.2

HE-26: Housing Supply and Affordability Education Campaign

The City will develop, with support from the City of Santa Barbara Housing Authority and other local affordable housing providers, an awareness campaign to bolster community support for housing programs and new housing construction, including affordable housing. This campaign could include social media content about housing needs, challenges, and resources and informational interviews for reporters who work on housing challenges and programs.

Funding Source: General Fund

Responsibility: Planning and Housing and Human Services Divisions, Housing Authority of the City of Santa Barbara

Time Frame: Awareness campaign by December 2024 and Ongoing thereafter

Corresponding Goal/Policy: Goal 6; Policies 6.1 and 6.2

Goal 7 - Coordinate with Regional Partners: Coordinate with surrounding communities and regional agency partners to address regional housing issues, homelessness, and the jobs/housing balance.

POLICIES

Policy 7.1: Regional Housing. Continue to work with neighboring jurisdictions, nonprofit organizations, and the private sector to address regional housing issues, homelessness, and the jobs/housing imbalance.

Policy 7.2: Student, Faculty, and Staff Housing. Encourage the University of California Santa Barbara (UCSB) and other institutions of higher education to develop additional on-campus student, staff, and faculty housing to meet the needs of their students and employees. Partner with UCSB, Santa Barbara City College (SBCC), and other educational institutions to expand near-campus student housing, to relieve the strain on supply for the general city population/housing.

Policy 7.3 Santa Barbara City College Housing Issues. Work with local organizations and interested parties to address housing issues associated with SBCC.

Policy 7.4: Employer-Sponsored Housing. Partner with regional agencies and local employees to facilitate employer-sponsored housing.

PROGRAMS

HE-27: Joint Legislative Platform

The City will continue ongoing work with other jurisdictions to advocate for State legislation that would provide ongoing funds for nonprofit developers to build affordable housing and related infrastructure improvements, and other programs to address South Coast housing and associated community support needs.

Funding Source: General Fund

Responsibility: Community Development Department/ City Administrator's Office

Time Frame: Ongoing

Corresponding Goal/Policy: Goal 7; Policies 7.1 and 7.4

HE-28: Affordable Student, Staff, and Faculty Housing

The City will regularly consult and coordinate with UCSB, SBCC, and City of Goleta on an ongoing basis to discuss ideas on housing options for students, staff, and faculty. The City will work the City of Goleta and the County to advocate for State legislation that would: 1) provide funding to help UCSB provide adequate on-campus student housing, and 2) allow greater flexibility for State universities and community colleges to enter into public/private partnerships to construct student housing.

Funding Source: General Fund

Responsibility: Community Development Department

Time Frame: Ongoing

Corresponding Goal/Policy: Goal 7; Policies 7.2 and 7.3

Goal 8 - Fund Affordable Housing: Develop a permanent source of local funding to produce deed-restricted affordable housing.

POLICIES

Policy 8.1: Affordable Housing Funding. Identify new funding sources and strategies to support affordable housing.

PROGRAMS

HE-29: Affordable Housing Funding

Starting in 2023, the City will study and adopt measures to secure permanent source(s) of funding for affordable housing and renter protections. The options the City will explore ~~Explore options~~ for generating affordable housing funds locally, include, including but are not limited to, the following:

- Progressive real estate documentary transfer tax;
- Vacancy/empty land tax
- Out-of-state transaction tax
- Transient occupancy tax
- Speculation/flipping tax
- Nonresidential development impact fee for housing (requires a nexus study)

Following the results of the studies and if warranted, the City will proceed with the voter-approval process by the 2026 general election date for any new tax initiatives.

By December 2025, the City will conduct a nexus study for a potential to consider a housing development impact fee for nonresidential development to be collected for the Affordable Housing Trust Fund. The fee will be implemented by 2027 if warranted by the results of the study.

Funding Source: General Fund

Responsibility: City Administrator's Office, Finance Department, Community Development Department

Time Frame: Study initiated in 2023, Voter Approval Process 2026 General Election (if warranted), Nexus Study for Impact Fee December 2025, Implementation December 2027 (if warranted) Short

Corresponding Goal/Policy: Goal 8; Policy 8.1

HE-30: Support for Affordable Housing Funding Legislation

The City will continue to provide ongoing support for State and Federal legislation and voter initiatives that create funding programs or new sources of funds for affordable housing (i.e., bond initiatives, tax increment financing, support removal of barriers for affordable housing (e.g., repeal California Constitution Article 34), state surplus funding, new state affordable housing bonds, increasing Housing Trust Fund funding, etc.).

Funding Source: General Fund

Responsibility: City Administrator's Office, Community Development Department

Time Frame: Ongoing

Corresponding Goal/Policy: Goal 8; Policy 8.1

6. APPENDICES

Appendix A: Review of 2015 Housing Element

Context and Purpose

State Government Code Section 65588 requires that the previous Housing Element be evaluated to assess the progress made in achieving the jurisdiction's housing goals and objectives. This step is important in assessing the appropriateness and effectiveness of the City's existing goals, policies, and implementation actions, and documenting results that were achieved during the planning period of 2015 to 2023, hereby referred to as the 2015 Housing Element. State law specifically calls for a three-step process:

- A review of the actual results of the previous element's goals, objectives, policies, and programs. The results should be quantified where possible.
- Progress in Implementation. An analysis of the significant difference between what was projected or planned in the previous element and what was achieved.
- Appropriateness of goals, objectives and policies. A description of how the goals, objectives, policies and programs of the updated element incorporate what has been learned from the results of the previous element.

This analysis of the 2015 Housing Element informed and directed the goals, policies, and programs in the 2023 Housing Element.

The 2015 Housing Element contained 5 goals, 26 policies, and 117 implementation actions intended to address the City's housing needs. The majority of the actions were a continuation of the City's commitment to producing affordable housing. During the 2015 Housing Element planning period, the majority of new multi-unit housing was developed in commercial and multi-unit zones in and around the Downtown area and the majority of new single unit housing was comprised of accessory dwelling units throughout the City.

EVALUATION

This section evaluates the effectiveness of the 2015 Housing Element's policies and programs. This step is important in determining the appropriateness of existing goals, policies, and actions. This evaluation, coupled with the updated housing needs analysis, informed and directed adjustments to the policies and programs for the 2023 Housing Element.

The evaluation discussion is organized around the five goals of the 2015 Housing Element. Evaluation details are provided in the attached Table A-1, quantified whenever possible. The following narrative describes the effectiveness by housing element goal area, including specific program highlights.

GOAL 1: HOUSING OPPORTUNITIES

The 2015 Housing Element established 9 policies and 33 implementation actions aimed at promoting housing opportunities for all persons, including seniors, homeless, special needs households, and low income households. For the most part, the actions associated with this goal were implemented, although most are ongoing to acknowledge the City's commitment to ensuring housing opportunities for

all segments of the community. Highlights of achievements during the 5th cycle planning period are presented below.

Funding Resources

At least 12 implementation actions relate to funding for housing support programs and projects. The City's Community Development Block Grant (CDBG) and Human Services programs provided grants to local agencies for a wide range of housing, human and community service programs, and capital improvement projects. From 2015 to 2022, approximately \$11 million in grants were distributed to support thousands of people through nonprofit community organizations and city programs. These programs strive to meet the needs of children, families, seniors and disabled persons, homeless, victims of domestic violence and others seeking assistance.

Affordable Housing Opportunities

New housing development policies and programs include 45 implementation actions. From January 2015 through December 2022, 232 new deed-restricted and four non deed-restricted affordable housing units were constructed. An additional 152 affordable housing opportunities were provided through acquisition of existing housing units and preservation by the City of Santa Barbara Housing Authority, sometimes supported with City funds.

Table A-1 details the progress made toward meeting the housing needs of the very low (0 – 50% Area Median Income [AMI]), low (50 – 80% AMI), and moderate-income (80 – 120% AMI) households. "Acquisition/Preservation" means the property was already an affordable housing property and it was acquired by the Housing Authority to maintain its affordability. This was to prevent loss from covenants about to expire. "Acquisition" refers to properties that were market-rate (although on some of the properties the landlord may have had some Section 8 households) but would otherwise have gone to market-rate at sale if the Housing Authority had not facilitated a purchase with the owner. These units are not deed-restricted by the City but income-restricted by the Housing Authority as an affordable housing provider. An exception to this is 536 W. Pedregosa which was purchased with a grant from the County of Santa Barbara and is deed-restricted with the County not the City. The City was successful in permitting new senior housing during this planning period, securing 243 rental units for very low and low-income seniors.

TABLE A-1: PROGRESS TOWARDS MEETING RHNA

Year	Project	Type (New, Acquisition, Rehab, Preservation)	Units by Income Level
2015	100 N. La Cumbre	Acquisition	19 Up to 120% AMI
2016	Eleanor Apartments 518 E. Canon Perdido	Acquisition/Preservation	4 @ 45% AMI 3 @ 40% AMI 1 @ 50% AMI (8 units)
2017	1616-1618 Castillo	Acquisition	9 Up to 120% AMI
2018	2120-2124 Oak Park Lane	Acquisition	9 Up to 120% AMI
2018	Jardin de las Rosas 510 N. Salsipuedes	New	3 Very Low 36 Low (39 units)
2018	Garden Court (Seniors) 1116 De La Vina	Acquisition/Preservation	30 @ 30% AMI 30 @ 35% AMI 37 @ 40% AMI (97 units)
2018	Grace Village (Seniors) 3869 State Street	New	6 @ 30% AMI 12 @ 40% AMI 26 @ 50% AMI 13 @ 60% AMI (57 units)
2019	421 N. Alisos	Acquisition	4 Up to 80% AMI
2020	Johnson Court (Veterans) 813 E. Carrillo	New	2 @ 30% AMI 6 @ 40% AMI 2 @ 50% AMI 6 @ 60% AMI (16 units)
2020	Gardens on Hope (Seniors) 251 S. Hope	New	9 @ 30% AMI 32 @ 40% AMI 48 @ 60% AMI (89 units)
2020	2 W. Mission	New (Conversion)	2 @ 50% AMI
2021	536 W. Pedregosa	Acquisition	3 Up to 80% AMI
2021	309 S. Voluntario	New (ADU)	1 Up to 120% AMI
2022	2120-2124 Oak Park	New (ADU)/Rehab	2 Up to 120% AMI
2022	Vera Cruz Village 116 E. Cota	New (Under Construction)	12 @ 30% AMI 12 @ 45% AMI 2 @ 50% AMI 2 @ 60% AMI (28 units)

HOUSING OPPORTUNITIES FOR PEOPLE EXPERIENCING HOMELESSNESS

The Housing Element includes approximately 11 implementation actions related to services and transitional housing for people experiencing homelessness and to prevent homelessness. The number of persons experiencing homelessness in the City has averaged around 951 since 2011. Most recently, the Santa Barbara County 2020 Point-in-Time identified 914 homeless individuals living in the City of Santa Barbara. The primary programs the City supports include the following:

Path Santa Barbara

PATH Santa Barbara operates interim housing for adults experiencing homelessness. This facility provides access to 100 beds, personal hygiene resources, three meals per day, and supportive services to help clients stabilize and move to permanent housing. From December to March, PATH is permitted to expand up to 100 additional beds when there is a chance of rain or temperatures are expected to drop below 40 degrees and, in recent years, activation of the expanded shelter is considered by request on days of extreme heat and hazardous air quality. The City grants PATH approximately \$202,100 annually to support operations.

Santa Barbara Alliance for Community Transformation (SB ACT)

Since 2019, the City has contracted with the Santa Barbara Alliance for Community Transformation (SB ACT) to develop a Santa Barbara Homelessness Collaborative. SB ACT convenes working groups to advance ACT on Homelessness 2023 Strategic Plan Goals and facilitates weekly Regional Action Plans meetings to generate dialogue and action amongst residents, business owners, and service providers. In 2021, the program was expanded to two Neighborhood Navigation Centers (a partnership between nonprofits, government agencies, faith communities, and community advocates to provide a neighborhood-based “one-stop shop” for homelessness resources and services) with a third planned for 2022. In response to a growing number of fire-prone encampments, in 2021 SB ACT and other partners formed an Encampment Response Regional Action Plan to address encampments and transition individuals into bridge housing in a 120-day pilot program. In October 2021, the City approved an appropriation of \$1.2 million in Measure C district sales tax funds to temporarily fund bridge housing services for an additional 90 days.

SB Connect Home

Santa Barbara Connect Home is a partnership with the City of Santa Barbara and other agencies, funded by a \$2 million grant from the California Homeless Emergency Aid Program (HEAP) from 2019 until June 2021, and has continued on a modified scale with funding through other State and Federal resources. This program focuses on the needs of the most vulnerable individuals experiencing homelessness and the highest utilizers of crisis services. The team works to connect the client to housing, accessing sources of income, public benefits, and medical and behavioral health services. In the initial two years, the project served 265 clients and resulted in 98 individuals permanently housed.

Project Roomkey And Project Homekey

In 2020, the State proposed Project Roomkey and Project Homekey to help communities manage homeless populations in an urgent response to the COVID-19 pandemic. Project Roomkey was aimed at temporary housing in participating hotels and motels for people experiencing homelessness and at risk of contracting COVID-19. Project Roomkey funds were used for temporary housing at several sites in the City and at the project’s peak there were 70 people participating. Project Roomkey funding ended

in September 2021 (In October 2021, the City committed Measure C sales tax funds to extend the program another 90-days, see SB ACT above). Project Homekey provided one-time state grants and was intended to be the next step by converting hotels and other similar buildings into permanent housing but, as of June 2022, no sites have been identified in the City for this use.

Safe Parking

The City contracts with New Beginnings Counseling Center to provide safe overnight parking for individuals and families living in their vehicle, including a smaller number of daytime parking spaces. In total, the program provides 113 night and day parking spaces in City-owned lots, churches, nonprofits, and businesses.

HOUSING OPPORTUNITIES FOR THE DISABLED

The policies direct the City to ensure availability of housing opportunities for the disabled population and create programs to aid the disabled population to secure accessible housing. Many of the implementation actions related to development and access for the disabled are now standard practice as a result of the Americans with Disabilities Act (ADA) of 1990 and revised ADA regulations.

GOAL 2: NEW HOUSING DEVELOPMENT

The 2015 Housing Element established a program of 9 policies and 45 implementation actions to promote new housing development. Special emphasis was given to multi-unit housing in and around the Downtown employment center and incentives for mixed-use development. The following highlights the City's accomplishments in this goal area.

- In 2019 the Average Unit-Size Density Incentive (AUD) Program was amended to include an Inclusionary Housing requirement for projects with ten or more units to provide at least 10% of the units as affordable to households at the Moderate Income level (80% to 120% of Area Median Income), and projects with five to nine units to either build a unit affordable to households at the Moderate Income level or pay a \$25 per square foot in-lieu fee.
- In 2018 and in 2021, the City amended the Zoning Ordinance for accessory dwelling units (ADUs) to comply with new state laws. As of May 17, 2022, 359 ADUs have been constructed, and another 224 have received building permit approval.
- To facilitate infill mixed-use and multi-unit housing projects, Infill Design Guidelines were completed in 2017 and are included in the Architectural Board of Review and Historic Landmarks Commission Guidelines.
- The Zoning Ordinance was amended in 2017 to adopt more flexible development standards for housing in nonresidential zones.
- In 2020, the Zoning Ordinance was again amended to establish a parking maximum of one space per AUD Program unit with no minimum parking requirement in the Central Business District and allow parking to be "unbundled" (i.e., rented separately) from the housing unit.
- In 2021 a conceptual Adaptive Reuse ordinance was vetted through Planning Commission that would further amend open space requirements in commercial zones for reuse of existing buildings.

Between 2015 and 2021, a total of 1,682 new units received building permits.

GOAL 3: CONSERVATION AND IMPROVEMENT OF EXISTING HOUSING STOCK

The 2015 Housing Element established a program of 3 policies and 14 implementation actions to conserve and improve existing housing stock, existing neighborhoods, and community diversity and character. The following highlights achievements during the 5th Cycle.

HOUSING REHABILITATION

The City's Housing Rehabilitation Loan Program (HRLP) has four main objectives: 1) to maintain and upgrade Santa Barbara's housing by correcting hazards to health and safety; 2) to enhance older neighborhoods by upgrading properties, thereby encouraging others to make improvements; 3) to provide improvements that help conserve resources and reduce operating and maintenance costs; and 4) to improve the quality of life of low and moderate-income residents by providing a healthful and pleasant living environment.

Prior to 2011, most HRLP loans were made to low-income homeowners in Santa Barbara. Due to the decline in CDBG entitlement funding and low demand for this program, the City gradually phased out this program for low income homeowners.

The HRLP, using program income generated from repayment of previous loans, continued to provide rehabilitation loans or grants to apartment owners who agree to keep the rents affordable to low-income tenants. Many of these owners are nonprofit developers who have acquired the property for the purpose of doing major rehabilitation and long-term management.

PRESERVATION OF HOUSING STOCK

The concern over the loss of older, naturally affordable housing to redevelopment has remained a critical issue. The City preserves residential properties with historic value through surveys and formal designations, and a focused review of building permit applications involving structures over 50 years old. In addition, preservation (or replacement in kind) of older housing stock that is not of historic value is encouraged.

During the 5th Cycle, the following objective was achieved:

- Extended affordability covenants to continue the affordability of 377 units to a period ranging from 30 to 99 years. New covenants for owner-occupied affordable units totaled 43.
- In 2021, the City's Historic Resources Ordinance was updated to clarify and streamline the process to designate historic resources, which can help minimize demolition of existing housing units. Historic Resource Design Guidelines were also adopted, which provide homeowners with recommended methods to maintain or expand historic buildings, prolonging their useful life.

GOAL 4: REGIONAL COOPERATION AND JOBS/HOUSING BALANCE

The 2015 Housing Element includes 3 policies and 20 implementation actions to work on regional housing issues. The following presents highlights in regional cooperation.

The City actively participates in and organizes quarterly meetings of the Joint City/County Affordable Housing Task Force.

City is a member City of Santa Barbara County Association of Governments and actively participates in transportation and housing needs planning efforts.

The City works with community groups to support regional workforce housing including the Joint City/County Affordable Housing Task Force, Coastal Housing Partnership, Santa Barbara League of Women Voters, and the Housing Trust Fund.

Consistent with state law, the City shifted away from analyzing potential environmental impacts of traffic based on Level of Service to Vehicle Miles Traveled, which facilitates housing development near job centers.

GOAL 5: PUBLIC EDUCATION

This goal recognizes the important role the public plays in building and maintaining community support for affordable housing. The 2015 Housing Element included 5 implementation actions to expand public education regarding affordable housing. The City continues to publicize housing achievements via the Affordable Housing website and the AUD Program website, as well as through participation in community forums and events such as the Housing Authority's annual Housing Day.

Housing Element Evaluation of Goals, Policies, and Implementation Actions 2015 – 2023

Results of the 2015 – 2023 Housing Element are evaluated in this section to determine the effectiveness of the policies and implementation actions and determine if the previous goals, policies, and actions should be continued, modified, or deleted. Up to 41 of the 117 implementation actions direct the City to continue programs that the City already executes – those actions will be continued but most do not need to be called out as new programs in the 2023 – 2031 Housing Element. ~~need to be modified or deleted. Furthermore, all of the implementation actions need to be modified to meet the state's requirements for effective programs that include definite time frames for implementation and identification of responsibilities, specific action steps, firm commitment, and funding sources to complete the program.~~

The City's housing goals, policies, and actions are guided by the City's overall housing vision from the 2011 General Plan:

Allowing as much housing as possible within resource limits to provide an array of lifestyle options for a demographically and economically diverse resident population.

TABLE A-2: THE 2015 HOUSING ELEMENT

Goal/Policy/Program	Results and Evaluation	Status
GOAL Housing Opportunities: Ensure a full range of housing opportunities for all persons regardless of race, religion, sex, age, marital status, sexual orientation, ancestry, national origin, color or economic status, with special emphasis on providing housing opportunities for low income, moderate, middle income and special needs households.		
Policy H1. Social and Economic Diversity. Promote new housing programs that retain and support social, economic and ethnic diversity.		
Policy H2. Housing Opportunities. Promote equal housing opportunities for all segments of the community, with special emphasis given to extremely low, very low, low, moderate, middle income and special needs households.		
<u>Implementation Actions</u>		
H2.1 Special Needs Population. Continue to fund a wide range of housing, human and community service programs and capital projects that strive to meet the needs of children, families, seniors, disabled persons, homeless, victims of	The City distributes funds from HUD's CDBG Program and HOME Investment Partnership Program. HOME funds provide tenant-based rental assistance and support housing development for special needs groups. CDBG and City General Fund dollars go to programs that help meet basic human needs and reduce the	Modify <u>Continue</u> The City has been successful at distributing CDBG, HOME, and

TABLE A-2: THE 2015 HOUSING ELEMENT

Goal/Policy/Program	Results and Evaluation	Status
domestic violence, and others.	community impact of homelessness.	general funds in support of social services and housing opportunities <u>and the City will continue to distribute these funds.</u> It is unnecessary to track multiple separate actions; they should be combined into one program.
H2.2 Rental Housing Mediation. Continue to fund, staff and support the Rental Housing Mediation Task Force, and publicize Rental Housing Mediation Task Force services and information on tenant and landlord rights including evictions, terminations, and fair housing issues.	In the 5 th cycle, total funding (grants and/or General Fund) for the Rental Housing Mediation Program (RHMP) was approximately \$1.67 million, an average of approximately \$238,000 annually. The RHMP staff assisted 8,315 individuals in the cities of Santa Barbara, Goleta, and Carpinteria (an average 1,188 persons per year).	Modify <u>Continue</u> <u>The City will continue to support RHMP.</u>
H2.3 Promote Public Awareness. Continue using CDBG funds to promote equal opportunity provisions and remedies under state and federal law.	The City's Housing and Human Services (HHS) webpage includes FAQs and housing-related policies and documents. Housing staff responds to requests for information regarding affordable housing topics, including the need for affordable housing, the City's efforts to address the issue, and opportunities to participate.	Modify <u>Continue</u> Seek input from HHS staff on additional public education

TABLE A-2: THE 2015 HOUSING ELEMENT

		opportunities.
H2.4 Enforcement Against Discrimination. If budget allows, develop adequate staffing and funding to pursue and assist the State Department of Fair Employment and Housing staff in pursuing enforcement actions against discrimination in housing under Civil Code Section 52 (c) with emphasis on discrimination against families with children in rental housing.	As an entitlement jurisdiction for CDBG and HOME funds, the City is required to affirmatively further fair housing. Approximately \$12,000 of funding for administration of the CDBG program is annually programmed for Fair Housing activities. On a case by case basis, allegations of housing discrimination are investigated. If necessary, enforcement actions are taken or referred to appropriate agencies for enforcement action.	Continue Modify or Delete This action is not necessary because it is already required as a condition of receiving federal funds. Could be restated.
<u>Policy H3. Homelessness Prevention. Support programs and efforts designed to prevent homelessness.</u>		
<u>Implementation Actions</u>		
H3.1 Continuum of Care Program. Continue to implement the Consolidated Action Plan's Continuum of Care program in conjunction with adjacent jurisdictions and community-based organizations.	Santa Barbara County is the lead agency for Continuum of Care. City staff participate on the Board. Up to \$2 million annually (grants and/or general fund) supports the work of local providers of service to the homeless population. Other funds are distributed to local service providers as available such as the state's Homeless Emergency Aid Program (HEAP) 2020, applied to Restorative Policing for street outreach services.	Modify Continue This is a regional action. and should be restated to clarify the City's role
H3.2 Prevention Programs. Seek funding for homeless prevention programs, such as a program to provide short-term financial assistance to households threatened by eviction due to an	In the 5 th cycle, total funding (grants and/or general fund) was approximately \$291,000, an average of approximately \$41,639 annually.	Modify Continue This is duplicative of other funding actions.

TABLE A-2: THE 2015 HOUSING ELEMENT

Goal/Policy/Program	Results and Evaluation	Status
inability to pay rent.		
H3.3 Supportive Housing. Support the conversion of existing hotels and motels to sponsored residential hotels, Single Room Occupancy (SRO) projects, or apartments for the homeless.	County funds from the state's Project Roomkey program in 2021 provided temporary housing at several motels in the City and at the project's peak there were 70 people participating. Project Roomkey funding ended in September 2021. In October 2021, City Council appropriated \$1.2 million in Measure C funds to provide similar temporary "bridge" housing at another local motel for a 3-month period. No permanent conversion opportunities were identified in the 5 th cycle.	Continue Modify <u>Updated efforts will be described in the 2023 – 2031 Housing Element.</u> Restate to reflect updated efforts.
H3.4 Recreational Vehicle Park. Facilitate application for a Recreational Vehicle (RV) park through the City's permitting process. Work with the County and other local agencies to locate RV parks.	It's unclear if this program was intended to provide a permanent mobile home park or temporary housing for people living in their vehicles. No RV park applications were submitted to the City in the 5 th cycle.	Modify or Delete <u>Unclear action and unlikely to occur.</u> Could be restated as a regional action if it meets a need.
H3.5 RV Park Program. Consider providing financial support for an RV park project if an application is submitted by a qualified sponsor/developer.	No RV park applications were submitted to the City in the 5 th cycle.	Modify or Delete
H3.6 RV Parking Locations. Continue zoning provisions for churches and non-profits to allow overnight RV parking under limited conditions.	New Beginnings has been offering a Safe Parking program in the City and neighboring jurisdictions since 2004. To date, there are 83 spaces for overnight parking and 16 spaces for daytime parking for people living in their vehicles. City provides \$24,000 annually from the General Fund for the daytime safe parking program. In the 5 th Cycle, the City provided approximately	Continue Modify This program is successful <u>and will be described in the 2023 – 2031 Housing Element.</u>

TABLE A-2: THE 2015 HOUSING ELEMENT

Goal/Policy/Program	Results and Evaluation	Status
	\$273,648 to this program.	but is duplicative of other funding actions.
<u>Policy H4. Homeless Shelters and Services.</u> Support other agencies and nonprofit organizations in their efforts to provide shelter and services for the homeless.		
<u>Implementation Actions</u>		
H4.1 Casa Esperanza. Continue to fund and support Casa Esperanza Homeless Shelter or other suitable shelter facilities and encourage a broad range of such services throughout the region including services with year round programming.	<p>Casa Esperanza is now PATH. PATH's interim housing meets the basic needs of individuals experiencing homelessness.</p> <p>The City provides \$202,100 annually from the General Fund to PATH. In the 5th Cycle, PATH also received approximately \$373,000 in CDBG funds from the City. In calendar year 2021, PATH served 1,069 people and made 65 housing placements.</p>	<p>Modify <u>Continue</u></p> <p>This program is successful <u>and the City provides funds annually.</u> but duplicative of other funding actions.</p>
H4.2 Operational and Service Needs. Support the operational and service needs (such as child care and job training) of homeless shelter and service providers. Provide financing when possible.	The City funds operational and service needs for people experiencing homelessness. In the 5 th cycle, total funding (grants and/or general fund) was approximately \$3.2 million, an average of approximately \$455,000 annually.	<p><u>Continue</u> Modify</p> <p>Duplicative of other funding actions.</p>
<u>Policy H5. Transitional Housing Opportunities.</u> Increase the supply and variety of transitional housing opportunities.		
<u>Implementation Actions</u>		
H5.1 Transitional Housing. Continue to fund community-based non-profit agencies, such as Transition House, to provide a range of transitional housing opportunities.	<p>The City annually evaluates and allocates Human Services Funds and CDBG Grants to nonprofits for transitional housing programs.</p> <p>Transition House exclusively serves families with children. In 2020, 370 individuals (111 families) were served and 72% of families</p>	<p>Modify <u>Continue</u></p> <p>Duplicative of other funding actions.</p>

	<p>mothers. In the 5th cycle, total funding for this program was approximately \$77,700, an average of approximately \$11,100 annually.</p> <p>Willbridge Emergency/Transitional Housing Program provides housing and services for chronically homeless mentally ill adults. In the 5th cycle, total funding for this program was approximately \$115,400, an average of approximately \$16,500 annually.</p>	
H5.2 Regional Coordination. Coordinate with the County of Santa Barbara and the cities of Carpinteria and Goleta to develop, update and implement the Consolidated Plan's Continuum of Care programs.	The most recent Consolidated Plan is for 2020 – 2024. The City continues to actively coordinate with the County Continuum of Care (CoC) by having City staff assigned to serve on the CoC governance board. The City also contracts with a local agency that provides regional collaboration services.	<p>Continue Modify or Delete</p> <p>The City will continue to participate in this program.</p>
<p><u>Policy H6. Housing Opportunities for Seniors.</u> Seek to ensure the availability of a range of housing opportunities with an emphasis on extremely, very low, low and moderate income seniors.</p>		
<p><u>Implementation Actions</u></p>		
H6.1 Senior Housing. Encourage the development of a full range of senior living situations, available at market and affordable rates.	During the 5 th cycle, 146 affordable senior housing units were constructed.	<p>Continue Modify</p> <p>Combine into one action.</p>
H6.2 Unit Acquisition and Rehabilitation. Continue to promote and assist in the acquisition and rehabilitation of existing dwelling units for use as affordable senior housing.	During the 5 th cycle, 98 affordable senior housing units were acquired/rehabilitated.	<p>Modify Continue</p> <p>Combine into one action.</p>

TABLE A-2: THE 2015 HOUSING ELEMENT

Goal/Policy/Program	Results and Evaluation	Status
H6.3 Upgrade Senior Facilities. Continue to facilitate private sector efforts to upgrade existing senior housing facilities, including services for seniors with long term care needs, in order to provide improved senior housing opportunities.	The City facilitates upgrades through the permitting process and with possible grants and loans for rehabilitation including the Multifamily Housing Rehabilitation Load Program, Affordable Housing Inclusionary Fund, and Low and Moderate Income Housing Asset Fund.	Modify <u>Continue</u> <u>Combine into one action.</u>
H6.4 Non-Institutional Facilities. Encourage small, non-institutional facilities that meet the needs of the older senior population (75+).	No small, non-institutional facilities for seniors were permitted in the 5 th cycle.	Modify or Delete <u>It's not clear</u> <u>Clarify</u> how this is similar or different from other senior housing opportunities
H6.5 Senior Advocacy. Continue to work with the Area Agency on Aging.	The City provides funding to the Long Term Care Ombudsman and Senior Services Program (formerly Area Agency on Aging). In the 5 th Cycle, total funding was \$163,000, an average of about \$23,300 annually.	Modify or Delete <u>Continue</u> Combine into single funding program.
H6.6 Support Services. Encourage the expansion of support services such as house cleaning, cooking, shopping and financial advising in order to meet the needs of the older, independent senior population.	The City funds senior support services. In the 5 th Cycle, total funding was \$275,146, an average of about \$45,858 annually.	<u>Continue</u> Modify or Delete Combine into single funding program
H6.7 Housing Incentives. Continue to provide reduced parking incentives for senior housing projects in combination with bonus densities to encourage the development of small senior and	The City Zoning Ordinance allows reduced parking spaces for senior housing and low income senior housing if certain conditions are met. Density bonus is available for qualifying affordable housing projects. In the 5 th Cycle, two senior housing projects applied the	Delete Complete

disabled apartment projects including efficiencies and congregate care.	reduced parking incentives and one senior housing project used density bonus incentives.	
H6.8 Design Guidelines. Adopt site and unit design guidelines for senior and disabled units, which incorporate all relevant federal, state and local laws, as well as recommendations from the Access Advisory Committee (AAC).	This program was not completed.	Modify or Delete <u>Standards are already available for these units</u> <u>Seek input from the AAC.</u>
<u>Policy H7. Housing Opportunities for Disabled.</u> Seek to ensure the availability of housing opportunities for the extremely low, very low, low and moderate income disabled population.		
<u>Implementation Actions</u>		
H7.1 Congregate Care. Promote and assist the development and processing of new congregate housing opportunities or board and care facilities for the extremely low, very low, low and moderate income, and physically and mentally disabled persons.	The City provides supportive funding for existing facilities but has no regulations to promote or assist in the development of new facilities. In the 5 th Cycle, a total of \$211,700 was provided to Sarah House, an end-of-life residential home for low income residents.	Modify <u>The 2023 – 2031 Housing Element will address identified constraints to housing for persons with disabilities by amending the Zoning Ordinance Performance Standard Permit and Conditional Use Permit</u>

TABLE A-2: THE 2015 HOUSING ELEMENT

Goal/Policy/Program	Results and Evaluation	Status
		standards. Congregate Care and Board and Care facilities are not defined in the City's Zoning Ordinance. These are now known as Congregate Living Health Facilities.
<p>H7.2 Special Needs Housing. Encourage community services groups, non-profits, and the faith-based community to create special needs housing.</p>	<p>In 2016, The City provided funds to facilitate the Housing Authority's purchase of the eight-unit Eleanor Apartments to provide affordable housing for very low income residents with mental health disabilities.</p> <p>In 2017, a HRLP Predevelopment loan was awarded to the Mental Wellness Center for rehabilitation and conversion of a single unit home to a group home for special needs housing.</p>	Continue <u>Modify</u> Be specific on how these could be encouraged.
<p>H7.3 New Housing Opportunities. Work with community service providers to expand their scope of services to include housing through new construction or acquisition and rehabilitation of existing dwelling units.</p>	<p>It's not clear if any community services providers expanded their scope to include housing but the City maintains affordable housing funds to offer loans and grants for new construction or acquisition and rehab of existing units.</p>	Delete <u>Continue</u>
<p>H7.4 Priority Status. Encourage the Housing Authority of the City of Santa Barbara to continue to give priority status to disabled people with the greatest housing needs.</p>	<p>The Housing Authority has 385 vouchers set aside to assist households who have a disabled adult member. The remaining voucher inventory gives equal priority to senior individuals, disabled individuals and families.</p>	<p>Delete Complete</p>

TABLE A-2: THE 2015 HOUSING ELEMENT

Goal/Policy/Program	Results and Evaluation	Status
	<p>HACSB also gives equal priority to disabled or senior individuals in 185 units of supportive housing. Priority is also given to individuals with disabilities for any partial or fully accessible unit within HACSB inventory.</p> <p>2,483 individuals with disabilities have been housed within the 5th Cycle.</p>	
<p>H7.5 Accessibility Funding. Explore ways to fund accessibility improvements for dwelling units that will be made available for disabled persons who are eligible to receive HUD Section 8 certificates.</p>	<p>The City provides grants for accessibility improvements:</p> <p>In 2015, \$195,000 in CDBG funding was awarded to the Public Works department to construct twenty-four (24) access ramps in the Westside neighborhood along San Pascual Street and Sunset Avenue between Pedregosa and Micheltorena Streets.</p> <p>In 2017, \$185,753 in CDBG funding was awarded to the Laguna Neighborhood Access Ramps Project to design and construct eleven (11) access ramps/curb cuts in locations near Santa Barbara Junior High and High Schools.</p> <p>In 2018, \$199,936 in CDBG funding was awarded to design and construct fifteen (15) access ramps/curb cuts in locations near Oak Park.</p> <p>In 2018, \$90,000 in CDBG funds was awarded to the Jewish Federation to enhance the security and safety of clients and program participants and ensure disabled accessibility.</p> <p>In 2017, a HRLP Predevelopment loan was awarded to the Mental Wellness Center for construction of an ADA compliant ramp.</p>	<p><u>Continue</u></p> <p>Modify or Delete</p> <p>Include in one funding action.</p>
<p>H7.6 At-Risk Affordable Disabled Units. Ensure</p>	<p>The City maintains affordable housing funds to offer loans and</p>	<p><u>Continue</u> Modify or</p>

TABLE A-2: THE 2015 HOUSING ELEMENT

Goal/Policy/Program	Results and Evaluation	Status
that affordable units occupied by disabled tenants at risk of converting to market rates are maintained as affordable, to the extent feasible.	grants for rehabilitation in exchange for extended affordability controls.	Delete
<u>Policy H8. Accessible Housing for Disabled.</u> Accessibility for the disabled shall be required in new residential development and in housing to be rehabilitated.		
<u>Implementation Actions</u>		
H8.1 Accessibility Review. Continue the ongoing review of residential development plans for accessibility for the disabled.	Privately owned and publicly assisted housing must meet accessibility requirements if located in a building of four or more units. The City reviews building permit project plans in accordance with State and Federal laws for accessibility and provides case-by-case ADA guidance.	Delete Required by State and Federal laws.
H8.2 Accessibility Guidelines. Distribute guidelines to builders that explain Federal and State laws regarding accessible units. Provide specific ideas and examples (such as no steps, wider doors and hallways and larger bathroom areas).	No guidelines were produced in the 5 th Cycle. The City provides guidance to builders on a case-by-case basis.	Delete <u>Guidance provided as needed</u> Modify Seek input from Building and Safety staff and the AAC.
H8.3 Accessible Housing. Adhere to either the Fair Housing Act or the California Building Code, whichever is more stringent, in order to provide accessible housing.	The City reviews each project application and ensures compliance with applicable accessibility regulations and requirements.	Delete <u>Continue</u> Already required.
<u>Policy H9. Accessible Housing Programs.</u> Support the creation of new programs to aid the disabled to secure accessible housing.		
<u>Implementation Actions</u>		

TABLE A-2: THE 2015 HOUSING ELEMENT

Goal/Policy/Program	Results and Evaluation	Status
H9.1 Accessible Housing Incentives. Investigate and implement policies that give incentives for disabled accessible units to be included in market-rate projects.	No incentive policies were implemented in the 5 th cycle. Accessible units are required in market-rate projects of four or more units.	Delete <u>Continue</u> Already required.
H9.2 Case Management. Seek funding for case managers to support the disabled in independent living situations.	The City provides funding to the Independent Living Resource Center, which supports residents with disabilities. A total of \$101,505 was provided in the 5 th cycle, an annual average of about \$14,500.	<u>Continue</u> Modify Include in funding action.
<p>GOAL</p> <p>New Housing Development: Encourage the production of new housing opportunities which are sustainable and increase equity by providing a sufficiently wide range in type and affordability to meet the needs of all economic and social groups, with special emphasis on housing that meets the needs of extremely low, very low, low, moderate, middle income and special needs households.</p>		
<p><u>Policy</u> H10. New Housing. Given limited remaining land resources, the City shall encourage the development of housing on vacant infill sites and the redevelopment of opportunity sites both in residential zones, and as part of mixed-use development in commercial zones.</p>		
H10.1 Early Project Consultation. Continue to offer and encourage early staff predevelopment consultations for residential development of opportunity sites and mixed use projects.	The City offers voluntary pre-application consultation and review for all projects. In accordance with Senate Bill (SB) 330 (2019), the City also offers pre-application submittal for qualified housing projects. Upon submittal of the preliminary application and payment of the permit processing fee, a housing developer is allowed to “freeze” the applicable fees and development standards that apply to their project while they assemble the rest of the material necessary for a full application submittal.	Modify <u>Continue</u> <u>The City will continue to offer voluntary and required pre-application services consistent with State law. Ensure consistency with State law.</u>

TABLE A-2: THE 2015 HOUSING ELEMENT

Goal/Policy/Program	Results and Evaluation	Status
H10.2 Property Profiles. Continue to offer property profile services in the Planning Division that explain development potential and constraints for parcels in the City. Property profile services generally involve the review of archive, street and planning files, and the preparation of a letter report containing information regarding the property's permit history and development potential.	The City continues to offer property profile services. Archive street and planning files are also available in the online Community Development Property Records Database. In-person archive plan viewing appointments can be scheduled when needed.	Modify or Delete <u>Continue</u>
H10.3 Building Reuse. Encourage residential reuse of existing nonresidential buildings, for both ownership and rental affordable housing.	Planning staff encourage developers to reuse existing nonresidential buildings for residential use. The Zoning Ordinance was amended in 2020 to change parking from a minimum to a maximum, reduce the open space requirement and increase densities in the downtown to further allow for adaptive reuse of buildings for residential.	Modify <u>Include a program in the 2023 – 2031 Housing Element to further facilitate adaptive reuse.</u>
H10.4 Housing at Shopping Centers. Promote and encourage the development of mixed-use for ownership and rental housing at shopping centers such as La Cumbre Plaza shopping center, with an emphasis on affordability, by coordinating and/or partnering with property owners and housing developers.	La Cumbre Plaza and other shopping center locations are in the priority housing overlay (37-63 dwelling units per acre). Discussions are underway with property owners of La Cumbre Plaza to build housing on the site.	Modify <u>Include a program in the 2023 – 2031 Housing Element specific to La Cumbre Plaza.</u>
Policy H11. Promote Affordable Units. The production of affordable housing units shall be the highest priority and the City will encourage all opportunities to construct new housing units that are affordable to extremely low, very low, low, moderate and middle income owners and renters.		
<u>Implementation Actions</u>		

TABLE A-2: THE 2015 HOUSING ELEMENT

Goal/Policy/Program	Results and Evaluation	Status
<p>H11.1 Affordable and Workforce Housing. Explore options to promote affordable and workforce housing, including revising the variable density ordinance provisions to increase affordable housing (e.g., limit unit size), requiring a term of affordability, and reducing parking standards with tenant restrictions.</p>	<p>The variable density ordinance was revised with adoption of the AUD Program in 2013. It includes reduced parking standards. In 2019, the AUD Program was amended to include an Inclusionary Housing requirement for projects with ten units or more to provide at least 10% of the units as affordable to households at the Moderate Income level, and projects with five to nine units to either build a unit affordable to households at the Moderate Income level or pay a \$25 per square foot in-lieu fee. To date, no inclusionary units have been constructed but there are 19 units in eight projects in the pipeline.</p>	<p><u>Continue and Modify</u></p> <p><u>The City continues to adjust the AUD program and will include a program in the 2023 – 2031 Housing Element to access inclusionary housing requirements.</u></p>
<p>H11.2 Priority Housing Overlay. Encourage the construction of rental housing, employer sponsored housing, and co-operative housing in the Downtown, La Cumbre Plaza/Five Points area, C-M Commercial Manufacturing Zone and Milpas Street area by providing incentives such as:</p> <ul style="list-style-type: none"> • Increased density overlays up to 63 du/ac as part of the Average Unit-Size Density Incentive Program. • Higher Floor Area Ratios (FAR) when such standards are developed. • More flexibility with zoning standards, (e.g., reduced parking standards). • Expedited Design Review process. • Fee waivers or deferrals. 	<p>This program is partially complete <u>per the adopted AUD program as follows.</u></p> <ul style="list-style-type: none"> • Increased density overlays and more flexible zoning standards were adopted (AUD Program). • The City did not adopt a proposal for Floor Area Ratios. • Expedited design review is offered for Senate Bill 35 (2017) projects, but no applicants have applied for this process. • The City has not adopted fee waivers or deferrals. <p>As of December 2021, 194 units were approved, 88 units are in building permit review, and 243 units were issued certificates of occupancy in the Priority Housing Overlay areas.</p>	<p>Modify Delete</p>
<p>H11.3 Inclusionary Housing. Amend the</p>	<p>The program is partially complete as follows.</p>	<p>Modify</p>

TABLE A-2: THE 2015 HOUSING ELEMENT

Goal/Policy/Program	Results and Evaluation	Status
<p>Inclusionary Housing Ordinance to:</p> <p>a. Consider a 15 - 25 percent inclusionary affordable housing provision in new residential ownership developments for affordable housing to accommodate workforce (middle) income earners:</p> <ul style="list-style-type: none"> Temporarily suspend the inclusionary housing requirements or in-lieu fees during times of economic downturn if development costs are prohibitive. <p>b. Amend the payment of in-lieu fees to include the following considerations:</p> <ul style="list-style-type: none"> Eliminate or reduce inclusionary housing in-lieu fees based on preferred development, such as affordable or special needs housing projects; Adjust the inclusionary housing in-lieu fee rate based on unit size (i.e., lower fees for smaller units); and <p>c. Require a Housing Mitigation Fee Program for commercial development.</p>	<ul style="list-style-type: none"> Inclusionary Housing Ordinance was adopted in 2019 for rental units (see H11.1) The in-lieu fee is adjusted based on unit size Inclusionary requirements are waived for voluntary 100% affordable projects and employer –sponsored housing. <p>The City has not adopted a Housing Mitigation Fee Program for commercial development.</p>	<p><u>Include a program in the 2023 – 2031 Housing Element to fund deed-restricted affordable housing, which could include amended in-lieu fees and mitigation fees on commercial development.</u></p>
<p>H11.4 Density Standards. Develop density standards that permit greater densities for projects that provide a greater percentage of price-restricted ownership units than required by the inclusionary housing ordinance.</p>	<p>In 2021 staff prepared amendments to the AUD Program that would allow for larger buildings and additional units for projects that provide more price-restricted units than are required by the inclusionary requirements and analyzed the Economic Feasibility of the proposals. This program was not adopted.</p>	<p>Modify</p> <p><u>Include a program in the 2023 – 2031 Housing Element to incentivize greater density coupled with deed-restricted affordable housing.</u></p>

TABLE A-2: THE 2015 HOUSING ELEMENT

Goal/Policy/Program	Results and Evaluation	Status
H11.5 Bonus Density. Continue to provide bonus density units above levels required by State law, to be reviewed on a case-by-case basis.	Prior to updates in State law, the City's density bonus allowed development of a greater number of units. Prospective applicants are encouraged to use the State or City's program, depending on which is most appropriate for a project.	Modify <u>Include a program in the 2023 – 2031 Housing Element to incentivize greater density if coupled with deed-restricted affordable housing, including Update to allow Moderate income units in the City's density bonus program</u>
H11.6 Private Sponsors. Continue to solicit proposals for low-, moderate-, and middle income projects from private sponsors and develop programs to assist in their implementation.	The City continues to solicit proposals for housing projects.	<u>Continue</u> Modify
H11.7 Infill Housing. Continue to assist the development of infill housing including financial and management incentives in cooperation with the Housing Authority and private developers to use underutilized and small vacant parcels of land for new extremely low, very low, low and moderate income housing opportunities.	All the 5 th Cycle affordable housing units were developed as infill housing, including 4 projects completed by the Housing Authority.	Modify <u>Continue</u> <u>Most of the City's new housing development occurs on underutilized infill sites. Consider additional programs to encourage infill</u>

TABLE A-2: THE 2015 HOUSING ELEMENT

Goal/Policy/Program	Results and Evaluation	Status
		housing.
H11.8 Opportunity Sites. Assist, coordinate or partner with builders for the development of affordable housing projects by identifying in-fill and opportunity sites in the commercial zones, on public lands and under-developed R-2, R-3 and R-4 sites.	The 2015 Housing Element identified infill opportunity sites as follows: Commercial zones, 806 parcels; R-2 zones, 891 parcels; R-3/R-4 zones, 566 parcels.	Delete This is already done as part of the suitable sites inventory.
H11.9 Sweat Equity Projects. Continue to support special procedures for development, permitting, construction and early occupancy of "sweat equity" projects.	Habitat for Humanity is the only known local organization developing sweat equity projects and no new units of that type were permitted in the 5 th Cycle.	Delete Combine with other affordable housing types.
H11.10 Large Rental Units. Encourage the construction of three bedroom and larger rental units for low-, moderate-, and middle income families, including the Housing Authority, in efforts to develop and/or acquire three+ bedroom units.	Larger rental units are encouraged and provided in some AUD Program projects because density is not based on bedroom count. In the 5 th Cycle, 64 three+ bedroom units were approved, issued a building permit, or constructed. The Housing Authority acquired one three bedroom/two bathroom house.	Continue <u>Modify</u>
H11.11 Condominium Conversions. Continue to implement the Municipal Code's Condominium Conversion Ordinance to provide opportunities for entry-level home ownership in a variety of locations while maintaining a supply of rental housing for extremely low, very low, low and moderate income persons.	In the 5 th Cycle, one condo conversion project was approved, involving three units.	Modify <u>Continue</u>

TABLE A-2: THE 2015 HOUSING ELEMENT

Goal/Policy/Program	Results and Evaluation	Status
H11.12 Surplus Land. Inventory all land in the City owned by County, State and Federal governments, the Santa Barbara School and High School Districts and public utilities, and actively pursue dedication of surplus land for development of low, moderate and middle income housing, and for qualifying employees of participating government agencies.	Surplus land was included in the sites inventory.	Delete <u>Modify</u> The state now requires a surplus land inventory <u>be included with the annual Housing Element progress reports.</u>
H11.13 Housing Opportunities. Look for housing opportunities on City-owned land or over private and public parking lots.	This is an ongoing effort. In the 5 th Cycle, the City entered into a Project Agreement with the Housing Authority to develop housing on an underutilized City parking lot.	<u>Modify</u> <u>Include a program in the 2023 – 2031 Housing Element to comprehensively evaluate all applicable City-owned land as potential future sites for housing.</u>
H11.14 Public Facilities. Pursue acquisition of the National Guard and Army Reserve sites in order to develop affordable housing, park, school or other public benefit facilities.	<p>In 2018, Santa Barbara Unified School District purchased the National Guard Armory. The City continues to consult with the School District regarding development potential of the site.</p> <p>In 2017, the Army Reserve Center was declared excess property by the Federal Government. American Indian Health & Services purchased the property for a health clinic and it was transferred to them in 2021. The property is currently zoned for low density residential. Staff recommended that a Specific Plan be prepared to</p>	<u>Delete</u> Both properties were purchased for uses other than housing.

TABLE A-2: THE 2015 HOUSING ELEMENT

Goal/Policy/Program	Results and Evaluation	Status
	allow the proposed clinic and restrict the site to public benefit uses, including affordable housing, if the clinic use were to cease.	
H11.15 Financial Assistance. Apply for, or support others in applying for, all available public and private funding and financial assistance for affordable housing projects.	The City supports state and federal legislation and programs to provide financing for affordable housing in the Legislative Platform. In the 5 th Cycle, the City continued to administer and provide matching funds for state and federal funding programs for affordable housing.	Modify <u>Continue</u>
H11.16 Property Transfer Tax. Increase property transfer tax to provide funding for price-restricted affordable and workforce housing, in order to broaden the funding base.	Property transfer tax is controlled by the California Revenue and Tax Code and all counties in California pay the same rate. In 2018, Senate Bill 2 (2018) mandated a \$75 recording fee on certain real estate transactions. A portion of the revenue goes to communities to create affordable housing.	Delete
H11.17 Alternative Revenue Sources. Explore alternative sources of revenue for Affordable Housing to replace the Redevelopment Agency tax increment financing since it was dissolved in 2012.	The City tracks alternative revenue sources but no programs were developed to replace RDA financing.	Modify <u>Include a program in the 2023 – 2031 Housing Element to replace RDA funding.</u>
H11.18 Extend Redevelopment Project Area. Continue to explore and pursue potential legislative amendments or other opportunities for extension or replacement of the Redevelopment Agency and its funding mechanism for affordable housing and other community benefit projects.	The City supports legislation for new community revitalization tools to replace the RDA and its funding mechanisms for affordable housing.	Modify <u>Include a program in the 2023 – 2031 Housing Element to replace RDA funding.</u>

TABLE A-2: THE 2015 HOUSING ELEMENT

Goal/Policy/Program	Results and Evaluation	Status
<p>H11.19 Parcel Consolidation. Encourage the consolidation of small and underutilized parcels for the development of affordable housing, if appropriate based on neighborhood compatibility.</p>	<p>Lot mergers are a ministerial action and were occasionally utilized in the 5th cycle to develop market rate housing.</p>	<p>Delete</p> <p><u>Voluntary lot mergers are Lot consolidation is encouraged but out of the City's control as they are pursued by developers on a case-by-case basis.</u></p>
<p><u>Policy</u> H12. Above Moderate Affordable Housing. Provide incentives for the private sector development of new housing opportunities affordable to households earning more than 120% of the Area Median Income, but not more than 200% of the Area Median Income.</p>		
<p><u>Implementation Actions</u></p>		
<p>H12.1 Above Moderate Housing. Encourage the development of housing for first time home buyers, including moderate and middle-income households.</p>	<p><u>The City's Inclusionary Housing Ordinance requires that projects with ten or more ownership units (excluding density bonus) include 15% of the units be sold at prices affordable to Middle or Upper-Middle income households.</u> In the 5th Cycle, five condominium units were constructed, seven were approved, and six are pending approval for a total of 18 units. None of the units are deed restricted.</p>	<p>Modify</p> <p><u>Include a program in the 2023 – 2031 Housing Element to reevaluate the effectiveness of the Inclusionary Housing Ordinance in producing deed-restricted housing for middle and upper middle</u></p>

TABLE A-2: THE 2015 HOUSING ELEMENT

Goal/Policy/Program	Results and Evaluation	Status
		<u>income households.</u>
H12.2 Large Employers. Encourage large employers to mitigate affordable housing impacts.	Both Westmont College and Cottage Hospital created employee housing under the City's regulations. Employer-Sponsored housing qualifies for density incentives under the AUD Program. In the 5 th Cycle, Westmont College constructed 13 new faculty/staff units and modified their Affordable Housing Agreement to allow flexibility in income levels assigned among their 54 income-restricted housing units.	Modify <u>Continue</u>
<u>Policy H13. Non-Subsidized Rental Housing. Preserve and promote non-subsidized affordable rental housing.</u>		
<u>Implementation Actions</u>		
H13.1 Preserve Rentals. Explore ways to avoid condominium conversions, or alternatively, the creation of cooperative tenant ownership of previous rentals.	This program was not completed.	Modify <u>Delete</u> Conflicts with H11.11, which encourages condominium conversions.
H13.2 Condominium Conversions. Amend section 28.88.120B of the Municipal Code to require all condominium conversions to conform to the density requirements of the General Plan.	This program was not completed.	Delete
H13.3 Rental Units. Allow the reconstruction or rehabilitation of existing rental apartments at non-conforming General Plan densities and zoning standards. The loss of some rental units may be	The zoning ordinance allows for improvements to existing rental units that are nonconforming to density and current zoning standards.	Delete

TABLE A-2: THE 2015 HOUSING ELEMENT

Goal/Policy/Program	Results and Evaluation	Status
considered to meet building code requirements.		
<u>Policy</u> H14. Sustainable Housing. Ensure that new market-rate residential development is consistent with the City's sustainability goal, including reduced energy and resource use, and increased affordable housing opportunities.		
<p>H14.1 Market Rate Housing. Market-level housing projects in the multi-family or commercial zones (including mixed-use) shall be encouraged to:</p> <ul style="list-style-type: none"> • Construct unit sizes consistent with averages and maximums set out under the City's Average Unit-Size Density Incentive Program; and • Have access to adequate public open space within a ½-mile radius, a dedication of sufficient useable open space on-site, a contribution is made toward future parks through in-lieu fees, or a combination of any of these. 	AUD Program provisions apply to market rate housing in multi-unit and commercial zones. All housing units in the City are served by existing public open space or on-site open space. No in-lieu fees for parks were established as the city is nearly fully built-out and additional fees could negatively impact housing development.	Delete
H14.2 Resource Conservation. Establish criteria and standards for resource use in relation to density in the project review process, to encourage reduced resource footprint projects. Residential projects that exhibit a significantly lower resource per capita footprint would be allowed bonus density providing the building remains smaller than allowed by zoning.	This program was not completed	Modify or Delete <u>Higher density housing projects use less water and other resources than lower density projects.</u>
H14.3 Market-Rate Incentives. Prepare design standards and codify incentives for market rate	The AUD Program codifies incentives for smaller units. However, new, smaller market-rate units are often coupled with significant	Delete

TABLE A-2: THE 2015 HOUSING ELEMENT

Goal/Policy/Program	Results and Evaluation	Status
<p>developers to build smaller, “affordable-by-design” residential units that better meet the needs of our community.</p>	<p>amenities, and were not found to be rented at rates affordable to moderate, low, or very low income households.</p> <p>Infill design standards were completed in 2017. The process to create Objective Design Standards for market rate and affordable housing was started in 2021.</p>	
<p><u>Policy H15. Secondary Dwelling Units.</u> Further encouraging second units (granny units) in single family zones shall be pursued with neighborhood input to gauge level of support but prohibited in the High Fire Hazard Zones to the extent allowed by the State laws applicable to second units. Second units may be most appropriate within a short walking distance from a main transit corridor and bus stop.</p>		
<p>H15.1 Secondary Dwelling Unit Ordinance. Amend the Secondary Dwelling Unit Ordinance to provide more site planning flexibility and affordable-by-design concepts such as:</p> <ul style="list-style-type: none"> • Changing the existing size limitations to remove percentage of unit size and allowable addition requirements, and allowing a unit size range (300 – 700 s.f.); • The square footage of the secondary dwelling unit shall be included in the floor-to-area ratio (FAR) for the entire property and shall be consistent with the Neighborhood Preservation Ordinance FAR; • Eliminating the attached unit requirement; • Eliminating or adjusting affordability requirements; • Allowing tandem parking and easing other parking requirements on a case-by-case basis; • Allowing one water, gas, and electric meter and a single sewer line, or reviewing 	<p>In the 5th Cycle, the Zoning Ordinance was amended twice to comply with State law to facilitate accessory dwelling units.</p>	<p>Modify</p> <p><u>State law changes have greatly facilitated the development of ADUs.</u></p> <p><u>Include a program in the 2023 - 2031 Housing Element to further facilitate production based on community input.</u></p>

TABLE A-2: THE 2015 HOUSING ELEMENT

Goal/Policy/Program	Results and Evaluation	Status
<p>requirements for meter placement and configuration to minimize the cost of individual metering of dwelling units; and</p> <ul style="list-style-type: none"> Developing guidelines and prototypes of innovative design solutions. 		
<p><u>Policy H16. Expedite Development Review Process.</u> Assist affordable housing sponsors to produce affordable housing by reducing the time and cost associated with the development review process while maintaining the City's commitment to high quality planning, environmental protection and urban design.</p>		
<p><u>Implementation Actions</u></p>		
<p>H16.1 Affordable Housing Projects. Continue to give priority to affordable housing projects on Staff, Committee and Commission agendas.</p>	<p>The City administratively provides priority for affordable housing projects on meeting agendas and permit plan review.</p>	<p>Modify <u>Continue</u></p>
<p>H16.2 Affordable Housing Facilitator. Continue to have a Staff-level Affordable Housing Facilitator with clearly established roles and responsibilities as defined by City Council.</p>	<p>The City's Housing <u>Programs Specialists Project Planner</u> served as the affordable housing facilitators.</p>	<p>Modify <u>Continue</u></p>
<p>H16.3 CEQA Exemption. Continue to use the CEQA infill exemption for Affordable Housing projects as appropriate.</p>	<p>The CEQA infill exemption is used when applicable.</p>	<p>Delete <u>Continue</u></p>
<p>H16.4 Coordinated Project Review. Address issues of coordination between the Architectural Board of Review (ABR), the Historic Landmarks Commission (HLC), the Staff Hearing Officer (SHO) and the Planning Commission (PC). Identify areas where additional staff authority could be given for administrative approvals.</p>	<p>PC Liaisons are appointed to design review bodies to improve communication. Case planners ensure that design review comments are conveyed to the PC and vice versa for projects that require both design review and PC approval. Expanding the types of projects that can be approved administratively by staff is being discussed but has not yet been implemented.</p>	<p>Modify <u>Continue</u></p> <p><u>Administrative approval is being pursued separately as part of the Land Development Team Process</u></p>

TABLE A-2: THE 2015 HOUSING ELEMENT

Goal/Policy/Program	Results and Evaluation	Status
		<u>Improvements.</u>
H16.5 Infill Project Guidelines. Work with AIA, ABR and HLC members to develop guidelines and examples for small infill projects (adding 1-3 units). Consider allowing projects consistent with the guidelines to be reviewed as Consent items when appropriate.	Infill Design Guidelines were completed in 2017 and are included in the Architectural Board of Review and Historic Landmarks Commission Guidelines.	Delete Complete
H16.6 Water Meters. Allow new apartment developments to be served by a single water meter for interior uses with sub-meters for each unit, as appropriate, or review requirements for meter placement and configuration to minimize the cost of individual metering of dwelling units.	State law requires all multi-unit developments approved after January 1, 2018, to be separately metered in order to measure water consumption. Developments with 100% rental units affordable to very low or low income households can use one water meter per six units under specific conditions. Accessory Dwelling Units do not require a separate water meter.	Delete Complete
H16.7 Expedited Review. Continue working with the Architectural Board of Review (ABR) and the Historic Landmarks Commission (HLC), and City departments to expedite the review of Affordable Housing Projects. As appropriate, establish joint sub-committees of design review boards and Planning Commission to offer early, consistent and timely input and problem solving during the review process.	Affordable housing projects are prioritized in the project review, public hearing, and permit review process. No joint sub-committees of design review boards and Planning Commission were established but liaisons are appointed to ensure communication.	Modify <u>Continue</u>
H16.8 Multi-Family Design Guidelines. Develop multi-family residential design guidelines and standards to address unit size, setbacks, open space, landscaping, building size, bulk and scale,	The Infill Design Guidelines partially fulfil this objective. City Council gave direction to further review open space and other standards through the AUD Program amendments. In 2020, the City prepared draft Objective Design Standards for Streamlined Housing Projects	Modify Partially complete. <u>Include a program in the 2023-2031</u>

TABLE A-2: THE 2015 HOUSING ELEMENT

Goal/Policy/Program	Results and Evaluation	Status
and site planning (e.g., pedestrian-friendly design, front porches facing the street or courtyard, and parking located out of sight).	per Senate Bill 35 (2017). In 2021, the City started the process of creating Objective Design Standards for all multi-unit housing.	<u>Housing Element to develop and now changed to objective design standards for multi-unit housing.</u>
<u>Policy H17. Flexible Standards.</u> With the New Zoning Ordinance (NZO) Update consider changes to development standards to be more flexible for rental, employer sponsored workforce housing, affordable housing projects, and limited equity co-operatives, where appropriate.		
<u>Implementation Actions</u>		
<p>H17.1 Parking Requirements. Consider incremental changes to the Zoning Ordinance parking requirements such as:</p> <ul style="list-style-type: none"> Reducing parking requirements for projects that develop under the Average Unit-Size Density Incentive Program to 1 space minimum per unit. Allowing tandem parking. Providing more flexibility for constrained sites (e.g., allowing for more than one maneuver, use of car stacking devices or other space saving measures). Eliminating guest parking requirements for housing in the Downtown commercial area. Rounding down when calculating parking requirements. 	These incremental changes are complete. The AUD Program parking standards dictate a parking maximum of one space in the Central Business District, unbundled parking, and no guest parking is required. Tandem parking is allowed for accessory dwelling units, multi-unit, and mixed-use development and is also allowed for all other residential uses if needed for flexibility on a constrained lot. Offsite parking is allowed for residential units in commercial zones. Parking calculations are now rounded down to the nearest whole number.	Delete Complete
H17.2 Zoning Standards. Consider amending the Zoning Ordinance to change how, where and the extent of outdoor living space, yard and setback	In 2017 and 2020, standards were amended for housing in nonresidential zones as follows: 1. Nonresidential setbacks are allowed for mixed-use development; 2. Live-Work Units allow	Delete Complete

TABLE A-2: THE 2015 HOUSING ELEMENT

Goal/Policy/Program	Results and Evaluation	Status
requirements for housing in commercial zones.	reduced open yard and parking; 3. The minimum distance between buildings requirement was removed; 4. An “alternative open yard” on mixed use projects can be approved by design review (instead of a Modification); 5. Required open space can be counted on roof decks. In 2021 a conceptual Adaptive Reuse ordinance was vetted through Planning Commission that would further amend open space requirements in commercial zones to facilitate reuse of existing buildings for housing.	
H17.3 Expedite Environmental Review. Develop and maintain a system for use of the City's Master Environmental Assessment Document as a means of expediting the environmental review process consistent with State law regarding housing.	The City is using SB2 grant funding to update the General Plan EIR to streamline CEQA review for housing projects. The City also continues to use the MEA to expedite review and apply applicable statutory and categorical exemptions. Mapped layers showing environmental constraints are also available for public viewing in the online City's GIS program.	Delete Complete
H17.4 Development Review Process. On an ongoing basis, evaluate the current development review system and make recommendations for improvements.	The development review process is reviewed annually as part of budget process. Additionally, workflow study was completed, which examined opportunities to improve efficiency, communication, and customer service. City staff is working to implement those process improvements, and meet with the Land Development Team Oversight Committee to report on the recommendations implementation.	Delete Complete
<u>Policy H18. Monitoring of Net Housing Gains and Losses. The City shall monitor housing development and progress toward achieving housing goals.</u>		
<u>Implementation Actions</u>		
H18.1 Adaptive Management Program. Through the Adaptive Management Program, monitor and	Housing production is tracked and evaluated on an ongoing basis and annually for the State Department of Housing and Community	<u>Continue</u> Delete

report annually to the Planning Commission, City Council and public, the number of total and affordable dwelling units (including bonus density units) that are being constructed, and the number of units converted to commercial use or demolished and not replaced.	Development. Residential units proposed under the AUD Program and accessory dwelling units are tracked regularly and posted on the City's website.	Complete
<p>GOAL</p> <p>Conservation and Improvement of Existing Housing: Conserve the existing housing stock and improve its condition while minimizing displacement, maintaining housing affordability, and preventing future blight or deterioration.</p>		
<p>Policy H19. Rehabilitation Programs. The City shall continue to expand its voluntary housing rehabilitation programs, and preserve existing housing in all parts of the City.</p>		
<u>Implementation Actions</u>		
H19.1 Low-Interest Loans. Continue to provide low interest rehabilitation loans for housing sponsors to rehabilitate multi-family structures.	The City's Housing Rehabilitation Home Program (HRLP), Affordable Housing Fund, and Affordable Housing Inclusionary Fund provides grants and low-interest loans for housing rehabilitation. In the 5 th Cycle, the City provided 10 loans and one grant.	Continue <u>Modify</u>
H19.2 Neighborhood Surveys. Continue to survey neighborhoods that have the highest number and concentration of units in need of rehabilitation.	A survey was conducted as part of the 2015 Housing Element.	Continue <u>Delete</u> Housing conditions surveys are a required component of the Housing Element.
H19.3 Substandard Housing. Continue to allow	The City allows demolition of substandard housing, if not	Delete

TABLE A-2: THE 2015 HOUSING ELEMENT

Goal/Policy/Program	Results and Evaluation	Status
the appropriate demolition of substandard housing.	designated as a historic resource.	Complete
<u>Policy</u> H20. Property Improvements. The City shall encourage residential property owners to improve the conditions of their property (ies) to a level that exceeds the minimum standards of the California Building Code and the Uniform Housing Code.		
H20.1 Zoning Enforcement. Continue to focus building and zoning enforcement efforts on property owners who are chronic, repeat offenders with emphasis on multi-departmental inspections and abatement orders, and prosecution of violators through the court system.	The City continues to enforce on chronic, repeat offenders. The City's website includes a potential code violation hotline and Request for Investigation form.	Delete <u>Continue</u> Complete
H20.2 Substandard Apartment Complexes. Look for opportunities to acquire larger, substandard apartment complexes in cooperation with the Housing Authority, Peoples' Self Help Housing or other community-based organizations in order to correct health and safety problems and to provide ongoing management services.	In the 5 th Cycle, the Housing Authority acquired 3 substandard housing units: 1 three-bedroom, 2 two-bedroom in 2020.	Modify <u>Continue</u>
H20.3 Bilingual Assistance. Continue to provide a bilingual ombudsperson for tenants in substandard units who wish to file a housing complaint.	Bilingual staff are available throughout the organization to assist with general questions, development applications, housing issues, and tenant/landlord disputes. The Housing and Human Services Division has 3 bilingual staff members and Rental Housing Mediation Program staff regularly interact with concerned tenants.	Modify <u>Continue</u>
H20.4 Zoning Information Reports. Continue to require Zoning Information Reports when residential units change ownership, excluding condominiums.	The ZIR program was changed substantially in 2019 and no longer requires that staff perform a site visit or review records. ZIRs continue to be required and can be obtained through independent review of the street and planning files on the City website.	Delete

TABLE A-2: THE 2015 HOUSING ELEMENT

Goal/Policy/Program	Results and Evaluation	Status
H20.5 Illegal Dwelling Units. Consider ways to legalize illegal dwelling units in accordance with the requirements of the Zoning Ordinance.	The Accessory Dwelling Unit ordinance provides an opportunity to legalize some illegal units. In the 5 th Cycle, 17 legal ADUs were created from enforcement/abatement cases.	Modify or Delete <u>Continue</u>
H20.6 Substandard Buildings. Consider implementing a program that would require owners of buildings found by the City's Building and Safety Division to be substandard to assume the financial burden of relocating their tenants to habitable units.	The City's Municipal Code requires a relocation assistance payment to qualified tenants for No-Fault Just Cause Evictions, which includes a local order that necessitates vacating the rental unit for at least 30 days. As of July 2022, AB 838 requires the City to inspect buildings upon complaint of a substandard building or a lead hazard violation.	Delete
H20.7 Tax Code. Continue to utilize the processes of Sections 17274 and 24436.5 of the State Revenue and Taxation Code which prohibits a taxpayer who derives rental income from substandard housing from receiving income tax deductions for interest, taxes, depreciation or amortization paid or incurred with respect to the substandard housing.	The City identifies substandard housing conditions and requires compliance with Government Code Section 17274 and 24436.5 when applicable.	Delete <u>Continue</u>
<u>Policy H21.Preserve Affordable Housing. Maintain the affordability of existing extremely low, very low, low and moderate income dwelling units.</u>		
<u>Implementation Actions</u>		
H21.1 Affordability Covenants. Continue to monitor and preserve affordable housing covenants before they expire.	The City monitors the expiration of affordability covenants and sometimes offers rehabilitation funds in exchange for extended affordability covenants; however, the City cannot unilaterally extend ownership covenants.	<u>Continue</u> Modify
H21.2 At-Risk Affordable Units. Continue to encourage the Housing Authority and nonprofit	The City encourages the Housing Authority and other nonprofits to acquire units with affordability limits that are due to expire. The City	Modify <u>Continue</u>

TABLE A-2: THE 2015 HOUSING ELEMENT

Goal/Policy/Program	Results and Evaluation	Status
purchase or preferably monetize Presidio Park Apartments and ensure they remain a long term affordable housing project.		
GOAL Regional Cooperation and Jobs/Housing Balance: Coordinate City efforts with those of surrounding communities towards balancing jobs and housing in the regional housing market.		
<u>Policy H22.</u> Work to Solve Regional Jobs/Housing Imbalance. The City is committed to working with neighboring jurisdictions and the private sector to solve the regional jobs/housing imbalance in a regional manner.		
<u>Implementation Actions</u>		
H22.1 Affordable Housing Task Group. Continue to support and participate on the Joint Cities / County Affordable Housing Task Group.	The City actively participates in and organizes quarterly meetings of the Joint City/County Affordable Housing Task Force.	Modify or Delete <u>Continue</u>
H22.2 Shared Housing Development. Explore joint housing development opportunities, with the County of Santa Barbara and the cities of Carpinteria and Goleta.	The City explores joint housing development opportunities but no joint housing development projects were undertaken in the 5 th Cycle.	Modify <u>Continue</u>
H22.3 Affordability Criteria. Continue coordination with the County to maintain uniform affordability criteria.	The City continues coordination with County on affordability criteria, and the City would seek input from the County and surrounding cities before modifying criteria.	Delete <u>Continue</u>
H22.4 Farmworker Housing. Encourage and support the County's efforts to address the special housing needs of farmworkers on the South Coast. Review City zoning regulations to ensure conformance with Health and Safety Code	The City supports County's farmworker housing efforts. Employee housing is not included in the definition of a boarding house or other similar terms per Section 17021.5. The City does not have an agricultural land use category per Section 17021.6.	Delete <u>Continue</u>

TABLE A-2: THE 2015 HOUSING ELEMENT

Goal/Policy/Program	Results and Evaluation	Status
Sections 17021.5 and 17021.6.		
H22.5 Affordable and Workforce Housing. Continue to work with community groups in support of Affordable and “Workforce” housing on the South Coast.	The City works with community groups to support regional workforce housing including the Joint City/County Affordable Housing Task Force, Coastal Housing Partnership, Santa Barbara League of Women Voters, and the Housing Trust Fund.	Modify <u>Continue</u>
H22.6 Coastal Housing Partnership. Continue to participate and support the Coastal Housing Partnership, as well as explore ways to expand its role and reach.	The City is an active member in the Coastal Housing Partnership.	Modify <u>Continue</u>
H22.7 Employer Incentives. Work with the Coastal Housing Partnership to develop incentives for employers throughout the South Coast to provide employee housing on-site or close-by off-site, and establish or expand programs that encourage employers to provide other housing benefits or financial assistance programs, such as down payments, closing costs and rental move-in fees for employees.	Program not completed.	Modify <u>Continue</u>
H22.8 Bridge Loans. Encourage the Community Housing Trust Fund to explore the feasibility of providing “bridge loans” to existing property owners to add small rental units (including “granny units”) to their property. The bridge loan would be for the construction period. In exchange, the rental units would be required to be affordable for a reasonable period of time.	The Housing Trust Fund operates a Revolving Loan Fund and supports housing projects where at least 25% of the units serve low-to-moderate income households. <u>The California Housing Finance Agency now offers up to \$40,000 in grants towards pre-development and non-reoccurring closing costs associated with ADUs.</u>	Modify <u>Include a program in the 2023 – 2031 Housing Element to incentivize ADUs as affordable housing.</u>

TABLE A-2: THE 2015 HOUSING ELEMENT

Goal/Policy/Program	Results and Evaluation	Status
<p>H22.9 Affordable Student Housing. Encourage UCSB and Santa Barbara City College to address affordable student, faculty and staff housing on campus and at close-by off-site opportunity sites. Discuss with SBCC or other interested organizations the potential and obstacles to development of student housing on campus or within walking distance to the campus. Provide encouragement and assistance in pursuit of any needed legislative or Local Coastal Plan Amendments for the provision of student housing.</p>	<p>The City continues to discuss student housing opportunities with SBCC/UCSB and with developers contemplating projects in proximity to the campuses.</p>	<p><u>Modify and continue</u></p> <p><u>Include a program in the 2023 – 2031 Housing Element to continue working on this issue.</u></p>
<p>H22.10 Regional Coordination on Affordable Housing. Continue to coordinate with other South Coast agencies to identify available land for residential development and consider partnerships between local agencies to develop housing for the South Coast workforce. Inventory and consider publicly-owned sites throughout the South Coast's urban areas with good transit accessibility for such development.</p>	<p>The City continues regional coordination, including participating in discussions via the Joint City/County Affordable Housing Task Force and regarding potential projects for the Affordable Housing & Sustainable Communities Program.</p>	<p><u>Modify and continue</u></p> <p><u>Include a program in the 2023 – 2031 Housing Element to continue working on this issue.</u></p>
<p><u>Policy</u> H23.Sustainable Regional Housing Solutions. Develop regional strategies to fund and construct Affordable Housing for different need categories (e.g., senior, young families, disabled, homeless) within existing urban growth limits.</p>		
<p>H23.1 State and Federal Funding. Explore opportunities for joint City/County applications for Federal and State housing assistance programs.</p>	<p>The City continues to provide Annual Action Plan (AAP) required under 5-Year HUD Consolidated Plan. The AAP acts as the City's application for federal HOME and CDBG funding. The City tracks funding opportunities from the State HCD.</p>	<p><u>Modify-Continue</u></p>

H26.3 Housing Achievements. Support and assist efforts to publicize both public and private affordable housing achievements.	The City continues to publicize housing achievements via the Affordable Housing website and the AUD Program website, as well as through participation in community forums and events such as the Housing Authority's Housing Day.	Modify <u>Continue</u>

Appendix B: Affirmatively Furthering Fair Housing

Introduction and Overview of AB 686

AB 686 (2018) requires Housing Elements to contain an Assessment of Fair Housing consistent with the core elements of the analysis required by the federal Affirmatively Furthering Fair Housing (AFFH) Final Rule of July 16, 2015. Under California law, AFFH means “taking meaningful actions, in addition to combating discrimination, that overcome patterns of segregation and foster inclusive communities free from barriers that restrict access to opportunity based on protected characteristics.”

To comply with AB 686, the City completed the following outreach and analysis. The Analysis of Impediments to Fair Housing prepared by Root Policy Research in 2020 (the “City AI”) provides extensive data and policy recommendations that informed this AFFH analysis.

In addition, HCD encourages that analysis be presented at both a local and county level, for the purposes of promoting more inclusive communities. The Santa Barbara County HOME Consortium and Urban County Partnership (referred to as “Consortium”) is included as a data source. At minimum, the analysis should compare patterns from the most recent Five-Year ACS. The 2020 City AI includes data from either the one-year 2018 ACS or the five-year 2014 – 2018 ACS, and to ensure data consistency, all additional data sources have been gathered from the same source.

AFFH Technical Terms

AFFH: Affirmatively Furthering Fair Housing

Taking meaningful actions that, taken together, address significant disparities in housing needs and in access to opportunity, replacing segregated living patterns with truly integrated and balanced living patterns, transforming racially and ethnically concentrated areas of poverty into areas of opportunity, and fostering and maintaining compliance with civil rights and fair housing laws.

Assessment of Fair Housing

An analysis undertaken pursuant to 24 CFR § 5.154 that includes an analysis of fair housing data, an assessment of fair housing issues and contributing factors, and an identification of fair housing priorities and goals, and is conducted and submitted to HUD using the Assessment Tool. The AFH may be conducted and submitted by an individual program participant (individual AFH), or may be a single AFH conducted and submitted by two or more program participants (joint AFH), or two or more program participants, where at least two of which are consolidated plan program participants (regional AFH).

Contributing Factor

A factor that creates, contributes to, perpetuates, or increases the severity of one or more fair housing issues. Goals in an AFH are designed to overcome one or more contributing factors and related fair housing issues.

Disparities in Access to Opportunity

Defined by the AFFH Final Rule as “substantial and measurable differences in access to educational, transportation, economic, and other opportunities in a community based on protected class related to housing.”

Disproportionate Housing Needs

Generally, refers to a condition in which there are significant disparities in the proportion of members of a protected class experiencing a category of housing need when compared to the proportion of members of any other relevant groups or the total population experiencing that category of housing need in the applicable geographic area. For purposes of this definition, categories of housing need are based on such factors as cost burden, severe cost burden, overcrowding, tenure (own vs. rent), homelessness, and substandard housing conditions.

Fair Housing Choice

Under the AFFH Final Rule, fair housing choice means that individuals and families have the information, opportunity, and options to live where they choose without unlawful discrimination and other barriers related to race, color, religion, sex, familial status, national origin, or disability. Fair housing choice encompasses:

- Actual choice, which means the existence of realistic housing options;
- Protected choice, which means housing that can be accessed without discrimination;
- Enabled choice, which means realistic access to sufficient information regarding options so that any choice is informed. For persons with disabilities, fair housing choice and access to opportunity include access to accessible housing and housing in the most integrated setting appropriate to an individual’s needs, as required under Federal civil rights law, including disability-related services that an individual needs to live in such housing.

Fair Housing Issue

A condition in a program participants geographic area of analysis that restricts fair housing choice or access to opportunity and includes such conditions as ongoing local or regional segregation or lack of integration, racially or ethnically concentrated areas of poverty, significant disparities in access to opportunity, disproportionate housing needs, and evidence of discrimination or violations of civil rights law or regulations related to housing.

Integration

A condition within the program participants geographic areas of analysis, as guided by the AFFH Data Viewer, in which there is not a high concentration of persons of a particular race, color, religion, sex, familial status, national origin, or having a disability or a type of disability in a particular geographic area when compared to a broader geographic area.

Meaningful Action

Significant actions that are designed and can be reasonably expected to achieve a material positive change that affirmatively furthers fair housing by, for example, increasing fair housing choice or decreasing disparities in access to opportunity.

Protected Class

Refers to groups of people who are legally protected from being harmed or harassed by laws, practices, and policies that discriminate against them due to a shared characteristic (e.g.e.g., race, gender, age,

disability, or sexual orientation). These groups are protected by both U.S. federal and state laws.

Segregation

A condition within the program participant's geographic area of analysis - in which there is a high concentration of persons of a particular race, color, religion, sex, familial status, national origin, or having a disability or a type of disability in a particular geographic area when compared to a broader geographic area.

Contributing Factors

The Housing Element must include an identification and prioritization of significant contributing factors to segregation, racially or ethnically concentrated areas of poverty, disparities in access to opportunity, and disproportionate housing needs. "Fair housing contributing factor" means a factor that creates, contributes to, perpetuates, or increases the severity of one or more fair housing issues. Contributing factors should be based on all the prior efforts and analyses: outreach, assessment of fair housing, and site inventory. Contributing factors must also be prioritized in terms of needed impact on fair housing choice and strongly connect to goals and actions.

Suitable Sites Inventory

AB 686 requires the City's suitable sites inventory contain the full scope of the assessment of fair housing, ensuring the City's projected housing development sites accommodate all income levels, and assess if projected development will either further entrench or help to ameliorate existing patterns of segregation and/or exclusion of members of protected classes. Demographic patterns, disproportionate housing needs and access to opportunity, and the City's regulatory review are identified fair housing issues for the City identified by the City AI. As a result, suitable sites were identified to accommodate all income levels in the City's commercial and multi-unit zones along transit corridors close to jobs and services. This section includes a map series that compares AB 686 to the suitable sites inventory. The inventory sites are shown in the figures below where applicable.

Goals, Policies, and Programs

Through the participation of stakeholders, fair housing advocates, and the assessment of fair housing issues described in this appendix, the City has identified contributing factors and meaningful actions that will be taken to address those issues during the planning period as described in Table B-1: For each fair housing impediment listed in Table B-1 below, a cross reference is provided to specific programs in this Housing Element that are intended to address the impediment.

TABLE B-1: FACTORS THAT CONTRIBUTE TO FAIR HOUSING ISSUES IN SANTA BARBARA

AFFH Identified Fair Housing Issues	Contributing Factors	Meaningful Actions
Demographic Patterns	Fair housing observation from demographic analysis: Concentration of Hispanic residents in Downtown and Eastside neighborhoods; higher poverty rates among minority populations.	<p>The Housing Element's suitable sites inventory identifies housing opportunities for low-income households throughout the City, rather than concentrated in particular neighborhoods.</p> <p>The following programs will provide assistance to racial/ethnic minority households:</p> <p>HE-152: <u>Support Rental Housing Mediation Task Force Program</u></p> <p>HE-2016: <u>Enhance the Fair Housing Program Affirmatively Further Fair Housing Program and Opportunities</u></p> <p>HE-2247: <u>Home Rehabilitation Funding and Technical Assistance</u></p> <p>HE-23: <u>Fund Home Improvements and Repairs</u></p> <p>HE-2449: <u>Renters Rights Information</u></p> <p>HE-250: <u>Housing Resources for the Public</u></p> <p>HE-26: <u>Housing Supply and Affordability Education Campaign</u></p>
Disproportionate Housing Needs	Fair housing observation from housing needs analysis: disproportionate housing needs exist for racial/ethnic minorities, large family households, and people with disabilities.	<p>In addition to the programs above, the following program will provide support for housing needs:</p> <p>HE-64: <u>Facilitate Production of Accessory Dwelling Units (ADUs)</u></p> <p>HE-86: <u>Innovative Housing Types</u></p> <p>HE-7: <u>Affordable Housing Overlay</u></p> <p>HE-10: <u>Affordable Housing Strategy</u></p> <p>HE-11: <u>Inclusionary Housing Ordinances Evaluation</u></p>

TABLE B-1: FACTORS THAT CONTRIBUTE TO FAIR HOUSING ISSUES IN SANTA BARBARA

AFFH Identified Fair Housing Issues	Contributing Factors	Meaningful Actions
		<p>HE-141: Affordable Housing Trust Fund</p> <p>HE-16: Right of First Refusal Purchase Program</p> <p>HE-18: Fund Home Repairs for Senior and Disabled Homeowners and Renters</p> <p>HE-21: Monitor and Preserve Existing Affordable Housing</p> <p>HE-27: Joint Legislative Platform</p> <p>HE-28: Affordable Student, Staff, and Faculty Housing</p>
Access to Opportunity	Fair housing observation from opportunity analysis: Racial/ethnic minorities have lower access to economically strong neighborhoods and live in neighborhoods with lower labor market engagement.	The Housing Element's suitable sites inventory identifies housing opportunities near transit corridors and jobs throughout the City, providing an opportunity for all residents to have access to economically strong neighborhoods.
Regulatory Review – Zoning and Land Use	Fair housing observation from regulatory analysis: Barriers to affordable housing development contribute to market realities that limit housing choice and exacerbate vulnerability of residents that may experience housing discrimination.	<p>In addition to the programs listed above, the following programs address regulatory review.</p> <p>HE-1: Facilitating Conversion of Nonresidential Buildings to Housing</p> <p>HE-3: Amend the Zoning Ordinance to Reduce Governmental Constraints and Comply with State Law for Special Needs Housing</p> <p>HE-4: Use-By-Right Permitting</p> <p>HE-5: Process Improvements</p> <p>HE-75: Objective Design Standards</p> <p>HE-118: Inclusionary Housing Ordinance Evaluation</p> <p>HE-129: City Land Registry</p> <p>HE-130: Housing Production Tracking</p> <p>HE-163: Right of First Refusal Purchase Program</p> <p>HE-174: Short-Term Vacation Rental/Hotel Ordinance Framework and Ordinance</p>

AFFH Identified Fair Housing Issues	Contributing Factors	Meaningful Actions
		<p><u>HE-18:</u> Hotel Zones Evaluation</p> <p><u>HE-195:</u> Residential Units Conversion Ordinance</p> <p><u>HE-272:</u> Joint Legislative Platform</p> <p><u>HE-29:</u> Affordable Housing Funding</p> <p><u>HE-3025:</u> Support for Affordable Housing Funding Legislation</p>

ASSESSMENT OF FAIR HOUSING ISSUES

This section provides an assessment of fair housing issues in the City, including fair housing enforcement and outreach capacity, patterns of integration and segregation, racial or ethnic patterns of concentration, disparities in access to opportunities, and disproportionate housing needs, including displacement risk.

History of Fair Housing Issues & City Response

The City of Santa Barbara’s African American and Black Historic Context Statement (Context Statement) provides a holistic history of the African American/Black community in Santa Barbara and identifies possible historic resources that represent that history.¹ In 2020, community members advocated for the historic designation of sites important to Santa Barbara’s African American and Black community as one aspect of highlighting and uplifting the community’s history. Community members worked with the City to secure a Certified Local Government grant from the California Office of Historic Preservation. The City hired architectural history consulting firm, Page & Turnbull, who partnered with Healing Justice Santa Barbara to complete the project by fall 2022.

Santa Barbara has a long and rich history that includes people of African descent since the earliest days of Spanish contact. The 1900s and 1910s coincided with the rise of racial zoning and restrictive covenants nationally. As a result, neighborhoods such as Oak Park Village south of Cottage Hospital, and west of State Street, were subdivided at the turn of the twentieth century by Los Angeles speculators as a “Whites only” upper class-community.

Once the U.S. Supreme Court ruled against racial zoning ordinances in the 1917 *Buchanan v. Warley* decision, cities used their zoning authorities in more indirect ways to segregate neighborhoods. As a result, restrictive covenants became more widespread, particularly as the 1920s saw a residential building boom across the country. Often placed on deeds by the private subdividing developer, restrictive covenants may list “building restrictions” such as setback lines, minimum building cost, or prohibited uses like oil drilling, in addition to exclusions of African American, Asian American, Mexican American, Jewish, and other residents. Italian and southern and Eastern European immigrants were

¹ Page & Turnbull and Healing Justice SB, “Santa Barbara African American and Black Historic Context Statement,” published in August 2022 available at: [https://santabarbaraca.gov/sites/default/files/2022-09/African percent20American percent20Black percent20Context percent20Statement percent20- percent20Final.pdf](https://santabarbaraca.gov/sites/default/files/2022-09/African%20American%20Black%20Context%20Statement%20-%20Final.pdf).

sometimes included among that list, given the nativist, anti-immigration sentiments of the period. The covenants may have a limited period, such as 20 to 50 years.

With this backdrop, Santa Barbara's racial/ethnic minority communities became increasingly concentrated over the course of the 1920's into the blocks to the east of lower State Street. By 1930, approximately two-thirds of Santa Barbara's Black residents lived in the area bounded by East Haley Street, East Montecito Street, State Street, and Garden Street that came to be known as the Eastside. This emergence of this neighborhood where most Black residents lived occurred as Santa Barbara was rebuilding itself in the image of a bucolic Spanish Colonial city after the 1925 earthquake and

Figure 2 - Newspaper advertisement for a "carefully restricted" residential development in the Santa Barbara area, January 1925

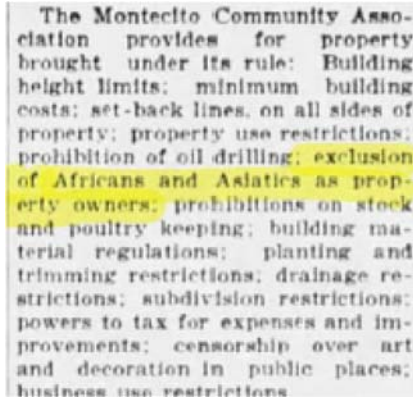

Figure 1 - An example of the types of restrictions that were included in residential developments, April 1927

introducing new residential subdivisions, especially west of State Street and the railroad tracks and north up the hills such as East San Roque.²

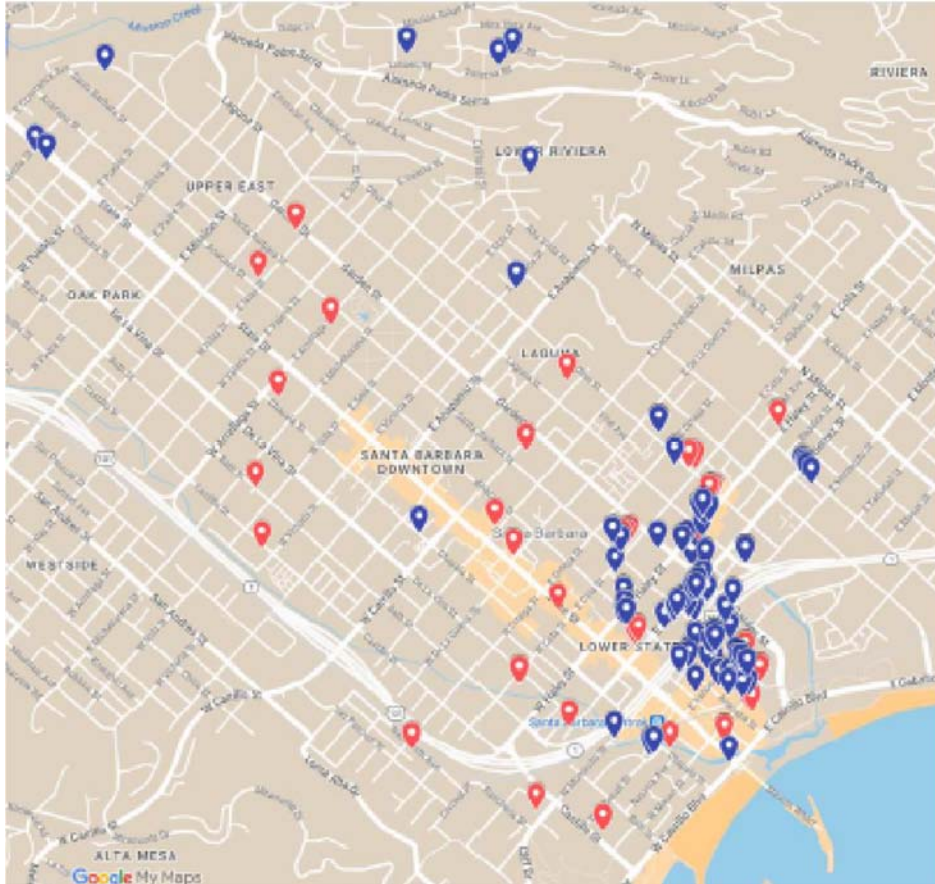

Figure 3 - Map showing the residences of African American and Black individuals in 1920 (red) and 1930 (blue) based on U.S. federal census data

Oral histories with Black and racial/ethnic minority residents who were alive during this period also describe anti-Black and racial/ethnic minority housing policies, in which real estate agents refused to rent or sell property in certain areas to people of color. This again followed national practices encouraged by the National Association of Real Estate Board's code of ethics, adopted in 1924, to maintain homogenous neighborhoods, and thereby property values, by steering African Americans and people of color away from White neighborhoods.²

All of this likely played a role in pushing people of color and working-class individuals into the lower Eastside. The Eastside geography was dominated by an estuary (the Estero) in the 19th century that was dry most of the time but would flood as far inland as Anapamu Street in wet winters. This slough land was drained and reclaimed starting in the 1860s when a canal was dug midway between Salsipuedes and Laguna Street, the so-called Canal Street that was renamed Olive Street in 1922. An agricultural park with a racetrack was created in 1886 southeast of Montecito Street to the shoreline between Santa Barbara Street and Quarantina Street as a use for the land prone to flooding. As a

² National Association of Real Estate Boards, "Code of Ethics," published in June 1924 available at: <https://www.nar.realtor/about-nar/history/1924-code-of-ethics>.

result of the patterns described, it appears that many built resources associated with important events, persons, and organizations have been lost. Blocks of housing between East Gutierrez Street and East Montecito Street just south of East Haley Street were cleared for the construction of U.S. Highway 101/State Highway 2 starting in the late 1940s. The area south of the highway became increasingly industrial and replaced what had been part of the Eastside neighborhood. This further displaced people of color, because housing and built resources were gone.³

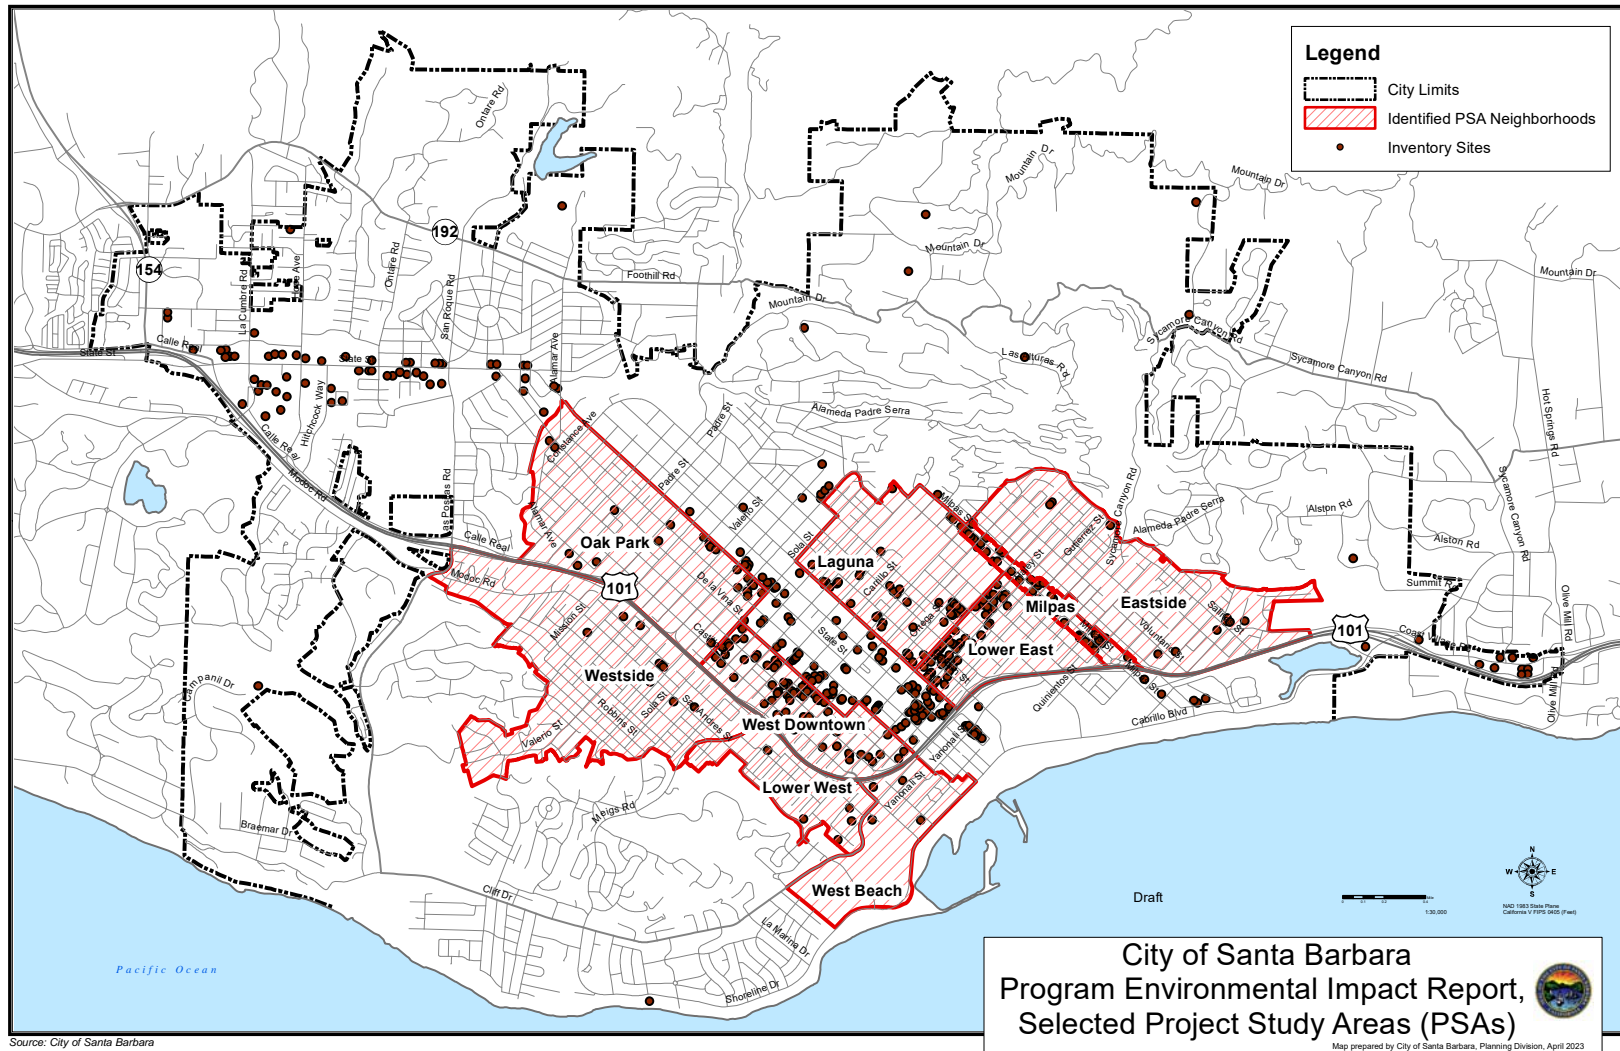

In 2010, the City certified a Program Environmental Impact Report for the Plan Santa Barbara General Plan Update and identified eight Project Study Areas (PSAs) that reflect neighborhoods containing higher concentrations of lower-income and racial/ethnic minority residents. The eight identified PSA neighborhoods, along with the number of identified suitable sites depicted on are (Figure B-1, are the following):

- **Westside** – five parcels
- **Eastside** – three parcels
- **Laguna/Lower Eastside** – 41 parcels
- **Lower West** – two parcels
- **Milpas Corridor/Lower East** – 42 parcels
- **West Beach** – four parcels
- **Oak Park** – 14 parcels
- **West Downtown** – 59 parcels

Total of Suitable Sites located in City PSA's = 170 parcels

³ City of Santa Barbara, "Santa Barbara African American and Black Historic Context Statement," published in August 2022 available at: <https://santabarbaraca.gov/sites/default/files/2022-09/African%20American%20Black%20Context%20Statement%20-%20Final.pdf>

Figure B-1 2010 Program Environmental Impact Report (EIR) Selected Project Study Areas (PSAs)

Identified suitable sites are concentrated within these eight project study areas (PSAs).

The identified eight PSAs (Figure B-1) are a direct result of historically segregating people of color and working-class individuals away from White neighborhoods and eliminating opportunities for them to own property and amass wealth. During the past 20 years, the City has been actively organizing focused planning studies, such as neighborhood design guidelines, annexation studies, and parks and recreation planning strategies, as well as the Neighborhood Improvement Program (NIP) that address physical conditions, resources, and housing affordability in lower-income and racial/ethnic minority populations. The City NIP was launched in 2003 to rectify issues of community concern in lower-income neighborhoods of the City. Improvements resulting from the NIP have included:

- Repair and construction of sidewalks, curbs and gutters, and installation of streetlights.
- Creation of safer and better maintained neighborhoods.
- Removal of graffiti from public and private properties.
- Elimination of illegal trespassing and accompanying fire hazard conditions.

Currently, several City-led projects are underway and are located in the eight PSAs. These projects consist of bicycle and pedestrian facilities, improved traffic lighting, road repaving, and high visibility crosswalks. These projects include the following:

- Castillo Street Undercrossing Bicycle and Pedestrian Facility Improvements (West Downtown)
- De La Vina Street Bridge Over Mission Creek Replacement Project (Laguna)
- Las Positas Modoc Road Bicycle and Pedestrian Path Project (Westside)
- Lower Eastside Connectivity Active Transportation Plan (Lower Eastside)
- Milpas Street Crosswalk Safety and Sidewalk Widening Project (Milpas)
- Westside and Lower West Neighborhoods Transportation Management Plan Implementation Project (Westside, and Lower Westside)
- Westside Community Paseos Project (Westside)

In 2009, under the leadership of the Parks and Recreation Department and Community Services, Neighborhood and Outreach Services was created, replacing the existing NIP. The mission of this unit is to provide programs and outreach services to strengthen families, improve outcomes for children and youth, enhance neighborhoods and create stronger communities. In November 2010, City Council by resolution, created the Neighborhood Advisory Council (NAC) to support the resident focus on neighborhood issues.

Fair Housing Outreach and Participation Enforcement and Outreach Capacity

The City of Santa Barbara, as a recipient of federal housing and CDBG funds, is required to take actions to reduce barriers to fair housing choice. The 2020 City's Analysis of Impediments to Fair Housing Choice, or AI, identifies the primary impediments to fair housing choice and recommends actions to reduce barriers. It addresses both barriers to housing choice and access to opportunity, and how economic factors play a significant role in attaining housing.

The community engagement activities that supported the development of the City's Analysis of Impediments for Fair Housing Choice, or AI, and identification of impediments included:

- A resident survey (521 participants);
- A focus group with Spanish speaking residents hosted by Just Communities;

- A focus group with residents with disabilities hosted by the Independent Living Resource Center;
- A focus group with residents experiencing homelessness (recruited by Santa Barbara Alliance for Community Transformation (SB ACT) and PATH Santa Barbara);
- Two focus groups attended by stakeholders representing organizations providing housing and human services, fair housing enforcement and advocacy, services to residents with disabilities, residents in poverty, workforce development, and transportation; and

Interviews with subject matter experts.

Regarding outreach for the 2023 Housing Element, please refer to the Public Outreach and Participation section of this document.

Local Data and Knowledge

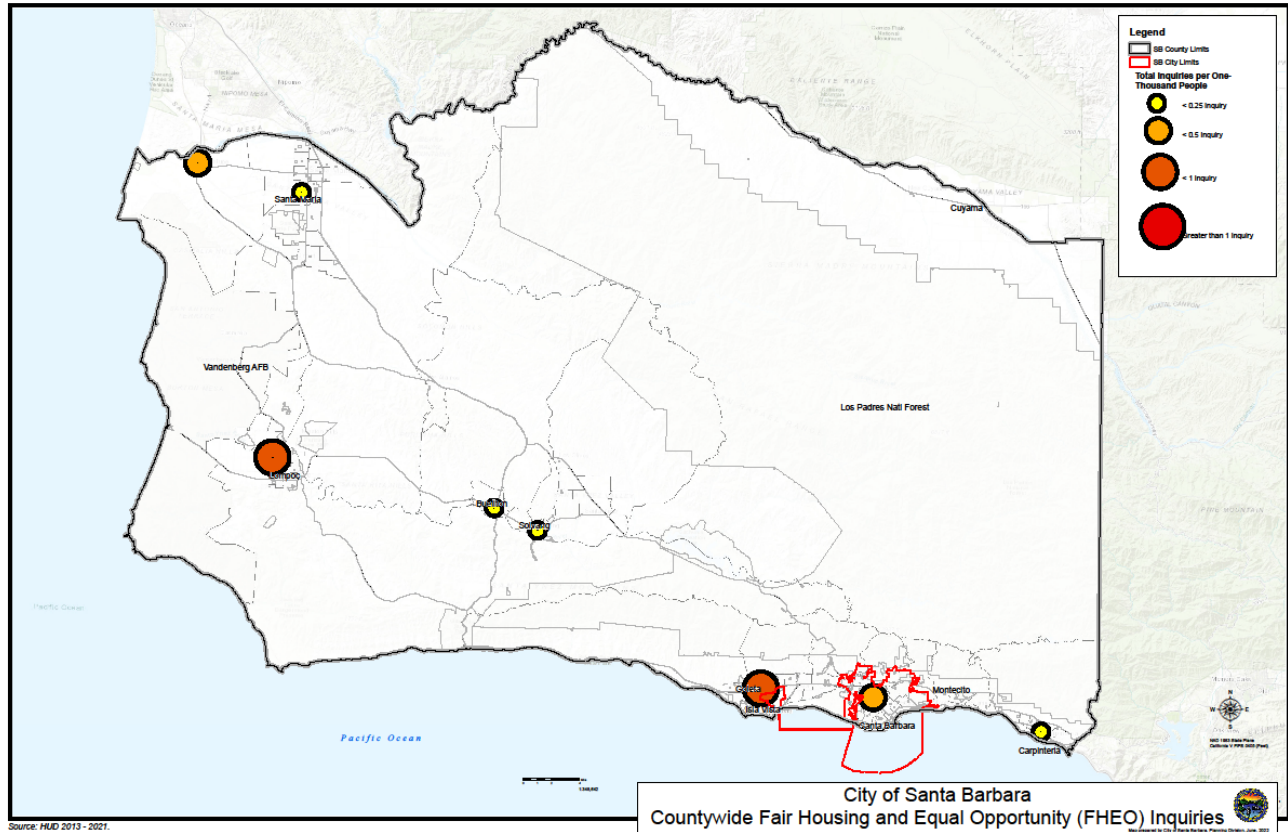

The City of Santa Barbara organized the Analysis of Impediments to Fair Housing Choice (AI) in 2020. This AI review^{see} housing discrimination as evidenced by demographic patterns, access to opportunity, and zoning and land use policy review. The Federal Fair Housing Act, passed in 1968 and amended in 1988, prohibits discrimination in housing on the basis of race, color, national origin, religion, gender/sex, familial status, and disability. The Fair Housing Act— Amended (FHAA) covers most types of housing including rental housing, home sales, mortgage and home improvement lending, and land use and zoning. Excluded from the FHAA are owner- occupied buildings with no more than four units, single-family housing units sold or rented without the use of a real estate agent or broker, housing operated by organizations and private clubs that limit occupancy to members, and housing for older persons. HUD has the primary authority for enforcing the FHAA. HUD investigates the complaints it receives and determines if there is a “reasonable cause” to believe that discrimination occurred. If reasonable cause is established, HUD brings the complaint before an Administrative Law Judge. Parties to the action can also elect to have the trial held in a federal court (in which case the Department of Justice brings the claim on behalf of the plaintiff).

The State of California has a substantially equivalent law prohibiting discrimination in housing. The Fair Employment & Housing Act (FEHA) is the primary state law prohibiting discrimination in the sale, rental, lease negotiation, or financing of housing based on a person’s race, religion, national origin, color, sex, marital status, ancestry, family status, disability, sexual orientation, and source of income. The State’s law exceeds the protections in the FHAA by including protected classes of marital status, sexual orientation, and source of income. In addition, the law defines physical and mental disability as a condition that limits a major life activity; this definition of disability is broader than the federal definition, which requires a “substantial limitation.” The FEHA also incorporates the protections of the Unruh Act which includes medical condition as a protected category.

The primary local fair housing organization serving the City of Santa Barbara is the City’s Rental Housing Mediation Program (RHMP), which provides information on fair housing laws and tenant-landlord mediation services. The Housing and Human Services webpage on the City’s website also provides information to residents regarding fair housing services and related complaint response procedures. The City also refers lower-income residents, particularly agricultural workers, to California Rural Legal Assistance.

As seen in Figure B-2, the HCD AFFH Data Viewer reported a Fair Housing Enforcement and Outreach (FHEO) inquiry rate of less than one per 1,000 persons for the 2013-2021 period in the City.

Figure B-2 FHEO Inquiries – City of Santa Barbara and Santa Barbara County

Fair Housing Complaints

Analysis of fair housing complaints submitted to HUD from 2015 to 2019 from residents of Santa Barbara County, which includes the Consortium member cities as well as the City of Santa Barbara, Mission Canyon, and Summerland, reveals that 56 complaints were filed with some complaints citing multiple reasons for their claims.⁴ Thirty-two (32) of the total 56 complaints were filed in the City of Santa Barbara.

After receiving a complaint, mediation services are offered. If mediation services are denied, or the case needs to be further investigated, the case is referred to the City Attorney's office for investigation and/or litigation. At this time, the City Attorney's office would investigate the matter, and a prosecutor would bring any formal legal charges against the party, if it was found to be housing discrimination. Legal Aid and State Fair Housing services are also referred to residents.

⁴ County of Santa Barbara HOME Consortium, "Analysis of Impediments to Fair Housing Choice," published in 2020 available at: <https://content.civicplus.com/api/assets/79dde4ec-94ea-4742-b323-846a81a46a3c?cache=1800>.

Table B-2 HUD Fair Housing Complaints – Number of complaints filed per year throughout the County, 2015-2019

	Total Cases Filed	Disability	Familial Status	National Origin	Race	Sex	Religion	Retaliation
2015	21	12	5	1	3	2	0	1
2016	5	4	0	0	0	1	0	1
2017	9	6	3	1	1	0	1	0
2018	6	3	3	1	1	0	0	2
2019	15	6	7	1	0	1	0	1
Total	56*	31	18	4	5	4	1	5
Percent percentage of Basis Cited		46% <u>percent</u>	26% <u>percent</u>	6% <u>percent</u>	7% <u>percent</u>	6% <u>percent</u>	1% <u>percent</u>	7% <u>percent</u>
*Thirty-two (32) of the total 56 complaints were filed in the City of Santa Barbara								

Disability was the most cited basis for complaints, comprising about 46 percent of all complaints. Familial Status was the basis for about 26 percent of complaints. Other bases cited include Race (seven percent), Retaliation (seven percent), National Origin (six percent), Sex (six percent), and Religion (one percent).

Among disability complaints, all but two of the complaints citing this basis included failure to make or allow reasonable accommodations as a basis for their complaint. Throughout focus groups and stakeholder interviews during the County AI process, participants noted a particular concern about failure to make reasonable accommodations as well.

Rental Housing Mediation Program (RHMP)

The City's Rental Housing Mediation Program (RHMP) maintains the continuity of housing and prevents homelessness by settling tenant and landlord disputes. These services result in the retention of housing, assist in maintaining Tenants' Section 8 Vouchers (Housing Authority of the City of Santa Barbara (HACSB), and the prevention of homelessness. Further, RHMP's service avoids the ripple effect of high-stake costly disputes, and litigation, which often negatively impact the community, and its valuable limited resources. The RHMP, therefore, effectively addresses societal issues before they become societal problems.

The target populations are tenants and landlords. 1,241 unduplicated clients were served in Fiscal Year (FY) 2021-2022. Of those, 85 percent are tenants and landlords, who own or manage rental property and 65 percent of the clients served were extremely low-to-low income. In addition, the Program's FY 2021-2022 statistical demographics showed 331 clients served were Hispanic/Latino, and 40 percent of these clients were monolingual Spanish speaking.

The RHMP is operated by the City of Santa Barbara and is comprised of three full-time staff, including one bilingual/bicultural staff member, and a Board of 15 trained City Council appointed volunteer mediators from the Rental Housing Mediation Board (RHMB). The specific service provided is to assist in the prevention and resolution of Tenant/Landlord disputes out-of-court using Dispute Resolution Services (DRS): information on rights and responsibilities, staff consultations, staff telephone

mediations, Board and staff virtual (video teleconferencing) and face-to-face mediations, outreach and education.

The program's client-outreach targets extremely low-to-low-income clients, minorities, limited English speakers, seniors, and persons with disabilities. Traditionally, outreach was held in person at food banks, community centers, public libraries, colleges, and Head Start Programs. Due to the Covid-19 pandemic, outreach is now mainly held virtually by webinars, workshops (Housing Santa Barbara Day), live-streamed internet, media, and Government Access TV. Clients are referred from Local Legislators, Government offices, Police, Legal Aid Foundation of Santa Barbara County, Social Services, and other nonprofit agencies serving families and special needs individuals.

The Program does not have income restrictions. For demographic and statistical purposes, clients are requested to provide self-certification of income. No supporting documentation is required. The data collected reveals that 65 percentpercent of the clients served are extremely low-to-low income per HUD's 2022 Area Median Income limits. These clients are the most vulnerable and are the greatest risk for becoming homeless. There is no fee charged or donation suggested for program services.

Fair Housing Laws

The City of Santa Barbara established its own Fair Housing laws consistent with the Housing Element to promote and ensure open and free choice of housing without discrimination to its residents. Santa Barbara Municipal Code 26.30 makes it unlawful for a person to attempt to do any of the following acts, where the act constitutes discrimination on a basis prohibited by the Unruh Act. The Unruh Act states that all persons are free and equal, and are entitled to full and equal accommodations, advantages, facilities, privileges, or services in all housing providers. The following standards ensure compliance with the Unruh Civil Rights Act:

- Refuse to rent or lease a rental unit;
- Refuse to negotiate for the rental or lease of a rental unit (includes acceptance of applications);
- Otherwise deny to, or withhold from any person or persons a rental unit;
- Discriminate against any person in the terms, conditions, or privileges of the rental or lease of a rental unit, or in the provision of services, facilities or benefits in connection with the rental unit;
- Refuse to show a rental unit;
- Advertise in any manner which indicates any preferences, limitations or discrimination;
- Require tenants to remain childless or otherwise limit families with children under 18 years of age;
- Refuse to rent after making a bona fide offer, or refuse to negotiate for the rental of, or otherwise make unavailable or deny, rental unit to any person;
- Charge additional rent for persons living in rental unit;
- Discriminate by means of arbitrary income restrictions (refuse to rent to a person who can demonstrate, by prior rental history or by other means, that he or she is able to pay the required rent); or
- Discriminate by means of arbitrary standards.

Exemptions

- Senior Facilities: Housing for senior adults or state-licensed residential care facilities for the elderly.
- Nursing homes: A state licensed nursing home, convalescent home, or community care facility.
- Owner-occupied unit: A rental unit occupied by the owner.
- Subleases: A rental unit occupied by a tenant who subleases any portion of that accommodation to another tenant.
- Government housing: A rental unit owned, operated or managed by a government agency.

In addition, the City does not have a crime free housing ordinance, or nuisance property ordinance, local laws or programs that either encourage or require private landlords to evict tenants who have had varying levels of contact with the criminal legal system, or to reject those tenants for housing in the first place. Generally, these laws penalize tenants if they or their guests engage in certain conduct or if they make frequent calls to the police—tenants become a “nuisance” if the police respond to a certain address too frequently.

Patterns of Integration and Segregation

RACE AND ETHNICITY

Two measures of segregation, spatial analysis and the Dissimilarity Index (a measure of the extent to which the distribution of any two groups differ across census tracts or block-groups), find that Santa Barbara has historically been an integrated community, but some neighborhoods show a concentration of Hispanic residents. The Dissimilarity Index has a range of zero-100, with zero-39 indicating low segregation, 40-54 indicating moderate segregation, and 55-100 indicating high segregation. As of 2018, the Dissimilarity Index for Minority/Non-Hispanic white is 39, the Dissimilarity Index between Hispanic/Non-Hispanic white in the City is 41, the Dissimilarity Index between Asian/Non-Hispanic white in the city is 42, and the Dissimilarity Index between African American/Non-Hispanic white is 49. The latter three index values indicate a moderate level of segregation between the comparison groups while the first index value indicates a low level of segregation.⁵ Concentration of populations by race, ethnicity, or nativity may be due to preferences toward living in cultural enclaves, concentration of affordable housing, or discrimination (e.g., steering). Similar factors apply to residents with disabilities, in addition to accessible infrastructure (e.g., accessible sidewalks and access to public transportation).

Residents that participated in focus groups specific to the City AI development, were asked if the housing needs they described were more prevalent for certain racial and ethnic groups. Some Spanish speaking residents, and residents with children, felt they were more likely than others to be treated

⁵ City of Santa Barbara, “Analysis of Impediments to Fair Housing Choice”, published in April 2020 available at: https://santabarbaraca.gov/sites/default/files/2022-06/Santa%20Barbara%20Analysis%20of%20Impediments%20to%20Fair%20Housing_final%282020%29.pdf.

poorly by landlords or to face housing discrimination.

Most focus group attendees agreed that low-income people are equally challenged by Santa Barbara's high housing costs. Participants that were Spanish speakers also expressed challenges related to accessing housing information (including marketing for rental units and lease agreements) in Spanish.

Local and Regional Analysis

The diversity index maps depicted in Figures B-3 and B-4, represent the probability that two individuals, chosen at random in the given geography, would be of different races or ethnicities. Lower index values between zero and 20 suggest more homogeneity and higher index values above 50 suggest more heterogeneity (diverse).

A countywide distribution is illustrated in Figure B-3. While White residents make up the majority, there are areas of the County that are primarily other racial or ethnic groups. For example, Hispanic residents make up the majority in the northeastern parts of the County, as well as in Lompoc, Goleta, and Carpinteria. Although race/ethnicity is just one factor that may affect fair housing choice, it is a useful tool in understanding the demographics of individual tracts across the region.

Racial and ethnic diversity can be indicative of economic and behavioral patterns. For example, racially and ethnically homogenous areas are sometimes representative of concentrated poverty or concentrated wealth. They could also be indicative of discriminatory housing policies or other relative barriers.

In describing the City-wide racial and ethnic make-up, Santa Barbara is a historically and ethnically diverse community: 56 percent of residents are non-Hispanic White, 36 percent are Hispanic, and the remaining seven percent identified as another racial/ethnic minority. About four percent of residents are Asian, one percent are Black or African American and one percent are Native American.⁶ As seen in Figure B-4, the percent percentage of non-White population in Santa Barbara is highest within the Westside, Lower West, Lower East, Milpas, and Eastside neighborhoods of the City. A similar pattern can be found on the PSA map (Figure B-1) and is further reinforced under the History of Fair Housing section and the historical narrative sourced from the City's Historic Context Statement.

⁶ City of Santa Barbara, "Analysis of Impediments to Fair Housing Choice", published in April 2020 available at: https://santabarbaraca.gov/sites/default/files/2022-06/Santa%20Barbara%20Analysis%20of%20Impediments%20to%20Fair%20Housing_final%282020%29.pdf.

Figure B-3 Racial Demographics – Santa Barbara County

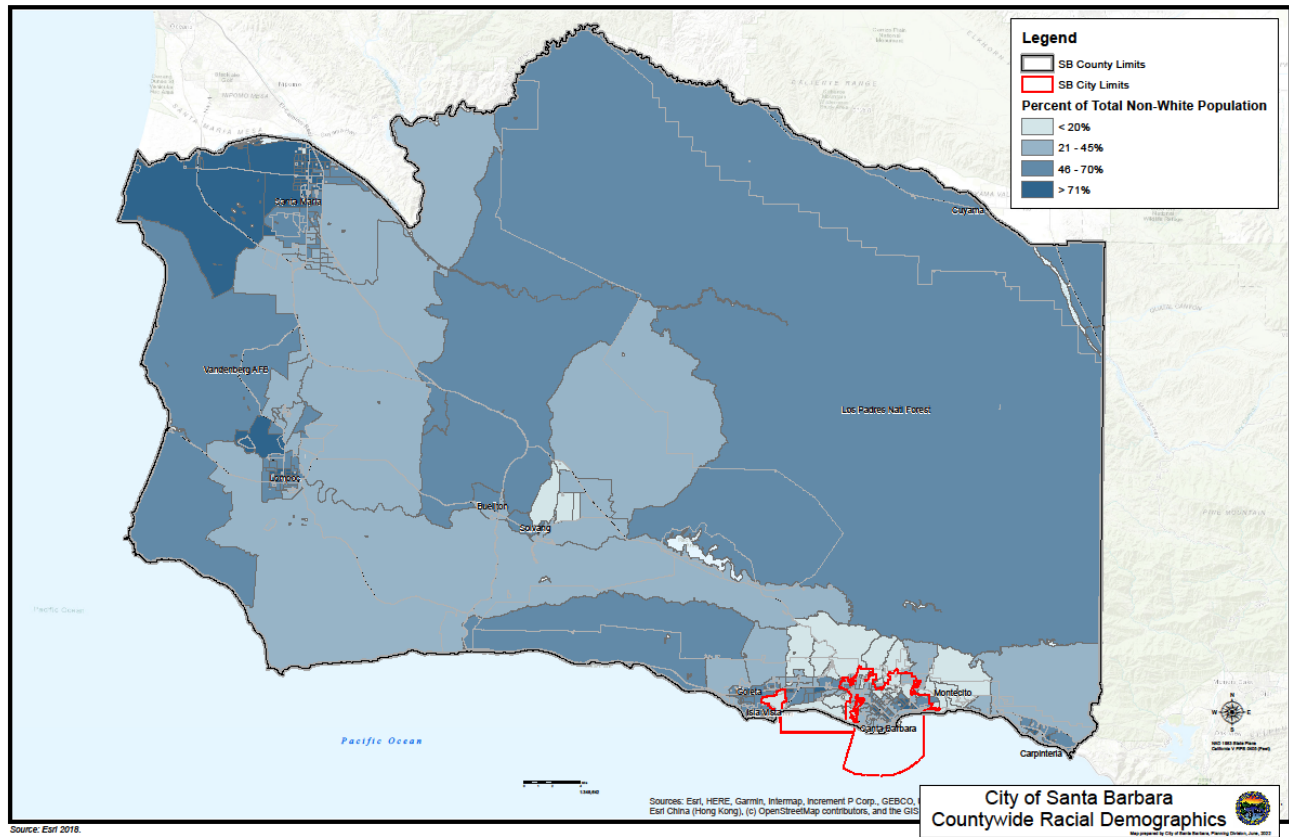

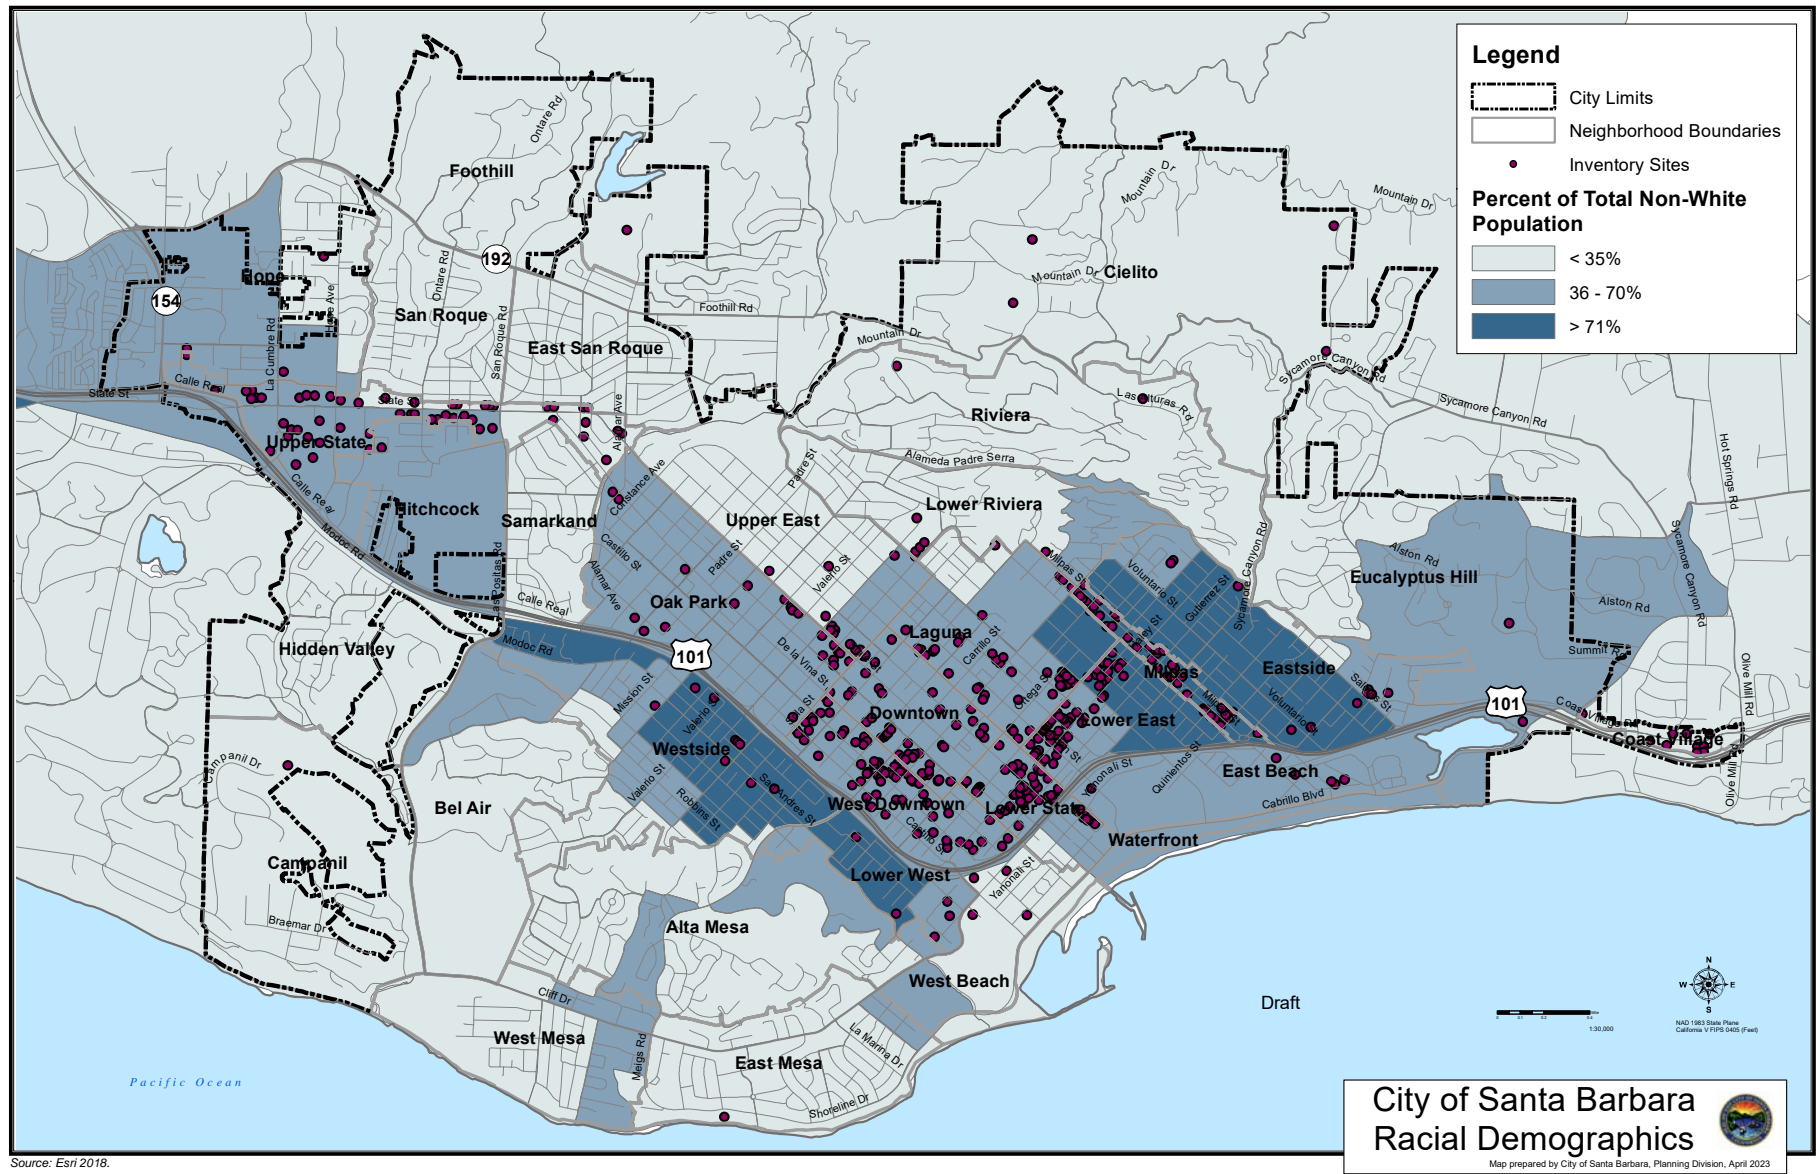

Figure B-4 Racial Demographics – City of Santa Barbara

PERSONS WITH DISABILITIES

The housing needs of persons with disabilities vary, but generally include accessible and affordable housing, and access to supportive services. More severely disabled individuals may require a group living environment where supervision is provided, and the most severely affected individuals may require an institutional environment where medical attention and physical therapy are provided. The City facilitates housing for persons with disabilities through its Reasonable Accommodation procedures under the Fair Housing Act and regulations that allow group homes, community care facilities, residential facilities for the elderly, and hospices housing six or fewer individuals in all residential zones.

Households that include a member with a disability may experience housing challenges related to modifications to the home or accommodations from their housing provider. Overall, one third of households that include a member with a disability live in a home that does not meet the needs of the resident with disability. Among these households, the improvements or modifications needed include:

- Grab bars in the bathroom;
- Reserved accessible parking spots by entrance;
- Wider doorways and ramps.

About half of residents with disabilities live in neighborhoods where they cannot get around due to inadequate infrastructure (e.g., missing/broken sidewalks, poor street lighting, dangerous traffic). Around 40 percent can't afford the housing that has accessibility features and around the same proportion worry about retaliation if the report harassment by neighbors/building staff/landlord.

In addition, low-income residents, precariously housed residents, and households that include a member with a disability were more likely than other residents to experience denial when looking for housing. All outreach conducted showed that the precariously housed, residents with disabilities and other minorities are less likely to agree that people like themselves are welcome in all neighborhoods.

Local and Regional Analysis

In addition to having to overcome barriers such as housing discrimination and difficulty in finding accessible units, people with disabilities face financial hardships at much higher rates than the average person. An estimated 9.4 percent of the total population of the County (32,314 people) had a disability of some sort.⁷

Unfortunately, accessible and affordable housing remains firmly out of reach for a large portion of the disabled population. The incidents of residents with a disability are highest in the southwest and northeast tracts of the County. Carpinteria, Lompoc, and Solvang have the highest percentage of disability rates in the Consortium (Figure B-5). The number of fair housing complaints filed per year throughout the County, 2015-2019, revealed that disability is the most cited bases for complaints, comprising about 46 percent of all complaints.⁸

As shown on Figure B-6, lower percentages of disabled residents (>eight percent) are located within the Riviera, San Roque, and Upper East, Bel Air, and West Mesa neighborhoods. The remaining

8 County of Santa Barbara HOME Consortium, "Analysis of Impediments to Fair Housing Choice," published in 2020 available at: <https://content.civicplus.com/api/assets/79dde4ec-94ea-4742-b323-846a81a46a3c?cache=1800>.

City of Santa Barbara focus group attendees agreed that low-income people are challenged by Santa Barbara's high housing costs. The exception is persons with disabilities who need both accessible and affordable housing – the supply of which is extremely limited. These residents have significantly disproportionately high needs if they are not living in publicly subsidized housing.

FAMILIAL STATUS

Familial status refers to the presence of children under the age of 18, whether the child is biologically related to the head of household, and the marital status of the head of households. Families with children may face housing discrimination by landlords who fear that children will cause property damage. Some landlords may have cultural biases against children of the opposite sex sharing a bedroom. Differential treatments such as limiting the number of children in a complex or confining children to a specific location are also fair housing concerns.

In 2018, nearly half of all households with children are married families, while the remaining half are single-parent householders. Twenty percent of all households include children under 18. Single-parent households are also protected by fair housing law.⁹

Female-headed households with children require special consideration and assistance because of their greater need for affordable housing and accessible day care, health care, and other supportive services.

Local and Regional Analysis

Figure B-7 shows the ~~percent~~ percentage of children living in married couple households for the County as a whole. According to the Santa Barbara County AI, familial status is the second most cited basis for fair housing complaints filed per year, 2015-2019, comprising about 26 percent of complaints.¹⁰ More specifically, in Goleta the most frequently cited basis was familial status.

~~while~~ Figure B-8 shows the distribution of children in married couple households in the City of Santa Barbara. of Santa. The greatest concentrations of children in married couple households are located on the east end of town; specifically, the Hidden Valley, Campanil and East Mesa neighborhoods. These neighborhoods are where a greater density of young families live, unlike the Riviera, where an older generation of retired individuals reside.

Regarding concentrations of female headed households, there are about 1,089 female headed households with children in the City of Santa Barbara. The poverty rate for these households is 28 percent – much higher than the city-wide poverty rate of eight percent. The 301 female headed households with children living in poverty are the most likely to struggle with rising housing costs and may need unique supports given the challenges they face.

Figure B-8 Percentage of Children in Married Couple Households – City of Santa Barbara

INCOME

Identifying low/moderate-income (LMI) areas is an important aspect in understanding patterns of segregation. HUD defines a LMI area as a census tract or block group where over 51 percent of the population is LMI (based on HUD income definition of up to 80 percent of the AMI).

In 2018, the median household income in Santa Barbara was \$78,381, up from \$61,245 in 2010 (a 28 percent increase).¹¹ The distribution of incomes also shifted upward between 2010 and 2018. In 2010, about one-third of all households earned less than \$35,000 per year; by 2018, one in five households earned less than \$35,000. This decline was off-set by a proportional increase in households earning more than \$75,000 per year, with the largest gains in the highest income category (households earning \$150,000 or more). This trend likely represents some households with increasing incomes but also may reflect displacement of lower income households to areas outside the City due to high, and rising, home prices.

Economic and Workforce Development

One of the key workforce challenges in Santa Barbara is the inability of service and wage workers to live in the community. Significant in-commuting contributes to turnover in the employment market and poses a challenge to business owners.¹²

Capacity building and workforce training, including entrepreneur incubation and training, were also highlighted as needs in the community. As part of the community engagement process for the AI, residents and stakeholders serving low-income households were specifically asked about broadband needs and digital inclusion. While participants generally believe that access to broadband was not a problem, several participants did express concern over a generation gap technology proficiency.

Local and Regional Analysis

As seen in Figure B-9, higher LMI concentrations are in the western and northeastern portions of the County. County-wide, there is a relationship between a household's median income and race or ethnicity. White and Asian households have median household incomes higher than the county median of \$68,023, while all other race/ethnicities are lower. Native American Indian/Alaskan Native households have the lowest median household income in the county with \$46,250, or 68 percent less than the countywide median household income. Due to the small size of the group, the median household income for Native Hawaiian/Pacific Islander households was not calculated.¹³

City-wide, households have higher incomes in the city with only 27 percent earning below \$50,000 compared to 43 percent of non-family households. Nearly half of family households earn over \$100,000. In Santa Barbara, the Downtown corridor, the southern portion of the Eastside neighborhood, Westside, parts of Oak Park, and

11 City of Santa Barbara, "Analysis of Impediments to Fair Housing Choice", published in April 2020 available at: https://santabarbaraca.gov/sites/default/files/2022-06/Santa%20Barbara%20Analysis%20of%20Impediments%20to%20Fair%20Housing_final%282020%29.pdf.

12 City of Santa Barbara, "Analysis of Impediments to Fair Housing Choice", published in April 2020 available at: https://santabarbaraca.gov/sites/default/files/2022-06/Santa%20Barbara%20Analysis%20of%20Impediments%20to%20Fair%20Housing_final%282020%29.pdf.

13 County of Santa Barbara HOME Consortium, "Analysis of Impediments to Fair Housing Choice," published in 2020 available at: <https://content.civicplus.com/api/assets/79dde4ec-94ea-4742-b323-846a81a46a3c?cache=1800>.

Upper State have the highest percentages of LMI households (Figure B-10).

Figure B-9 Low/Moderate Income Population – Santa Barbara County

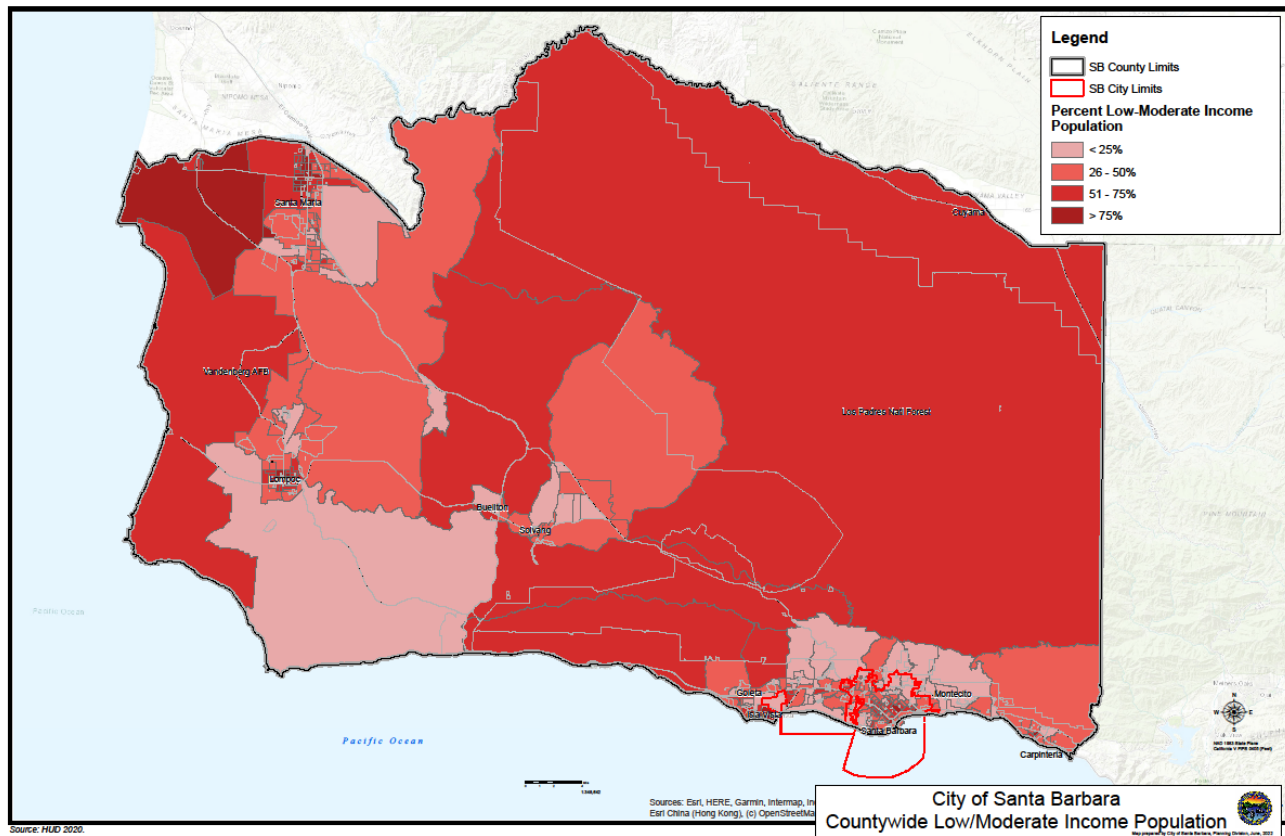

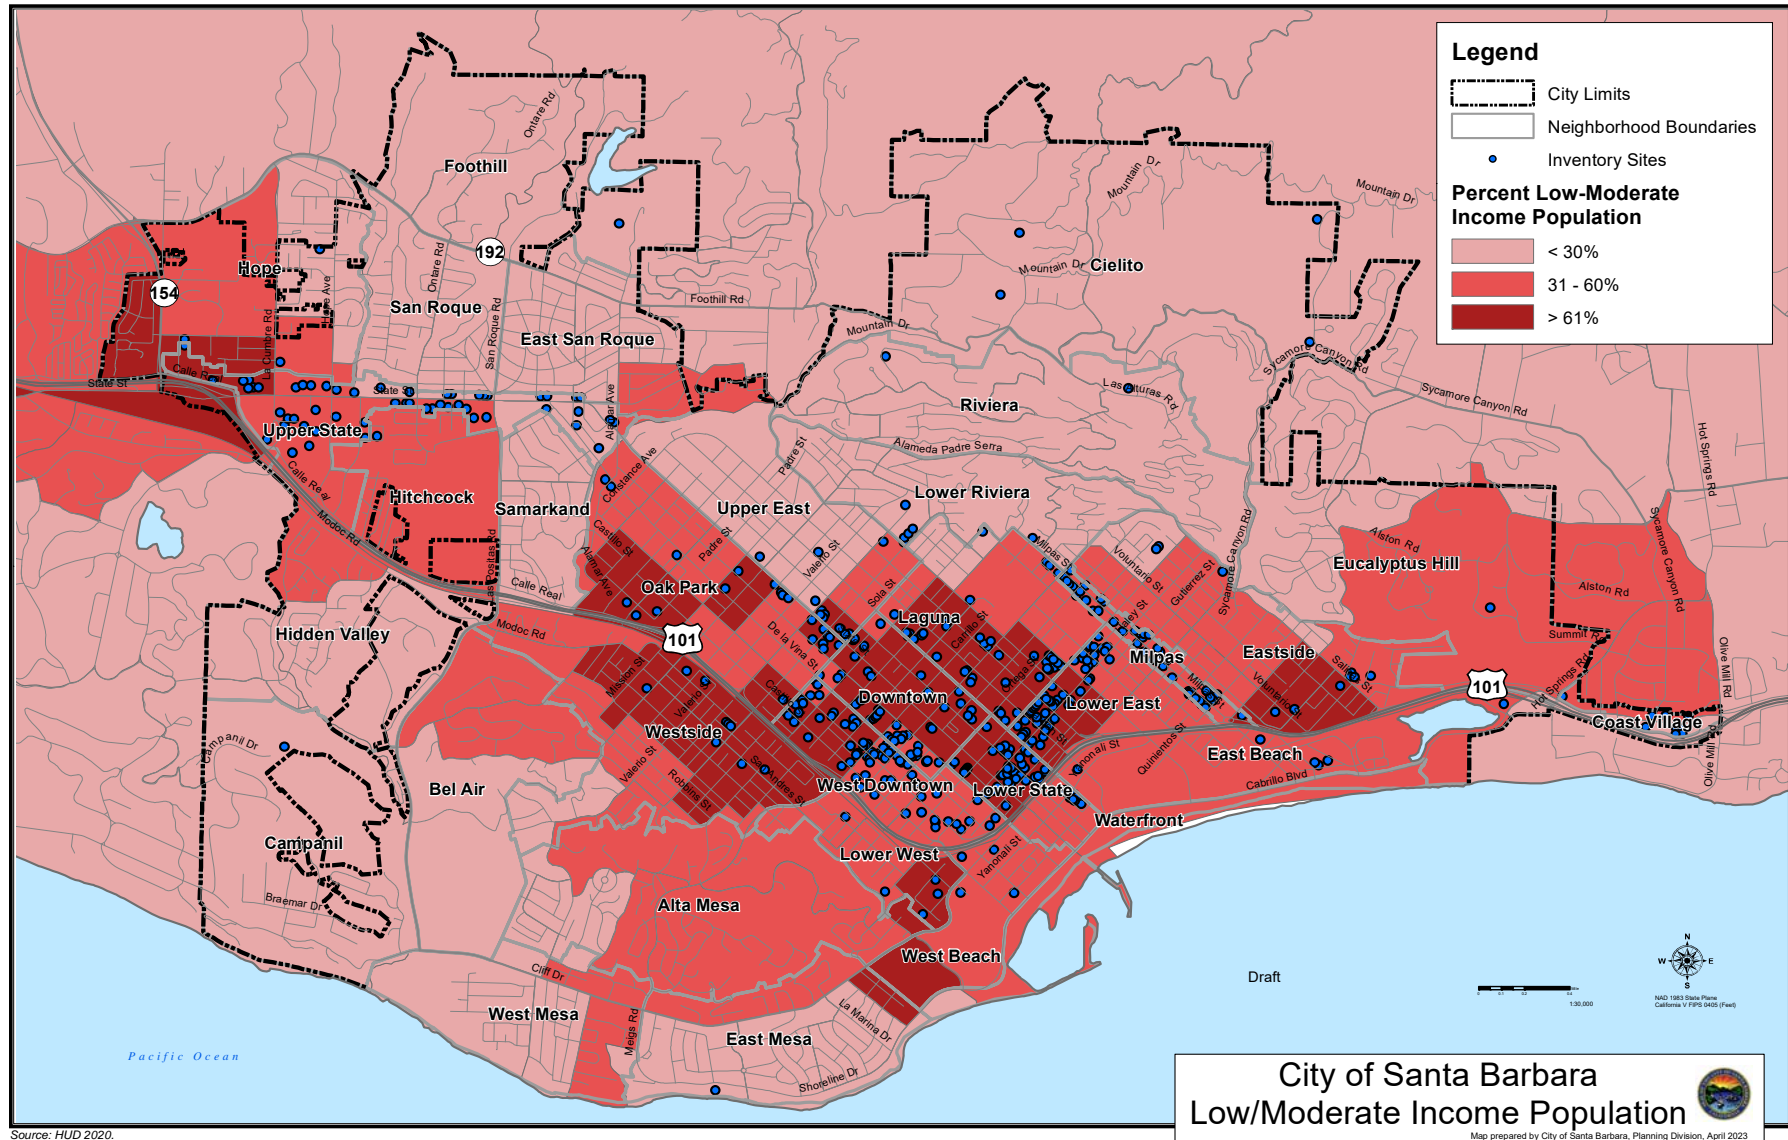

Figure B-10 Low/Moderate Income Population – City of Santa Barbara

RACIALLY/CONCENTRATED AREAS OF POVERTY

According to HUD, a racially or ethnically concentrated area of poverty (R/ECAP) is an area in which 50 percent or more of the population identifies as non-White and 40 percent or more of residents are living in poverty.¹⁴ Households within R/ECAP tracts frequently represent the most disadvantaged households within a community and often face a multitude of housing challenges. HUD data shows that there are no R/ECAPs in the City of Santa Barbara.

From 2010 to 2018, the poverty rate in Santa Barbara decreased from 18 percent to 12 percent, tracking with the economic recovery after the Great Recession.¹⁵ Santa Barbara County saw a similar decrease in poverty over the same period.¹⁶

Local and Regional Analysis

The poverty rate in the County has consistently been higher than the statewide rate and has also increased slightly more than the state as a whole. In 2010, the poverty rate in the Consortium was 14.4 percent and by 2017 it increased to 15.8 percent. During the same time period, the poverty rate in the state as a whole went from 13.7 percent to 15.1 percent.¹⁷

As shown in Figure B-11, the increase in poverty was uneven throughout the region. Three cities experienced a decrease in the poverty rate, Buellton and Carpinteria had the largest decrease with 24.7 percent and 28.0 percent, respectively. Solvang experienced a very large increase going from six percent in 2010 to 15.1 percent in 2017 – an increase of 145 percent. Concentrations of poverty are important to be aware of, particularly if the areas overlap with neighborhoods that have a large racial or ethnic minority present. Tracts in Santa Maria, Lompoc and Goleta appear to have the highest poverty in the County.

While the City does not include R/ECAP areas, areas of poverty do exist within the City, as shown in Figure B-12. Based on this map, poverty rates are highest (greater than 21 percent) along the Downtown corridor and adjacent neighborhoods. South of Highway 101, the Alta Mesa, Lower West, and West Beach neighborhoods include concentrations of people experiencing the highest poverty rates. Currently, there are several affordable single-unit and multi-unit housing projects in these areas, especially within the Downtown, West Downtown, Lower State, Lower East and Laguna neighborhoods (Figure B-13). The West Beach neighborhood is where City College is located, where 37 percent of the student body identifies as Hispanic. In addition, many of the colleges' students reside in this area and adjacent neighborhoods. Currently, 43 percent of City College students attend classes full-time, and do not receive a steady income, falling into the City's population whose income is the past 12 months is below poverty level.

Figure B-11 Racially/Ethnically Concentrated Areas of Poverty – Santa Barbara County

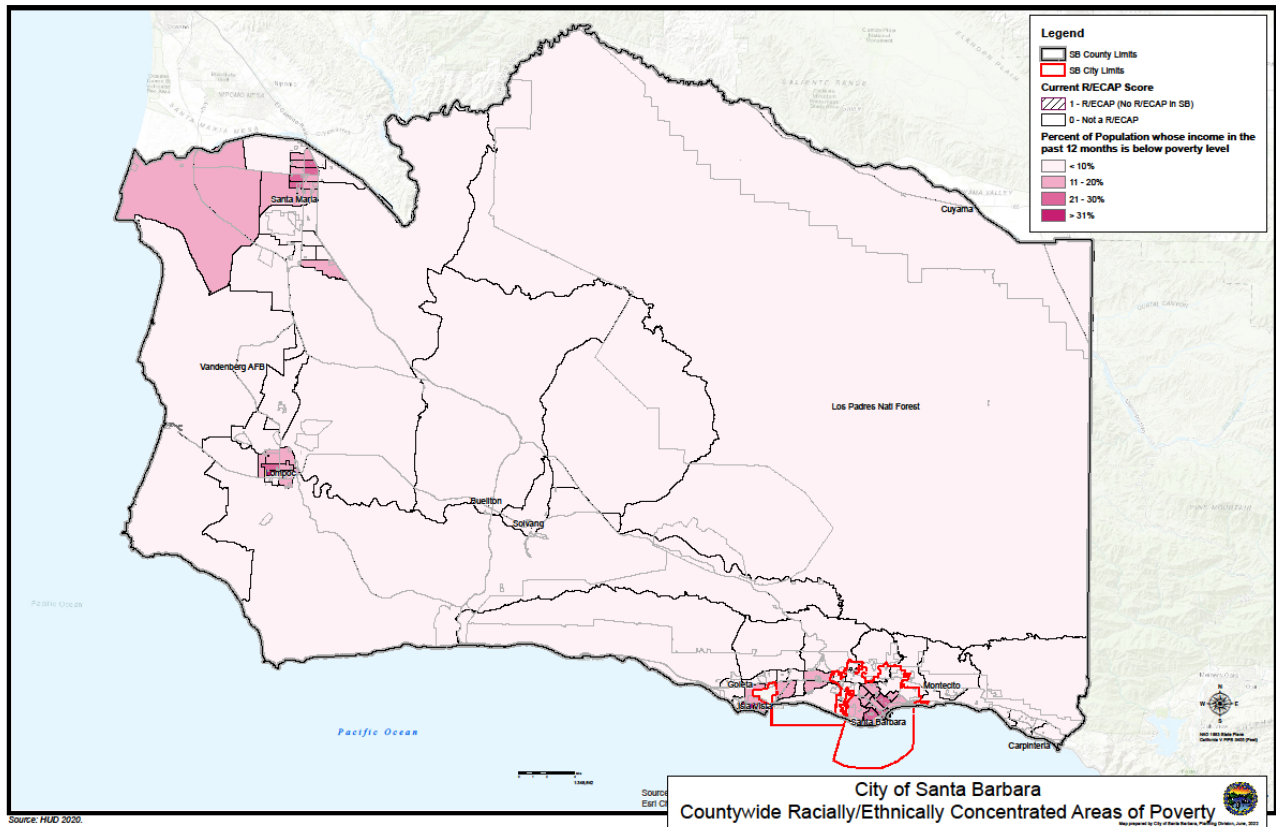

Figure B-12 Racially/Ethnically Concentrated Areas of Poverty – City of Santa Barbara

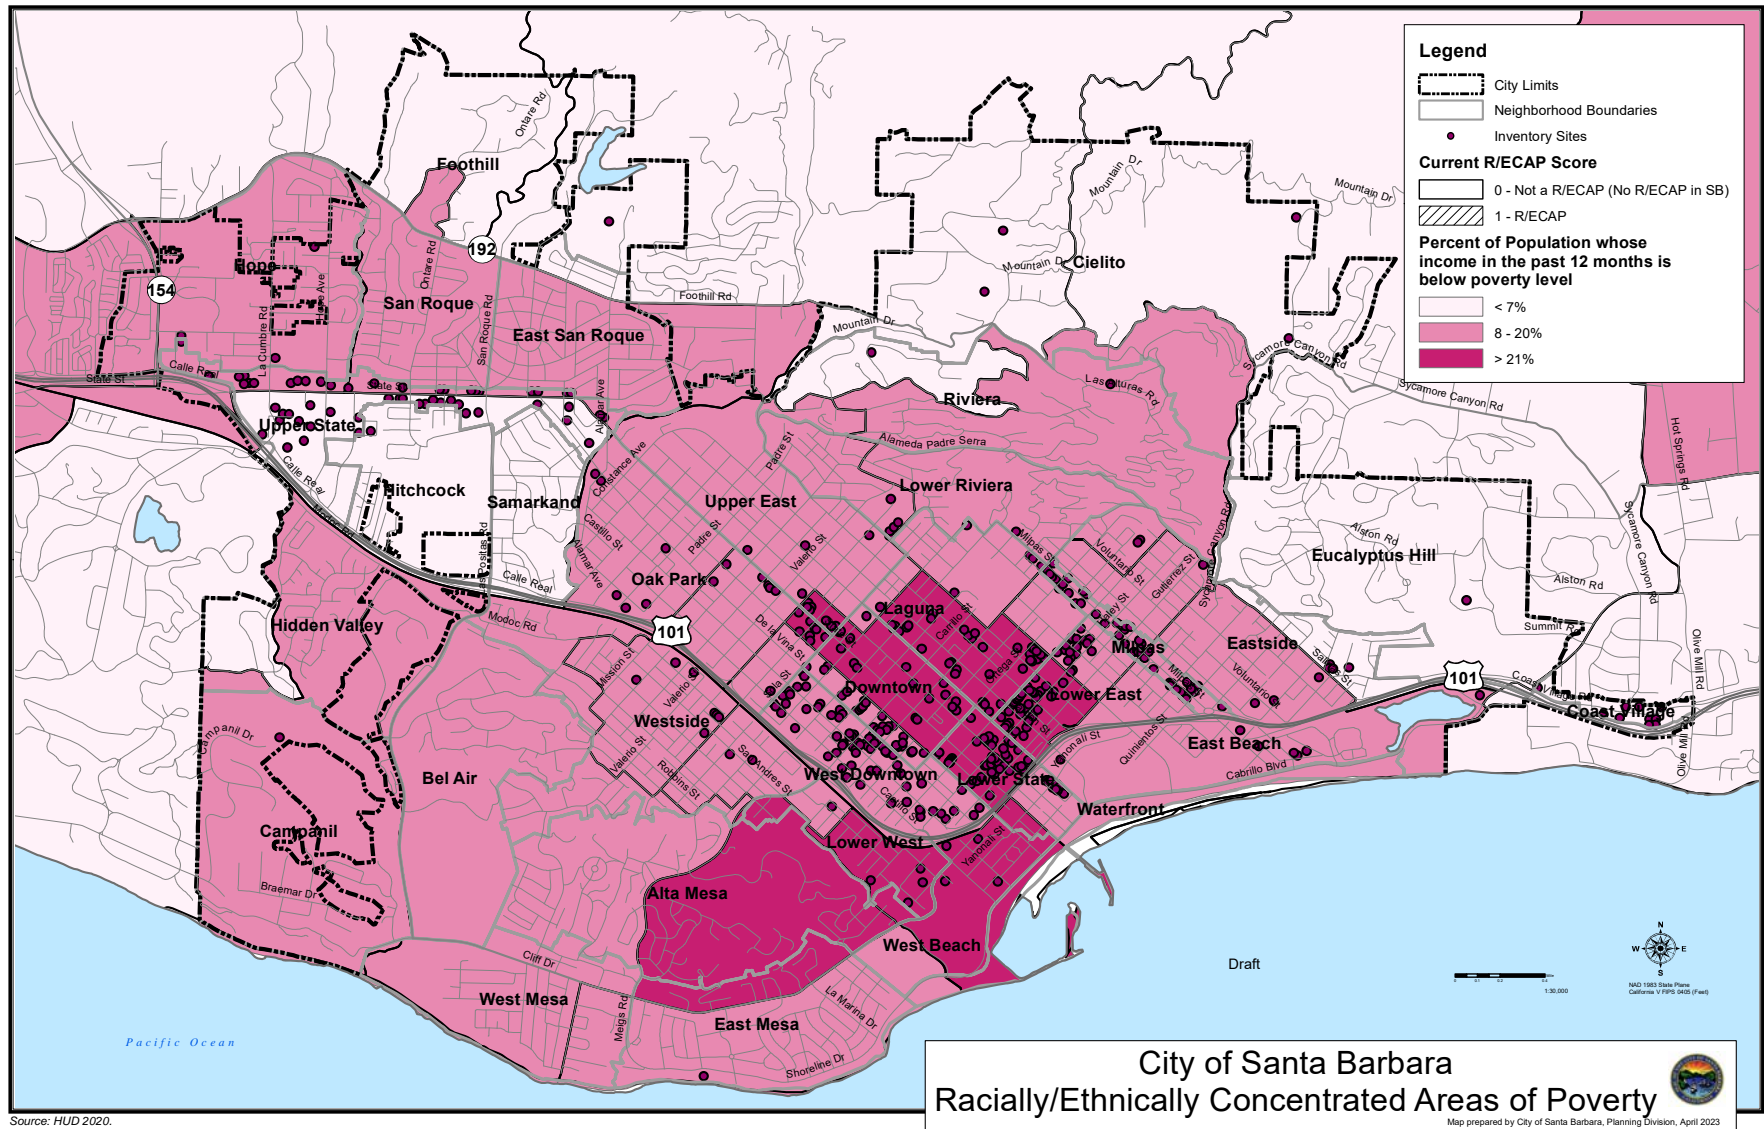

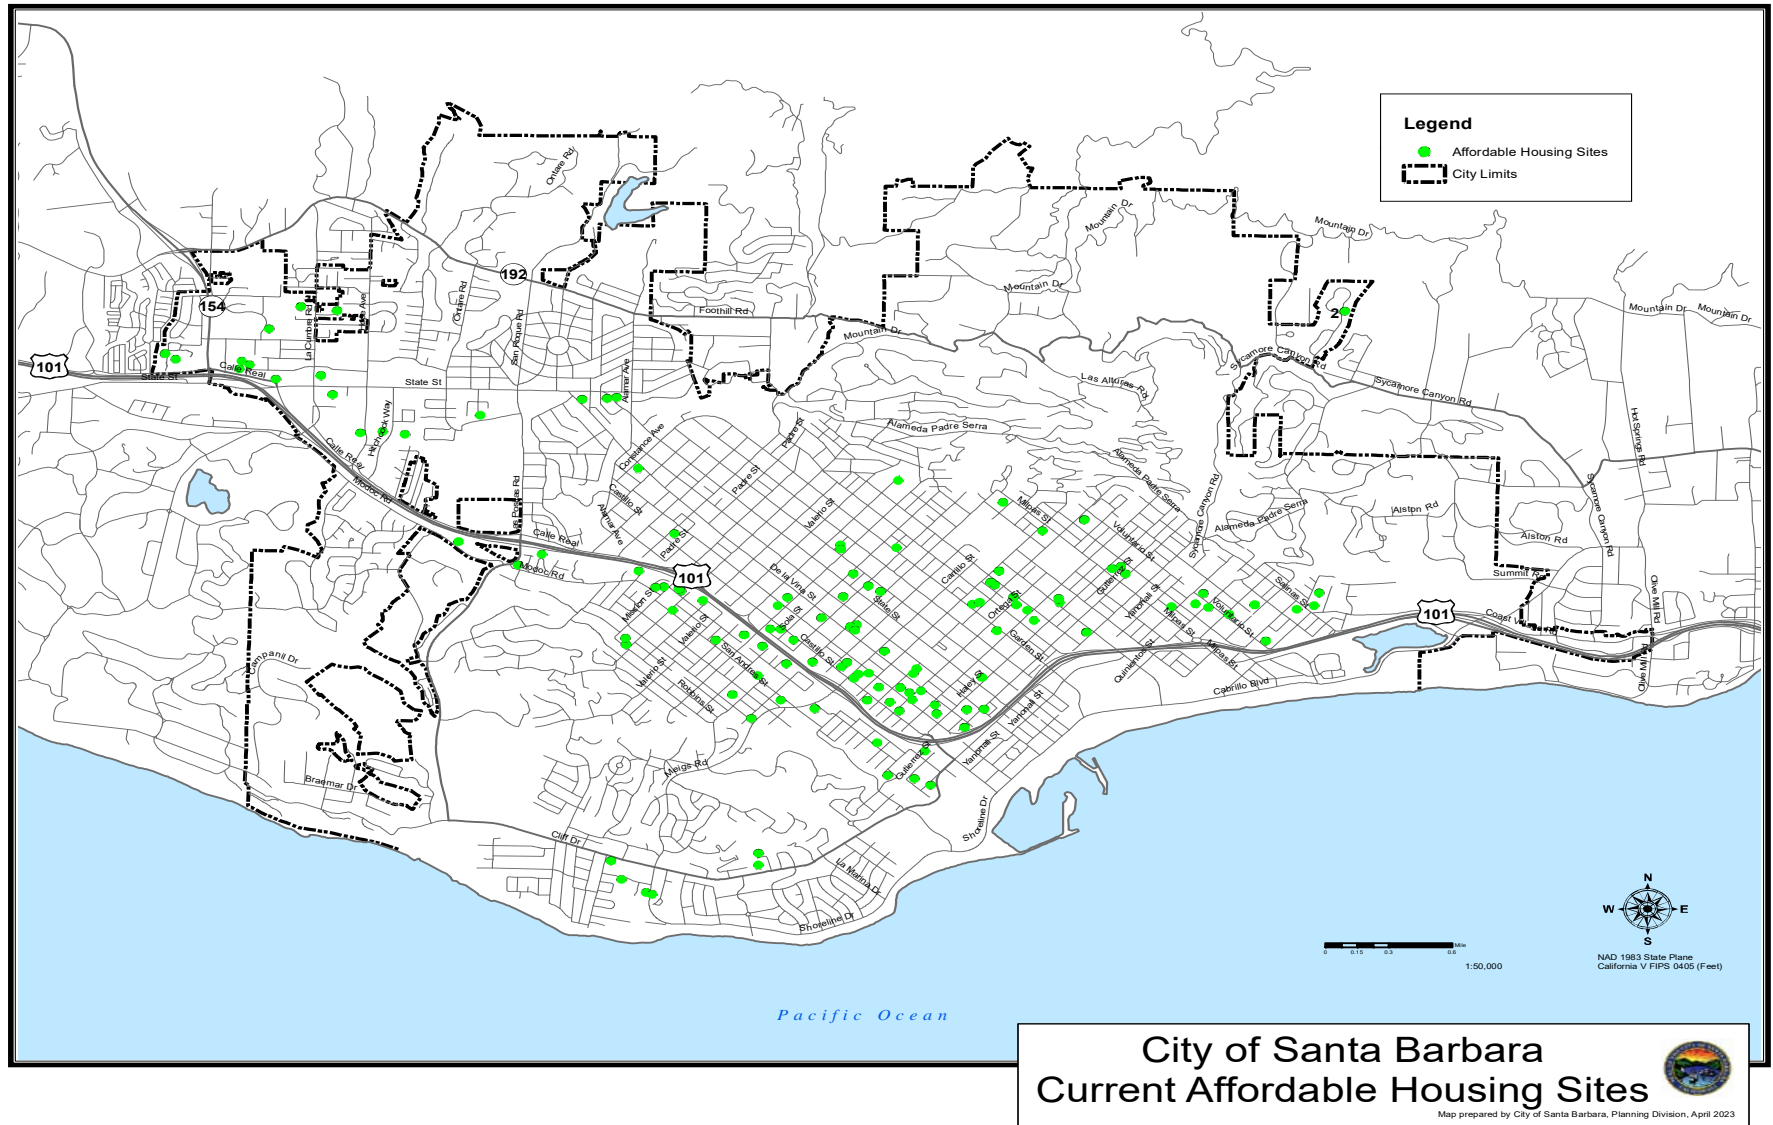

Figure B-13 Affordable Housing Projects - City of Santa Barbara

RACIALLY CONCENTRATED AREAS OF AFFLUENCE

According to HCD's AFFH Resource, *Cityscape: A Journal of Policy Development and Research*, awareness and concern regarding racially concentrated areas of affluence as an expression of segregation has been largely absent from both our national and state housing policy agenda until recent years. Historically, while low-wealth communities of color have been thoroughly problematized and portrayed as the most recognizable example of racial and income segregation in the United States, relatively little attention has been given to the other side of the segregation dynamic – the affluent, White community. Identifying Racially Concentrated Areas of Affluence (RCAAs) are now required for state Housing Elements, ensuring scrutiny is applied to demonstrate that although patterns of segregation in the United States exist within all racial groups, Whites are the most severely segregated. According to the HCD's AFFH Guidance Memo, "segregation is a continuum, with polarity between race and poverty and race and affluence, which can be a direct product of the same policies and practices." Therefore, both sides of the continuum must be examined.¹⁸

Local and Regional Analysis

Table B-3 compares the median household incomes (regardless of household size) of White/non-Hispanic residents in the City of Santa Barbara and Santa Barbara County (Figure B-14) as a whole to the median incomes for the total population of the City and County. This table shows that, in the City, the median income for White/non-Hispanic households is about 16 percent higher than for the City's population as a whole. Countywide, the median income for White/non-Hispanic households is about 12 percent higher than for the population as a whole. These data suggest that there is less racial concentration of affluence in the City than in Santa Barbara County as a whole.

As shown in Figure B-15 racially concentrated areas of affluence exist among the City's Foothill areas and the western portion of the Hidden Valley neighborhood. The suitable sites inventory does not identify sites within these areas because they did not meet the criteria to accommodate RHNA. Conversely, potential housing development opportunities are identified within the downtown and State Street corridor, serving the LMI residents that live there, and are located within close proximity to employment opportunities and public transportation.

Although the suitable sites inventory does not identify sites within these areas, Figure B-16 shows the number of pending and issued ADU permits within the City's racially concentrated areas of affluence. Since 2017, there have been 221 issued ADU permits and 64 ADU permits are pending within the City's racially concentrated areas of affluence. According to state Housing and Community Development, ADUs are an innovative, affordable, effective option for adding much-needed housing in California.

In addition, there are approximately 20 suitable sites in these areas. However, these areas include development constraints such as high cost of insurance due to their location within the City's Very High Fire Areas. Most standard homeowners' insurance policies will cover fire damage, including from wildfires. The City's Racially Concentrated Areas of Affluence have a higher risk of wildfires than other areas of the City, which can make it more difficult to find affordable home insurance. Property owners in these areas can expect to pay much higher rates for home insurance on average, as these areas are more prone to wildfires. Finally, it's important to note that the City's Racially Concentrated Areas

¹⁸ California Department of Housing and Community Development, "Affirmatively Furthering Fair Housing: Guidance for All Public Entities and for Housing Elements," updated in April 2021 available at: https://www.hcd.ca.gov/community-development/affh/docs/affh_document_final_4-27-2021.pdf.

of Affluence are also far from public transit and employment opportunities. Development in these areas of affluence would further exacerbate access to opportunity for racial/ethnic minorities that have lower access to economically strong neighborhoods and live in neighborhoods with lower labor market engagement.

TABLE B-3: MEDIAN HOUSEHOLD INCOME BY RACE – CITY OF SANTA BARBARA AND SANTA BARBARA COUNTY

Disparities in Access to Opportunity

OVERVIEW

California housing law requires cities to analyze disparities in access to opportunity as part of the fair housing assessment. The California Tax Allocation Committee (TCAC) and HCD developed maps showing access to various types of opportunities such as education, economic, transportation, and environmental indicators that can be utilized for this analysis. These maps are discussed below.

EDUCATIONAL OPPORTUNITY

There is a minimum variation in access to proficient schools by race or ethnicity, though Hispanic residents have a somewhat lower index value than other groups. However, when the analysis is restricted to residents in poverty, access to proficient schools appears to increase for non-Hispanic White and Asian residents.¹⁹

Local and Regional Analysis

Variation in access to proficient schools by race/ethnicity is more pronounced in Santa Barbara County than in the City of Santa Barbara.

For the 2022-23 school year, there are 126 public schools serving 66,600 students in Santa Barbara County. 92 percent of all K-12 students in Santa Barbara County are educated in public schools, compared to the CA state average of 90 percent. Educational opportunity scores (based on math and reading proficiency, high school graduation rate, and student poverty indicators) for Santa Barbara County as a whole are shown in Figure B-17. The areas with the highest educational opportunity are found in the South Coast and in the Santa Ynez Valley. Minority enrollment is 79 percent of the student body (majority Hispanic).

For the 2022-23 school year, there are 21 public schools serving 13,183 students in Santa Barbara Unified School District. Minority enrollment is 68 percent of the student body (majority Hispanic). As shown in Figure B-18, TCAC educational opportunity scores are highest in the northwestern portion of the City within the Hope School District and a small eastern portion of the City located within the Montecito School District. The remaining areas of the City, where scores are lower, are located within the Santa Barbara Unified School District.

If a student is interested in attending a school outside of their school of residence, or is interested in a pathway, academy, or program of choice that is not available at the school of residence, parent/guardian(s) may submit an Intra-District Transfer Application. This Intra-District Transfer Application allows students mobility outside of their assigned school district, allowing students to take advantage of educational opportunities in schools located in areas where higher educational domain scores exist.

Map prepared by City of Santa Barbara, Planning Division, April 2023

ECONOMIC OPPORTUNITY

According to data from the Bureau of Labor Statistics, unemployment rates for the County, City and the State are following a very similar trend. Since 2010, the unemployment rates in the region have been steadily decreasing.

The 2013-2017 ACS, reports that there were 211,793 workers in Santa Barbara County with the “Educational services, health care, social assistance” industry being the largest employing business sector by far with 23 percent share of all workers. This was followed by the “Arts, entertainment, recreation, accommodation, food services” and “Professional, scientific, management, admin, waste management” business sectors with 12.2 percent and 11.4 percent respectively. Retail trade was the fourth largest employing business sector in Santa Barbara County with a 10.4 percent share of workers.²⁰

This is significant because not all jobs have the same earning potential. Two of the four largest business sectors in the County also have the lowest Industry Median Earnings – the median earnings of all employed workers in the business sector. Workers in the “Retail trade” business sector have an annual median earning of \$21,003 and those in the “Arts, entertainment, rec, accommodation, food” business sector have \$18,776 – the two lowest earning business sectors in the County.

Local and Regional Analysis

In Santa Barbara County, the highest access to economic opportunity (based on poverty, adult education, employment, and job proximity indicators) are found in the South Coast and Santa Ynez Valley areas, as seen in Figure B-19.

In Santa Barbara, the lowest economic opportunity scores areas are found along the City’s coastline, such as West Beach, East Beach, and the Waterfront. Neighborhoods within the western areas of the City, such as, Campanil and Hidden Valley, also include the lowest economic scores within the City (Figure B-20).

This is likely because these areas include lower-income households and/or are located further from job centers. Specifically, a large portion of the City’s City College student population live within the highlighted portions of the West Beach and Lower West neighborhoods. In addition, the highlighted northwestern portion of the City’s Upper State neighborhood is where a concentration of Assisted Living and Retirement communities reside. For example, the age-restricted San Vicente Mobile Home Park serves approximately 270 households that are at least 55 years old in age, is located in this portion of the Upper State neighborhood. While considering suitable sites for future development, sites were prioritized along not only transit corridors, but within close proximity to employment opportunities and services.

TRANSPORTATION OPPORTUNITIES

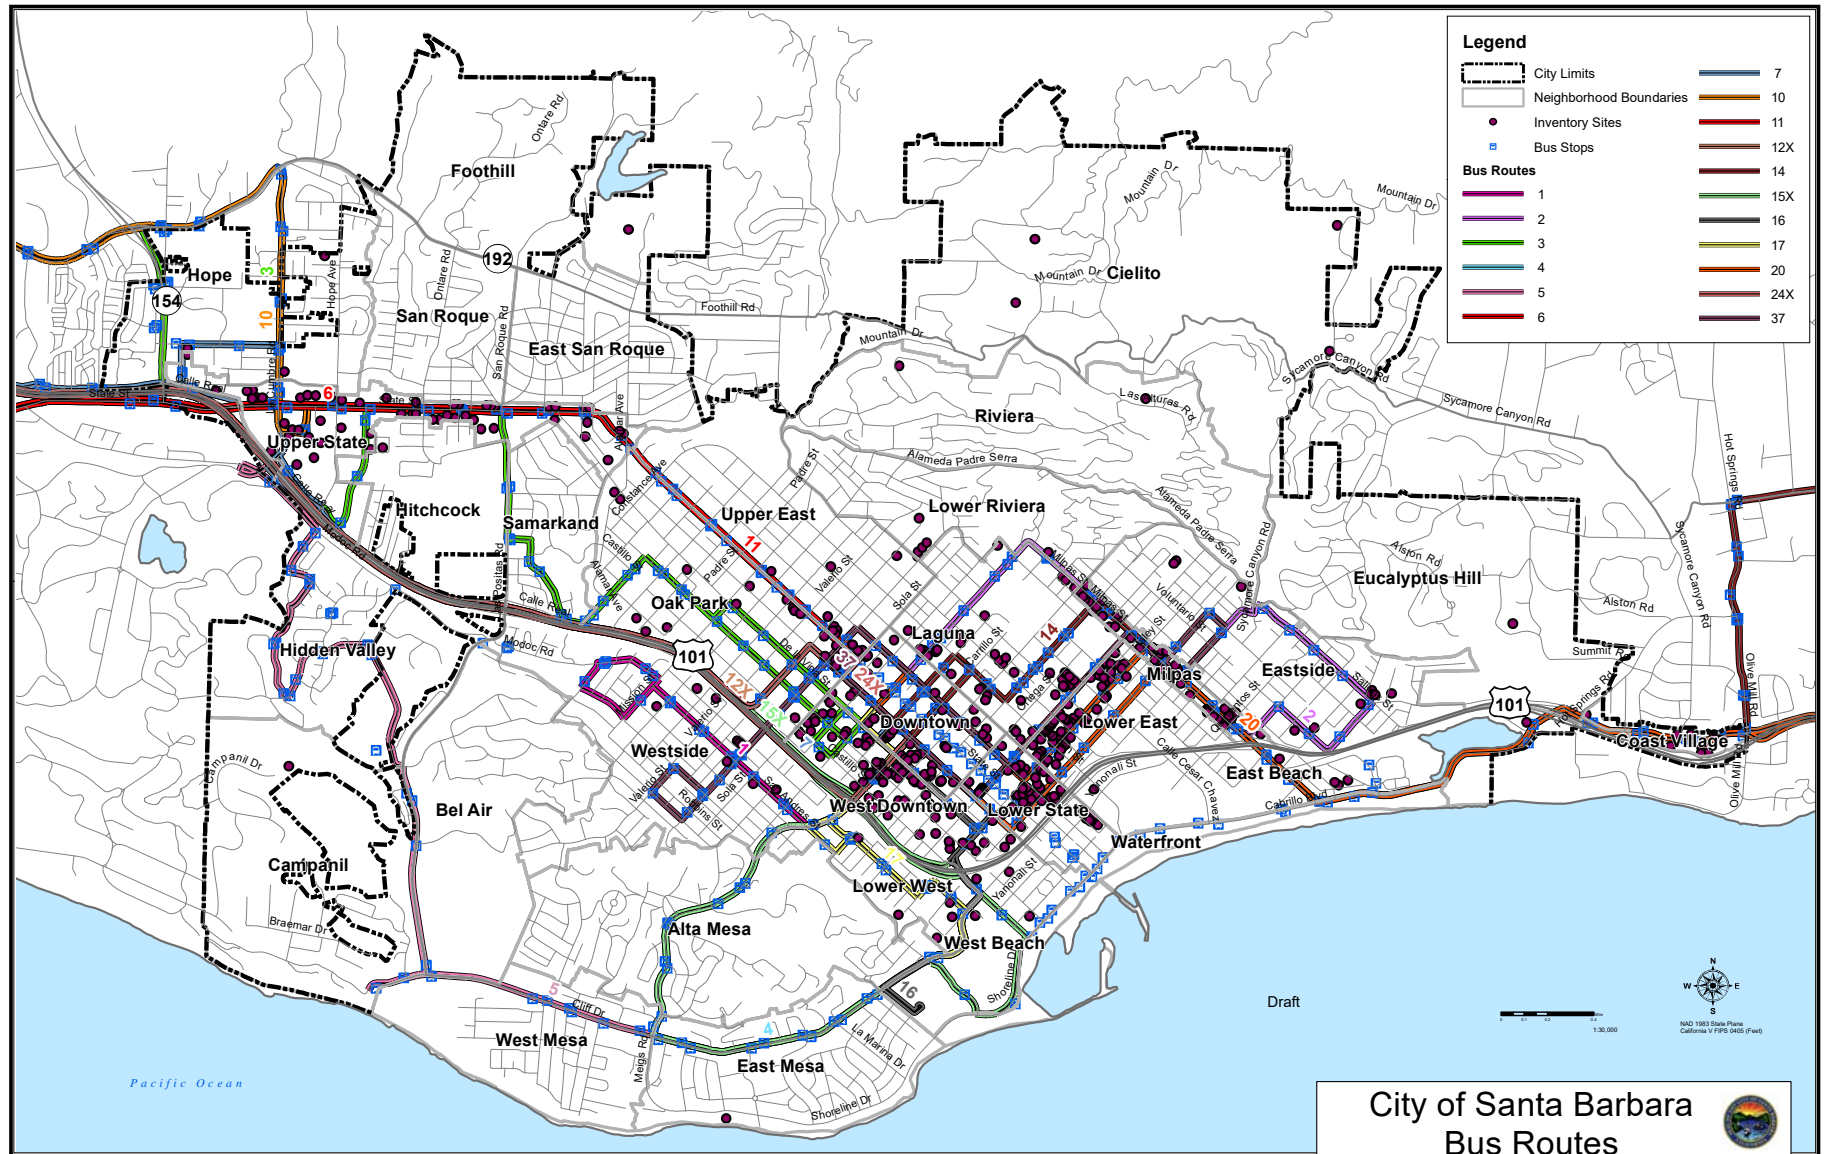

In general, those living in Santa Barbara have lower transportation costs and better access to transit than residents living in Santa Barbara County.²¹ This likely reflects shorter commuter times (and thus lower commuting expenditures) and the City's public transit system, which residents and stakeholders both considered to be more efficient than commuter transit options. The City AI also includes survey responses and, on average, showed the highest level of agreement with the statement, "I can easily get to the places I want to go using my preferred transportation option." While residents agree the most with the statement, members of other populations lag behind, such as families with children, large families, people with disabilities, and Hispanic and other racial/ethnic minorities.

Transportation infrastructure, including improvements to county-wide transit options for commuters was a top workforce-related need identified through AI community outreach. While stakeholders acknowledged that regional transit does exist, their concern was that the frequency and timing only accommodate typical nine a.m. – five p.m. schedules and does not serve in-commuters working in retail or food/accommodation services who often work evenings. In addition, residents with disabilities highlighted the need for accessible housing, particularly near transit.

Suitable sites were also considered based on walkability and bicycle path/lane access. The Santa Barbara Metropolitan Transit District (MTD) provides bus service downtown, connecting the Westside and Eastside, providing continuation to Goleta and Isla Vista (Figure B-21). In addition, bicycle paths are easily accessible from identified suitable sites, and additional bicycle path proposals are currently under review (Figure B-22).

ENVIRONMENTAL OPPORTUNITIES

Environmental opportunity scores are based on the California Fair Housing Task Force Methodology for the 2021 TCAC/HCD Opportunity Map as described below.

The environmental opportunity metric relies on twelve of the indicators that are used in the California Office of Environmental Health Hazard Assessment (OEHHA)'s CalEnviroScreen 3.0 tool under the "exposures" and "environmental effect" subcomponents of the "pollution burden" metric. To mirror the CalEnviroScreen 3.0 approach to calculating pollution burden scores, the exposure indicators are weighed twice as heavily as the environmental effects burden indicators because they are considered to have more of an impact on pollution burden. The indicators for each category are listed below:

Exposure indicators:

1. Ozone Concentrations
2. PM2.5 Concentrations
3. Diesel PM Emissions
4. Drinking Water Contaminants
5. Pesticide Use
6. Toxic Releases from Facilities
7. Traffic Density

Environmental effects indicators:

8. Cleanup Sites
9. Groundwater Threats
10. Hazardous Waste Generators and Facilities
11. Impaired Water Bodies
12. Solid Waste Sites and Facilities

CalEnviroScreen 3.0 was developed to support the Affordable Housing and Sustainable Communities program and other programs that allocate funding from sale of cap-and-trade revenue, but it is explicitly acknowledged as a tool that can be used for a variety of policy and planning purposes. For more information on CalEnviroScreen 3.0, see the OEHHA website.

One limitation of the environmental quality indicators is that the levels of a pollutant are generally measured at a limited number of points statewide; the levels of the pollutant are then estimated for other areas that are not immediately adjacent to the measurement site. Additionally, there are some indicators which may have a large impact in one area of a census tract, but which could have only a marginal effect at another location in the same census tract. This is particularly true of stationary polluting sources, where the impact decreases as the distance from the site decreases.

Local and Regional Analysis

Environmental opportunity scores are put in order from highest to lowest. Therefore, areas with the highest scores, have greater environmental opportunity, and areas with the lowest score, have less environmental opportunity. Specifically, for Santa Barbara County these scores are shown in Figure B-23. This map shows that the highest scores are found in the Santa Maria, Lompoc, Santa Ynez Valley,

and South Coast areas.

In Santa Barbara, the highest environmental opportunity scores are found in the western and northeastern portions of the City (Figure B-24), while neighborhoods in the central and eastern areas show lower scores. Areas with the highest opportunity scores, are a greater distance from urban areas and levels of pollutant are less severe. Wind patterns can link Santa Barbara with the more polluted air of the South Coast Air Basin (Los Angeles area). Air pollutants generated in the South Coast Air Basin can be blown offshore then carried to other coastal cities such as Santa Barbara. In addition, some pollution is transported from the San Fernando Valley to Ventura County, then into Santa Barbara.

In addition, areas within the City with the lowest environmental opportunity scores include residential areas west of Milpas Street, south of Cota Street, and east of State Street are interspersed with auto body shops, gas stations, and businesses that use solvents. In addition, land uses in the lower State Street area south of Sola Street features a high density of internal combustion engines, surface coating operations, and other sources of air pollution. The area north of the Santa Barbara Airport also has a high density of facilities using solvents, internal combustion engines, and other sources of air pollution. Although, areas with the lowest scores consist of the city's urbanized areas, and include a great number of suitable sites, they are also areas with greater access to public transportation and economic opportunities.

DISADVANTAGED COMMUNITIES

Senate Bill 1000 (2016) requires cities with designated disadvantaged communities to include environmental justice goals and policies in the General Plan. Per SB 1000, the California EPA uses CalEnviroScreen to identify disadvantaged communities. As seen in Figure B-22, there are no identified disadvantaged communities in the City of Santa Barbara. The only designated disadvantaged community in Santa Barbara County is in the northwestern corner of the County.

Disproportionate Housing Needs and Displacement Risk

The AFFH Rule Guidebook (24 C.F.R. § 5.152) defines “disproportionate housing needs” as “a condition in which there are significant disparities in the proportion of members of a protected class experiencing a category of housing needs when compared to the proportion of a member of any other relevant groups or the total population experiencing the category of housing need in the applicable geographic area.” The analysis of disproportionate housing needs is completed by assessing cost burden, severe cost burden, overcrowding, and substandard housing. In addition, this analysis examines homelessness and displacement risk.

COST BURDEN (OVERPAYMENT)

A household is considered cost-burdened if it spends more than 30 percent of its income in housing costs, including utilities. Reducing housing cost burden can also help foster more inclusive communities and increase access to opportunities for persons of color, persons with disabilities, and other protected classes.

Local and Regional Analysis

Over 60 percent of renter households in Santa Maria, Lompoc, and cities in the southern coastal area have high-cost burdens. The County’s lowest rates of renter households with high-cost burdens (under 30 percent), are found in tracts to the south and west of Santa Maria and in central areas bordering Los Padres National Forest. Three areas of the Consortium stand out with a disproportionately high homeowner cost burden (over 40 percent of owner households). These areas are north of Santa Maria, central areas bordering Los Padres National Forest, and along the south coastline west of Goleta. Many of the tracts located around the cities in the County have cost burden higher than the rural tracts of the region.²²

Key findings from both stakeholder and resident focus groups notes that across the board, residents and stakeholders expressed concern about the shortage of affordable housing, particularly rental housing in Santa Barbara. Residents and stakeholders noted that the city’s economy supports a number of retail and service jobs which do not pay wages high enough to live in the city. This creates long commutes for workers and has both traffic and environmental consequences.²³

Residents expressed the need for more affordable housing options throughout the city, particularly for families and larger households, including renting and/or buying homes. Residents specifically noted a

²² County of Santa Barbara HOME Consortium, “Analysis of Impediments to Fair Housing Choice,” published in 2020 available at: <https://content.civicplus.com/api/assets/79dde4ec-94ea-4742-b323-846a81a46a3c?cache=1800>.

²³ City of Santa Barbara, “Analysis of Impediments to Fair Housing Choice”, published in April 2020 available at: https://santabarbaraca.gov/sites/default/files/2022-06/Santa%20Barbara%20Analysis%20of%20Impediments%20to%20Fair%20Housing_final%282020%29.pdf.

shortage of rentals priced around \$1,200 per month or for purchase housing with a mortgage of around \$2,000 per month or less. Residents currently experiencing homelessness desired more extremely affordable rental options and identified a need for one-bedrooms, studios, and/or single room occupancy units. Residents with disabilities highlighted the need for accessible housing, particularly near transit.

Stakeholders emphasized a need for housing options across the spectrum including the need for increased shelter space, transitional housing, and permanent supportive housing. These types of housing are particularly difficult to develop in Santa Barbara due to not-in-my-backyard (NIMBY) attitudes along with financing challenges. Stakeholders identified the following barriers to affordable development and the siting/development of shelters/transitional housing: Community resistance, insufficient funding, environmental requirements, bias toward and stereotyping of expected residents, cultural resistance to density, and parking requirements.

Figures B-25 and B-26 show overpayment rates for renters and homeowners in Santa Barbara County. In most areas of Santa Barbara (Figures B-26), overpayment affects 41 to 60 percent of all renter households. As seen in Figure B-28 and B-29, the highest rates of overpayment for both Santa Barbara renter and homeowners (61 percent or greater) occurs in the southern portions of the City, south of Highway 101. See the Housing Challenges section of the Housing Element for more information about cost burden. The problems of overpayment are addressed in the Housing Element through efforts to facilitate production and preservation of affordable housing.

Map Title: City of Santa Barbara Homeowners Overpaying for Housing

Source: American Community Survey 2015 - 2019.

Map prepared by: City of Santa Barbara, Planning Division, April 2023

OVERCROWDING

“Overcrowding” is defined by the Census Bureau as a housing unit occupied by more than 1.01 persons per room (excluding kitchens, porches, and hallways). A unit with more than 1.51 occupants per room is considered “severely overcrowded.” The incidence of overcrowded housing is a general measure of whether there is an available supply of adequately sized housing units.

In such a high-cost market, many residents in the city, accept substandard living conditions by paying high rents for units in very poor condition and others live in overcrowded situations, sometimes with entire families renting a single room in a home.

Many residents and stakeholders also described situations of extreme overcrowding in the city, stemming from the shortage of affordable, appropriately sized units. In many cases families are sharing a single-room and individuals are renting what stakeholders described as “closets” for hundreds of dollars per month.²⁴

Overcrowding is also related to overpayment, because households may not be able to afford a large enough home to accommodate their needs. Overcrowding can lead to a variety of other problems such as lower educational performance among children, psychological stress, and adverse health impacts.

Local and Regional Analysis

In high-cost markets, such as Santa Barbara, many residents may accept substandard living conditions by paying high rents for units in very poor condition, and others may live in overcrowded situations, sometimes with entire families renting a single room in a home. According to the City AI, many residents and stakeholders also described situations of extreme overcrowding, stemming from the shortage of affordable, appropriately sized units. For Santa Barbara County as a whole, overcrowding is most common in the northwestern portion of the County to the west of Santa Maria (Figure B-30). In Santa Barbara, the highest rates of overcrowding occur in the southeastern portion of the city (Figure B-31).

24 City of Santa Barbara, “Analysis of Impediments to Fair Housing Choice”, published in April 2020 available at: https://santabarbaraca.gov/sites/default/files/2022-06/Santa%20Barbara%20Analysis%20of%20Impediments%20to%20Fair%20Housing_final%282020%29.pdf.

Figure B-30 Overcrowded Households – Santa Barbara County

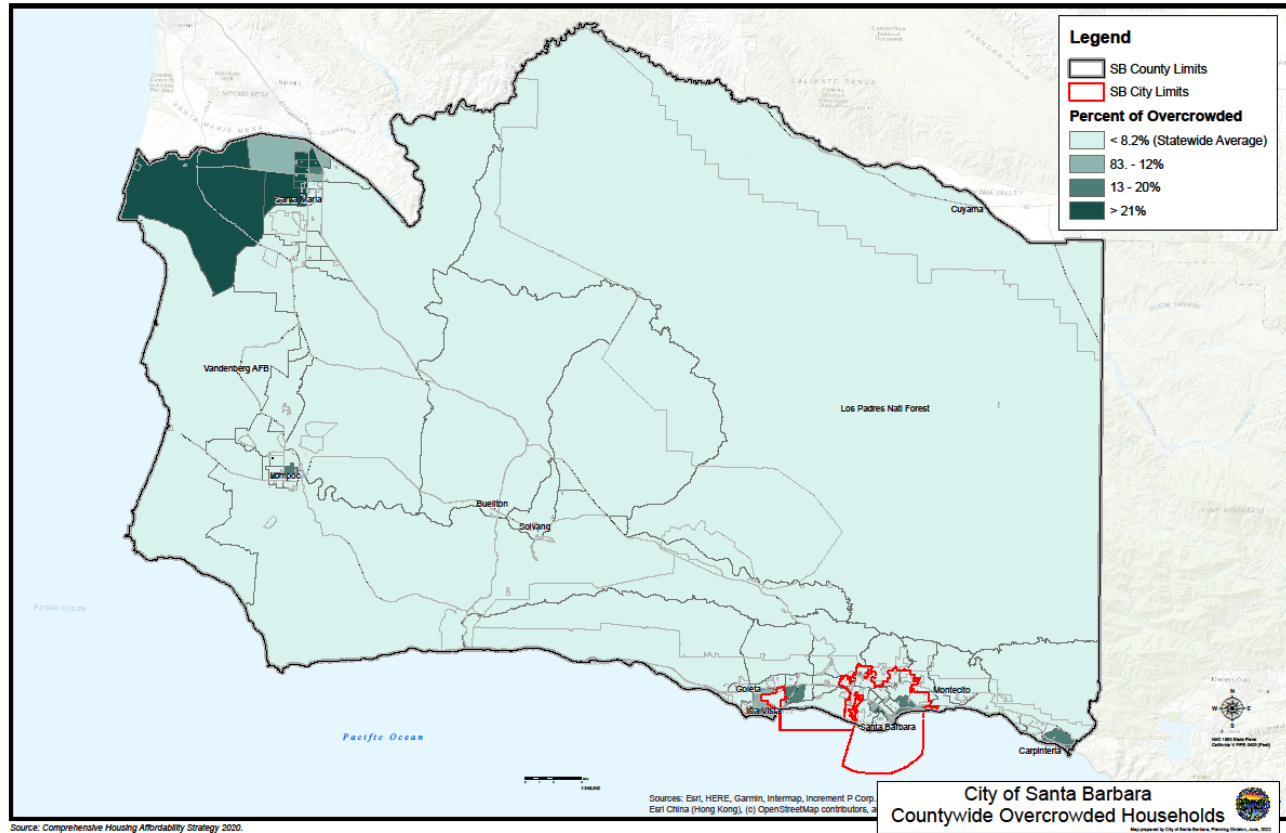

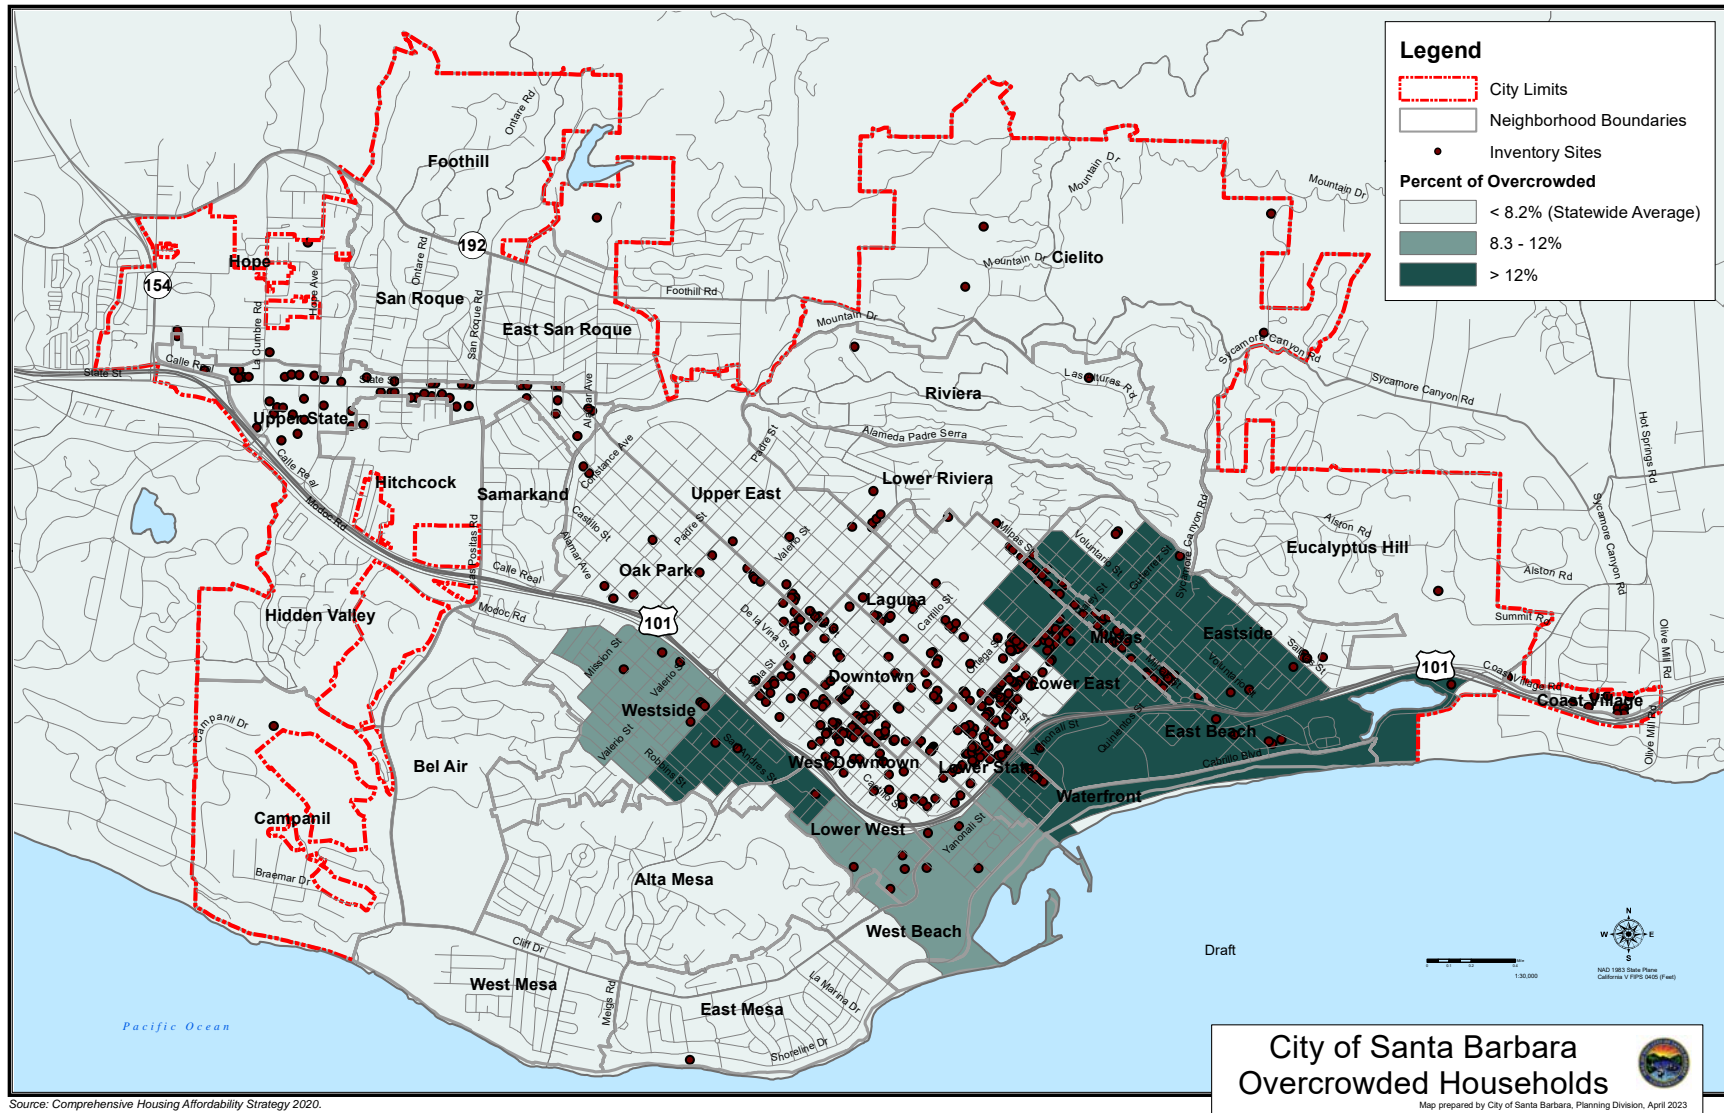

Figure B-31 Overcrowded Households – City of Santa Barbara

The problems of overcrowding are addressed in the Housing Element through efforts to facilitate production and preservation of affordable housing.

SUBSTANDARD HOUSING

Housing age is often an important indicator of housing condition. Housing units built prior to 1978, before stringent limits on the amount of lead in paint were imposed, may have interior or exterior building components coated with lead-based paint. Housing units built before 1970 are the most likely to need rehabilitation and to have lead-based paint in deteriorated condition. Lead-based paint becomes hazardous to children under age six and to pregnant women when it peels off walls or is pulverized by windows and doors opening and closing.

The age and exterior condition of housing is one indicator of overall housing conditions. Approximately 75 percent of the City's housing stock was built prior to 1980 (see Table 9 in the Housing Element), which can raise housing maintenance issues. Housing units older than 30 years typically need some rehabilitation work to address issues with roofing, siding, and plumbing and electrical systems.

Local and Regional Analysis

In the County, approximately 61.2 percent of the housing stock was built prior to 1980. Homes older than 1980 have a higher risk of containing lead-based paint, which means that over 70,000 units in the Consortium are at risk. In the Consortium newer homes are primarily concentrated in the northwest, particularly just west of Santa Maria. In those tracts the median year built is 1990 or later. Tracts running north and south along highway 101 also have newer homes with a median year built of 1980 or later. In general, tracts surrounding the cities have homes with a median year built of 1980 or later, and rural tracts have a median year built before 1980.

The Housing Condition section and Table 8 describes the City's housing stock conditions for eight surveyed neighborhoods: Laguna, Eastside, Westside, the Mesa, San Roque, Samarkand, Downtown, and West Beach. The housing condition survey included a total of 1,584 housing units (Table 8). The majority of units were single-unit dwellings, followed by multi-unit complexes, and duplexes. Of the 1,584 units surveyed, 833 were found to be sound, 727 were found to be in minor need of repair, 22 were found to be in moderate need of repair, and two in substantial need of repair. None of the units surveyed were considered to be dilapidated.

Table B-4: Year Unit Built (City of Santa Barbara)

<u>Range</u>	<u>Number</u>	<u>%</u>
<u>Built 2014 or Later</u>	<u>241</u>	<u>0.6%</u>
<u>Built 2010 to 2013</u>	<u>798</u>	<u>2.0%</u>
<u>Built 2000 to 2009</u>	<u>1,682</u>	<u>4.2%</u>
<u>Built 1990 to 1999</u>	<u>2,313</u>	<u>5.8%</u>
<u>Built 1980 to 1989</u>	<u>4,189</u>	<u>10.5%</u>
<u>Built 1970 to 1979</u>	<u>5,587</u>	<u>14.0%</u>
<u>Built 1960 to 1969</u>	<u>6,665</u>	<u>16.7%</u>
<u>Built 1950 to 1959</u>	<u>7,319</u>	<u>18.3%</u>
<u>Built 1940 to 1949</u>	<u>2,829</u>	<u>7.1%</u>
<u>Built 1939 or earlier</u>	<u>8,309</u>	<u>20.8%</u>
<u>Total</u>	<u>39,932</u>	<u>100%</u>
<u>Data Source: 2015-2019 American Community Survey 5-Year Estimates (DP04)</u>		

Table B-4 illustrates that city-wide, approximately 76.9 percent of the housing stock was built prior to 1980 whereas in the County, this figure is approximately 61.2 percent. Homes built prior to 1980 have a higher risk of containing lead-based paint, which means that over 30,000 units in the City are at risk. In the City, newer homes are primarily concentrated in the northwest and the downtown core. In those tracts, a significant portion of the housing stock was built in 1990 or later. Tracts that are located adjacent to Downtown, on the City's Eastside, on the City's Westside, and on the Mesa tend to have older housing stocks.

The Housing Element Goals, Policies and Programs include implementations assisting homeowners with repairs. These policies include Policy 3.4: Financial Assistance and HE-13: Affordable Housing Trust Fund, both intended to provide financial assistance for income-qualified households for home repairs. Regarding rental properties, Policy 5.1: Repair and Upgrade Housing, encourages the maintenance and repair of existing renter, and owner-occupied housing to prevent deterioration and assist property owners that can demonstrate financial need in upgrading substandard units. Lastly, in 2023, City Council established a Low-Income Homeowner Rehabilitation Pilot Program with funding from the Inclusionary Housing Reserve Funds to Habitat for Humanity to operate the program. As a result, HE-22: Fund Home Improvements and Repairs will support Habitat for Humanity or

other local nonprofits that provide home repair and equipment grants to income-qualified households, including seniors or persons with disabilities, to improve safety, security, and comfort.

PEOPLE EXPERIENCING HOMELESSNESS

Low-income households are at greatest risk of housing instability and are at greater risk of homelessness. Santa Barbara is one of the most expensive cities in which to live. The Housing Element's Introduction provides a cost and inflation rate over time analysis that supports the fact that home and rent prices are up significantly and the supply of available homes and apartments is insufficient.

Displacement

Displacement refers to any involuntary household move caused by landlord action or market changes. Displacement can be caused by rising housing costs, insufficient affordable housing opportunities, expiration of affordability covenants, evictions, natural disaster, housing discrimination, or the physical demolition of existing housing to make way for new development.

Displacement mitigation strategies include tenant protections, physical maintenance and conservation of the existing affordable housing stock, preservation of existing deed-restricted affordable units at-risk of conversion to market-rate, acquisition and rehabilitation of existing housing units, requiring the replacement of existing affordable units demolished as part of redevelopment, and facilitating construction of additional affordable housing. The Housing Element includes programs to implement all of these strategies.

From 2015 to 2020, one in four survey respondents had to move from a home when they did not want to move. Four in ten precariously housed residents experienced displacement in the past five years, the highest rate among the resident segments examined. One in three residents with income less than \$25,000, Hispanic residents, residents with income less than \$50,000, and renters have been displaced over the last five years.²⁵

A focus group meeting with residents currently experiencing homelessness discussed the challenges facing people without stable housing and the precarious situation of those at risk of homelessness. They noted the need for additional shelter space and affordable housing but also identified the need for health services, help with service navigation, and protection for those living on the streets (e.g., safe parking locations, designated camping areas, bathrooms).

Participants expressed a desire (and need) for supportive services, but also expressed

25 City of Santa Barbara, "Analysis of Impediments to Fair Housing Choice," published in April 2020 available at: https://santabarbaraca.gov/sites/default/files/2022-06/Santa%20Barbara%20Analysis%20of%20Impediments%20to%20Fair%20Housing_final%282020%29.pdf.

frustration that the system prioritizes people in crisis for housing, which creates the perception that you have to be substance addicted in order to get access to housing. Stakeholders also identified a need for more mental health resources for the general population and for people with disabilities.

The reasons for having to move varied, but the greatest proportion of respondents attributed their displacement experience to increased rent, landlord selling the home, personal/relationship reasons, or landlord wanting to rent to someone else.

Displacement & Natural Disasters

Santa Barbara County and the City have a history of displacement due to wildfire, earthquakes, and floods. Over the last ten years, Santa Barbara County has experienced nine major fires. Two of these fires directly threatened the heavily populated Santa Barbara Front Country and hillside areas of the City of Santa Barbara. The Very High Fire Severity Zones (VHFSZ) are located primarily in the City's areas of Racially Concentrated Areas of Affluence (RCAA). Generally, property owners within RCAA areas have the financial means to rebuild their homes after wildfire events and have done so. Therefore, property owners located in both the VHFSZ and RCAA are rarely displaced permanently.

The City of Santa Barbara is also located in a high seismic activity zone. However, the City has not experienced a destructive earthquake, causing property damage and death since June 1925. According to the United States Geological Survey (USGS), the probability of occurrence for a magnitude six earthquake to occur within the Southern California region over the next 30-years is 100 percent. Nonetheless, during the 1925 earthquake, buildings of reinforced concrete were damaged little, as were frame buildings covered in stucco, sheathing, or lath. Structures built today, are far more resilient to seismic activity.

Flooding has been a major problem in the City of Santa Barbara. The City has several watershed areas that have different types of flooding problems, including over bank riverine flooding, flash floods, tidal flooding/tsunamis, and dam failure. The most common flooding in the City is due to watershed channel flooding and flash flood events. However, the City's Floodplain Management Ordinance has identified FEMA flood hazard areas that may be subject to periodic inundation which may result in loss of life and property. The Floodplain Management Ordinance sets forth minimum standards for construction within flood-prone areas of the City.

Local and Regional Analysis

Housing costs are a significant barrier to acquiring affordable housing for renters. However, there are additional barriers that renters often face. Historically, California law allowed landlords to evict tenants without providing a reason for eviction. Tenants could be subjected to eviction in retaliation for repair requests or organizing with their neighbors against rent hikes and displacement.

However, state and local government have taken action to address the eviction crisis. The County has increased its dispute resolution services as a direct result of the passage of the new State and local laws found in the Tenant Protections Act of 2019, which became

effective on January 1, 2020. This passage of AB 1482 (2019) enacts three new California Civil Code Sections, which together establish Statewide Rent Control and Just Cause Eviction protections and remedies, including tenant relocation costs until January 1, 2030

Additionally, on June 7, 2019 the Santa Barbara City Council adopted Mandatory Lease Ordinance No. 5885 to help housing retention and prevent homelessness. The Rental Mediation Housing Program is specifically named in the ordinance. In cases of non-renewal of leases, it states “the tenant shall be offered a one-session conciliation meeting with the landlord using the Santa Barbara Rental Housing Mediation Board...” This new ordinance with the Program’s neutral Dispute Resolution Services, at no cost to the parties, has already led to an increase in staff workload with the scheduling and performance of conciliation and face-to-face mediations, including multiparty mediations.

The overall number of people experiencing homelessness (sheltered and unsheltered) in Santa Barbara County has remained relatively consistent since the 2013 Point in Time (PIT) Count (1,882 in 2013 vs. 1,897 in 2020). According to the City’s HOME ARP Allocation Plan, Santa Barbara has the highest population of persons experiencing homelessness in Santa Barbara County.²⁶ The 2022 PIT count found 1,962 persons experiencing homelessness countywide, with approximately 53 percent of those in the South Coast. Notably, of the total countywide homeless population, 42 percent were specifically within the City of Santa Barbara.²⁷

In regard to demographics, VI-SPDAT (Vulnerability Index - Service Prioritization Decision 4 Assistance Tool) assessment data shows that: 80 percent of persons experiencing homelessness were White; ten percent were Black/African-American; two percent were Native Hawaiian or Pacific Islander; one percent were Asian. Of these, 31 percent were Hispanic. These demographics are generally in line with U.S. Census demographics with two exceptions: Black/African-American persons only make up two percent of the overall citywide population, while making up ten percent of the homeless population; and Native Hawaiian or Pacific Islanders, which only make up two tenths percent of the general population, but make up two percent of the homeless population. While two different data sources were used for this assessment, this disparity should still be noted and a greater emphasis should be placed on addressing the needs of these particular populations. Additionally, VI-SPDAT data shows that 19 percent have a physical disability, 44 percent have a chronic health condition, 30 percent have a substance use disorder, and 34 percent have mental health conditions or brain injuries. The PIT identified 117 homeless

26 City of Santa Barbara, “Home ARP Allocation Plan,” published in March 2022 available at: <https://www.hud.gov/sites/dfiles/CPD/documents/HOME-ARP/ALLOCATIONPLANS/SantaBarbaraCAAllocationPlan.pdf>.

27 County of Santa Barbara, “2022 Santa Barbara County Homeless Point-In-Time County & Survey,” published in March 2022 available at: <https://content.civicplus.com/api/assets/4344ab0c-a9f5-47dd-8d52-fd7ad028dca9>.

veterans countywide, which is a decrease from 210 counted in 2020.²⁸ New Beginnings Counseling Center reported serving 372 veterans and their families in Santa Barbara through its Supportive Services for Veteran Families program.²⁹

Although the supportive and housing services needed by this population vary, generally, all need health care and counseling immediately following the event and continued mental health support to assist with the traumatic stress disorder related to the event. Victims may also require assistance with substance abuse and mental health services, both of which are common among this population.

Moreover, access to affordable housing is also critical: the National Alliance to End Homelessness argues that a “strong investment in housing is crucial [to victims of domestic violence] ...so that the family or woman is able to leave the shelter system as quickly as possible without returning to the abuse.” The Alliance also reports that studies have shown a correlation between domestic violence and homelessness.³⁰

SITES INVENTORY ANALYSIS

The City’s inventory of sites for potential housing is presented in Appendix G. The inventory is comprised of vacant sites, non-vacant underutilized sites, and future ADUs. The sites analysis shows that very little vacant developable land is available in the City of Santa Barbara and underutilized sites in commercial and office areas provide the majority of future housing capacity.

As illustrated in Figure B-32, much of the City, including suitable sites for housing, are within areas designated by the TCAC/HCD Opportunity Maps as Moderate, High, or Highest Resource. The TCAC/HCD opportunity maps are intended to display which areas, according to research, offer low-income children and adults the best chance at economic advancement, high educational attainment, and good physical and mental health. High resource means that there are positive economic, educational, and health outcomes for low-income families

The City of Santa Barbara is in the Central Coast Region. The TCAC/HCD Opportunity Map allocates 20 percent of census tracts in each region with the highest relative index scores to the “Highest Resource” designation and the next 20 percent to the “High Resource” designation. The remaining tracts are then evenly divided into “Low Resources” and “Moderate Resource” categories. The map is also used for TCAC/HCD

28 County of Santa Barbara, “2022 Santa Barbara County Homeless Point-In-Time County & Survey,” published in March 2022 available at: <https://content.civicplus.com/api/assets/4344ab0c-a9f5-47dd-8d52-fd7ad028dca9>.

to develop new policies aimed at increasing access to high-opportunity areas for families with children financed with nine percent Low Income Housing Tax Credits.

While commercial and office use areas provide the largest component of the potential residential inventory, it is important to recognize that existing residential neighborhoods categorized with High or Highest opportunity resources also provide substantial potential for new housing through ADUs and Senate Bill 9 (2021) two-unit residential development and urban lot splits.

.

Appendix C: Public Outreach Table

This table is a list of all the organizations contacted and methods of public outreach throughout development of the 2023 – 2031 Housing Element from March 2022 when the Housing Element Update was initiated until submittal of the draft to Housing and Community Development Department in August 2022. Public comment letters and the City’s responses are posted on the project’s website here: <https://www.santabarbaraca.gov/heu>. The City welcomes the opportunity to discuss the Housing Element with community members. Public outreach will continue throughout the 2023 – 2031 Housing Element process and beyond.

Appendix D: Santa Barbara Accessory Dwelling Unit Use and Affordability Survey

Introduction

Government Code §65583.1 details how local governments can consider alternate means of accommodating the RHNA beyond vacant and underutilized sites. The potential for Accessory Dwelling Units (ADUs) within the planning period is one of the available alternatives. Since the location and rents of projected ADUs are unknown, local governments must make assumptions about which RHNA income categories they should be counted towards. For purposes of determining how ADUs are being used and, if rented, what rates are being charged, the City conducted a survey of property owners with ADUs. The data from the survey informed the ADU affordability used to assign ADUs to RHNA income categories in the 2023-2031 Housing Element.

Methodology

In April 2022, the City sent a postcard and email notifications to 349 property owners with ADUs that received certificates of occupancy, and encouraged them to take a short survey posted online. The survey included questions about ADU type, use, size, number of occupants, and rent charged (if rented). The availability of the survey was also announced using other platforms such as the American Institute of Architects newsletter and City News in Brief. The City received a total of 57 responses.

The results of the survey were analyzed to assign income categories to the ADUs anticipated in the eight years of the 6th Cycle Housing Element. The income category calculation was completed using the following steps:

- Identify very low, low, and moderate income limits by household size;
- Calculate maximum affordable rent by household size (pre-utility deduction);
- Calculate utility allowance per the City of Santa Barbara Housing Authority 2021 Utility Allowance Schedule for residents of affordable rental housing (total of \$97); and
- Calculate maximum affordable rent by household size with utility deduction.

As noted in the survey results below, some ADUs are used as guest spaces or offices, rather than long-term housing. Other uses for ADUs included the primary owner(s) living in the ADU while renting the main house. From the data, staff determined that 65 percent of ADUs permitted each year could be counted as housing units for RHNA purposes (ADUs with no occupants were not considered a housing unit). If the ADU has an occupant and no rent is charged, it was assigned to the very low income category per Southern California Association of Governments methodology. Survey respondents with tenants in the ADU but who declined to state the rent were considered in the above moderate income category.

Of this total, it is anticipated that rents will be charged in accordance with the following affordability breakdown:

- Very Low Income - 23 percent
- Low Income – 23 percent
- Moderate Income – 11 percent
- Above Moderate Income – 41 percent

SURVEY RESULTS

Q1 - What type of ADU do you have?

Q2 - How big is your ADU?

Q3 - How do you use your ADU?

Q4 - How many tenants are living in your ADU?

Q5 - What is the monthly rent of your ADU?

TABLE D-1: ADU SURVEY RESULTS

2	\$3,500	Above Moderate	N	N	N	
1	\$1,300	Low Income	N	Y	Y	
0	\$0	non housing unit for RHNA purposes				
1	Declined to state	Above Moderate				
0	\$0	non housing unit for RHNA purposes				
1	\$1,800	Low Income	N	Y	Y	
1	\$1,800	Low Income	N	Y	Y	
1	\$2,600	Above Moderate	N	N	N	
2	\$4,500	Above Moderate	N	N	N	
2	\$2,200	Moderate Income	N	N	Y	
1	\$2,250	Above Moderate	N	N	N	
1	\$2,600	Above Moderate	N	N	N	
1	\$2,800	Above Moderate	N	N	N	
0	\$0	non housing unit for RHNA purposes				
2	\$0	Very Low Income				
1	\$1,950	Moderate Income	N	N	Y	
2	\$0	Very Low Income				
1	\$1,200	Low Income	N	Y	Y	
1	\$1,000	Very Low Income	Y	Y	Y	

TABLE D-1: ADU SURVEY RESULTS						
Q4: How many tenants living in your ADU?	Q5: What is monthly rent of your ADU?	Classification	Affordable to Very Low Income?	Affordable to Low Income?	Affordable to Moderate Income?	Affordable to Above Moderate?
2	\$2,250	Moderate Income	N	N	Y	
0	\$0	non housing unit for RHNA purposes				
3	\$2,350	Low Income	N	Y	Y	
1	\$1,600	Low Income	N	Y	Y	
Notes: If the ADU has an occupant and no rent is charged, assigned to Very Low per Southern California Association of Governments Methodology. ADUs with No Occupants can't be considered a Housing Unit for RHNA purposes. Survey respondents who "Decline to State" the rent were considered "Above Moderate" to err on the conservative side.						

Appendix E: Housing Stock Surveys

Housing Conditions by Neighborhood

The following tables display housing condition survey data for the Laguna, Eastside, Westside, Mesa, San Roque, Samarkand, Downtown, and West Beach neighborhoods collected in 2022.

The Laguna survey area included 22 housing units (Table E-1). Of the 22 housing units surveyed, the majority of units (12) were single-unit dwellings, followed by multi-unit complexes (8) and duplexes (2). In the Laguna survey, 2 units were found to be in moderate need of repair. None of the units surveyed were considered dilapidated or in substantial need of repair.

TABLE E-1: HOUSING CONDITIONS SURVEY: LAGUNA

Housing Type	Sound	Minor	Moderate	Substantial	Dilapidated	Total
Single-unit	3	8	1	0	0	12
Duplex	0	2	0	0	0	2
Multi-unit	1	6	1	0	0	8
Total	4	16	2	0	0	22

Appendix F: Residential Development Standards

This Appendix contains more detailed descriptions regarding development standards and other factors related to the production of housing in Santa Barbara.

PARKING STANDARDS

Required off-street parking spaces are as follows:

1. Each lot shall provide the minimum number of automobile and bicycle parking spaces stated in F-1, except provided below:
 - a. Minimum Number of Spaces. Fractions shall be rounded pursuant to Section 30.15.050, Fractions.
 - i. Automobile Parking. If the result of rounding is less than one automobile parking space, a minimum of one automobile parking space shall be required for every new use established and new main building constructed.
 - ii. Bicycle Parking. When bicycle parking is required pursuant to this chapter, and the result of rounding is less than one space, a minimum of one bicycle parking space shall be provided. Rounding for bicycle parking shall take place prior to the determination of the numbers of short term and long term bicycle parking, as described below.
 - iii. Short Term and Long Term Bicycle Parking. When the numbers of short and long term bicycle parking spaces required per Table 30.175.040, Required Off-Street Parking Spaces, result in fractions of a space, the one remaining required bicycle parking space represented by the sum of the fractions may be provided as either short term or long term.

TABLE F 1: OFF STREET PARKING REQUIREMENTS

Nonresidential Structures			
Front	Same as for Residential Structures		
Interior (Conversion and Alterations)	Conversions of existing residential structures to nonresidential structures, or alterations of existing structures that contain nonresidential uses, are subject to the setback requirements for residential structures		
Interior (New or Additions)	12	New nonresidential structures or additions to existing nonresidential structures are subject to the following interior setback: - 1 st and 2 nd Stories: 12 - Portions of structures above 2 nd story: 20 - Exception: Neighborhood Markets and Community Gardens are subject to the setback requirements for residential structures.	
Minimum Setbacks, Mixed-Use	Portions of structures that contain residential uses are subject to the setback for residential structures, and portions of structures used for nonresidential uses are subject to the setback requirement for nonresidential structures. Portions of structures used by both the residential and nonresidential uses are subject to the setback requirement for nonresidential structures.		
Minimum Setbacks, Uncovered Parking	See §30.175.060, Location of Required Automobile and Bicycle Parking		
Open Yard			
Open Yards	See §30.140.140, Open Yards See Chapter 30.150, Average Unit-Size Density		

OPEN SPACE REQUIREMENTS

The City's development standards for multi-unit residential zones and uses are specified below in Table F-3. The table identifies development standards for residential projects that require some type of open space, whether common area open space, recreation open space, privately accessible open space, or other types.

TABLE F 3: OPEN SPACE REQUIREMENTS FOR RESIDENTIAL ZONES

Open Space Requirements	Existing Multi-Unit Zones	Existing Non-Residential Zones (Multi-unit is allowed in non-residential)
Minimum Area	15% of lot area	No minimum area
Per Unit	Private Yard required: Studio Unit: 60 – 100 sq. ft. 1 Bedroom: 72 – 120 sq. ft. 2 Bedroom: 84 – 140 sq. ft. 3+ Bedroom: 96 – 160 sq. ft.	Private Yard Required: Studio Unit: 60 – 100 sq. ft. 1 Bedroom: 72 – 120 sq. ft. 2 Bedroom: 84 – 140 sq. ft. 3+ Bedroom: 96 – 160 sq. ft.
Minimum Dimension	Must Provide: 15% Area: 10' x 10' Private On-Grade: 10' x 10' Private Balcony: 6' x 6' Common: 20' x 20'	Must Provide: Private On-Grade: 10' x 10' Private Balcony: 6' x 6'
Common Open Yard	Waiver Required 15% Area: 10' x 10' Plus, One Area: 20' x 20'	Allowed Instead of Private Yards: 15% of Lot Area Plus, One Area: 20' x 20'
Shared Amenities	Subjective Findings “The alternative open yard design is necessary to provide flexibility in architectural style or site organization, such as the preservation of natural features, enhanced circulation, shared amenities, or the protection/creation of scenic views.”	If More Than 4 Units: One Common Area: 15' by 15'
Variations	Not Allowed	Not Allowed

TABLE F 4: PROCESSING AND PERMIT PROCEDURES

<u>PROCESS STEPS</u>	<u>Ministerial (SB-35)</u>	<u>Objective (SB-330)</u>	<u>Discretionary</u>
1. <u>Submit Pre-Application (PRE)</u>	<u>Preliminary Housing Application: Required</u> ¹	<i><u>Preliminary Housing Application: Optional</u></i> ¹	<i><u>Optional</u></i> ²
2. <u>Tribal Scoping Consultation</u>	30 days from PRE-app, City contacts Native American tribes. After consultation, if eligible, submit full application. If not eligible, application may submit under other process	N/A	N/A
3. <u>Submit Full Planning (PLN) Application</u>	<u>Required.</u> Submit within 180 days from PRE-app	<u>Required.</u> If a preliminary housing application is submitted, full application must be submitted within 180 days from PRE-app	<u>Required.</u>

¹ Preliminary Housing Application consistent with Gov't Code §65941.1

² Mandatory City Pre-Application is required for certain types of development projects per SBMC §30.205.030, Pre-Application Review

³ Pursuant to Permit Streamlining Act, Gov't Code §65943

⁴ City may conduct no more than 5 public hearings (including appeal hearings) per Gov't Code §65905.5.(a)

⁵ No limit to number of hearings; however, after 4 design review hearings additional fees will apply

TABLE F 4: PROCESSING AND PERMIT PROCEDURES

<u>PROCESS STEPS</u>	<u>Ministerial (SB-35)</u>	<u>Objective (SB-330)</u>	<u>Discretionary</u>
4. <u>Completeness or Consistency Review by Staff</u>	Staff review for consistency: 60 days if ≤ 150 units 90 days if ≥ 151 units <u>If incomplete, applicant must resubmit; if complete, project is scheduled for ministerial design review hearing</u>	Staff review for completeness: 30 days ³ <u>If incomplete, applicant must resubmit in 90 days</u> When complete, project is scheduled for limited number of public hearings	Staff review for completeness: 30 days ³ <u>If incomplete, project scheduled for Conceptual Design Review, and applicant resubmits</u> When complete, project scheduled for project approval
5. <u>Appeal of Incompleteness Determination</u>	N/A	<u>Optional.</u> May be appealed to Planning Commission within 60 days	<u>Optional.</u> May be appealed to Planning Commission within 60 days
6. <u>Design Review: Conceptual Review</u>	N/A	<u>Optional.</u> Requires separate PRE submittal for one Conceptual Review	<u>Optional.</u> Separate PRE submittal not required. Some projects require Conceptual Review
7. <u>Environmental Determination by Staff</u>	N/A	Required. 30 days from application complete; CEQA timelines apply	Required. 30 days from application complete; CEQA timelines apply
8. <u>Land Use Decision</u>	N/A	Required. 60-90 days from Environmental Review. ^{3, 4} <u>If no land use decision required, skip to PDA</u>	Required. 60-90 days from Environmental Review. ^{3, 5} <u>If no land use decision required, skip to PDA</u>
9. <u>Design Review: Project Design Approval (PDA)</u>	Required. One ministerial design review hearing: 90 days if ≤ 150 units 180 days if ≥ 151 units	Required. If no land use decision, PDA is the final hearing/project approval ⁴	Required. If no land use decision, PDA is the substantive approval, with FA for review of details ⁵

TABLE F 4: PROCESSING AND PERMIT PROCEDURES

<u>PROCESS STEPS</u>	<u>Ministerial (SB-35)</u>	<u>Objective (SB-330)</u>	<u>Discretionary</u>
10. <u>Design Review: In-Progress Review</u>	<u>N/A</u>	<u>N/A</u>	<u>Optional.</u> ⁵
11. <u>Design Review: Final Approval (FA)</u>	<u>N/A</u>	<u>N/A</u>	<u>Required.</u> PDA & FA may occur at one or more hearings ⁵
12. <u>Review-After-Final Approval (RAF)</u>	<u>Optional.</u> Review of modifications per Gov't Code 65913.4 (g): 60 days if staff review 90 days if design review	<u>Optional.</u> Amendments to approved plans may require new hearing	<u>Optional.</u> Amendments to approved plans may require new hearing
13. <u>Appeals</u>	<u>Optional.</u> Denial may be appealed within 10 days	<u>Optional.</u> Appeals allowed within 10 days ⁴	<u>Optional.</u> Appeals allowed within 10 days
14. <u>Submit Building (BLD) Permit Application</u>	<u>Required.</u> Approval is valid for 3 years & 1 year time extension. BLD must be issued before PLN expires	<u>Required.</u> Approval is valid for 3-4 years & extensions, max 5 years. BLD must be issued before PLN expires	<u>Required.</u> Approval is valid for 3-4 years & extensions, max 5 years. BLD must be issued before PLN expires
15. <u>Plan Check Review by Staff</u>	2-4 weeks; Staff reviews plans and issues corrections	2-4 weeks; Staff reviews plans and issues corrections	2-4 weeks; Staff reviews plans and issues corrections
16. <u>Submit Corrected Plans</u>	Time varies by applicant response period	Time varies by applicant response period	Time varies by applicant response period
17. <u>Corrections Verified by Staff</u>	5 days; if corrections completed, permit is ready to issue. If not, repeat step above until all corrections made	5 days; if corrections completed, permit is ready to issue. If not, repeat step above until all corrections made	5 days; if corrections completed, permit is ready to issue. If not, repeat step above until all corrections made
18. <u>Permit Issued & Construction Starts</u>	Time varies by applicant response period	Time varies by applicant response period ⁶	Time varies by applicant response period
19. <u>Request Inspections</u>	1 day/per inspection	1 day/per inspection	1 day/per inspection

TABLE F 4: PROCESSING AND PERMIT PROCEDURES			
<u>PROCESS STEPS</u>	<u>Ministerial (SB-35)</u>	<u>Objective (SB-330)</u>	<u>Discretionary</u>
20. <u>Final Inspection / Certificate of Occupancy</u>	<u>Project Completed</u>	<u>Project Completed</u>	<u>Project Completed</u>

⁶ Construction must commence within 2.5 years of the housing development's final approval

Appendix G: Suitable Sites Inventory

ZONING AND EXISTING USE ACRONYMS KEY

Zone/Overlay	Definition	Existing Use	
ACS	Auto, Commercial, and Services	C	Commercial
C-G	Commercial General	C & I	Communication and Information
C-R/C-1	Restricted Commercial	I	Institutional
HRC-2	Hotel and Related Commerce 2	M	Manufacturing
M-C	Manufacturing Commercial	MU	Mixed Use
OC	Ocean-Oriented Commercial	R	Residential
O-M	Office Medical	T	Transportation
O-R	Office Restricted	V	Vacant
R-4	Hotel-Motel-Multiple Residence		
R-M	Residential Multi-Unit		
R-MH	Residential Multi-Unit and Hotel		
RS/E-3	Residential Single Unit		
S-D-3	Coastal Overlay Zone		
USS	Upper State Street Area		

Notes on the Inventory

REALISTIC CAPACITY ASSUMPTION

The assumption is calculated by multiplying the Realistic Density by the Parcel Size. In some cases, the realistic capacity assumption does not match the parcel size because:

- The site has existing units on it that are assumed to remain;
- The site is a pending project using Density Bonus incentives to produce more units;
- The site is listed as likely to consolidate with other parcels, in which case the number of units is assumed on only one of the parcels in the consolidated site assumption.

LEASES/SALES

Staff reviewed the sites for information on available leases or recent sales. Where lease information was available, the majority are for 3-5 year terms. Because these terms are shorter than the eight year Housing Element cycle, they are included in the inventory as a potential site for housing. Sites with new leases and evidence that they are undergoing renovations for the new use were removed from the inventory.

SITES WITH EXISTING RESIDENTIAL USES

Inventory sites with existing residential units assumes that the existing units are retained. The “Total Capacity” column indicates new unit potential on the site. The true site capacity equals the existing units plus the units assumed under “Total Capacity”. These sites are included in the inventory because they meet the criteria for new housing construction including an underdeveloped site with portions of the parcel, (e.g., parking lots, open space) considered suitable for adding units.

Three sites in the inventory (721 Laguna Street, 305 Rancheria Street, and 175 S. La Cumbre Lane) with existing low-income residential units include a total number of units (i.e., existing units plus total capacity) higher than would be assumed under realistic density. These sites are owned by the Housing Authority of Santa Barbara (HASB) and, in consultation with HASB staff, they are planned for redevelopment within the next eight years to provide additional units at a higher density.

Site Address/ Intersection	Assessor Parcel Number	General Plan Designation (Current)	Zone	Parcel Size (Acres)	Existing Use/Vacancy	Site Status	Lower Income Capacity	Moderate Income Capacity	Above Moderate Income Capacity	Total Capacity	Identified in Last/Last Two Planning Cycle(s)
