

PROPOSED UTILITY RATE INCREASES

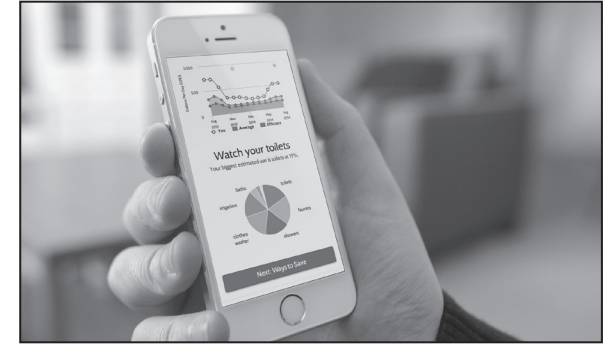

The City is proposing utility rate increases to continue to provide safe and reliable utility service. If adopted, rates would go into effect July 2024. Trash and recycling rate increases are proposed for one year, through June 2025. Water and wastewater rate increases are proposed for the next four years, through June 2028. As a public utility, our rates can only include the costs of providing water, wastewater, and trash & recycling services. Revenues from rates are used to run the utilities and do not generate profit or go towards unrelated programs. Rates also must be proportionally distributed among customer classifications such as residential and commercial users.

To learn more about proposed water and wastewater rates, please visit SantaBarbaraCA.gov/RateChanges and attend the informational webinar on Wednesday, May 22 at 6:00 pm. To learn more about proposed trash and recycling rates, please visit SantaBarbaraCA.gov/TrashRates.
