**COMMUNITY DEVELOPMENT DEPARTMENT
PLANNING, AND BUILDING AND SAFETY FEES**

The increased fees and charges, set forth in Sections 1, 2 and 3 hereof, shall become effective not less than sixty (60) days after final adoption of the resolution approving such fees and charges.

The City's Community Development Department provides important services to the public in the areas of construction safety, planning, housing, and land use. The department has four divisions: Planning, Building and Safety, Housing and Human Services, and Administration, as well as numerous boards and committees.

The Community Development Director, or staff designee, will make the final calculation and determination of required fees specific to each project. Some services are charged based on hourly rates with a required deposit. For site development, activities areas, or combination of structures and/or site changes, the fee per square footage is not limited to the building area, and may involve the site area as determined by staff.

In addition to the base fee amounts listed below, there are additional fees that are applied. A Cashier Services fee is applied to transactions of more than \$200, a Records Management fee is applied to most fees listed in Section 1 (Planning Division Fees) and Section 2 (Building and Safety Fees), a Technology Fee is applied to building permit fees, and a Growth Management fee is applied to building projects that create new square footage or the demolition and rebuilding of existing square footage. The current fee amounts for these items can be found in Section 3 (Other Fees).

SECTION 1. PLANNING DIVISION FEES

GENERAL INFORMATION

- In addition to the base fees listed below, a Cashier Services fee of \$17 is applied to each transaction of more than \$200, and a 7% Records Management fee is applied to most Planning Division fees
- Fees for projects involving alterations and additions are calculated by determining the alteration fee and addition fee based on square footage totals and applying the higher fee.
- Projects involving multiple main buildings or phased improvements may require separate fees for review of each building.
- For new mixed-use projects, calculate fees for both residential and non-residential elements and charge both fees; for alterations/additions to mixed-use projects, charge the greater of either the residential or non-residential fee.
- All other services not specifically identified in the fee schedule will be charged at the applicable hourly rate.

If you plan to shoot in a City park, beach, Stearns Wharf or the Harbor, a facility use fee is charged, in addition to the permit fee. Fee rates depend on the location where photography or filming occurs. See the applicable Facility Use Fee charts below.

In situations where City personnel may be required to be present during the shoot, a fee for staff will be charged. See the Staff and Miscellaneous section below for further information.

- F. An account holder may request a change to their customer classification by filing a written request with the Public Works Director. The request must identify the requested classification and contain a detailed statement supporting the change based on water use patterns, wastewater strength characteristics, or other sewer service characteristics. The Director will document a decision on the request in writing. Any change in classification approved by the Director will go in effect upon commencement of the next complete billing cycle. The decision of the Director is final and not subject to appeal. The Director may delegate the authority under this provision.

In the case an account classified as multi-unit residential (section II.A.2 or II.A.3) is approved to be reclassified to a single family residential account (section II.A.1), the fixed charge shall be equal to the fixed charge stated in II.A.1.i times the number of dwelling units on the account. IV. Sewer Service Connections

- A. The City has three methods for the installation or replacement of sewer lateral connections. The three options are outlined below.
 - 1. Option 1: Standard Sewer Connection Installation/Replacement. This option and associated charges are only for the replacement of the lateral connection by the City contractor after the property owner's appropriately licensed/permitted contractor has excavated at the location of connection to the City main. The following charges cover the cost of the City's contractor to make the replacement of the fitting from the private lateral to the City sewer system and shall apply for each connection of a sewer lateral to the City sewer system, and shall be in addition to any applicable capacity charges:

Sewer Lateral Diameter	Sewer Main Diameter	Fee
4" or 6"	6" or 8"	\$1,100
	10" or greater	\$1,000
	6" or 8" (rehab)	\$1,000

Applicants for such connections shall coordinate with City staff in advance of the appointed installation time to determine required site preparations. If City staff determines that such preparation is not complete at the scheduled start time, a rescheduling fee of \$500 will be charged and the connection will be rescheduled upon payment of such fee.

2. Option 2: Complete Sewer Connection Installation/Replacement. This option and associated charges cover the complete cost of the new lateral connection installation or replacement, including all permits, coordination and project management, locating, excavation (up to 8 feet deep), and inspection services. The following charges shall be in addition to any applicable capacity charges:

Sewer Lateral Diameter	Sewer Main Diameter	Fee
4" or 6"	6" or 8"	\$8,500
	10" or greater	\$8,500
	6" or 8" (rehab)	\$8,500

For connections deeper than 8 feet deep, an additional \$3,000 per four feet of depth will be added to the sewer installation fee charge.

If in the course of the scheduled wye replacement, an additional service connection is encountered and the property owner elects to replace it at the time of excavation, the additional connection may be replaced for an additional \$500 per connection, regardless of the lateral or main size.

3. Option 3: Sewer Lateral Connection Rehabilitation: For lateral connections that are in a condition eligible for rehabilitation and are on a lined sewer main, or are part of a proposed capital improvement project, a "trenchless" sewer lateral connection sealing device can be installed by the City's contractor, with Wastewater System Manager approval. The cost for installing a lateral connection sealing device, including coordination and project management by City Staff: \$2,084.25 per device.
- B. If a sewer main is damaged during installation or replacement of a lateral or during other similar work affecting City sewer lines, an additional fee equal to the greater of:

\$306.60 per lineal foot of sewer line needing repair or replacement, or \$466.20 per hour plus the cost of materials including fifteen percent markup, shall be charged to the person(s) who caused such damage.

- C. **Sewer Lateral Connection Abandonments:** This option and associated charges are only for the removal of the lateral connection by City contractor after the property owner's appropriately licensed/permitted contractor has excavated at the location of connection to the City main. Cost for the City's contractor to remove the lateral connection and replace it with a like piping of the City maintained sewer main is \$1,300 per abandonment on 6" or 8" sewer mains and \$1,000 per abandonment on 10" and above sewer mains.

V. Wastewater Discharge Other Than Through an Approved Sewer Connection.

The following service charge shall apply to all discharges of wastewater permitted pursuant to Municipal Code Section 16.04.080 and 16.04.090:

- A. \$15 per 100 gallons. Charges shall be assessed on the metered discharge or on the rated capacity of the tank discharging the wastewater if no meter is available.
- B. Every Person required to obtain a temporary discharge permit under Title 16.08.120 of the Santa Barbara Municipal Code shall be required to pay fees and charges as set forth below.

A permit fee is applicable for each temporary discharge permit application submitted. The fee includes application processing, site visit, verification of submitted information, permit processing, reports, and invoicing:

1. \$200.55 per permit.
2. \$125 additional fee will apply in the event of incomplete application/resubmittal, permit modification request, or if review from multiple departments is necessary.
3. In the event of any unplanned or emergency discharges that are not in compliance with its permit conditions, additional fees or charges may apply (See Section VI.A. Wastewater Miscellaneous Fees.)
4. Temporary Wastewater Discharge Permit Volume Charges

Hourly rate for a two-person crew with heavy duty equipment, including emergency response, containment, control and recovery, data input, and reporting related to a private sewer lateral overflow or a sanitary sewer overflow or blockage caused by a private party where that party can clearly be identified: \$462 per hour.
 2. Hourly rate for a two-person crew with light duty equipment to respond to priority sewer related requests that do not constitute an emergency response, including CCTV inspection, locating and dye testing services for a sewer main: \$316.05 per hour.
- B. Lateral Liner Inspection Fee: For applicants seeking to rehabilitate their private sewer laterals using cured in place pipe, or other lining technology, a \$200.55 fee will be assessed for the lateral installation inspection and pre- and post-video review by City staff. Applicants for such lateral liner installation shall coordinate with City staff in advance of the appointed installation time to determine required site preparations. If City staff determines that such preparation is not complete at the scheduled start time, a rescheduling fee of \$64 will be assessed, and the installation will be rescheduled upon payment of such fee.

A monthly service charge shall be collected for all connections, including City submeters, without regard to actual water use. Unless a master meter serves water directly to a dwelling unit without water passing through a City submeter, a monthly service charge shall not be collected for a City master meter. The monthly service charges shall be as follows (\$/meter/month):

Water Meter Size	Effective July 2, 2024	Effective July 1, 2025	Effective July 1, 2026	Effective July 1, 2027
5/8"	\$36.21	\$40.01	\$44.01	\$48.41

2.2 MASTER METER (AUXILIARY MASTER METER) OPERATIONS AND MAINTENANCE FEE

Unless a master meter directly serves water to a dwelling unit without water passing through a City submeter, a monthly operations and maintenance fee shall be collected for master water meters, without regard to actual water use, if any, as follows (\$/meter/month):

Size of Master Meter	Effective July 2, 2024	Effective July 1, 2025	Effective July 1, 2026	Effective July 1, 2027
2"	\$54.00	\$54.86	*	*
3"	\$67.00	\$68.07	*	*

6"	\$76.00	\$77.22	*	*
8"	\$80.00	\$81.28	*	*

* Charges shall be escalated annually based on the change in the January Engineering News Record (ENR) Construction Cost Index (CCI) 20-City Average from the previous year. For example, if the January 2026 ENR CCI is 3% higher than the January 2025 ENR CCI, then the Master Meter Operations and Maintenance Fee will increase by 3% in July 2026 (start of FY27).

2.3 USER CLASSIFICATIONS

For the purposes of assessing metered water charges provided for below, user classifications shall be determined and corrected by Staff, using the categories below. Any meter serving multiple uses shall be classified based on the dominant use.

2.3.1 Residential Single Family

Applicable to all meters serving one detached dwelling unit that is not an accessory dwelling unit.

2.3.2 Multifamily 1-4 Units

Applicable to all meters serving two to four dwelling units, all meters serving one attached dwelling unit, and all meters serving only an accessory dwelling unit.

2.3.3 Multifamily Over 4 Units

Applicable to all meters serving five or more dwelling units.

2.3.4 Commercial

Applicable, without regard to meter size, to all accounts serving mercantile buildings, motels, and other short term lodging establishments, office buildings, institutional buildings, schools, churches, and other commercial establishments. Also applicable to accounts solely serving common areas on multifamily or mixed use properties including but not limited to communal laundry rooms.

2.3.5 Industrial

Applicable to all meters serving laundries (other than self-service laundries), manufacturing facilities, and other industrial facilities.

2.3.6 Irrigation-Potable

Applicable to meters limited to outdoor water use and subclassified as provided in subsections 2.3.6.1 through 2.3.6.4 below. All meters under this classification shall be subject to interruption upon declaration of a Stage Three Drought Condition. There shall be no connection between a meter served under this classification and any dwelling or commercial or industrial structure.

The first tier of all irrigation accounts shall be calculated using the following formula:

$$\text{Monthly Water Budget} = (ET_o)(.62/748)((PF \times HA)/IE)$$

Where

ET_o = Reference evapotranspiration (weather factor)

$0.62/748$ = Conversion factor (inches to HCF)

PF = Plant factor

HA = Square footage of irrigated area(s) IE

= Irrigation efficiency (80%)

The Monthly Water Budget shall be determined using real-time monthly ETo data from a local weather station, plant factors that relate plant type water use needs to the ETo, and irrigated area by plant type. Irrigation system efficiency is set at a constant value of 80% for all account types.

Monthly Water Budgets shall be based on irrigated area only. Accounts shall be subject to mandatory ground-truthing measurement at Staff discretion to verify measurement accuracy of irrigated areas and plant types. If ground-truthing measurements are not completed within two months after initial contact due to lack of customer response, service may be subject to suspension until irrigated landscaped areas are verified in the field.

2.3.6.1 Irrigation-Agriculture

Applicable only to Potable Irrigation meters that serve bona fide commercial agricultural enterprises, including nurseries. A bona fide commercial agricultural enterprise is one that grows and sells one or more type of agricultural or horticultural products, for the purpose of producing income from the sale of these products. The amount of water made available in the first tier of metered water usage under this sub-classification shall be based on the square footage of the commercial crop area that is planted and irrigated as part of the enterprise. As a condition of the right to receive Irrigation-Agriculture service, the Director may require an Account holder to submit to the Director any documentary or other evidence necessary to establish to a reasonable degree of certainty that the property served by the meter is being used to conduct a bona fide commercial agricultural enterprise as defined above. Such evidence may include tax returns, bills of sale, or similar documents.

PFc = 75%

HAc = total crop irrigated area (square feet)

If the crop is a tree species the crop irrigated area is the number of irrigated trees multiplied by the average tree area. The average tree area is the area of a circle with a diameter equal to the average diameter of the drip line of the relevant species. An alternate method to calculate the irrigated area may be used as approved by the Director.

2.3.6.2 Irrigation-Recreation

Applicable only to Potable Irrigation meters that serve areas used primarily for passive or active recreational purposes, including parks, playgrounds, golf courses, school yards, and publicly owned open spaces and landscaped areas. Cemeteries also meet the parameters of this classification. The amount of water made available in the first tier of metered water usage under this sub-classification shall be based on the square footage of the irrigated area served by the meter.

HAt = total irrigated turf area (square feet) Turf PFt = 80%

HAs = total irrigated shrub area (square feet)

Shrub PFs = 30%

2.3.6.3 *Irrigation-Urban (Residential / Commercial):*

Applicable to Potable Irrigation meters serving properties that are primarily residential in use or are zoned for residential use or commercial, industrial, or institutional in use. The amount of water made available in the first tier of metered water usage under this subclassification shall be based on the square footage of the irrigated area served by the meter.

HAt = total irrigated turf area (square feet)

For Residential Irrigation, HAt cannot exceed 20% of total irrigated area. If measurements are greater than 20%, the remainder square footage will be assigned to the HAs.

PFt = turf plant factor = 80%.

HAs = total irrigated shrub area (square feet)

For Commercial Irrigation, 100% of total irrigated area is considered HAs, unless a permitted exception of Water Efficient Landscape Standards has been approved.

PFs = shrub plant factor = 30%.

Plant Factor percentage allotments reflect the requirements of the City's Water Efficient Landscape Standards per SBMC 14.23.005.

2.3.6.4 *Bird Refuge*

Upon finding that there are adequate water resources available to allow such use, the Director may also authorize the sale of up to a total of 21,780 HCF (50 acre feet) per year at the first block recreation rate for use in refilling the Andre Clark Bird Refuge.

2.3.7 *Recycled Water*

Applicable to all meters providing recycled water.

2.4 *METERED WATER CHARGES*

In addition to all other charges imposed by Chapter 14.08 of the Santa Barbara Municipal Code, including but not limited to the monthly service charges set forth in subsection 2.1 above, water use shall be charged according to the following block rates for those user classifications defined in subsection 2.3 above. Usage shall be measured in units of 100 cubic feet (HCF).

The allocation of the City's six water sources to customer classes and tiers is based on priority level. Each tier is charged the weighted average cost of water based on the allocated sources. The highest priority customer tiers receive the least expensive sources of water, limited to that tier's percentage of each priorities' total demand times the water source (or remaining water

source remaining from a higher priority).

1. Tier 1 Agriculture. The highest priority use is allocated to tier 1 agriculture (Ag) for efficient agricultural purposes.
2. Tier 1 Residential Single Family (SFR)/Tier 1 Residential Multi-family (MFR)/Tier 1 Recreation (Rec) for essential health and safety purposes and efficient irrigation of parks and public spaces.
3. Tier 1 Commercial/Industrial for efficient use of commercial and industrial purposes.
4. Tier 2 Residential SFR/MFR and Tier 1 irrigation for efficient irrigation needs for residential/commercial with dedicated irrigation meters.
5. Tier 2 Ag/Tier 2 Rec/Tier 3 Residential/Tier 2 Irrigation for residential and commercial dedicated irrigation meters/ Tier 2 Commercial or Industrial for inefficient use for agricultural, recreation, residential, commercial, or industrial purposes

3 Water Service Policies and Miscellaneous Fees

3.1 FAILURE TO CONNECT TO RECYCLED WATER SYSTEM

Where the Director has determined that use of recycled water is feasible at and on a particular property and has notified the account holder for the meter serving such property of this fact as described in Section 14.23.030 of the Santa Barbara Municipal Code, and thereafter the user has failed to substitute recycled water use for potable water use, the charge for provision of potable water use shall be double the otherwise applicable charge for metered water.

3.2 NOT USED

3.3 WATER CONSUMPTION ESTIMATES

If an accurate meter reading is not obtained for any reason, including but not limited to, inability to access the meter and/or meter failure, the water consumption for the time period where the water meter read is not available may be estimated. If access is the issue, then estimation may only occur after two separate attempts within one reading cycle to gain access. If a technical

meter failure is the issue, then the water consumption will not be estimated for more than 90 days, unless plumbing on the customer side must be addressed prior to meter replacement or with mutual consent of the City and the customer.

City staff will estimate daily average use based on the six billing periods that most closely correspond to the time frame from the prior calendar year. Should there not be adequate usage history on the account to do this, staff will estimate use based on available billing periods as appropriate. Staff will multiply the calculated daily average by the number of days that usage data is not available to determine an estimated consumption for the reading period.

Once the water meter is repaired or replaced, if the customer's water consumption is found to be significantly lower than the estimated consumption calculation after three full months of meter reads on the new meter, the customer may request an evaluation of the estimated consumption calculation and consideration of a billing adjustment.

3.4 MISCELLANEOUS SERVICES

3.8 CHANGE OF ACCOUNT HOLDER UPON TERMINATION OF TENANCY

Upon termination of utility service by an account holder who is a tenant, the property owner or agent thereof, shall automatically become the account holder, provided that the City has on file a written request from such property owner or agent authorizing such change. In the event that the account holder is transferred to a new account holder willing to take responsibility for all charges incurred after the most current bill, the Administrative Transfer Fee shall apply in lieu of the Service Initiation Fee.

4 Non-Metered Private Fire Services

Payable monthly, the rates for City water for private fire services when the use of a meter is not required pursuant to Section 14.12.010 of the Santa Barbara Municipal Code shall be as follows:

5 Water Service Connections

All determinations of the size and location of water service connections, water main connections, and meters shall be subject to the approval of the Director. All water service connections must be installed per City standard details. If not, the customer shall be charged at a time and materials basis for the service to be brought up to City standards.

The Director may waive the fee for a service connection or main connection to the recycled water system upon a finding that such connection will promote the efficient and beneficial use of recycled water and will displace existing usage of the City's potable water supply. WATER AND WASTEWATER CAPACITY CHARGES AND POLICIES

1. CAPACITY CHARGES

Water capacity charges shall be collected prior to the Public Works Director's approval to: 1) install a new City water meter and/or make a new connection to the City water system, or 2) increase the size of an existing water meter. If the property is also connected to the City's wastewater system, wastewater capacity charges shall also apply in the above instances.

Wastewater capacity charges shall be collected prior to the Public Works Director's approval to: 1) make a new connection to the City's wastewater system from a property that does not have an existing connection, or 2) commence discharge to the City's wastewater system.

Such capacity charges shall be in addition to fees assessed under other resolutions for the labor, materials, equipment, and other City costs necessary to construct the actual connection to the water or wastewater system.

Water capacity charges for: 1) non-residential uses, 2) newly created single family residential units, or 3) a multi-family residential dwelling unit served by a meter larger than 5/8", are as follows, per meter*:

** Should a multi-family or single-family residential property require a meter size larger than 5/8" to primarily serve indoor domestic capacity needs, wastewater capacity charges shall not be capped at the 5/8" meter charge and shall be determined by the Non-Residential meter sizes as reflected in the chart above. The property may be subject to a site inspection by City staff to verify water use.

*** See Future Year Charge Calculation subheading, below.

Capacity Charges for Multi-Family and Accessory Dwelling Unit Projects

Except as provided above, the water and wastewater capacity charges for newly permitted multi-family dwelling units and accessory dwelling units served by a separate and dedicated City water meter shall be calculated by multiplying the total number of newly proposed water supply Fixture Units times the applicable Fixture Unit cost as established in the tables below; provided, however, the wastewater capacity charge per dwelling unit for multi-family and accessory dwelling units shall not exceed the wastewater capacity charge for a 5/8" meter.

Fixture Unit Costs (\$/Fixture Unit)

Wastewater	\$124.81	\$128.59	\$131.91	\$134.02	***

*** See Future Year Charge Calculation subheading, below

Future Year Charge Calculation

Charges shall be escalated annually based on the change in the January Engineering News Record (ENR) Construction Cost Index (CCI) 20-City Average from the previous

year. For example, if the January 2026 ENR CCI is 3% higher than the January 2025 ENR CCI, then capacity charges will increase by 3% in July 2026 (start of FY27).

2. REGULATIONS REGARDING ASSESSMENT OF CAPACITYCHARGES

The following regulations shall apply to the assessment of water and wastewater capacity charges:

- A. The term “multi-family residential dwelling unit” as used herein shall mean any attached dwelling unit, including attached apartments, condominiums, and secondary dwelling units.
- B. Water and wastewater capacity charges shall not apply to:
 - 1. Water system connections for public fire hydrants, private fire hydrants, and private fire lines; and
 - 2. Common area meters to serve irrigation on multi-family residential properties.
- C. A wastewater capacity charge shall not apply to a water meter that is classified as “Irrigation” in the City billing system.
- D. Water and wastewater capacity charges shall not apply to a connection to the City’s recycled water distribution system to the extent that the connection offsets existing potable water capacity.
- E. In the case of an application for a water connection to serve a parcel where connections already exist, credit shall be given for existing connections such that the water capacity charges shall be based on the net increase in metered capacity. In the case of an application for a Wastewater connection to serve a parcel where connections already exist, capacity charges shall be based on the net increase in meter capacity for non-residential meters, or in the case of residential meters, the net increase in the number of dwelling units. The credit shall only be valid when the existing connections are abandoned within six months of the installation of new services.
- F. There shall be no capacity charge assessed for the installation of a meter to serve a legally existing residential dwelling unit that is already being legally served by another City water meter when such installation is done for the purpose of providing separate metering to such dwelling unit.
- G. There shall be no capacity charge assessed for the installation of a 5/8” irrigation meter to serve existing irrigated landscaping that is already being legally served by another City water meter when such installation is done for the purpose of providing separate metering of indoor uses and irrigation. Water use history for the property must show patterns of irrigation watering for at least two years. The property may be subject to a site inspection by City staff to verify the landscaping

is existing and irrigated. Should a customer request an irrigation meter size larger than 5/8", the capacity charge will be calculated at the applicable fee based on the meter size as provided in Section 1, less the applicable fee for a 5/8" meter. All other applicable fees, charges, and costs shall apply.

- H. A reduction in meter size may be approved by the Public Works Director in accordance with applicable resolutions; however, there shall be no refund of capacity charges upon such reduction.
- I. When a customer voluntarily downsizes a meter, the original meter capacity will be reserved for the service connection for 12 months. If, before 12 months has elapsed from the time of the smaller meter being installed, the customer requests the original meter size to be re-installed at the same service connection, no capacity charge shall apply. If more than 12 months have elapsed, the customer will be charged the difference in capacity charge between the meter size currently installed and the size of the meter to be installed.
- J. In cases where an applicant asserts that the water or wastewater capacity charge imposed under this Resolution exceeds the reasonable cost of providing the service for which the charge is imposed, or does not reasonably reflect the proportionate benefit of existing public facilities using the methods contained herein, an applicant may appeal the determination of the capacity charge to the Public Works Director:
 - 1. Within 30 days of receipt of the invoice for capacity charges, the applicant shall submit a written notice of appeal to the Public Works Director. The notice of appeal shall set forth the grounds upon which the appeal is based, a proposed alternate capacity charge calculation, and all relevant issues, facts, information, and analysis necessary to substantiate the appeal. If an applicant fails to request a hearing before the Director prior to 30 days after receipt of the invoice they waive their right to appeal.
 - 2. Within 21 days of receiving the appeal, the Public Works Director shall provide a written decision.
 - 3. The Public Works Director shall have the authority to continue the determination on the appeal beyond 21 days in order to request additional information from the applicant, and consider new issues and facts raised by the applicant. The decision of the Public Works Director is final.
- K. The Public Works Director is authorized to establish Administrative Guidelines to determine eligibility criteria to pay capacity charges previously established in lieu of capacity charges established herein for development projects that have achieved specific milestones in the development review process.

3 REGULATIONS REGARDING RESERVED CAPACITY CHARGES FOR INACTIVE ACCOUNTS

- A. As system capacity continues to be reserved for inactive accounts even when connections are not in use, accounts that have been inactive for more than 6 months shall be subject to reserved capacity charges before service can be reinstated. Charges shall be determined by the following formulas:

1. WATER

The current monthly service charge multiplied by the number of months that have passed since the expiration of the 6-month grace period.

2 WASTEWATER

For Residential Accounts: The current monthly basic charge per dwelling unit, multiplied by the number of dwelling units on the account, multiplied by the number of months that have passed since the expiration of the 6-month grace period.

For Commercial Class 1-4 Accounts: The minimum monthly service charge based on meter size, multiplied by the number of months that have passed since the expiration of the 6-month grace period.

3. The water monthly service charge and wastewater minimum monthly service charge shall be based on the meter size at the time of account termination.

- B. If the above calculation exceeds the current capacity charge for the meter size in question, the charge is capped at the current capacity charge amount.

Accounts that are inactive due to catastrophic circumstances, such as fire or other natural disasters, may apply for a waiver of reserved capacity charges that have accrued within 5 years of the catastrophic circumstance, subject to approval by the Public Works Director. The Public Works Director may adopt an administrative policy for implementation of this section.

A Self-Pay Parking Management System shall operate year-round. Hours of operation for all Waterfront Area Parking Lots including Stearns Wharf from 8:00 a.m. to 10:00 p.m. daily, including weekends and holidays.

6. Parking permits exempting Harbor slip permittees from parking fees shall be available at \$145.00 per calendar year with a limit of one parking permit per slip permit. All slip permittee parking permits issued under this section

- 12.. Fees for an oversized vehicle parking in Leadbetter, Harbor West, Garden Street, or the Palm Park lot shall be double the normal parking fee charged for regular sized vehicles in those lots.
