The City of Santa Barbara offers one-stop photo and film/video permitting with Parks and Recreation as the lead department accepting applications, collecting fees, issuing the permits, and coordinating as many internal logistics among City departments such as Police, Fire, Public Works and Waterfront as possible for administrative convenience.

Fees for photo and film/video shoots include both permit and “facility use” fees. Permit fees apply to all photo and film/video shoots. If you plan to shoot in a City park, beach, Stearns Wharf or the Harbor, a facility use fee is charged, in addition to the permit fee. Fee rates depend on the location where photography or filming occurs. See the applicable Facility Use Fee charts below.

In situations where City personnel may be required to be present during the shoot, a fee for staff will be charged. See the Staff and Miscellaneous section below for further information.

Utility Hook Ups for De La Guerra Plaza, Mackenzie Park and Leadbetter Beach Events:

For De La Guerra Plaza and Mackenzie Park, gas, water and electrical hook ups may be made available for large public events. The activation of these utilities can either be accomplished through a licensed general contractor (or a licensed plumbing and licensed electrical contractor), or the Parks and Recreation Department can facilitate the hook-up requests through the Public Works Department. If the former is chosen, the Public Works Department will charge fees to supervise and inspect the work before and after the activation and require that a permit be obtained from the Building and Safety Department. A \$100-\$500 deposit is required to cover the estimated usage of the utilities with the amount is based on the number of utility boxes activated. Additional information on the fees and how to obtain the permit will be provided.

If the latter is chosen, approval is dependent upon Public Works' ability to schedule the necessary personnel to complete the required work for the event within the given timeframe. Requests must be submitted a minimum of four weeks in advance of the event. The base cost to activate/deactivate the plumbing is \$569.16 for the first box, plus \$94.86 per additional box. The base cost to activate/deactivate the electricity is \$141.90 for the first box and plus \$94.86 per additional box. A deposit of up to \$1,000 is also required to cover the estimated usage of the utilities.

For Leadbetter Beach, only water and electrical hook ups are available and the activation of these utilities is handled by park monitors, along with the reading of the water and/or electrical

meters prior to and after the usage. Water usage is charged at \$10 per unit of water and electricity usage is charged at \$5 per kilowatt-hour or \$5 minimum. A deposit of up to \$100 is required to cover the estimated usage of the utilities.

Vehicles in Park or Beach Areas Related to Permitted Events:

The use of vehicles in parks and beaches is strictly controlled and restricted to authorized uses only. Unauthorized driving or parking of vehicles in park or beach areas related to permitted events will be cited and fined \$50 per vehicle.

WATER RATES AND FEES

Title 14.08 of the Santa Barbara Municipal Code authorizes the City Council to set fees for water meters and water service;

Section 14.12.010 of the Santa Barbara Municipal Code authorizes the City Council to set the rate for City water for private fire services when the use of a meter is not required; and

The City does currently and wishes to continue to have in effect a water rate structure that reflects an adequate supply of water and promotes the efficient use of such water by its customers.

1. DEFINITIONS

Wherever used in this resolution the following quoted words shall have the meanings set forth below:

A. "Account holder" means the person or entity responsible for payment for water service at a particular property, as shown in the City's water billing records.

B. "Master Meter" or "Auxiliary Master Meter" is defined in Santa Barbara Municipal Code 14.04.065

C. "Base allotment" means the average monthly consumption on record with the City for the most recent complete off-peak period calculated assuming the maximum days in a monthly billing cycle, or such other level of consumption determined by the Director to represent the average monthly off-peak water usage by a particular customer. An off-peak period for any given customer shall be a period comprised of the service periods charged on bills dated January through June.

D. "Director" means the Director of the Department of Public Works, or his or her designated representative.

E. "Dominant use" means for any meter serving multiple uses, such as an existing meter serving both a residence and a commercial establishment, the use consuming the most water on average. In cases where a meter serves more than one type of use, the meter will be classified based on the dominant use for billing purposes.

F. "HCF" means one Hundred Cubic Feet.

G. "Service" or "water service" means water provided by or through the water distribution facilities of the City.

2. WATER SERVICE RATES

The following provisions shall govern all fees related to water service for metered connections to the City water system:

- A. 1. **MONTHLY SERVICE CHARGE.** A monthly service charge shall be collected for all connections, including City sub-meters, without regard to actual water use. Unless a master meter serves water directly to a dwelling unit without water passing through a City sub-meter, a monthly service charge shall not be collected for a City master meter. The monthly service charges shall be as follows:

- B. **USER CLASSIFICATIONS.** For the purposes of assessing metered water charges provided for in Subsection C below, user classifications shall be determined and corrected by Staff, using the categories below. Any meter serving multiple uses shall be classified based on the dominant use.

1. Residential Single Family Detached: Applicable to all meters serving one detached

dwelling unit.

2. Multifamily 1-4 Units: Applicable to all meters serving two or more detached dwelling units, all meters serving 1, 2, 3, or 4 attached dwelling units, and all meters serving accessory dwelling units.
3. Multifamily Over 4 Units: Applicable to all meters serving five or more dwelling units, any of which are attached.
4. Commercial: Applicable, without regard to meter size, to all accounts serving mercantile buildings, motels, and other short term lodging establishments, office buildings, institutional buildings, schools, churches, and other commercial establishments. Also applicable to accounts solely serving common areas on multifamily or mixed use properties including but not limited to communal laundry rooms.
5. Industrial: Applicable to all meters serving laundries (other than self-service laundries), manufacturing facilities, and other industrial facilities.
6. Irrigation-Potable: Applicable to meters limited to outdoor water use and subclassified as provided in Subparagraph a. through c. below. All meters under this classification shall be subject to interruption upon declaration of a Stage Three Drought Condition. There shall be no connection between a meter served under this classification and any dwelling or commercial or industrial structure.
 - a. Irrigation-Agriculture: Applicable only to Potable Irrigation meters that serve bona fide commercial agricultural enterprises, including nurseries. A bona fide commercial agricultural enterprise is one that grows and sells one or more type of agricultural or horticultural products, for the purpose of producing income from the sale of these products. The amount of water made available in the first tier of metered water usage under this sub- classification shall be based on the square footage of the commercial crop area that is planted and irrigated as part of the enterprise. As a condition of the right to receive Irrigation-Agriculture service, the Director may require an Account holder to submit to the Director any documentary or other evidence necessary to establish to a reasonable degree of certainty that the property served by the meter is being used to conduct a bona fide commercial agricultural enterprise as defined above. Such evidence may include tax returns, bills of sale, or similar documents.
 - b. Irrigation-Recreation: Applicable only to Potable Irrigation meters that serve areas used primarily for passive or active recreational purposes, including parks, playgrounds, golf courses, school yards, and publicly owned open spaces and landscaped areas. The amount of water made available in the first tier of metered water usage under this sub-classification shall be based on the square footage of the irrigated area served by the meter.
 - c. Irrigation-Urban (Residential / Commercial): Applicable to Potable Irrigation meters serving properties that are primarily residential in use or are zoned for residential use or commercial, industrial, or institutional in use. The

amount of water made available in the first tier of metered water usage under this subclassification shall be based on the square footage of the irrigated area served by the meter.

7. Recycled Water: Applicable to all meters providing recycled wastewater.

8. State Institutional: Applicable to customers that are State agencies located in the unincorporated area of the County of Santa Barbara

C. **METERED WATER CHARGE.** In addition to all other charges imposed by Chapter 14.08 of the Santa Barbara Municipal Code, including but not limited to the monthly service charges set forth in Subsection 2.A. above, water use shall be charged according to the following block rates for those user classifications defined in Subsection B above. Usage shall be measured in units of 100 cubic feet (HCF).

The allocation of the City's six water sources to customer classes and tiers is based on priority level. Each tier is charged the weighted average cost of water based on the allocated sources. The highest priority customer tiers receive the least expensive sources of water, limited to that tier's percentage of each priorities' total demand times the water source (or remaining water source remaining from a higher priority).

1. Tier 1 Agriculture. The highest priority use is allocated to tier 1 agriculture (Ag) for efficient agricultural purposes.
2. Tier 1 Residential Single Family (SFR)/Tier 1 Residential Multi-family (MFR)/Tier 1 Recreation (Rec) for essential health and safety purposes and efficient irrigation of parks and public spaces.
3. Tier 1 Commercial/Industrial for efficient use of commercial and industrial purposes.
4. Tier 2 Residential SFR/MFR and Tier 1 irrigation for efficient irrigation needs for residential/commercial with dedicated irrigation meters.
5. Tier 2 Ag/Tier 2 Rec/Tier 3 Residential/Tier 2 Irrigation for residential and commercial dedicated irrigation meters/ Tier 2 Commercial or Industrial for inefficient use for agricultural, recreation, residential, commercial or industrial purposes.

6. Irrigation - Potable:

The first tier of all irrigation accounts shall be calculated using the following formula:

$$\text{Monthly Water Budget} = (ET_o)(.62/748)((PF \times HA)/IE))$$

Where

- ET_o = Reference evapotranspiration (weather factor)
- $0.62/748$ = Conversion factor (inches to HCF)
- PF = Plant factor
- HA = Square footage of irrigated area(s)
- IE = Irrigation efficiency (80%)

The Monthly Water Budget shall be determined using real-time monthly ET_o data from a local weather station, plant factors that relate plant type water use needs to the ET_o , and irrigated area by plant type. Irrigation system efficiency is set at a constant value of 80% for all account types.

Monthly Water Budgets shall be based on irrigated area only. Accounts shall be subject to mandatory ground-truthing measurement at Staff discretion to verify measurement accuracy of irrigated areas and plant types. If ground-truthing measurements are not completed within two months after initial contact due to lack of customer response, service may be subject to suspension until irrigated landscaped areas are verified in the field.

D. FAILURE TO CONNECT TO RECYCLED WATER SYSTEM. Where the Director has determined that use of recycled water is feasible at and on a particular property and has notified the account holder for the meter serving such property of this fact as described in Section 14.23.030 of the Santa Barbara Municipal Code, and thereafter the user has failed to substitute recycled water use for potable water use, the charge for provision of potable water use shall be double the otherwise applicable charge for metered water.

E. GRANTING OF ADJUSTMENTS TO EXTRAORDINARY WATER CHARGES. Upon an account holder's application that is 1) received within 45 days of a relevant billing date, 2) submitted on a form provided by the Finance Director, and 3) supported by detailed written documentation, the Finance Director, or a designee of the Finance Director, shall have the authority to make adjustments to extraordinary water charges in the event of hidden leaks, undetected line breaks, unexplained usage of at least five times the average use, or circumstances that are demonstrated to be beyond the reasonable control of the account holder. Such adjustments shall be made in accordance with written guidelines reviewed by the Water Commission and approved by the Finance Director and Public Works Director. However, such adjustments shall in no case result in a cost per HCF that is less than the lowest unit rate for residential customers located within the City limits. The decision of the Finance Director, or said designee, regarding any such adjustment shall be final and not subject to further appeal. Adjustments shall not be allowed for ordinary water use, such as filling of swimming pools, establishment of landscaping, or similar

voluntary or customary uses of water. The Finance Director shall not approve an adjustment within five years of the date of a prior adjustment for the same account unless the Director rescinds the prior adjustment at the request of the account holder.

- F. **WATER CONSUMPTION ESTIMATES.** If an accurate meter reading is not obtained for any reason, including but not limited to, inability to access the meter and/or meter failure, the water consumption for the time period where the water meter read is not available may be estimated. If access is the issue, then estimation may only occur after two separate attempts within one reading cycle to gain access. If meter failure is the issue, then the water consumption will not be estimated for more than 90 days, unless plumbing on the customer side must be addressed prior to meter replacement or with mutual consent of the City and the customer.

City staff will utilize estimating functionality within the billing system to estimate use based on the six billing periods that most closely correspond to the time frame from the prior calendar year. The calculated daily average is multiplied by the number of days in the reading period where the meter read is not available to determine an estimated consumption for the reading period. Should there not be sufficient usage history on the customer's account, a system-wide average by meter size and season (Winter = Jan/Feb/Mar, Spring = Apr/May/June, Summer = July/Aug/Sep, Fall = Oct/Nov/Dec) shall be applied in lieu of the prior history calculation. Such system-wide averages shall be updated at the beginning of each fiscal year.

Once the water meter is repaired or replaced, if the customer's water consumption is found to be significantly lower than the estimated consumption calculation after three full months of meter reads on the new meter, the customer may request an evaluation of the estimated consumption calculation and consideration of a billing adjustment.

- G. **MISCELLANEOUS SERVICES.** The following miscellaneous fees related to water service shall be charged and collected upon demand:

Service Initiation Fee:	\$47
Service Restoration Fee:	\$64
Administrative Account Transfer Fee:	\$21

In the event that the account holder is transferred to a new account holder willing to take responsibility for all charges incurred after the most current bill, the Administrative Transfer Fee shall apply in lieu of the Service Initiation Fee.

4. WATER SERVICE CONNECTIONS

All determinations of the size and location of water service connections, water main connections, and meters shall be subject to the approval of the Director. All water service connections must be installed per City standard details. If not, the customer shall be charged at a time and materials basis for the service to be brought up to City standards. The Director may waive the fee for a service connection or main connection to the recycled water system upon a finding that such connection will promote the efficient and beneficial use of recycled water and will displace existing usage of the City's potable water supply. Fees related to water service connection to the City water system are as follows and are in addition to buy-in fees established by the City Council in separate resolutions:

2. REGULATIONS REGARDING ASSESSMENT OF CAPACITY CHARGES

The following regulations shall apply to the assessment of water and wastewater capacity charges:

- A. The term "multi-family residential dwelling unit" as used herein shall mean any attached dwelling unit, including attached apartments, condominiums, and secondary dwelling units.
- B. Water and wastewater capacity charges shall not apply to:
 1. Water system connections for public fire hydrants, private fire hydrants, and private fire lines; and
 2. Common area meters to serve irrigation on multi-family residential properties.

- C. A wastewater capacity charge shall not apply to a water meter that is classified as "Irrigation" in the City billing system.
- D. Water and wastewater capacity charges shall not apply to a connection to the City's recycled water distribution system to the extent that the connection offsets existing potable water capacity.
- E. In the case of an application for a water connection to serve a parcel where connections already exist, credit shall be given for existing connections such that the water capacity charges shall be based on the net increase in metered capacity. In the case of an application for a Wastewater connection to serve a parcel where connections already exist, capacity charges shall be based on the net increase in meter capacity for non-residential meters, or in the case of residential meters, the net increase in the number of dwelling units. The credit shall only be valid when the existing connections are abandoned within six months of the installation of new services.
- F. There shall be no capacity charge assessed for the installation of a meter to serve a legally existing residential dwelling unit that is already being legally served by another City water meter when such installation is done for the purpose of providing separate metering to such dwelling unit.
- G. There shall be no capacity charge assessed for the installation of a 5/8" irrigation meter to serve existing watered landscaping that is already being legally served by another City water meter when such installation is done for the purpose of providing separate metering of indoor uses and irrigation. Water use history for the property must show patterns of irrigation watering for at least two years. The property may be subject to a site inspection by City staff to verify the landscaping is existing and irrigated. Should a customer request an irrigation meter size larger than 5/8", the capacity charge will be calculated at the applicable fee based on the meter size as provided in Section 1, less the applicable fee for a 5/8" meter. All other applicable fees, charges, and costs shall apply.
- H. A reduction in meter size may be approved by the Public Works Director in accordance with applicable resolutions; however, there shall be no refund of capacity charges upon such reduction.
- I. When a customer voluntarily downsizes a meter, the original meter capacity will be reserved for the service connection for 12 months. If, before 12 months has elapsed from the time of the smaller meter being installed, the customer requests the original meter size to be re-installed at the same service connection, no capacity charge shall apply. If more than 12 months has elapsed, the customer will be charged the difference in capacity charge between the meter size currently installed and the size of the meter to be installed.
- J. In cases where an applicant asserts that the water or wastewater capacity charge imposed under this Resolution exceeds the reasonable cost of providing the service for which the charge is imposed, or does not reasonably reflect the

proportionate benefit of existing public facilities using the methods contained herein, an applicant may appeal the determination of the capacity charge to the Public Works Director, and may subsequently appeal the Public

Works Director's Decision to the City Council, for determination of a different capacity charge. Appeals under this section, shall be made as follows:

1. Prior to installation of water meters, the applicant shall submit a written notice of appeal to the Public Works Director. The notice of appeal shall set forth the grounds upon which the appeal is based, a proposed alternate capacity charge calculation, and all relevant issues, facts, information, and analysis necessary to substantiate the appeal.
2. Within twenty-one (21) days of receiving the written notice of appeal, the Public Works Director shall provide a written decision on the appeal to the applicant.
3. The Public Works Director shall have the authority to continue the determination on the appeal beyond twenty-one (21) days to request additional information from the applicant, and consider new issues and facts raised by the applicant.
4. The applicant may appeal the decision of the Public Works Director to the City Council by filing a written notice of appeal with the City Clerk within ten (10) days of the date of the Public Works Director's Decision. The notice of appeal shall set forth in detail the grounds upon which the appeal is based and provide all supplemental documents upon which the applicant intends to reply. The City Clerk shall require payment of a fee for such appeal as is provided by resolution of the City Council for the matter.
5. Prior to setting the appeal for hearing before the City Council, the Water Commission, at their soonest available meeting after the notice of appeal is filed with the City Clerk, shall consider the Public Works Director's decision on the appeal and shall make a recommendation to City Council on the appeal. No new information, documents or evidence shall be filed or considered by the Water Commission.
6. Within twenty-one (21) days of receiving the recommendation from the Water Commission, the City Clerk shall set a date for hearing on the appeal before the City Council.
7. At the time and place of the hearing, the City Council shall hear and receive any relevant information and document regarding the appeal. The City Council may continue the hearing from time to time as may be required, or may grant or deny the appeal, in whole or in part.
8. The decision of the City Council shall be final on the day of the decision.

- K. The Public Works Director is authorized to establish Administrative Guidelines to determine eligibility criteria to pay capacity charges previously established in lieu of capacity charges established herein for development projects that have achieved specific milestones in the development review process.

3. REGULATIONS REGARDING RESERVED CAPACITY CHARGES FOR INACTIVE ACCOUNTS

- A. As system capacity continues to be reserved for inactive accounts even when connections are not in use, accounts that have been inactive for more than 6 months shall be subject to reserved capacity charges before service can be reinstated. Charges shall be determined by the following formulas:
1. WATER
The current monthly service charge multiplied by the number of months that have passed since the expiration of the 6-month grace period.
 2. WASTEWATER
For Residential Accounts: The current monthly basic charge per dwelling unit, multiplied by the number of dwelling units on the account, multiplied by the number of months that have passed since the expiration of the 6-month grace period

For Commercial Class 1-4 Accounts: The minimum monthly service charge based on meter size, multiplied by the number of months that have passed since the expiration of the 6-month grace period
 3. The water monthly service charge and wastewater minimum monthly service charge shall be based on the meter size at the time of account termination.
 4. If the above calculation exceeds the current capacity charge for the meter size in question, the charge is capped at the current capacity charge amount.
- B. Accounts that are inactive due to catastrophic circumstances, such as fire or other natural disasters, may apply for a waiver of reserved capacity charges, subject to approval by the Public Works Director.
