

APCD ASBESTOS NOTIFICATION

CLEARANCE FORM

ASBESTOS NOTIFICATION

Federal laws regulate hazardous air pollutants and require the property owner or the contractor to notify the Santa Barbara County Air Pollution Control District (APCD) before all commercial demolitions, or before renovations of buildings that contain a certain threshold amount of asbestos.

INSTRUCTIONS

The City Building & Safety Division requires an APCD "sign off" prior to issuing a building permit for a commercial renovation or demolition project. Please review the APCD instructions for submitting the appropriate notification forms on their website: <https://www.ourair.org/asbestos/>

1. Submit this **APCD Project Clearance Form** along with the appropriate ENF-28 or ENF-28e form to Asbestos@sbcapcd.org. The District will sign off on this clearance form.
2. Upload the signed clearance form as a PDF attachment to your electronic BLD Application.
