The AUD Program has an initial duration of eight years or until 250 new units under the Program have been constructed in the High Density Residential or Priority Housing Overlay areas, whichever occurs first. Any application for new units that is deemed complete prior to the expiration of the Program may continue to be processed under the AUD Incentive Program.

\* Net new units are the difference between total units and existing units on site of project.

\*\* New units are newly built units. This category includes the replacement of existing units that are demolished and rebuilt, but does not include the conversion of existing units.
