Dear Historic Landmarks Commission N cole Hernandez Jessica Grant and C ty DOT

Please when the Mission Creek Bridge 51C-51 s repaired make sure the entry to the pedestrian br dge part s a minimum of 48" wide and that the entire length of the pedestrian bridge s also a minimum of 48" wide at all brights. Th s s the pedestr an bridge's histo ical wid h. Th s width makes his bridge ADA compl ant n width should it be needed in the fu ure. Th s bridge is already ADA compl ant n railing he ght and wooden wheel barrier along he bot om of the mesh. The mesh makes t compliant for children as well. See photo attached.

Also DOT f feasible to do right now **with the consent of HLC** could you add a one or two feet wide by fi e feet long ex ension o he pedestrian bridge eastward at this south entry behind the City Historic Landmark Oli er Trough/Fountain? Th s will make th s south end of the pedestrian bridge 5' square for a requ red turn-around for folks using wheelchairs. Cost would be min mal. Land is here.

Th s m nimal expans on will allow a person in a wheel chair the freedom to access the pedestrian br dge from he Rocky Nook Park entry (County where here is ADA parking and easy compliant wheelchair access at the north end of the pedestrian bridge) tra e se he bridge and gaze at he creek direc ly from abo e an experience hey ha e not been able o ha e and then turn a ound on he new fi e foot square "bulb-out behind he Oli er Trough/Fountain and return o he Rocky Nook Park entry. The hea y pipe railing and mesh plus wheel barr er board would ha e to be mo ed at the bridge's south end for a maximum of two feet eastward for a min mum d stance of fi e feet and then put oge her again wi h new added sections of pipe. wheel barrier board and mesh at the two new places. Cost would be minimal. E entually to make he pedestrian bridge ADA (wheelchair) compliant the parallel boards wi l ha e to ha e to ha e the cre asse filled with ust occasional holes left for dra nage. This is per the rules to p e ent narrow wheels from gett ng stuck in the spaces between he boards. These spaces are only 3/ " w de but guidelines al hough e idently not hard and fast ules end to be followed. Then way into the future DOT can look into making he cross slope of W. Mountain Dr. and the ent y onto the pedestrian bridge wheelchair accessible.

In my last email I explained how a wheelchair ramp/landing can be nstalled at the south corner of W. Mt. Dr. at he 1806 reser oir without damaging historic resources W g l l f l y

Hello Historic Landmarks Commissioners, Nicole Hernandez and Jessica Grant,

Thank you for having the saved sandstone blocks put back onto the Mission Creek Bridge 51C-51 so quickly.

I'll leave it at that.

Sincerely yours,

Paulina Conn

EXTERNAL

Good Afternoon,

Is BLACK part of the new approved colors for Santa Barbara?

No? Will code enforcement actually then do anything about this or will the new code enforcement rules give this building owner "pass"?

This building is only partially painted. Please have someone visit this building ASAP.

I will make the suggestion again, send written letters to all painters in the city and immediate area that colors other than thoes approved by the City are not acceptable and buildings will need to be repainted ASAP.

This building is between 306 an 314 E Haley.

Thank you,
A
