The tree is a volunteer growing very close to another tree next to it. The tree is getting to big and the olives that it drops all over the sidewalk are very slippery and dangerous when stepped on and stain the sidewalk as well. I am afraid because of it height the branches are growing towards my house and on a windy day could break off and cause damage to my roof.

WILL YOU REPLACE THE TREE(S)? YES NO

IF YES, WHAT WILL YOU REPLACE THE TREE(S) WITH?

If it is determined that I need to replace the tree, please send me a list of what is acceptable for that area.
