MaryJane and Ralph Clevinger:

We have been (hopefully) good neighbors for many decades. But I have to make a serious request.

The palm tree on your property has been a problem and it has approached a critical point. While it may have been on your property for while I hope you consider having it removed.

The fronds have been hitting our house in the past, but this past weekend...it came perilously close to our grandkids.

Yes, I can live with them hitting our solar panels (Two replaced),

Yes, I can live with them hitting our car (Two years ago)...

But now it is apparent it is a real danger to our grandkids. Leela and Nick have insisted the grandkids come in the driveway now....and are unconditionally opposed that they do not use the front door or walk anywhere near the palm tree.

Is there any way that you can remove or replace the palm with something less dangerous.

I hope we can remain good neighbors. I am sorry to be so adamant about this danger.

NEIGHBORLY,

Richard and Gissy
