Dear Architectural Board of Review,

I am writing in regards to Application number PLN2021-00439 at 934 E. Haley Street. As a neighbor of the 900 block of Haley Street what concerns me is the already lacking availability of parking. Adding an Accessory Dwelling Unit (ADU) will just aggravate that issue. The current occupants already occupy multiple parking spots even though they have availability to park on their driveway. Which is never in use. It is not just 2 it is at least 5 vehicles if not more at one point and they are not the only residents of the block behaving in this manner. It is really frustrating to see this as a longtime resident of the neighborhood. I understand the high rents of the area but, at this point it is disrespectful to the rest of the neighbors. Those who do not take advantage of the street parking. If you arrive at the 900 block of Haley after 4pm on a weekday for example there is most likely no parking available. You are out of luck if you have no driveway to park on. I ask for the Architectural Board of Review to consider already existing problems before coming to a decision and not aggravate the neighbors even more.

Best Regards,

Beatriz Dorado

Re: parcel # 031-311-008

We are totally against this new constitution.
We already have absolutely NO street parking, this property already does not have parking spot on the property!!!

Thank you
