

COMMUNITY DEVELOPMENT DEPARTMENT

STATE STREET ADVISORY COMMITTEE

July 15, 2024 — *Continued from June 26, 2024*

Summary of Recommendations

Staff Recommendations

- A “Grand Paseo” design framework
- A pedestrian core
- Full-size circulator shuttle that primarily travels on Anacapa and Chapala Streets
- Pedicab program or micro-transit on State Street
- Primary gateway to Grand Paseo at 400 block
- 400 block: separated spaces for all modes at all times with enhanced sidewalks, two-way vehicular traffic, and bicycle paths

Staff Recommendations

- 500–900 blocks: no private vehicles allowed
- 500, 600, and 900 blocks: pedestrians, bikes, pedicabs or micro-transit allowed
- 700 and 800 blocks: pedestrian-prioritized, programming and event area. Would be pedestrian only for at least a portion of the year

Staff Recommendations

- 1000–1200 blocks: expanded space for pedestrians and activation, a separated two-way bicycle facility, and a one-way vehicle lane
- 1300 block: gateway, separated spaces for all modes with enhanced sidewalks, two-way vehicular traffic, and bicycle paths

SSAC STRAW POLL

SSAC Straw Poll

- *Do you agree that the "Grand Paseo" design framework, which includes a pedestrian core district bracketed by districts on either side that employ different approaches to mobility, aligns with the SSAC's vision for the study area?*

SSAC Straw Poll

- *Do you support the recommendation of a curbed design for the 400-block that allows for all modes of transportation and transforms the block into a gateway to the Grand Paseo?*

SSAC Straw Poll

- *Should the 400 block include physical features or monumentation to signal arrival to the district?*

SSAC Straw Poll

- *Do you support the curbless, flat and flexible design for the 500 and 600 blocks of State Street? This design includes a 20'-wide clear area for emergency access, that would be shared by bikes and transit, and no private vehicles would be allowed outside of service and delivery hours.*

SSAC Straw Poll

- *Do you support the curbless, flat and flexible pedestrian-exclusive core on the 700 and 800 blocks of State Street? This design includes plaza-like spaces, allows for festivals and special community events, and is exclusively for pedestrians at all times, even if excluding bike and vehicle access requires that capacity for bikes and vehicles be provided elsewhere on surrounding streets (e.g., Chapala).*

SSAC Straw Poll

- ***Do you support the curbless, flat and flexible primarily pedestrian core on the 700 and 800 blocks of State Street? This design includes plaza-like spaces, allows for festivals and special community events, and is exclusively for pedestrians during special events, days of the week with high pedestrian traffic, and during peak seasons (e.g., weekends and/or Summer). This time-based solution to create an exclusively pedestrian core may not require the bicycle reroute.***

SSAC Straw Poll

- ***Do you support a curbed design for the 1000 to 1200 blocks of State Street that reintroduces cars and private vehicles to State St at Carrillo St?***

If so, do you support the recommended design that includes expanded space for pedestrians and outdoor dining, a separated two-way bicycle facility, and a one-way vehicle lane with limited loading and/or drop-off locations?

SSAC Straw Poll

- *Do you support the recommendation of a curbed design for the 1300 block of State Street that always allows all modes, and emphasizes its role as an emergency access corridor and a primary gateway to Upper State? This design includes two-way vehicle traffic, a bicycle facility, and pedestrian space on the sidewalk.*

SSAC Straw Poll

- *Do you support a transit option connecting the Grand Paseo to the Waterfront that includes a full-size circulator shuttle that primarily travels on Anacapa and Chapala Streets and is supplemented by a pedicab program or micro-transit on State Street?*
